CONTENTS.

The names of contributors are arranged alphabetically.

PAGE

R. D. BANERJI :—

No. 10. Naihati Grant of Vallala-Sena : the 11th year	156
„ 23. Bangarh Grant of Mahi-pala I : the 9th year	324
„ 29. A note on King Chandra of the Meharauli Inscription	368

LIONEL D. BARNETT :—

No. 14. Lakshmeshwar Pillar Inscription of the Yuvaraja Vikramaditya	188
„ 19. Two Inscriptions from Kurgod	265
A.—Of Somesvara IV and the Sinda prince Rachamalla II : Saka 1095 and 1103	265
B.—Of the same reign	278
„ 21. Arthuna Inscription of the Paramara Chamundaraja : Vikrama-Samvat 1136	296
„ 28. Tuppad-Kurhatti Inscription of Akalavarsha-Krishna III	373

K. N. DIESHIT :—

No. 11. Sangoli Plates of Harivarman : the 8th year	163
---	-----

T. A. GOPINATHA RAO :—

No. 3. Srirangam Plates of Mummadi Nayaka : Saka-Samvat 1280	83
--	----

HIRANANDA SASTRI :—

No. 5. Haraha Inscription of the reign of Isanavarman : Vikrama-Samvat 611	110
--	-----

STEN KONOW :—

No. 7. Ara Inscription of Kanishka II : the year 41	130
„ 8. Sanjan Plates of Buddhavarasa	144
„ 20. Taxila Inscription of the year 136	284

GAURISHANKAR HIRACHAND OJHA :—

No. 13. Partabgarh Inscription of the time of (the Pratihara) King Mahendra-pala II of Mahodaya : Samvat 1003	176
--	-----

LEWIS RICE :—

No. 24. Penukonda Plates of Madhava II (III)	331
--	-----

DAYA RAM SAHNI :—

No. 16. Chandravati Plates of Chandra-dova : Vikrama-Samvat 1150 and 1156	192
---	-----

G. RAMADAS :—

No. 27. Purle Plates of Indravarman : the (Ganga) year 1189	360
---	-----

ROBERT SEWELL :—

No. 1. The True Longitude of the Sun in Hindu Astronomy	1
„ 18. „ „ „ „ „ „ : The Siddhanta-Siromani	241

V. S. SUKTHANKAR :—

No. 3. Porumamilla Tank Inscription of Bhaskara Bhavadura : Saka 1291	97
„ 6. Bhandak Plates of Krishnaraja I : Saka 694	121
„ 9. A new Andhra Inscription of Siri-Pulumavi	153

	PAGE
S. V. VENKATESWARA AND S. V. VISWANATHA :—	
No. 12. Udayambakam Grant of Krishna-deva-Rayā : Saka 1450	168
„ 16. Bevinahalli Grant of Sadasiva-Raya : Saka 1473	212
„ 17. Kudiyantandal Grant of Vira-Nrisimha : Saka 1429	231
„ 22. Kadaladi Plates of Achyuta-Raya : Saka 1451	310
G. VENKOBΑ RAO :—	
No. 2. Dandapalle Plates of Vijaya-Bhupati : Saka-Samvat 1332	68
S. V. VISWANATHA :—	
No. 25. The Kanuma Grant of Sadasiva-Raya : Saka 1470	341
„ 26. Meluvaka Grant of Mahadevendra Sarasvati : Saka 1608	354
<i>See also</i> S. V. VENKATESWARA AND S. V. VISWANATHA.	
INDEX	373
Title-page, Contents, List of Plates, and Additions and Corrections	i to ix

LIST OF PLATES.

No. 1.	Dandapalle Plates of Vijaya-Bhupati : Saka-Samvat 1332, i—iva between pages	72 & 73
" 2.	" " " " " " " " " ivb—vb	" "	76 & 77

ADDITIONS AND CORRECTIONS.

- Page 93, text l. 50,—for भवह read मवह.
- „ 93, „ l. 55,—for दायकी read दायकी.
- „ 95, n. 2,—for व read व.
- „ 96, last line but 2,—for Viltāru read Villāru.
- „ 101, text l. 8,—for गुमवाक. read गुमवाक्.
- „ 103, „ l. 54,—for गुम read गुमी.
- „ 118, „ l. 20,—for वद read वदु.
- „ 124, n. 19,—for सजने° read सुजने°.
- „ 158, last two lines,—for Āuhāgaḍḍiā and Āudā° read Ān°.
- „ 170, n. 2,—for Bhāshage read Bhāshege.
- „ 171, n. 3,—for न read न.
- „ 171, text l. 16,—[for तं च राजं read तंचराजं. See *Ep. Ind.*, Vol. III, *Add. and Corr.*, p. viii.—H. K. S.]
- „ 172, „ l. 25,—for सप्तमी[धी]च read सप्तमी[धी]च.
- „ 172, „ l. 42,—for रुचैक्य read °कं.
- „ 172, „ l. 42,—for व्रजैदिय read °व.
- „ 179, n. 1,—The Hansot plates were published in *Ep. Ind.*, Vol. XII, pp. 197 sqq.
- „ 185, n. 7,—for कीशयि read °यि.
- „ 187, n. 1,—for °मयह read °मयेह.
- „ 212, no. 16, col. 3,—for Srivatsa read Śrī°.
- „ 213, no. 24, col. 2, } —for Liṅgaṇa read Liṅgaṇa.
- „ 214, no. 52, col. 2, }
- „ 220, text l. 67,—for कुवलय...र read °र.
- „ 223, „ l. 137,—for महासुत्र read °ह.
- „ 231, l. 2,—for Śālivāhana reckoning read cycle.
- „ 272, text l. 41,—for da-volada read ḍa-volada.
- „ 298, v. 3,—for °jvalitair we might read, for the sake of the metre, °janitair.
- „ 301, v. 59,—for vaikalpya read vaikalya ?
- „ 306, n. 2,—The reason why the elephants recoil from drinking the water of the oceans would rather be that it is scented with the ichor of the *dig-gajas*.—H. K. S.
- „ 307, v. 44,—for ‘applied his energy to battle’ we might read ‘bringing them to peace through battle’.
- „ 309, v. 67,—for ‘the praise of the blest Maṇḍana’ we might read ‘the religious foundation (*kīrttana*) of the blest Maṇḍana’.
- „ 312, trans. vv. 37-42,—for in the month Makara read at a Makara-saṁkrānti.

CORRECTIONS BY PROFESSOR HULTZSCH.

VOL. XI.

- Page 84, n. 7,—for संजतः read भुजतः.
 „ 144, text l. 33,—for पष read पष.
 „ 145, „ l. 45,—for °वेद्वान read °वेद्वान.
 „ 181, no. 18,—This inscription was published independently by Mr. D. R. Bhandarkar in the *Ind. Ant.*, Vol. XLII, pp. 201 sqq.
 „ 221, text l. 12,—for °तिष्ठेत् read °तिष्ठेत्.

VOL. XII.

- Page 62, n. 45,—for rōshapamū read rōshapamu.
 „ 63, text l. 4,—for °वर्षनी read °वर्षना.
 „ 63, „ l. 12,—for चालक° read चालक°.
 „ 63, n. 12,—for शशि° read शशि°.
 „ 188, l. 13,—for kṛipta read kṛipta.
 „ 188, l. 23,—for Maghavanmaṇi read Maghavamaṇi.
 „ 192, text l. 42,—for विष्णव read विष्णव°.

Rao Bahadur R. Narasimhachar, M.A., has kindly communicated to me the following corrections of the paper on the Inscriptions of Kurgod in Vol. XIV, pp. 265 ff.

- Page 270, v. 8,—read bālēnduva kale (“the digit of the crescent moon”. It became a full moon by Parvati's lovely glance and the lustre of her moon-face).
 „ 271, v. 13,—ēḷidan-gey, “to laugh at”. *Elidikkayane māḍu* means the same. *Āro kāḍuvar*, “who will fight” ?
 „ 271, v. 19,—read adagunti (=greatness), not adagunati.
 „ 271, v. 20,—avanibhṛit-samaṅgalam=“equal to a mountain, great”.
 „ 272, v. 21,—*Āspudey=app-Echala* is the correct reading. See verse 10 of inser. B.
 „ 272, l. 34,—Yugandhara is commonly used in Kanarese inscriptions for Yaugandharāyaṇa, the minister of Vatsarāja.
 „ 279, v. 2,—read Nityōbhava-vesar-esav-i.
 „ 279, v. 3,—This verse is in praise of Rēchi (not rēji), who is compared to the ocean. *Ratnākara* and *samudra* are synonymous.
 „ 280, v. 5,—Here there is a play on words. The outer town had *sara*, ‘ponds’ or ‘musical sounds’, like (*terade*) Nārada; swans (moon and sun) like the sky; and groves (*rane*=Lakshmi) like Vishnu.
 „ 280, l. 23,—the correct reading is *billaṁ goṇḍu kalitanada balupin*, “having taken the bow, by the might of his prowess . . .”. There is no reference to Nala.
 „ 281, v. 15,—*naij-ōnmantr-ābhi-rājam*=a moon to the ocean of proper policy.

L. D. B.

Rao Bahadur R. Narasimhachar, M.A., has kindly supplied to me the following corrections to some of my papers in Vols. XIII and XIV of the *Epigraphia Indica*.

VOL. XIII.

- Page 41, l. 5 of text: the construction is *prabandha-kavi-rājam*, "king of poets of compositions". There is no reference to Virāt; Brahmā is not mentioned under that name.
- „ 44, l. 30 of text: *uru-sere-goffu* = "having become prisoners". *Tamaya keya* should probably be corrected to *tann=arikeya*: 'there were none who did not send precious things and vehicles'. The alteration requires a *r*.
- „ 171, l. 26 of text, and Vol. XIV, p. 271, l. 26 of text: *adagunti* should be corrected to *adaguntī*, a form which occurs in literature.

VOL. XIV.

- Page 270, l. 13 of text: read *bāl-ēndura kaḷe*, "discard the crescent, now that you have the full moon". The form in -a is used for the regular accusative in -am.
- „ 271, l. 17 of text: *kuntala-dēśa* denotes only the place on the head where the locks of hair are; there is no reference here to the country of Kuntala.
- „ 271, l. 18 of text: *bhūta* is a mistake for *chūta*.
- „ 271, ll. 20-21 of text: *ālāvāḍu* = "to despise", *ālīmāḍu* = "to treat with contempt", *ēḷidikke-māḍu* = "to mock". *Elidirkke* is wrong.
- „ 280, l. 10 of text: *toradu* is a misreading for *teradu*.
- „ 280, l. 23 of text: *bilam* is a mistake for *chalam*; and *Kalita-Nala* is an error for *kalitanada*, "of valour".
- Pages 280-1, ll. 25-6 of text: *bhāgadol* is an error for *chāgadol* ("in generosity"), which should be construed with *-udāra-śrīyan* in the previous portion of the verse.
- Page 281, l. 3 from bottom of page: *kulīśa* here = 'diamond'. Nails are not likened to fish.
- „ 282, v. 5: the meaning of this verse is not properly brought out. The outer town with its *sara* (pond, otherwise *svara*, musical notes) resembles the sage Narada; with its *rāja-hansa* (royal swans, otherwise the moon, *rāja*, and the sun, *hansa*) it is like the sky; with its *ārāme* (grove, otherwise *ā Rame*, "the celebrated Lakshmi") it is like Vishnu's breast.
- „ 284, ll. 13-14 from top of page: *naij-ōnmantr-ābdhi-rājam* should be translated "a moon to the ocean of his policy", and *suvibhava-sumanō-rājan*, "an Indra in his magnificence".

L. D. B.

EPIGRAPHIA INDICA.

VOLUME XIV.

No. 1.—THE TRUE LONGITUDE OF THE SUN IN HINDU ASTRONOMY.

By ROBERT SEWELL (I.C.S., RETIRED).

(A continuation of the author's "*Indian Chronography*," continued from *Epig. Ind. XIII. p. 103.*)

234. The exact position of the true or apparent sun at sunrise of each civil day, taken for tabular purposes as mean sunrise, is one of the essential elements of Hindu chronography, and the exact position of the true moon is another. From these positions are calculated the beginning and end of each tithi and nakshatra, with the currency of these at sunrise. All over India for many centuries the civil day has been coupled with the true tithi current at sunrise, the nakshatra in which the true moon stands at sunrise being stated in the local almanacks and constantly mentioned in the dates of historical inscriptions. In southern India the nakshatra was considered of such importance that from as early as the tenth century it has regularly given its name to the day. For the proper verification of historical inscription-dates, therefore, it is of the highest importance that we should know the precise position of the true sun at any moment and more especially at the moment of mean sunrise.¹

235. Now the process adopted for this purpose in "*The Indian Calendar*" (Sewell and S. B. Dikshit, 1896), though resulting in a fair approximation, did not, for critical examinations of dates, give a sufficiently close result, as I have already explained in my "*Indian Chronography*," §§ 119, 120, pp. 42-43; something more accurate was required. We want, for each of the Indian astronomical authorities separately, extremely accurate determination of the sun's true longitude each day of the year; and there is only one way to obtain this. For each day a calculation must be made of the exact equation of the sun's centre on the basis of the sun's mean anomaly, according to the Hindu method of computation. This was a formidable undertaking; but it has now been accomplished for the two principal authorities, and the Tables are published^a herewith. It is to be hoped that they are final. They are intended to fix the true longitude of the sun on any day or at any moment of the day, with an accuracy extending to the hundredth part of a second, the calculation having been each separately carried to eight or nine decimals of a second so as to ensure correctness. I give the result in degrees and parts, and in ten-thousandths of the circle. The former, converted as desired, can be adapted to any system of reckoning; the latter are for use by the *Indian Calendar* system.²

¹ For calculation affecting all parts of India the basis has to be mean sunrise, and this is always taken as mean sunrise at Lanka, or Ujjain.

² The *Indian Calendar* System is the system adopted by Prof. Jacobi (of Bonn) in 1888 (*Indian Antiquary*, Vol. XVII) itself founded on Lalande's *Connaissance des Temps*, 1815).

236. These calculations are, as I have stated, based purely on the Hindu system of reckoning. I have used for the sun's mean anomaly and longitude the mean position and mean motion of the sun as gathered from each *Siddhānta* separately, and have used the Hindu values of the sines for computing the amount of the equation of the centre, and thence the sun's true position. The Tables are prepared according to the *First Ārya* and *Present Sūrya Siddhāntas*, the latter both with and without the *bija*. The *bija*, which came into general use about A.D. 1500, made no change in the length of the solar year or the number of civil days in a *mahāyuga*, or in the position of the sun's apsis, and therefore none in the sun's longitude, whether true or mean. I shall attempt hereafter to publish similar Tables for the other principal Indian authorities—Tables which will be of great value in the verification of dates, seeing that up to the present time no one knows exactly at what periods and in what tracts these other *Siddhāntas* were used. (The *Siddhānta-Sirṣmaṇi* Table has been completed and is ready for Press.)

237. Assuming, since these Tables are not intended for any but the initiated, that the *Indian Calendar* process of calculation, which might be termed Prof. Jacobi's first process and which has the advantage of simplicity, is known to readers of the *Epigraphia*, only one or two remarks need be made before entering on details. Since everything depends on the accuracy of the Table-entries, I must call attention to the great help which I received from M. Louis de Ries of Moscow for many months. He takes the greatest interest in Hindu astronomy, and has prepared certain Tables of his own, the publication of which has been delayed by the War. His processes are characterized by the most laborious and painstaking endeavours to obtain extreme accuracy for every result arrived at. Filled with a similar desire, and after my calculations for the sun's exact position (in true longitude for successive 24-hour periods after the true sun's arrival at long. 0°) had been carried out for about one-third of the *Ārya-Siddhānta* year, I asked M. de Ries to calculate some of these positions of the sun by his own method, so that we might compare the results. He most kindly did so; and, when I state that our results, worked in entire independence of one another and by different methods, were found to agree in every respect down to four, and in one case even down to five, decimals of a second, I think that it may be fairly assumed that my Tables may be depended upon.

238. There is more than one reason why the *Indian Calendar* system, though yielding results very fairly approximate, requires some expansion for the purpose of exact calculation. By it we have been in the habit of computing the true moon's place both for the tithi and nakshatra by the *Sūrya-Siddhānta* data, using the same figures for finding the tithi-index, t , and nakshatra-index, n , for all dates, both for inscriptions known to belong to tracts and times when the *Ārya-Siddhānta* was the authority used by the framers of the record, as well as for those which must have been guided by almanacks calculated by the *Sūrya-Siddhānta*. The c of the *Indian Calendar* method, i.e. the sun's mean anomaly at any moment, is always the *Sūrya-Siddhānta* c in thousandths of the circle, and that it differs in various proportions at different times of the year from the c of the *Ārya-Siddhānta* will be apparent to anyone who compares the entries for the same day given in my new Tables XLVIII A and B, cols. 2, 3, in ten-thousandths. At the moment of *Māsha-samkrānti* for instance (the first entry in each Table) the c by the *Sūrya* is 2794.0642 in ten-thousandths, and is 279 in thousandths in *Indian Calendar* reckoning; but by the *Ārya-Siddhānta* it is 2774.5577, and so for our ordinary reckoning should be stated as 277. In calculation for the tithi-index, t , in ordinary work this difference has no very great effect, though of course it actually has some, and possibly may in some cases alter the value of t by one unit ($4\frac{1}{2}$ minutes); but it has greater effect when we are calculating the nakshatra, as will presently be explained. As to the difference between the two authorities in the value assigned to the sun's true longitude, s , it will be seen that this varies day by day. About Day 261, i.e. the 261st period of 24 hours each measured from

true Mōsha-samkrānti, the value of s is practically the same by the two authorities; about Day 150 the Ārya s is about $3' 36''$ ahead of the Sūrya s . The difference increases and diminishes regularly throughout the year.

The principal reasons for this difference are that by the *Sūrya-Siddhānta* the position of the sun's perigee-point is different from that assumed by the *Ārya-Siddhānta*, and that there is a difference in the two year-lengths.

239. I have stated above that this difference has only a very slight effect as regards the value of the tithi-index; its effect on the ordinary calculation of the nakshatra and lagna must now be noticed. In so doing we take first the nakshatra and note the process by which those who have used the *Indian Calendar* have hitherto calculated its index.

Our method of computing the sun's true longitude, s , by the system of the *Indian Calendar* has been to take the c found for the desired moment, that is to say the value, in thousandths of the circle, of the sun's mean anomaly according to the *Sūrya-Siddhānta*, making this serve for both Siddhāntas; to multiply this c by 10 to get its approximate value in ten-thousandths; to add to it a figure, 7207, representing the longitude of the sun's perigee-point (taken as 7146.3 by the *Sūrya-Siddhānta*) in A.D. 1100 plus a small addition (60.4) rendered necessary by the construction of the Tables in order to avoid the necessity for sometimes adding and sometimes subtracting the equation of the centre¹; to deduct from the result the figure representing this equation; and so to obtain the sun's true longitude, s . The tithi-index, t^2 , having been already found, we add s to t , and find the nakshatra-index n , or the longitude of the true moon; this index shows in which nakshatra she stands at the moment. The result is an approximation, but it is not close enough. If we are working for an *Ārya-Siddhānta* date, we have used *Sūrya-Siddhānta* values (which differ slightly), and we have arrived at the value of s in part by multiplying by 10 a value obtained in thousandths so as to be able to apply it to the other value, that of the moon, which has been obtained in ten-thousandths of the circle. This multiplication by ten creates a possibility of error not inconsiderable. Thus, if we have, in thousandths, the figure $c = 623$, this may stand for any value in ten-thousandths between 6225 and 6235, and may lead to a miscalculation amounting to anything under 10 units in our estimate of the nakshatra index n ; and 10 units represent in time-valuation 39 minutes.

240. All these possibilities of error are entirely removed by the present Tables. The exact value of s by either Siddhānta is easily found—a value which we know to be absolutely correct—and when we add this s to the already found t we know that the result gives the correct nakshatra-index; or at least that the only possibility of error lies in the value found for the tithi. As for this last we must for the present trust to the correctness of Prof. Jacobi's calculations for the moon's place relative to the sun (a) and for the moon's equation (b), correcting the sun's equation by my new Tables.

241. These Tables will also be found very useful for calculating the lagna accurately. Hitherto our process for finding, in working for the lagna, the value of the sun's true longitude, s , at mean sunrise of the day concerned has been the same as the process for finding the nakshatra. We have found the value of s by both Siddhāntas from a calculation really correct only by one Siddhānta, and even that after a rather clumsy multiplication by 10, which itself may cause an error of 39 minutes of time. The present Tables give the accurate s by either Siddhānta, and they give it in degrees, etc., thereby simplifying the calculation.

¹ See *Indian Calendar*, §§ 107, 108; pp. 60, 61.

² The tithi-index, " t ", gives the distance of true moon from true sun, i.e. shows the moon's true place with reference to the true sun. When this is added to the true sun's longitude, we have the true moon's place in the heavens, " n ", or the required nakshatra-index.

EXPLANATION OF THE TABLES.

242. Table *XLIII*. The details were worked out with great care by M. L. de Rios from the respective lengths of the sidereal solar year, i.e. the time taken by the true sun to travel from 0° to 0° , according to the several Indian authorities.

Table *XLIV* gives the sun's mean motion per day of 24 hours, and per hour, minute and second, for use in calculation. It is exact for the *Ārya-Siddhānta*, and may be used with care for other authorities, having regard to the footnote.

Table *XLVA*. See the heading. It explains itself.

Table *XLVA* is for use in calculations. Every valuation given in the main Tables *XLVIII A* and *B* in ten thousandths of the circle was made by it.

Table *XLVB* is the reverse of *XLVA*.

Table *XLVI* is a revised nakshatra Table, showing the exact ending points of each.

Table *XLVII* is very important, being a revised Table of sines and equations of the sun's centre, given in full after particularly careful calculation. Its preparation is described below §§ 249-253. The supplementary Table *XLVIIA* gives, for close work, very full details of the exact equations according to authorities other than the *First Ārya-Siddhānta* and of the differences, in seconds per minute of mean anomaly-arc, between the consecutive base-equations. Table *XLVII* is for the present to be held inapplicable to the *Brahma-Siddhānta*.

Tables *XLVIII A* and *XLVIII B* are the main working Tables, showing, by the *First Ārya* and *Present Sūrya Siddhāntas* (with or without the *bija*), the precise value of the sun's true longitude (*s*) and equation of the centre at each interval of 24 hours measured from true Mēsha-samkrānti, the moment when the true sun arrives each year at celestial longitude 0° ; as well as the sun's mean anomaly and mean longitude. There was no possibility of framing a Table which should give these particulars for mean sunrise of each day, the primary requirement for the verification of Indian dates, because the moment of true Mēsha-samkrānti varies each year and the starting-point had to be from that moment. These two Tables therefore give the consecutive 24-hour positions of the mean and true sun after that moment.

Tables *XLIX* and *L* enable us to find the sun's true longitude at mean sunrise; the former giving for each group of days the sun's true motion per hour, and the latter giving his mean motion per minute. It is not necessary for general purposes to give his true motion per minute; if required, this can always be obtained by dividing by 60 the details of Table *XLIX* for one hour of the day.

243. Tables *XLVIII* to *L* are used in the following way, when we desire to find the *s* for mean sunrise. Say that Mēsha-samkrānti occurred in the year for which we are working at 12 h. 15 m. after mean sunrise, according to the *Indian Calendar* (Table *I*, cols. 13 to 17 or 17a). Then for every day of that year Table *XLVIII A* or *B* gives us his true longitude, *s*, at 12 h. 15 m. after mean sunrise; and to obtain the *s* at mean sunrise on the day in question we have to deduct the sun's true motion during 12 h. and 15 m. We do this by Tables *XLIX* and *L*, and so get the exact *s* for mean sunrise on the day in question.

Table *XLIX* for hours is exactly correct for the *Ārya-Siddhānta*. When used for the *Sūrya-Siddhānta*, there may be an error amounting, at the time of year when there is the greatest difference between the two authorities, to about one-third of a second per hour or about seven seconds per day. If anyone desires to be absolutely exact by the *Sūrya-Siddhānta*, he should calculate the true sun's motion during the hours and minutes of the day in question by observing in Table *XLVIII B* the consecutive 24-hour positions, *s*, of the sun given in the Table for (i) the day in question and (ii) the previous day, and divide the difference by 24 for each hour's, and this result by 60 for each minute's, true motion. Even this, of course, is

not mathematically exact, since the true motion of the sun varies from hour to hour; but it is quite accurate enough.

244. The calculation for the true longitude of the sun each day was made by ascertaining his mean anomaly and then using the sine-Table as finally prepared (Table XLVII) for finding the equation of the centre. The starting point for the year is the value of his mean anomaly at the moment of true Mēsha-saṅkrānti. This had to be computed with great care. The problem is fully discussed below §§ 254-255.

245. To obtain a correct value of the sun's *mean* longitude at sunrise of any day, take the value given in Table XLVIII A or B, as the case may be, and deduct for the intervening hours and minutes (*cf. s. 243*) the quantities shewn in Table XLIV for the sun's *mean* motion. Greater accuracy even than this can be obtained by the use of Table XLIII.

246. I do not enter very fully into the difference in the sun's true longitude brought about, according to the *Sūrya-Siddhānta*, by the shift in the apsis of the sun's orbit, because this seems so slight that it may be ignored. It would amount to about 1" in the last 1500 years (*see below, s. 254, ii*).

Use of the Tables. Rules.

247. That the use of the Tables may be thoroughly understood, I append a few rules of work and examples.

(i) *The nakshatra*.—Work by the usual *Indian Calendar* process for finding t , the tithi-index at mean sunrise of the day in question. Note the serial number of the civil day, ignoring altogether the day of the Hindu solar month. Deduct from this number the serial number of the day on which Mēsha-saṅkrānti occurred (Table I, col. 13). The result is the number of the day, or 24-hour period, referred to in col. 1 of the new Tables XLVIII A and B. Remembering to use the proper Table for the *Siddhānta* concerned, turn to this number in either of those Tables. Against it in col. 9 will be found the correct value of the sun's longitude, s , on that day at a moment as many hours and minutes after mean sunrise as elapsed between mean sunrise and the moment of Mēsha-saṅkrānti at the beginning of the solar year (Table I, col. 17 or 17a). Turn to Table XLIX for hours on the day in question and Table I for minutes, and deduct from the s so obtained the values of the sun's motion during those hours and minutes (*above* § 243). This gives the sun's exact true longitude at mean sunrise of the day in question. $s + t = n$, the nakshatra-index. For exactending points of nakshatras, i.e. the points when the true moon passes out of each, consult Table XLVI. (Table VIII of the *Indian Calendar* suffices except in very close cases.) Properly worked, the s so found yields the correct longitude of the true sun within the hundredth part of a second.

(ii) *The tithi*.—[This may be examined by the new Tables, though probably it will not be liable to change, or at any rate not to any change greater than one unit. Until some new Tables are published, we work for the moon's place by Prof. Jacobi's fixtures, and accept them.] The serial number of the day, or 24-hour period, being found as above, note against it in Table XLVIII A or B, cols. 2, 3, the value of the sun's mean anomaly; and for the intervening hours and minutes deduct the sun's *mean* motion as given in Table XLIV, observing the remarks in the footnote to that Table. This gives the sun's mean anomaly at mean sunrise of the day in question in ten-thousandths of the circle. Take the value in thousandths of the circle by removing the decimal point one place to the left. Refer to Table VII, *Indian Calendar*, and the auxiliary Table for correcting the "equation c " of the calculation, if it does not seem necessary to work with greater exactness than by use of units of about $\frac{1}{4}$ minutes.

We can find the equation more accurately as follows:—It has been noted in § 239 that, in order that "equation c " in the a, b, c system may always be additive, the quantity 60.4 was taken from a (the mean moon's distance from mean sun) and added to the equation of the centre. Hence we shall have the exact "equation c ", if we deduct from 60.4 the amount of the

equation (given in the new table), when it is *plus* (+), and add to 60·4 the amount of the equation, when it is *minus* (—); the signs are given in the heading of cols. 6, 7, Tables XLVIII and B.

The equation can also be obtained with quite sufficient approximation by noting the difference between the equation of the day and the equation of the previous day (cols. 6, 7), dividing this difference by 24, and applying to the equation of the day the amount proportionate to the hours intervening from mean sunrise (see example given below, § 248, ii, B); or, perhaps easier, the true sun's longitude at mean sunrise having already been found, by calculating the mean sun's longitude at mean sunrise, as shewn in § 245, and subtracting the one from the other.

(iii) *The lagna*.—To find the time of rising of the named sign on the day concerned, calculate the *s* for mean sunrise as above explained, but this time use degrees, minutes and seconds (col. 8 of either Table XLVIII A or B). Table XXII, *Indian Chronography*, gives the beginning and ending points of the named sign. Adding to these 360°, if necessary, deduct from their value the value of *s* at mean sunrise. The result shews the distance from the sun at mean sunrise of the beginning and ending points of the sign. Multiply the degrees by 4 for minutes, and the minutes by 4 for seconds of time. The result gives the times of rising of the beginning and ending points of the named sign.

Examples of Work.

248. Given an inscription date to be examined, with the details Śaka 1412, Friday, the day of Uttara Bhādrapadā, Chaitra kṛishṇa 12, Mithuna lagna.

The year is A.D. 1490-91 (Śaka 1412 expired). Chaitra kṛishṇa 12 will be about 25 days later than the day of Chaitra śukla 1. Work first in the usual way by the *Indian Calendar*.

	Day.	Week-day.	a.	b.	c.
(Table I, cols. 19-25)	81	2	75	430	264
(Table IV for 25 days)	25	4	8466	907	68
	106	6	8541	337	332
(Table VI equation b)	.	.	260		
(Table VII equation c)	.	.	7		

Tithi-index, *t*, = 8808

The day was 106, which (Table IX) = 16 April, A.D. 1490.

Week-day 6 = Friday. The index *t* shews (Table VIII) that the tithi current at mean sunrise was Chaitra kṛishṇa 12. We then work for the nakshatra-index.

<i>c</i> × 10	3320
Constant	+ 7207
					527
Less for the sun's equation <i>c</i>	.	—	.	.	7.
Sun's true longitude, <i>s</i>	520
Add the tithi-index, <i>t</i>	8808
Nakshatra-index, <i>n</i>	9328

This value of *n* shews (Table VIII) that by the equal-space system the moon at mean sunrise of the given day was in the nakshatra Uttara Bhādrapadā. So far so good. The date seems genuine; but we want to be certain, and we refer to the present Tables.

A. *The exact nakshatra (i) by the First Ārya-Siddhānta.*—Mēsha-saṁkrānti occurred in the year A.D. 1490 (*Table I. cols. 13, 17*) at 10 h. 55 m. after mean sunrise on Day 86. The day of the record is 106. $106 - 86 = 20$. Turning to day 20 in *Table XLVIII A*, col. 1, we see that the sun's true longitude, s , was, at 10 h. 55 m. after mean sunrise, 540·6811, in 10,000ths of the circle. Deduct the sun's true motion on Day 20 for 10 hours and 55 minutes; viz. (*Table XLIX*) for 10 hours 11·2059, and (*Table L*) for 55 minutes 1·0457, total 12·2516. $540·6811 - 12·2516 = 528·4295$. This is the value of s at mean sunrise on the given day. Add s to t , $528 + 8808$ (in whole numbers) = 9336. This is the proper nakshatra-index, n , for mean sunrise, always supposing the tithi-index, t , to be correct. It differs by 8 units from the *Indian Calendar* valuation 9328, which is found therefore so much in error. This, in time (*Table X*), is over half an hour; but we find that the moon was certainly in Uttara Bhādrapadā at mean sunrise.

(ii) *By the Sūrya-Siddhānta.*—The process, *mutatis mutandis*, is similar. Mēsha-saṁkrānti occurred at 12 h. 44 m. after mean sunrise. On Day 20 (*Table XLVIII B*) s , at 12 h. 44 m. after mean sunrise, was 540·5000. Deduct for the sun's true motion on Day 20, for 12 h. (*Table XLIX*) 13·4471, and for 44 m. (*Table L*) 0·8365. Total 14·2836. $540·5000 - 14·2836 = 526·2164$. This was the s at mean sunrise. $s + t = 526 + 8808 = 9334$. This, if the t is correct, is the correct value of the nakshatra-index, n , at mean sunrise; and we see that the *Indian Calendar* n , 9328, was in error by 6 units, or 24 minutes of time.

B. *The exact tithi (t) by the First Ārya-Siddhānta.*—We first check the mean anomaly of the sun, c . Our preliminary work shewed this to be, in thousandths of the circle, 332. *Table XLVIII A*, col. 3, shews that at 10 h. 55 m. after mean sunrise the mean anomaly was, in ten-thousandths, 3322·1148. Deduct by *Table XLIV* the sun's mean motion during 10 h. 11·4074, and during 55 m. 1·0457, total 12·4531. $3322·1148 - 12·4531 = 3309·6617$. This is the exact mean anomaly of the sun, c , at mean sunrise. If we work by the simple *Table VII* of the *Indian Calendar* and take the c in thousandths as 331, we see that equation c would remain unchanged at the value 7. Hence, accepting the values assumed for the moon's mean place and equation, we find that the tithi-index was actually, as found by us, 8808.

We try this again by the more elaborate, but more, accurate process recommended above (§ 247, ii, last para.). By *Table XLVIII A*, col. 7, we have the equation of the centre at 10 h. 55 m. after mean sunrise on Day 20 given as 51·8996 in 10,000ths of the circle. The difference in 24 hours had been (*day 19*) 52·3833 — (*day 20*) 51·8996, or 0·4837. A 24th part of this is ·02015, the average difference per hour. Accepting 10 h. 55 m. as 11 h., we have for 11 h. the difference ($·02015 \times 11$)·2216. Call this ·222 and add it to 51·8996. Result gives the equation of the centre at mean sunrise 52·1216. Then $60·4 - 52·1216 = 8·2784$, the value of equation c . This is over 8, and hence we find that the former valuation 7 is incorrect, and that the tithi-index at mean sunrise was really 8809, not 8808, by the *Ārya-Siddhānta*. But we have also found out a little more regarding the nakshatra-index, n . s was found to be really 528·4295; and if we substitute the full value of equation c , viz. 8·2784, for the value found by the original calculation, viz. 7, we have, for the tithi-index:—

a	.	8541
Equation b	.	260
Equation c	.	8·2784
<hr/>		
$t =$.	8809·2784
Add ($s =$)	.	528·4295
<hr/>		
$n =$.	9337·7079, or, say, 9338 in whole numbers.

Thus the real nakshatra-index, n , was 9338, and our *Indian Calendar* process with result 9328 yielded a result in error by 10 units, or 39 minutes of time.

(ii) *By the Sūrya-Siddhānta*.—By Table XLVIII B, col. 3, we have the sun's mean anomaly c at 12 h. 44 m. after mean sunrise = 3341.6212, in ten thousandths of the circle. Deduct for 12 h. 13.68.9 and for 44 m. 0.8.36.5 (*Table XLIV*) for the sun's mean motion, total 14.5254. $3341.6212 - 14.5254 = 3327.0958$. This was the sun's mean anomaly at mean sunrise. Calling this 333 and consulting *Indian Calendar* Table VII, we should raise equation c in our original work from 7 to 8.

Again we test this by the more accurate process. The equation of the centre on the given day 12 h. 44 m. after mean sunrise was (*Table XLVIII B, col. 7*) 52.3475. The same for the previous day was 52.8500. Difference = 0.5025. Divided by 24, this gives an average difference per hour of 0.02094. Taking 12 h. 44 m. as 13 h. and multiplying, we have 0.27224. Add 0.2722 to the equation of the day, 52.3475, and we find as the equation of the centre at mean sunrise 52.6197. $0.4 - 52.6197 = 7.7803$. Hence equation c in the original calculation should certainly have been 8, and not 7.

Lastly we substitute the newly found values as before, for *Indian Calendar* calculation; s , having been already determined to have been at mean sunrise by this authority 526.2164.

	a	.	8541
Equation b	.	260	
Equation c	.	7.7803	
<hr/>			
	$t =$.	8808.7803
Add	$s =$.	526.2164
<hr/>			
	$n =$.	9334.9967 say 9335.

This is as near as we can get to the true nakshatra-index at mean sunrise. It differs by 7 units from the *Indian Calendar* value, which was 9328, or by 28 minutes of time.

(iii) *Allowance for the shift in the sun's perigee-point when working by the Sūrya-Siddhānta*.—I have shown below (§ 254) that, for calculation of the tithi, nakshatra, or lagna, this shift in the apsis may well be ignored; but in case any one should desire to take notice of it I have entered a Table (p. 12 below), giving its exact amount. Its effect on our inscription-date is as follows. Table XLVIII B is calculated for about A.D. 1400. The year of our inscription is A.D. 1400. 90 years after A.D. 1400 the perigee-point had advanced (*see Table*) 0.0806 from the position we assumed for it. Hence the sun's mean anomaly at mean sunrise of our date was not, as already found, 3327.0958, but this amount less 0.0806, or was actually at 3327.0152. 90 years earlier than A.D. 1400 it would have been 3327.0958 plus 0.0806, or 3327.1764. But this change would have only an infinitesimal effect on the equation of the centre, or, in consequence, on the sun's true longitude, or on the calculated values of the tithi, nakshatra, or lagna.

C. *The Yōgā, by either Siddhānta*.—The formula for this is $2s + t$, and, as the value of s has been correctly found by the above process, no further remark is necessary.

D. *The lagna, (i) by the Sūrya-Siddhānta*.—For this we have to find the correct value of s at mean sunrise in degrees, etc. By Table XLVIII A, col. 6, the s for the day was in our

example above $19^{\circ} 27' 52'' \cdot 27$. Deduct (*Tables XLIX, L*) for, on day 20, 10 hours $24' 12'' \cdot 29$, and for 55 minutes $2' 15'' \cdot 52$, total $26' 27'' \cdot 81$. Then the s for mean sunrise was $19^{\circ} 1' 24'' \cdot 46$. This was the true sun's longitude at that moment on the meridian of Ujjain. The given lagna was the sign Mithuna. The first point of this is 60° , the last 90° . We take the s as 19° , which is sufficiently exact for ordinary purposes. $60^{\circ} - 19^{\circ} = 41^{\circ}$. $41 \times 4 = 164$ m., or 2 h. 44 m. $(90^{\circ} - 19^{\circ}) \times 4 = 284$ m., or 4 h. 44 m. The first point of Mithuna was 41° distant from the true sun at the moment of mean sunrise, the last point 71° . Mithuna was lagna between 2 h. 24 m. and 4 h. 44 m. after mean sunrise on the given day.

(ii) *By the Sūrya-Siddhānta*.— $s =$ (*Table XLVIII*) $19^{\circ} 27' 28'' \cdot 80$. Deduct for 12 hours (*Tables XLIX, L*) $29' 2'' \cdot 74$ and for 44 minutes $1' 48'' \cdot 42$, total $30' 51'' \cdot 16$. Remainder, or s for sunrise, $18^{\circ} 56' 37'' \cdot 64$. We may call this 19° , and come to the same result as in the former case. The lagna of Mithuna really began twelve seconds later.

(iii) *By the Indian Calendar process, and for both Siddhāntas*.—Here s was found to be in ten-thousandths, 520. Converted by Table VIIIB, this $= 18^{\circ} 45'$. This was the sun's true longitude at mean sunrise. The difference between the actual time of the lagna of Mithuna and that found by the *Indian Calendar* is slight.

More accurately worked, the first point of Mithuna was lagna by the *Ārya-Siddhānta* at 2 h. 43 m. 56 s., by the *Sūrya-Siddhānta* 2 h. 44 m. 16 s., and by the *Indian Calendar* 2 h. 45 m., after mean sunrise on the day in question.

Construction of the Tables.

A detailed explanation is here given of the construction of the principal Tables, in order to satisfy experts as to their accuracy.

249. *The Hindu Sine-Table*.—The *Sūrya-Siddhānta* (ii, 34) gives in minutes the sines of a series of angles, each separated from the other by $3^{\circ} 45'$, twenty-four of these completing the quarter-circle of 90° . These values stand, so far as I can ascertain, for all Indian authorities except the *Brahma-Siddhānta*, which assumes different sine-values. There is no need here to discuss their exact accuracy, as I am concerned solely with chronography as the handmaid of history, and have nothing whatever to do with the casting of horoscopes or any other branch of astrology. The sines, as used in calculations by authorities other than the *Brahma-Siddhānta*, are given in Table XLVII, col. 3, and the differences between them, in minutes, in col. 4. For astronomical purposes the several angles are angles of a planet's mean anomaly, and are so applied to the mean anomaly of both sun and moon.

250. *The equation of the centre*.—For the preparation of the sine and equation Table (XLVII) the equation of the sun's centre for each base-angle of anomaly has been calculated from its sine-value by the proper formula for each *Siddhānta*, the calculation being carried to nine decimals of a second, in order to insure absolute accuracy for the tabulated two decimals. The details for the *First Ārya-Siddhānta* (*Table XLVII, cols. 5, 6*) are complete in themselves; details for the other authorities are given in full in a supplementary Table (*XLVIIA*). Table XLVII differs a little, but only in one or two places, from Jacobi's Table XXIV (*Epig. Ind. I, 259*); I have, however, thought it advisable to record two decimals of seconds in all cases.

251. *Equation of centre*.—In Hindu astronomy the sun is treated as a planet, and in all planetary movement a fundamental principle (Jacobi, *Epig. Ind. I, 441*) is contained in the proportion sin. equation : sin. mean anomaly :: minutes in the epicycle : minutes in the orbit. The minutes in the sin. anomaly are given in Table XLVII; the minutes in the epicycle are ascertained from statements made in each *Siddhānta*; the minutes in the orbit of 360° are

always 21600'. The formula then for all authorities, α being the angle of mean anomaly, is :

$$\text{Equation centre}^1 = \frac{\text{minutes in epicycle}}{21600'} \times \sin. \alpha.$$

252 A. The *First Ārya-Siddhānta* gives for the dimension of the epicycle $13^\circ 30'$ or 810'. Hence by that authority :—

$$\text{Equation centre} = \frac{810}{21600} \sin. \alpha. = \frac{3}{80} \sin. \alpha.$$

Since there are $3^\circ 45'$ between each base-angle, the difference in minutes between each is 225', and the measure of first or average difference of equation for each intermediate minute of anomaly is the difference between two consecutive equations divided by 225. Taken in seconds, this difference is given in col. 6. Multiply the minutes of difference between the base-angle and the given anomaly-angle by the amount given in col. 6, and, taking the result in seconds, apply it to the base-equation, and you have the correct equation for the given anomaly-angle.

For an example take the 2nd and 3rd sines. The 2nd sine, i.e. of anomaly-angle $7^\circ 30'$, is 449'. Multiply by 3 and divide by 80. Result $0^\circ 16' 50''\cdot 25$.

The 3rd sine, of anomaly $11^\circ 15'$, is 671'. Multiply by 3 and divide by 80. Result $0^\circ 25' 9''\cdot 75$.

The difference between the two results is $8' 19''\cdot 50$. This is the total difference in 225', which is the difference between the two anomaly-angles. $8' 19''\cdot 50$ divided by 225 gives for each minute of angle the increment $2''\cdot 22$.

B. *Equation of the centre by the Sūrya-Siddhānta*.—This calculation is made on the same fundamental principle.

The *Sūrya-Siddhānta* (cf. Jacobi, *above*, I, 441) assumes a contraction of the epicycle amounting to 20' at the end of each of the odd quadrants. If this contraction at any point is called q , we have $q : 20' :: \sin. \alpha : \sin. 90^\circ$. $\therefore q = 20 \frac{\sin. \alpha}{\sin. 90^\circ}$. $\sin. 90^\circ = 3438'$ (see Table XLVII).

Hence $q = \frac{20'}{3438'} \sin. \alpha$. The *Sūrya-Siddhānta* gives for the dimension of the epicycle 14° .

Hence the formula for the equation without the contraction would be $\frac{14'}{360'} \sin. \alpha$. With the

contraction it is $\frac{14'}{360'} \sin. \alpha - \frac{20'}{3438' \times 21600'} \sin.^2 \alpha$; or, finally $\frac{14'}{360'} \sin. \alpha - \frac{\sin.^2 \alpha}{3713040}$.

The best authorities agree that this is the correct formula.

Each equation for the several base angles has been calculated by this formula and fully worked out for nine decimals of a second. The results are given in full in Table XLVIIA, col. 7, and in abbreviated form in Table XLVII, col. 7. The difference in equation per minute of anomaly-arc has been calculated by dividing the difference between consecutive base-equations in minutes by 225, and taking the result in seconds. This is tabulated in full in Table XLVIIA, col. 8, and in abbreviated form in Table XLVII, col. 8.

253 C. *Equation of the centre by the Second Ārya-Siddhānta and Siddhānta-Śiromaṇi*.—The same fundamental principle holds good. The epicycle is (*Epig. Ind. I. 341*) 13°

¹ When an angle is very small, as is the case with even the greatest of the equation-angles, which is only about $2^\circ 10'$, the sine is taken to be equal to the arc. Hence the presumed equality in the text of "sin. equation" and "equation centre." Table XLVII shews that the sine of $3^\circ 45'$ is 225', the same as the arc. The sine of 1° is 60', also the same as the arc.

40' or 820'. There is no contraction. Minutes in the orbit, 21600'. Hence the equation is $\frac{820}{21600} \sin. a$, or $\frac{41}{1080} \sin. a$. The entries are made in abbreviated form in Table XLVII, cols. 9, 10, and in full in Table XLVIA, cols. 9, 10.

254. *The sun's mean anomaly, and the starting-point for its valuation.* The sun's daily mean motion, i.e. his mean motion in 24 hours, is given according to the several Hindu authorities in Table XLIII, so that, given his exact mean place at the moment of true Mēsha-samkrānti when the true sun was at 0°, his mean position at the end of every 24-hour period is obtained by simple addition. We must, therefore, fix with great care the value of his mean anomaly when the true sun was at 0°.

(i) *By the First Ārya-Siddhānta.*—S. B. Dikshit's valuation of the equation by this *Siddhānta*, 2° 6' 59"-9421, was a trifle too great. Dr. Schram's, 2° 6' 57"-323496, is exact down to the fifth decimal. M. de Ries with almost painful accuracy has carried it as far as sixteen decimals of a second. Tested by the sine-table, his valuation is found exact. The equation (I give nine decimals of a second, the amount which I have generally used in these calculations) is + 2° 6' 57"-323494885, or, in 10,000ths of the circle, 58-775644170. This is correct for the corresponding mean longitude value 357° 53' 2"-676505115, or 357° 53'-044608419, or in 10,000ths of circle 9941-224355830, the two added together amounting to exactly 360°. Thus, the perigee-point of the orbit being by this *Siddhānta* fixed at 258°, or, in 10,000ths of the circle, 7166-6, we have found the sun's mean anomaly at true Mēsha-samkrānti to have been 99° 53' 2"-676505115 or 99° 53'-044608419, or in ten-thousandths of the circle 2774-557689163 (i.e. 9941-224355830 — 7166-6). This then is our starting-point for cols. 2, 3, 4, 5, of Table XLVIA.

(ii) *By the Present Sūrya-Siddhānta.*—In this case we have to deal with an authority which postulates a slight movement in the line of apsides of the sun's orbit, the apogee and perigee-points moving eastwards at the rate of 0"-1161 per ann.; and before working for a correct valuation of the sun's mean anomaly at true Mēsha-samkrānti in any year, we have first to decide which year to select as base of operations. I have chosen the year K. Y. 4500 or A.D. 1399-1400, roughly A.D. 1400, for reasons which follow. The period covered by Indian Epigraphy, the historical period, that is, of Indian History, may be taken as the period K. Y. 3500 to 5000, A.D. 400 to 1900, or the last 1500 years, the bulk of the inscriptions belonging to the last millennium K. Y. 4000 to 5000 or A.D. 900 to 1900. I take the central year of this millennium as my base. In K. Y. 4000 the perigee-point was at 257° 15' 32"-4, and in K. Y. 5000 it was at 257° 17' 28"-5. Hence in K. Y. 4500, say, A.D. 1400, it was 257° 16' 30"-45, or, in 10,000ths of the circle 7146-53125.¹ The difference in the sun's equation of the centre and true longitude, caused by this shift of the apsis, is exceedingly small and may well be ignored.

For we are concerned only with the period A.D. 400 to 1900; and calculation by the equation-table on the value of the sun's mean anomaly at the beginning of the Hindu solar year A.D. 400-01 and at the beginning of A.D. 1900-01, allowing for the shift of the perigee-point, proves that the total difference in the equation in the whole period of 1500 years was 1"-0739. This constitutes also the total difference in the sun's true longitude, which is his mean longitude ± the equation, the mean longitude remaining the same whatever may be the shift in the line of apsides.

To assist those interested, however, I append a Table shewing the cumulative change of position of the apsidal points.

¹ Actually, for nine decimals, 7146-531250000

256. In calculating the true sun's correct longitude and equation for each day for the preparation of Tables XLVIII and B I have obtained the equation by using the first or average difference in seconds as given in Table XLVII, cols. 6, 8, for each minute of anomaly-angle between the base-angle of the Table and the given angle, in the belief that this represents the practice of the Hindus in bygone centuries. It is possible to calculate with still greater minuteness. We might perhaps be able, by use of some complicated formula, to find out a more exact value of the difference in seconds applicable to the anomaly-angle under consideration; but this system would be so troublesome that it may be reasonably assumed to have never been adopted.

256 a. An example will best illustrate how each calculation for the 24-hour periods given in Tables XLVIII and XLVIII A was made. The value of the equation is based on the angle of mean anomaly, c , given in col. 2. The base-equation used is that for the base-angle next lower in the sine-table (XLVII, col. 5 or 7), the increment in the equation for the difference in angle between the base-angle and the given angle of anomaly being found by multiplying that difference in minutes and decimals by the amount given (col. 6 or 8) in seconds (this being the equation-difference per minute of anomaly-difference). The increment is added to or subtracted from the base-equations according as the consecutive base-equations are increasing or diminishing. The result is the exact equation for the given anomaly-angle, and this is entered in Table XLVIII A or B, cols. 6, 7. This equation is added to or subtracted from the mean longitude of the sun (Table XLVIII A or B, cols. 4, 5), and the result is the sun's true longitude, s (cols. 8, 9). The heading of the sine-Table (cols. 2, 11) shews whether the equation is *plus* or *minus*.

For an example I take Day 27 and work by the *Ārya-Siddhānta*, using only the number of decimals given in my Tables.

Mean anomaly (Table XLVIII A, col. 2)	126° 29' 72124
Next-lower base-anomaly (Table XLVII, col. 2)	-123 45

Difference	2° 44' 72124
------------	--------------

2° 44' = 164'. The multiplier per minute of difference is (col. 6) 1".31.

164' 72124 × 1".31 = 215.7848244. 215" = 3' 35". Hence

Base equation for anomaly 123° 45' (Table XLVII, col. 5)	1° 47' 12".75
--	---------------

Difference in equation above found, deducted since the values in col. 5 are diminishing	3 35.7848244
---	--------------

Exact equation for given anomaly	1° 43' 36".9651756
----------------------------------	--------------------

Sun's mean longitude (Table XLVIII A, col. 4)	24° 29' 43".27
---	----------------

Equation found (for sign column-heading)	+1 43 36 97
--	-------------

Exact value of sun's true longitude, s	26° 13' 20".24
--	----------------

This is converted into 10,000ths of the circle by Table XLVA, and both values are entered in cols. 8, 9, of Table XLVIII. Work by the other *Siddhāntas* is precisely the same, the base-equations and multipliers being used, each set for its own authority.

In this way every figure of equation and true longitude has been worked out for every day of the year.

In applying these results to inscription-dates we calculate the s for mean sunrise as described above, § 238.

If anyone should wish to calculate with a greater number of decimals than the four given in the principal Tables he can work as follows. In § 254 above I have given by both the *Siddhāntas*, with nine decimals of a second, the exact mean anomaly of the sun and mean longitude at true Mēsha-samkrānti each year. Add for the intervening days, i.e. from the day on which Mēsha-samkrānti occurred down to the day in question (included), the quantity obtained by multiplying the figure given for one day in Table XLIII by the number of intervening days. This gives, with eight decimals of a second, the value of mean anomaly and mean longitude for the day. In calculating for the equation note that the base-equations according to the *Ārya-Siddhānta* are complete as given in Table XLVII. They are given in full for the other authorities in Table XLVIIA.

Note.—The Table figures are calculated by the *First Ārya-Siddhānta*. The difference between these and the same according to the *Present Sūrya-Siddhānta*, *Parāśara* and *Second Ārya-Siddhānta* is negligible. For the total of 365 days according to the *Brahma-Siddhānta* and *Siddhānta-Sirōmāni* the difference amounts to 0-86 or (in 10,000ths of the circle) 0-0086, by which these are greater than the figures given, their total for 365 days being 359° 44' 43" 02 or (in 10,000ths of the circle) 9992-9245. It is not necessary for historical purposes to trouble about the *Original Sūrya- or Poulstya-Siddhānta*. Any one desiring to do so can calculate them from Table XLIII.

TABLE XLIVA.

LONGITUDE OF SUN'S APSIS (PERIGEE) AND EQUATION OF CENTRE
at different millenniums, according to the Hindu standard authorities.
[Position of apsis is given according to Jacobi, Epig. Ind. I, 440, 450; the equation has been
calculated by Dr. Schram.]

27	Rēvatī	360	10,000	360	10,000	360	10,000	27	Vaidhṛiti	

* Āśvini begins at 0° by all systems.

† Though, properly speaking, there is no Abhijit in the equal-space system in ordinary use, sometime it is referred to as a secondary detail. When this is the case, it has the same limits as fixed by the *Brahma-Siddhanta*, viz. 276° 42' 15" to 280° 56' 30", or, in 10,000ths of the circle, 7686·2269 to 7803·9352.

TABLE XLVII.

HINDU SINES, AND EQUATIONS OF SUN'S CENTRE.

N.B. i.—The sines, col. 3, stand, it is believed, for all authorities except the *Brahma-Siddhānta* (see *Sūrya-Siddhānta*, ii 15-27).

" ii.—"Equation + " or "—" means that the amount of the equation, added to or subtracted from the sun's mean long., gives his true or apparent long.

" iii.—This Table is assimilated to that of Prof. Jacobi (*Epiq. Ind.*, 1. 459).

" iv.—First *Ārya* figures are exact. For fuller details see next Table.

Serial number of sine.	SUN'S MEAN ANOMALY.		SINE OF MEAN ANOM. ANGLE.		SUN'S EQUATION OF THE CENTRE ACCORDING TO THE						SUN'S MEAN ANOMALY.		Serial number of sine.
					First Ārya-Siddhānta.		Present Sūrya-Siddhānta.		Second Ārya-and Siddhānta-Sirōmaṇi.				
	Equation +		Minutes.	Diff.	Base-equation.	Diff. per min. of anom.	Base-equation.	Diff. per min. of anom.	Base-equation.	Diff. per min. of anom.	Equation —

N.B.—In col. 9 under " (seconds) and opposite lines Nos. 1, 8, 18, 20, the last figure, "·5", is not, like the rest, a recurring decimal.

TABLES XLVIII A AND B.

Elements of the Sun's Longitude for the Hindu Solar Year.

First Ārya and Sūrya Siddhāntas.

TABLE XLVIII A.
ELEMENTS OF THE SUN'S LONGITUDE FOR THE HINDU SOLAR YEAR
according to the **First Ārya-Siddhānta**,
in periods of 24-hours each from the moment of true Mēsha-samkrānti,
the astronomical beginning of the solar year.
(Exact for all years.)

[True longitude = mean longitude \pm equation of centre.]

24-hour period from true Mēsha-samkrānti.	Sun's mean anomaly (or mean sun's distance from perigeo- point) ($^{\circ} \text{ } ^{\circ} \text{ } ^{\circ}$).	Sun's mean longitude.	Sun's equation of the centre. +	Sun's true longitude ($^{\circ} \text{ } ^{\circ} \text{ } ^{\circ}$).	10,000ths of circle.
	2	3	4	5	6
1	0	10,000ths of circle.	0	10,000ths of circle.	0
	0	10,000ths of circle.	0	10,000ths of circle.	0

(The sun's equation of the centre is + till his mean anomaly reaches 180°).

At moment of true Mēsha-samkrānti.	99	53-04461	2774-5577	357	53	2-68	9941-2244	2	6	57-32	58-7756	0	0	0-0	0-0

TABLE XLVIII B—Contd.

Present Sūrya-Siddhānta.

24-hour periods from true Māha-samkrānti.	Sun's mean anomaly (or mean sun's distance from perigeo- point) (° C.).			Sun's mean Longitude.		Sun's equation of the centre.		Sun's true Longitude (° S.).	
	2.		3.	4.	5.	6.	7.	8.	9.
	o	'	10,000ths of circle.	o	'	o	'	o	10,000ths of circle.

TABLE XLIX.

ELEMENTS OF THE SUN'S TRUE LONGITUDE.

HOURS.

N. B.—Column 1 corresponds to the 24-hour periods, measured from true Mēsha-samkrānti, entered in Col. 1, Tables XLVIII A and B. In the present Table they are grouped in conformity with the Hindu Sine-Table. Figures in Columns 4 to 6 give the actual arcs travelled on the ecliptic by the true sun in the given number of hours. For minutes see Table L, following. The Table is exact for the First Ārya-Siddhānta, but can be used for all the Hindu authorities.

Grouping of the days.

(a) Days 1 to 85 in order, and in reverse order days 86 to 164.

(b) Days 165 to 267 in order, and in reverse order days 268 to 363.

(c) Days 363 to 365 are grouped with Day 1.

This arrangement had to be adopted to prevent the size of the Table being doubled.

24-hour periods from true Mēsha-samkrānti (inclusive).	Arc travelled by true sun in 24 hours.		Arc travelled by true sun per hour.

N. B.—Since this Table shows the sun's *mean* motion during the number of minutes indicated, a slight correction must be made, in order to ascertain his *true* motion, if very great accuracy is required. The largest possible correction, namely for 59 minutes on the days 81 and 263 (when the sun is in apogee and perigee and is therefore at his slowest and quickest) is on Day 81 *minus* 5".4516 or 0.0421, and on Day 263 *plus* the same.

Hence on Day 81 the true sun's journey in 59 m. must be taken as (by the Table, 2' 25".38—5".45=) 2' 19".93, or (by the Table, 1.1217—0.0421=) 1.0796; and on Day 263 as (2' 25".38+5".45=) 2' 30".83, or (1.1217+0.0421=) 1.1638.

It is not necessary to frame a Table to meet corrections less than this. Calculation can always be made by taking from the Hour Table (Table XLIX) the true sun's motion in one hour on the day in question, dividing this by 60, and multiplying the result by the number of minutes concerned.

TABLE L-A.

ELEMENTS OF THE SUN'S LONGITUDE.

SECONDS.

Cols. 2, 3, shew the Sun's *mean* movement during times noted in Col. 1.

The Table follows M. de Ries's fixture of the sun's *mean* movement in 1 time-minute by the *Siddhānta-tirāmāṣi* 2°-464,008,788, or 0-019,012,414.

No. 2.—DANDAPALLE PLATES OF VIJAYA-BHUPATI: SAKA-SAMVAT 1332.

By G. VENKOBÄ RAO, MADRAS.

The copper-plates which bear the subjoined inscription were obtained by me on a short loan from the *monagar* of Dandapalle,¹ a village in the Palamner *taluka* of the Chittoor district, during my official tour in 1913. They have been briefly noticed in the Madras Epigraphical Report for 1913, page 119, paragraph 53.

The plates are five in number, each measuring about 9½" by 5½". The edges are folded over, flattened and slightly raised into rims, in order to secure the protection of the writing from coming into contact with the written sides of the adjoining plates. The tops are neatly curved in the form of a bow slightly turned upwards at the edges where these meet the plates. The curved tops have, as usual, a hole in the centre to allow the copper-ring to pass through. The ring, which is plain and circular, bears no seal attached to it. It had been out before the plates were secured by me.

The first plate bears writing only on its inner side, while the remaining four are written on both their sides. Plates one to four are numbered in Telugu-Kanarese numerals on their first written sides. The fourth plate, ending with the usual imprecatory verses, indicates that the record must have closed with it. The fifth plate bears no number, and there are no rims on its inner face, which bears writing; this shows that the writing on that side of the plate may not have been originally intended. Consequently the last plate must have been added subsequently as a post-script whereon the boundaries of the land granted had to be engraved in the vernacular of the country.

The engraving is fairly deep and well executed. The characters are Nandināgarī, almost of the same type as those of the Satyamangalam plates of Dévarāya II, published with a facsimile plate on pp. 35 to 41 of *Ep. Ind.*, Vol. III; and the languages employed are Sanskrit verse² and Kanarese prose.³ The signature of the king at the end appears as "Śrī Triyambaka" in Kannaḍa characters.⁴

The following palæographical and orthographical peculiarities are worth noting. The use of the *anusvāra* is very arbitrary. In cases where naturally a class nasal or a final *m* would be used the *anusvāra* is substituted. The vowel *ṛ* is throughout written as *ṛ*, and in two cases (ll. 144 *ṛṇaṁ* and 163 *ṛṇaṁ*) with superscript *ṛ*. Very little difference in form is perceptible between *bha* and *ta*. The double letters *dda* and *ppa* are represented by two full forms of *da* and *pa* written side by side with a single top line, and the conjunct consonant *kkha* in ll. 121 and 126 by *kkkha*. The symbols for *tha* and *dha* are the same as the modern symbols, but *vice versa*. The hard or intensified *ṛ* is represented by *ṛ̣* (ll. 123, 135, 154, 175, 177, 186 and 191). The difference between *ḷa* and *la* is indicated by a ligature in the case of the former, which is absent in the latter. We often find the dental *ḷa* used instead of the cerebral *ḷa*, evidently owing to Sanskrit influence, even though the latter is expected according to the vernacular pronunciation, e.g. *ṣṭaṇṇa* (l. 55), *ṣṭaṇṇa* (l. 56) and *ṣṭaṇṇa* (l. 145). *Vice versa*, *ḷa* is used for *la* in *Kaḷyaṇḍya*

¹ In his *List of Antiquities*, Vol. I, p. 159, Mr. Sewell has noted the existence of these plates. It may be added that these have since been presented by the owner to the Madras Museum and are deposited there.

² Ll. 100 to 102 after v. 46, ll. 109 to 110 after v. 48, ll. 116 to 118 after v. 49, l. 180 after v. 55 and ll. 189 to 192 after v. 59 consist only of portions of verses. Probably there has been some mistake in the engraving of the text. It is not impossible that the first and the third fragments, which are both half-verses in the *Mandākrāntā* metre, should be read together to form one verse. In the second, fourth and fifth we have portions of *Anuṣṭubh*, *Śāliṣī* and *Indrajaṭṭā*.

³ Ll. 144 to 146 and ll. 153 to 192.

⁴ The Madras Museum plates of Śrīgiri-Bhūpāla of about this period (*Ep. Ind.*, Vol. VIII, p. 306 ff.) are attested similarly.

(l. 1) and *lālitāṅghri* (l. 11) and *Mahālakṣmī* (l. 34). A consonant after *anusvāra* and the *rēpha* is doubled, as in Telugu and Kanarese inscriptions, e.g. *सूक्तिं* in l. 7, *यं* in l. 42, *पुण्यवंतो* in l. 40, *राज्यं* in l. 83 and *वृत्तिं* in l. 86; in *विज्ञान* (l. 99) the consonant is doubled before *ra*. The *virāma* is used with the letters *त* in ll. 13, 15, 17, 57, 66 and 106, *न* in ll. 17, 27 and 73 and *क* in ll. 81 and 137. The rules of Sandhi are not observed in the following cases:—The *visarga* does not assimilate with the following consonant except in *वरिष्ठा* in l. 14. *कौशिको ऋषि* for *कौशिक ऋषि* in l. 78 and *विश्वामित्रो ऋषि* for *विश्वामित्र ऋषि* in l. 126; *अमृतं* for *अमृतम्* occurs in l. 15, *शिवान्* *ज्ञातय* for *शिवान्* *ज्ञातयि* in l. 44, *ऋषिन्* *श्रीवत्सी* for *ऋषि* *श्रीवत्सी* in l. 106 and *ऋषिन्* *हारी* for *ऋषि* *हारी* in l. 120. *आज्ञय* for *आज्ञयि* in ll. 55 f. and 61, *येकैव* for *एकैव* in l. 146 f., and *सिंहास* for *सिंहास* in ll. 26 and 27 are evidently due to a wrong pronunciation very common in later Vijayanagara inscriptions. One grammatical mistake is *वृत्तिं* for *वृत्ति* in l. 143.

After invoking Gaṇeśa and the boar incarnation of Viṣṇu, the record begins as usual by tracing the First Vijayanagara dynasty from the Moon. In the lunar race was born **Bukka-Rāya (I)**. His son was **Harihara (II)**, and his son **Dēvarāya (I)**, who ruled at Vijaya-purī (Vijayanagara). He had a son **Vijaya-Bhūpati** by his wife **Dēvāmbikā**, who was herself the daughter of a certain **Nūka-Bhūpāla** of the Solar race (v. 17). **Kriyāsakti-dēśika** was the spiritual teacher of Vijaya-Bhūpati (v. 20). This king **Vijaya**, having founded in the division called **Mulvāgila rājya**, in the district **Huli nāḍu**, in **Danḍēhalli śhala**, a new village called **Kriyāsakti-pūra**, granted it to **Kṛishṇa-Paṇḍita** in the Śaka year reckoned by the chronogram *raṅgalōka* (i.e. 1332), corresponding to the cyclic year **Vikṛiti**, in the bright half of **Bhādrapada**, when (the nakshatra) **Śravaṇa** was combined with Monday, on the **Ēkādaśī tithi** (and) the **Lakṣminārāyaṇa yōga** (vv. 26 to 30). Verses 21 to 25, which introduce the donee **Kṛishṇa-Paṇḍita**, state that his parents were **Mēchāmbikā** and **Śiṅgaṇārya**,¹ that he belonged to the **Bhāradvāja gōtra** and that his younger brother was **Annadātā**, in company with whom he served the king **Vijaya** faithfully. **Kṛishṇa-Paṇḍita** constructed in **Kriyāsakti-pura** a tank called **Vijaya-samudra** (v. 31), and, having secured the permission of the king, made a grant of the village and the tank to **Brāhmaṇas** of different *gōtras* (vv. 34 and 35). As stated in the Kanarese passage (ll. 144 to 146), the village consisted of 82 *vṛittis*. From the post-script which describes the boundaries of the village we learn that **Kriyāsakti-pura**, on being granted to **Brāhmaṇas**, received the name **Abhinava-Vijaya-Bukkarāya-samudra**, evidently after **Vijaya-Bukka**, one of the surnames of king **Vijaya-Bhūpati**.

The date of the grant has been verified with the help of **Dowan Bahadur Swamikaṇṇu Pillai's Ephemeris**. In the year **Vikṛiti**, corresponding to A.D. 1410, **Bhādrapada** was intercalary. On Monday in the bright half of *nija*-**Bhādrapada** the *tithi* *dasamī* (i.e. the 10th day) ended at 38 after mean sunrise, and the *nakshatra* **Uttara-Āshādhā** similarly ended at 48 after mean sunrise. Thus the given *tithi* (i.e. the 11th) and the *nakshatra* **Śravaṇa** were in combination with Monday only in the last quarter of that day. If such a choice of an auspicious moment in the early hours before sunrise is possible, the English equivalent would be the last quarter of A.D. 1410, September 10, Monday.

Very few stone inscriptions of **Vijaya-Bhūpati** have been found. The present record, accordingly, is one of extreme interest, being the first copper-plate inscription of his time discovered up to now. Professor **Kielhorn's List of Southern Inscriptions**, No. 480, says that **Vijaya's** father **Dēvarāya I** ascended the throne in Śaka-Samvat 1328 (=A.D. 1406-07).² It must have been soon after this that **Vijaya-Bhūpati** was installed as viceroy at **Mulvāgai** in

¹ In the list of donees he is incidentally also mentioned as **Śiṅgaṇāchārya**, father of **Rāmakṛishṇa** (i.e. **Kṛishṇa-Paṇḍita**) and **Annadātā**.

² From No. 345 of the Madras Epigraphical Collection for 1905 it may also be surmised that the coronation of **Dēvarāya I** took place in A.D. 1406-07.

the Mysore State.¹ The earliest date known for Vijaya is Śaka 1331, the cyclic year Virōdhin, corresponding to A.D. 1409-10.² In Śaka 1344 (Śubhakṛit=A.D. 1422-23) he assumed the title of paramount sovereign.³ From an inscription found at Bārakūr it has been ascertained that Dēvarāya II, son of Vijaya, commenced to reign in Śaka 1343 (Śārvarin).⁴ The interval between the latest known date of Dēvarāya I (viz. Śaka 1340) and the accession of Dēvarāya II (viz. Śaka 1343) is very little, and it is, therefore, difficult to reconcile the statement of Nuniz that he reigned for 6 years at the capital Vijaya-nagara, except on the supposition, as surmised by Mr. H. Krishna Sastri, that Vijaya was co-regent with his son Dēvarāya II and also with his father Dēvarāya I.⁵ In inscriptions of the Tamil country Vijaya-Bhūpati assumes the names Vira-Vijaya, Vira-Bukka and Vijaya-Bukka. Vijaya-Bhūpati of our record should not however be confounded with Vira-Bhūpati, son of Bukka II, whose records of about the same period are also found in the south.⁶

It may be observed that Vijaya's mother is herein called Dēmāmbikā, while other records mention her name as Hēmāmbikā.⁷ She was the daughter of Nūka-Bhūpāla of the Solar race. This Nūka-Bhūpāla may be identified with the Redḍi chief Nūka or Nalla-Nūka, who married Vēmasāni, sister of Annavōma.⁸ We are aware of a similar matrimonial alliance between the Redḍis and the Vijayanagara family. The Vēmayāram plates of Allaya-Vēma refer to a Kāṭaprabhu as the son-in-law of Harihara (III).⁹

The full name of the Śaiva teacher in whose honour Vijaya-Bhūpati founded the village Kriyāśakti-pura was perhaps Kāśivāsa Kriyāśakti, referred to in terms of high esteem in the records of Bukka I. He was also the teacher of Harihara II and of his general Muddanna-Daṇḍanāyaka.¹⁰ Viṭṭhanṇa-Oḍeya, a viceroy under Harihara II and Dēvarāya I, was also a follower of Kriyāśakti.

Of the 82 *vr̥ttis* into which Vijaya-Bukkarāya-samudra was divided the temples of Gōpinātha and Rāmēśa (Rāmēśvara), evidently located at that village, received each a *vr̥tti*. Among the Brahman recipients figure Chaṇḍapārya of the Vasishṭha *gōtra*, Sōma, son of Chaṇḍārya of the same *gōtra*, Annadātā, son of Śīṅgaṇāchārya of the Bhāradvāja *gōtra*, and Duggappārya, son of Annadātā of the same *gōtra*, each of whom obtained 2 *vr̥ttis*. The names of Chaṇḍapārya and his son Sōma of the Vasishṭha *gōtra* are interesting, inasmuch as the former is known to us as the author of the Śrauta work *Prayōgaratnamālā*. Another son of Chaṇḍapārya, Chaṇḍapāchārya or Chaṇḍapāmētya was Nāgaya-mantrin mentioned in a

¹ *Ep. Carn.*, Vol. X., Intr. p. xxxv., No. 824 of the Madras Epigraphist's Collection for 1912, from Karhanapalle of the Puṅganūr Zamindari, informs us that in Śaka 1332, the same year as that of our grant, prince Vijayarāya-Uḍaiyar was ruling as viceroy at Muḷvāyil (Muḷbāgal). A subordinate of his was the Chōla chief Vira-Obaḷadēva Chōḷamahārāja of the Sammaṭṭi family, which Mr. H. Krishna Sastri identifies with Samuṇēṭa, the family to which Lakkaya-dēva Mahārāja and Bommaya-dēva Mahārāja, who were dependants of Dēvarāya II, belonged.

³ *Ep. Carn.*, Vol. VII, Sk. 93.

⁴ No. 160 of the Epigraphist's Collection for 1901 and *Arch. Surv. Rep.* for 1907-08, p. 247.

⁵ *Arch. Surv. Rep.* for 1907-08, p. 248.

⁶ See the genealogical table on p. 86 of the Madras Epigraphical Report for 1907. Inscriptions of Vira-Bhūpati are found at Tiruvārūr and Tiruppūnduruttī in the Tanjore district (No. 575 of 1904 and *Christian College Magazine* for 1890, p. 105).

⁷ The Satyamaṅgalaṃ Plates of Dēvarāya II give the name Dēmāmbikā (*Ep. Ind.*, Vol. III, p. 37, text-line 18); but on the authority of an inscription of Vira-Vijaya published in the *Madras Journal of Lit. and Sc.* for 1881 it was corrected by Professor Hultzsch into Hēmāmbikā (*ibid.*, note 7). The *varia lectio* is due probably to the similarity of form of the letters *ha* and *ḍa* in Nandināgarī.

⁸ *Ep. Ind.*, Vol. III, p. 287. The Redḍis, so far as we know, do not claim any connection with the Solar race.

⁹ Madras Epigraphical Report for 1900, p. 25, paragraph 63.

¹⁰ *Arch. Surv. Rep.* for 1907-08, p. 242, foot-note 12.

[illegible]

Tripurāntakam in option.¹ The donees Annadātā and Duggappārya were apparently related to the donor, the one being his brother and the other his nephew. Under his full name Kṛishṇa-Paṇḍita was evidently the Rāmākṛishṇa who reserved for himself 20 shares in the village.² He was well versed in the Yajur-Vēda and belonged to the Bhāradvāja gōtra. His younger brother Annadātā must be distinguished from his namesake, the son of Chaṇḍapāmātya, which latter belonged to the Vasishṭha gōtra.

Danḍehalli, near which was situated the granted village Kriyāsakti-pura or Abhinava-Vijaya-Bukkarāya-samudra, is the same as the modern Danḍapalle, where these plates were found. Of the places mentioned among the boundaries Eḍūru is a village very near Danḍapalle. Tirumaladāri, i.e. the road leading to Tirumala, must have been a recognised pilgrim-route which passed the granted village. I am unable to identify Tālakuṇṭe or Tālakuṇṭe and Arasāṇḍeyahalli, the two other villages mentioned in the plates.

TEXT.³

[Metre of verses 1-44, *Anuṣṭubh*; of 45, *Mandākrāntā*; of 46-48, *Anuṣṭubh*; of 49, *Mandākrāntā*; of 50-55, *Anuṣṭubh*; v. 56—please see note 2, page 68 above; of 57-61, *Anuṣṭubh*; and of 62, *Salini*.]

¹ No. 255 of the Madras Epigraphical Collection for 1905.

² The honorific epithet *śāmin* given to Kṛishṇa-Paṇḍita in l. 90 and the way in which his name is introduced in v. 21 immediately after the description of Kriyāsakti lead us to suspect that these may have been identical.

³ From the original plates.

⁴ वृ was first written वृ and then corrected.

⁵ श्ला is corrected from श्वा.

⁶ Read °लानः.

⁷ The symbol for u is added in error by the engraver to the preceding letter वि instead of to वृ.

⁸ Read अभूत्.

 40 पुण्याणि ^{१३}तटितस्साराः पुण्यवंत्तौ^{१३} च तौ

^१ Read पूर्व.

^२ The letter प looks more like व.

^३ Read सिंघा°.

^४ The letter त of भरत looks like भ.

^५ An extra vertical stroke has been erased between स्मि and रा.

^६ An extra vertical stroke between the letters स्मि and व has been erased.

^७ The syllable व is corrected from वि.

^८ The letter स्ना is engraved like स्ना.

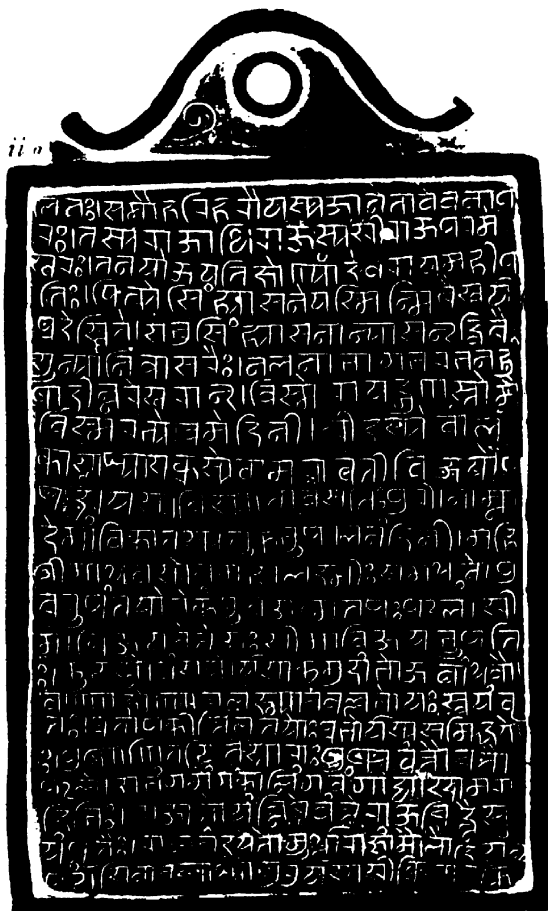

^९ Read समेधते.

^{१०} The first half of this verse is the same as verse 14 of the Satyamāṅgalam plates of Dēvarāya II, except that तयोरेकं appears as तयोः द्वापयं in those plates.

^{११} The visarga is engraved at the beginning of the next line.

^{१२} Read तटित°.

^{१३} Read पुण्यवंत्तौ; पु is written like वु, and there is an additional stroke added to it at the bottom, which makes the u-sign look long.

ABRIDGED TRANSLATION.

L. 1. Let there be prosperity !

(Verse 1.) Let Gaṇḍēśa, who is an ocean of compassion and whose cheek is moist with incessant flow of rut, take an interest in our welfare.

(V. 2.) Let the glorious Varāha, who bore aloft the delighted Earth sunk in the waters of the ocean, procure fortune to us in abundance.

(V. 3.) Let water (*jivana*), which is the abode of Lakshmi,¹ the bed of Śauri (Vishṇu), the body corporeal of Umāpati (Śiva) and the first (*object of*) creation of Brahṇā, exist for our subsistence.

(Vv. 4 and 5.) The moon—the birth place of nectar, of pure body, the embodiment of sixteen parts and the esteemed brother² of Lakshmi—whom Sadāśiva, whose lotus-like feet are fondled by the crest jewels of the gods and the demons, himself proudly wears, was born from the milky ocean.

¹ Read शासन.

² The goddess Lakshmi is said to have come out of the milky ocean, when it was churned.

³ The moon is the brother of Lakshmi, as both of them were produced from the milky ocean.

(V. 6.) There flourishes on earth the world-famed family of his (*i.e.* the moon's), in which the omnipresent Hari, the creator of the worlds, himself was born.¹

(Vv. 7 and 8.) In that (*family*) was sprung king Bukka-Rāya, the ocean of a multitude of good qualities, of irresistible valour, whose exalted position was well known in all quarters—whose course of conquests extended to all directions with the grandeur of continuous success and who (*as such*) surpassed the gods Indra and the rest, who were lords each of a single quarter.

(Vv. 9 and 10.) To him was born by virtue of superior penance accumulated in former (*births*) a virtuous son Hariharēśvara, who was to be reckoned among the ancient kings. To him, well served by Śrī (*i.e.* Lakshmi) and famous as the all-knowing (*Sarvajña*), only Hari and Hara were equal and none else.²

(V. 11.) Victorious on this earth is the prosperous Rājaparamēśvara, king Dēvarāya, the son of this Rājādhirāja.

(V. 12.) While this king sat on the ancestral throne, bestowing wealth on his friends, the thrones of his enemies became vacant in two or three days.

(V. 13.) Amazed at his excellent virtues, the earth actually forgets the sovereigns Nala, Nābhāga, Bharata, Nahusha and others.

(V. 14.) Like unto (*the city of*) Alakā of (Kubēra) the giver of wealth, and unto Amarāvati of Indra, the excellent and famous city which has for its prefix the word Vijaya (*i.e.* Vijaya-nagara) was his residence (*vasati*).³

(V. 15.) His consort Dēmāmbikā by name, the daughter of Nūka-Bhūpāla, is prosperous like Mahā-Lakshmi, the consort of Mādhava.

(V. 16.) The illustrious Vijaya-Bhūpati, the chief fruit, in the form of a son, of their (*i.e.* of the parents') penance (*practised*) in former births, is victorious as the (farther) limit of prowess.

(V. 17.) At the root of whose lineage are (the Moon and the Sun),⁴ the friends of the white and red lotuses (respectively); and who is voluntarily chosen as lord by (*the goddesses*) Sarasvatī, the Earth and Lakshmi.

(V. 18.) The lightning and the stars (*were*) the flowers and the sun and the moon (*were*) the fruits of the two well-grown creepers, the valour and fame of this lord.⁵

(V. 19.) Upon whom the kings of Aṅga, Kāliṅga, Vaṅga and the rest always attend holding *chauris*, etc., the insignia of royalty, themselves.

(V. 20.) His (*i.e.* Vijaya-Bhūpati's) spiritual teacher was Kriyāśakti-dēśika who, placing his feet on the diadems of kings (*rājā*), became more illustrious than Śiva carrying the moon (*rājā*) on his head.⁶

(V. 21.) Kṛishṇa Paṇḍita, the ocean of good qualities and the abode of every fortune, is highly esteemed by that king and is famous.

¹ This is the Yādava family, in which Kṛishṇa was born.

² Hari (Vishṇu) is the husband of Lakshmi and Sarvajña is a recognised surname of Hara (Śiva).

³ In the Eastern Gaṅga grants *vāsaka* appears in the sense of *rājadhānī*; above, Vol. III, p. 20, note 2.

⁴ Vijaya-Bhūpati was born in the race of the moon. His mother Dēmāmbikā was born of the Solar race.

⁵ *I.e.* his fame and valour reached even unto the sky. This verse is the same as verse 12 of the Satya-maṅgalam plates of Dēvarāya II; *Ep. Ind.*, Vol. III, p. 37, text lines 20 f.

⁶ Kriyāśakti-dēśika is greater than Śiva, because the *rājā* carried on his head by the latter was merely trodden by the former.

(V. 22.) By (*possessing*) this son (*i.e.* Kṛishṇa-Paṇḍita) the praiseworthy couple Mēchām-bikā and Śiṅgaṇārya came to be ranked foremost among parents (*lit.* those *possessing children*) in this world.

(V. 23.) The founder of the lineage of (Kṛishṇa-Paṇḍita), who has obtained fame in the Yajur-Vēda and so on, is Bharadvāja, praised by founders of families like Vasishṭha and others.

(V. 24.) His younger brother, the wise and fortunate Annadātā, prospers well, making his designation literally appropriate by feeding (the needy) day and night.

(V. 25.) These (*two*) elder and younger brothers, serving by the side of the famous king Vijaya-Bhūpati, who was an Indra on earth, resembled (the two celestial brothers) the Aśvins.¹

(Vv. 26 to 30.) This illustrious and virtuous ruler, the heroic Vijaya, who was a celestial tree on earth and a mine of compassion, and who was ornamented with good qualities, having founded the new village called Kriyāsakti-pura, adorned with rich fields, houses, pleasure-gardens and boundary marks, in the auspicious Daṇḍēhaḷli *sthala*² in Huli nāḍu of great yield, in the Muḷvāgila rājya, gave (*it*) as a free gift, together with the eight kinds of easements, to Kṛishṇa Paṇḍita, accompanied by the pouring of water and a fee, in order to propitiate (the god) Tryambaka, in the Śaka year expressed by the (chronogram) raṅgalōkē (*i.e.* 1332), in the (*cyclic*) year Vikriti, on the day of Śravaṇa which corresponded to a Monday, the 11th *tithi* of the bright fortnight in the month of Bhādrapada and was coupled with the *yōga* (called) Lakshmi-Nārāyaṇa.

(V. 31.) (*Subsequently*) this Kṛishṇa-Paṇḍita founded in that place a tank called Vijaya-samudra endowed with charm all round.

(V. 32.) Even to speak of (the lake) Achchhōda, while describing it (*i.e.* tank), is vain; even the Mānasa-saras (the tank of the gods) does not become attractive to the minds of the people (after once seeing this).³

(V. 33.) It seems as if Lakshmi performs her sportive dance over the cluster of lotuses (in this tank),—the swans (being) her noisy anklets and the (row of) *sārasa* birds her jingling girdle.

(Vv. 34 and 35.) The wise, wealthy, virtuous and discriminate Kṛishṇa-Paṇḍita, with the permission of the king, made a gift of the *agrahāra* adorned by the tank above described to Brāhmaṇas. The best of the Brāhmaṇas who received shares are enumerated in regular order.

(Ll. 75 to 146.) List of donees :—

No.	Name of the donee.	Father's name.	Gōtra.	Vēda.	No. of shares.
1	Gōpīnātha (Viṣṇu)	1
2	Rāmēśa (Śiva)	1
3	Gōvinda	Raṅgāya	Kauśika	Rich	1
4	Obhala	Gōvinda	Do.	Do.	1

¹ The Aśvins are the inseparable twins who serve as physicians to the gods.

² Daṇḍēhaḷli *sthala* may have been the lowest territorial division in which the village Kriyāsakti-pura was situated. The word *sthala* in this sense corresponds to *ṣāṇa* or *ṣāṇya* of other inscriptions and is etymologically connected with them.

³ Achchhōda and Mānasa-saras are two famous lakes in the Himalayas.

TOTAL SHARES .					82

(Ll. 146 to 148.) Altogether the *vr̥ttis* are 82, including the share of the gods. Also in words eighty-two *vr̥ttis*.

(Ll. 149 to 152.) [Here follow the two usual imprecatory verses].

(Ll. 153 to 192.) The boundary of Abhinava-Vijaya-Bukkarāya-samudra is (as follows) :—

One stone set up to the west of the tamarind trees at the south-east corner of Ēḍūru, on the side of the north outlet of the tank; to the east of it, one stone set up to the north of the tamarind tree; in the north-east corner of it, one stone set up to the north of the tamarind tree; east of it, one boulder stone set up with the letters engraved on it; to the east of it, one stone under the tamarind tree which was on the boundary between Ēḍūru and Tālakunṭe; one stone set up to the south-west of Tālakunṭe; to the east of it, one stone set up to the north of the banyan tree south of Tālakunṭe; to the north-east of it, one stone set up at the tamarind tree east of Tālakunṭe; to the east of it, one stone (set up) at the Bēl tree in the eastern outlet of the tank; to the east of it, one stone set up below the Tuggila tree; one rock to the east of it; to the east of it, an inscription engraved on a black stone; to the east of it, one stone set up at the tamarind tree on the boundary between Tālakunṭe and Arasāṇḍēyaha[!]¹li; to the south-east of it, one stone set up to the north of the ant-hill¹

¹ *Uṭta* is the same as *Antta*, "an ant-hill" according to Dr. Kittel's Kannada-English Dictionary. It is however difficult to account for the form *utina*.

at the Tāre (*Beleric Myrobalan*) tree on the south bank of the stream and north of Kūdanaha![*]i; one stone set up to the east of the rock west of Kūdanaha![*]i; an inscription engraved on that rock; to the west of it, one stone set up to the east of the tamarind tree; west of it, one stone set up to the west of the tamarind tree on the road to Tirumale; west of it, one stone set up to the west of a tamarind tree; west of it, one stone set up at the tamarind tree on the boundary of Daṇḍēha!li; to the south of it, one stone set up to the west of the wild Mangosteen tree; to the west of it, one stone set up to the east of the waved-leaved fig tree; to the north of it, an inscription caused to be cut on a rock on the road to Tirumale; to the west of it, one stone set up to the south of a tamarind tree; to the west of it, one stone set up at the ant-hill of the banyan tree; to the west of it, an inscription caused to be engraved on the boulder set up to the south of Daṇḍēha!li; to the south of it, one stone set up at the ant-hill of the Tuggila tree; to the south of it, one stone set up at the ant-hill of the boulder set up a little beyond to the east of the banyan tree; to the west of it, the boundary is the boundary limit of the fields of Kaṅḡṇiyaha![*]i.

(L. 193.) Śrī-Triyambaka.

No. 3.—SRIRANGAM PLATES OF MUMMADI NAYAKA : SAKA SAMVAT 1280.

BY T. A. GOPINATHA RAO, M.A., TRIPPLICANE.

The subjoined inscription is engraved on five copper plates, bound together by a ring, which was already cut when I got them for examination. The ring bore no seal. The plates measure 9" by 2", and the writing is engraved lengthwise on both sides of the plates. There are exactly ten lines on each side, and the plates are numbered with Telugu-Kanarese numerals, marked on the proper right of the ring-hole on the second side of each plate. The rims are neither raised nor shaped thicker, and yet the writing is in an excellent state of preservation.

This set of copper plates belongs to the Raṅganātha-svāmin temple at Srīraṅgam and was kindly lent to me for examination by the trustees of the temple, Messrs. T. Deśikāchārya, B.A., B.L., of the Trichinopoly bar, and K. S. Kuṇṇusūmi Ayyaṅḡār. My thanks are due to these gentlemen for having so obligingly placed this, as also all the other copper plate documents, at my disposal for some time and thus enabling me to take mechanical copies of them.

The alphabet in which the record is written is old Telugu, and the language Sanskrit. The whole is written in 64 verses of various metres. The inscription records that Mummadi Nāyaka, the king of the Teliṅga country, granted to Bhaṭṭa Parāśara, the seventh, the village of Kottālaparṇu, which the donee's mother regranted to Śrīraṅganātha-svāmin, the presiding deity of the great Viṣṇu temple at Śrīraṅgam. The genealogy of the donor is given as follows:—

Mummadi is said to have married the niece (sister's daughter) of a Kāpaya Nāyaka. His family was known by the name of Mañchikoṇḍa, and the ancestors of this family were originally brought down from the Gangetic valley by Mukkaṇṭhi. Teliṅga-dēśa, ruled over

by Mummaḍi Nāyaka, was bounded on the north by Kanyākubja, on the south by the Pāṇḍya country, on the east by Kalinga and on the west by Mahārāṣṭra. Prince Mummaḍi is described as having conquered the Pānāra, the Kōṇa, the Kuravāṭaka, the Cheṅgara and other countries lying on either side of the Gōḍāvari, and as having made Kōrukoṇḍa his capital. He had two brothers, Śīṅgaya and Gannaya, whom he allowed to rule over the small principalities of Kōṭi and Tāḍipākka. Sovereignty had no attraction for Mummaḍi; but he was obliged to accept the crown for the sake of his father. Mummaḍi is also called Śrīraṅga-varddhana (v. 52), a surname which he perhaps assumed after he became the disciple of Parāśara Bhaṭṭa VII. He became a follower of the latter, when the latter had gone to the Teliṅga-dēśa, and as a *guru-dakṣhiṇā* this grant of a village was made.

At present nothing more than what is given in this document is known of Mummaḍi Nāyaka. From the fact that the southern boundary of his kingdom was the Pāṇḍya country we can very well understand that at the time of this record the occupation of the Nellore district by Jaṭā-varman Sundara Pāṇḍya was an accomplished fact. This latter subverted the dynasty of the Chōlas, overran and captured their country as far north as Nellore, where he had his *virābhishēka* celebrated.¹ Nothing is known definitely of the chiefs of Pānāra,² Cheṅgara, Kuravāṭaka, etc.

The village granted to Parāśara Bhaṭṭa VII was evidently enjoyed by him for some time before he died. His mother, who survived him (v. 48), seems to have thought of allowing the relatives of the deceased to inherit the village; but in the meanwhile she changed her mind and gave it away to the god Raṅganātha, taking Him, as she says, as the greatest of all relatives. Most likely the relatives began to trouble her and perhaps also to question her rights to the property, which must have goaded her on to take the course which she chose.

An inscription found lately at Kōrukoṇḍa itself gives a very interesting account of the death of the seventh Parāśara Bhaṭṭa and his reappearance as a divine being. Incidentally also some facts about his patron and disciple, Mummaḍi Nāyaka, are given in it. Mr. Krishna Sastri summarises the contents of the record thus:—

“Mummaḍi Nāyaka is stated to have been the ruler of Kōrukoṇḍa, which was surrounded by a fort. He was a great conqueror and had subdued the kingdoms of Pānāra, Kōṇa, Kuravāṭaka and Bēṅgara A Vaishṇava teacher Bhaṭṭari, of whom Mummaḍi was the devoted disciple, told the chief one day that he had reached the last of his human births and, as soon as the existing mortal frame was given up, he would appear in the form of the god Lakṣmī-Nārasimha on the hill at Kōrukoṇḍa. Soon after this revelation the teacher died, and all about his rebirth as the god Nārasimha was apparently forgotten. A dancing-girl of the village, called Lakṣmī-dāsi, saw the teacher in a dream and was told by him of his manifestation on the Pārāśara-śāila. The king, being informed of this, was at once reminded of what the teacher had told him and permitted the dancing-girl to build the temple. She wandered about in rags, begging for money, pledged her daughter, earned the amount required, built a temple and consecrated therein Parāśara-Nṛisimha, presenting at the time of the consecration two villages for the maintenance of the worship and offerings.”³ Mr. Sastri adds that the verses in the inscription under notice are repeated verbatim in the Kōrukoṇḍa record also. The latter inscription is dated Ś. 1275; this is the date of the consecration of the image of the god Nṛisimha; and therefore the death of the seventh Parāśara Bhaṭṭa would have occurred some time before this date, and this mother would consequently have survived him for at least seven or eight years.

¹ No. 904, p. 145 of the Appendix to Vol. VII of *Ep. Ind.*

² Vājaya, a prince of Pānāra, is mentioned in one of the Eastern Chālukya grants published in *South Indian Inscriptions*, Vol. I, p. 44.

³ Madras Epigraphist's *Annual Report* for 1912, para. 68.

Parāśara Bhaṭṭa VII belongs to a very illustrious family of scholars of southern India. Śrīvatsasihna-guru, or Śrīvatsasihna Miśra, as he is generally called, was the first or the founder of the family of Bhaṭṭars of Śrīrangam. He was the first and foremost disciple of Śrī Rāmānuja, the famous founder of the Viśiṣṭādvaita school of philosophy. In all the Śrīvaiṣṇava chronicles and among the Śrīvaiṣṇavas he is better known by the name of Kūrattālvāṇ. He belonged to the Hārīta gōtra and Āpastambha Sūtra and was of the Yajus sākhā. He was born in the year Saumya, on a Thursday which was Pañchami in the month of Pushya. He was a Vādama by sect and belonged to the village of Kūram near Chingleput. His wife was named Āṇḍāl. The early education of Kūrattālvāṇ was undertaken by his own father; but he finished his studies during his stay with Rāmānuja and under him. He was the chief assistant and the amanuensis of Rāmānuja in the compilation of the Śrībhāṣya. He was of the same gōtra as Rāmānuja.

The Śrīvaiṣṇava Chronicles narrate the persecution of Rāmānuja by the Chōla sovereign, and assert that this king was a bigoted Śaiva and consequently began to persecute the Vaiṣṇavas. It was pointed out to this king that converting the common people by force was not in itself capable of augmenting the numbers to the Śaiva faith, and, if such a great leader as Rāmānuja were to be made to subscribe to the Śaiva faith, his followers would join that sect in a body. Rāmānuja was summoned before the king; Kūrattālvāṇ, apprehending danger to his master, assumed the garb of a *sannyāsin*, proceeded to the royal court, and represented himself as the famous Vaiṣṇava Āchārya. The king then compelled him to sign a declaration that no god was superior to Śiva. Kūrattālvāṇ boldly contradicted him by telling him that "larger than Śiva was Drōṇa," (words which also mean two different measures, of which the latter was the bigger),¹ thus playing upon the double meaning of the words Śiva and Drōṇa. The king, enraged at the behaviour of Kūrattālvāṇ, ordered both his eyes to be put out immediately, and the order was forthwith carried out. So throughout the remaining part of his life he lived a blind man.²

Another important service which he rendered to his master was the conversion of Tiruvarāṅgattamudapūr, the hereditary trustee of the Raṅganātha temple at Śrīrangam, to the Śrīvaiṣṇava faith. This neophyte made over the right of management of the temple to Kūrattālvāṇ, who in his turn handed it over to Rāmānuja. Highly pleased with the devotion of his dear disciple, Rāmānuja gave the *paurōhītya* of the temple and the right of reading the *Purāṇas* therein to the family of Kūrattālvāṇ.

Kūrattālvāṇ was the author of the *Varadarāja-stava*, *Sundarabāhu-stava*, *Atimānushya-stava*, *Śrīvaiṣṇava-stava*, *Śrī-stava*, *Yamakaratnākara* and *Gādyatraya-vyākhyāna*.

Śrīvatsasihna Miśra had two sons, Parāśara Bhaṭṭa and Rāma Miśra.³ Of these the elder was the most distinguished scholar of the day; he was nominated to the pontifical seat by Rāmānuja, and, when he succeeded the latter, he was comparatively a young man. In a short time, however, he was able to convert to his faith a great Vēdāntin named Mādhava and made him his own disciple and successor under the name of Nañjīyar. He is believed by the Śrīvaiṣṇavas to have died at the early age of 28 and without issue; but there are weighty

³ Some Śrīvaiṣṇava chronicles assert that these were twins.

reasons for assuming that he lived for no less than 60 or 70 years.¹ The education of Parāśara and his brother was entrusted by Rāmānuja to Embār, his own cousin. Bhaṭṭar wrote the *Śrīraṅgarāja-stava*, *Śrīguṇaratnakōśa*, *Sahasranāma-bhāṣya*, *Kriyādīpa*, *Aṣṭaśloki*, *Chatuśloki*, *Dvayaśloki* and *Taṇiśloki*.²

Parāśara Bhaṭṭa, the elder son of Śrīvatsasihna Miśra, says the inscription, had a large number of disciples, of whom Vēdānta-vēdya was the most important. Vēdānta-vēdya is better known to the Śrīvaiṣṇavas as the 'Vēdāntin of the West country' (*mēl-nāṭṭu Vēdānti*). He was defeated in a religious wrangle by Parāśara Bhaṭṭa, whose devout disciple he soon after became, and he assumed holy orders, after which he was known as Nāñjiyar, meaning literally 'our jīya,' for he was so addressed by his *guru*. The name of this *sannyāsin* in his *pūr-vāśrama* (that is, before he assumed holy orders) was Mādhava.

As soon as Parāśara Bhaṭṭa and Rāma Miśra were born, the god Raṅganātha commanded their father through the *archaka* (the performer of *pūjā*) to bring the children to His temple and bring them up there. They are therefore believed to be the adopted sons of the god Raṅganātha and his goddess Śrī.³ It is this faith of the Śrīvaiṣṇavas that is recorded in verse 35.

Vāgviyaya Bhaṭṭa was the son of Rāma Miśra,⁴ the brother of Parāśara. He is known to the Śrīvaiṣṇavas as Naḍuvil Tiruvīdi Pillai Bhaṭṭar ("the Bhaṭṭa of the middle street"). He was the author of *Kṣhamāśhōḍaṣī*, and is hence called also *Kṣhamāśhōḍaṣī Bhaṭṭa*.⁵

¹ It is a well-known fact that Parāśara Bhaṭṭa was born some time before the Chōla persecution and the subsequent flight of Rāmānuja to the Hoysala country. I have shown in my History of the Śrīvaiṣṇavas (*Madras Review* for 1905) that Rāmānuja must have lived in the Hoysala kingdom for no less than 20 years, during which period Kūrattālvān, who was blinded by the Chōla king, was living in Śrīraṅgam with his sons. On the return of Rāmānuja to Śrīraṅgam after the demise of the persecuting Chōla prince in A.D. 1118 the remaining third part of the *Śrībhāṣya* was finished. After this Rāmānuja lived for ten years; Parāśara succeeded him on the pontifical seat, vanquished the Vēdāntin of the West Country, taught him the Drāviḍa Vēdas, and, after the latter had made sufficient progress in them, ordered him to write the *Onpadināyirappadi vyākhyānam* on the *Tiruvāymoli*. The *Guruparamparā-prabhānam* of Pimpalgiya-Jiyar (p. 210) states that Parāśara Bhaṭṭar lived as late as in the reign of Tribhuvanavīra-Dēva, that is, Kulottunga-Chōla III, who ruled from A.D. 1178 to 1216; and the author of the *Guruparamparā* referred to above was almost a contemporary of the illustrious Bhaṭṭar and is therefore likely to know about what he states in his work. Therefore we may rely on his assertion that the Bhaṭṭar lived at least down to some few years later than A.D. 1178, and therefore was more than 75 years when he died. The majority of the Śrīvaiṣṇava chronicles affirm that Parāśara Bhaṭṭar had no children, which appears to be the fact.

His son was Vēdavyāsa *alias* Sudarśana Bhaṭṭa. He studied the *Śrībhāṣya* at Kāñchī under Varadavishṇvārya, the grandson of Naḍādūr Ālvāṇ (a nephew of Rāmānuja).¹ Varadavishṇu was better known as Naḍādūr-ammāl. He was a great exponent of the *Śrībhāṣya*, and his learning drew many earnest students to Kāñchī. One such was Vēdavyāsa Bhaṭṭa. This youth's unostentatious manners, his typical silence and apparent unsociability made him mistaken for a dullard. His colleagues could not perceive that all his thoughts were concentrated on his study and that he found little or no time for idle talk with them. But his teacher knew him very well. One day, when the students were assembled for the usual lecture, Naḍādūr Ammāl, who had also come early, would not proceed with his disquisition. He began it only after Vēdavyāsa Bhaṭṭa took his seat in the assembly. With a desire to show the real man to the audience, Ammāl feigned forgetfulness in the matter of an explanation which he had given some time back and asked each one of his students about it, but did not succeed in eliciting a reply; when Vēdavyāsa's turn came, he requested his *āchārya* to command him to give the interpretation as given by him (the *āchārya*) on any one particular occasion; for he had heard Ammāl twenty-one times. When questioned if he remembered the very language employed by Ammāl on those twenty-one occasions, he replied that he did. At the command of Ammāl he began to pour forth in the very language in which Ammāl had explained that particular point on so many previous occasions. The fellow disciples of Vēdavyāsa were dismayed at this extraordinary performance of the apparent dullard, and began to feel ashamed of themselves. As a matter of fact, this youth committed to memory every word of Ammāl, as it fell from his lips, and reduced it to writing the very same evening after the lecture was over. The work that grew in this manner was called the *Śrūta-prakāśikā*, and Sudarśana came to be known thenceforth by the name of Śrūta-prakāśikāchārya.² He was an elder contemporary of Venkaṭanāthārya, *alias* Vēdānta-dēśika. When he was very old, the vandalistic march of Malik Kafur swept over Śrīraṅgam, and in the onslaught that took place he perished.³

Sudarśana Bhaṭṭa had two sons, Vēdāchārya Bhaṭṭa and Parāśara Bhaṭṭa.⁴ Before his death Sudarśana Bhaṭṭa entrusted these sons and his valuable work the *Śrūta-prakāśikā* to the care of Vēdānta-dēśika with the request that they might be saved from the Musalman havoc. The latter carried out his promise so faithfully that to-day we owe the existence of this valuable

¹ "Nos. 471a and 505b contain the *Vasanta-tilaka-bhāṣam*, a drama by Varadāchārya. This author can be safely identified with the Vaiṣṇava teacher of the same name, who was the son of Dēvarāja of Kāñchī, and to whom the *Guruparamparā-prabhāvam* attributes the two surnames Ammālāchārya and Ghaṭikaśatam-ammāl. The first of these two names appears in the form Ambālāchārya in No. 505b, and a corruption of the second name is preserved in the colophon of Dr. R. Mitra's No. 116" . . . "Another drama by Varadāchārya is the *Chōḷa-bhāṣa*." *Rep. on Sans. MSS. in S. India* by Dr. E. Hultzsch, No. I, p. vii of the Introduction.

⁴ श्रीपराशरभट्टार्यं श्रीवत्साराख्यपीत्रकम् ।

वेदाचार्यानुजं वन्दे वेदाचार्यस्य मन्दनम् ॥

gloss on the *Śrībhāṣya* to *Vēdānta-Dēśika*. *Vēdāchārya* Bhaṭṭa was the author of the *Aṣṭākṣharadīpikā*, *Rahasyatraya* and *Tanidvayam*. *Vēdāchārya*'s son was Śrīraṅgarāja Bhaṭṭar.¹

The *Periya Tiru-muḍiy-aḍai* assigns the following pedigree to the first great Parāśara Bhaṭṭar:—his son was Uddanḍa Bhaṭṭar; his son Parāśara Bhaṭṭar; his son Śrīraṅganātha Bhaṭṭar; his son Bhaṭṭa Parāśara; his son Śrīraṅga Bhaṭṭar; his son Sudarśana Bhaṭṭar; his son Śrīraṅgarāja Bhaṭṭar; his son Sādhu Bhaṭṭar; his son Tiruvōṅkaṭa Bhaṭṭar.²

The grant was made on a Thursday, corresponding to the fifth *tithi* of the bright fortnight of the month of Chaitra, in the Śaka year 1280, computed by the moon (1), the eyes (2), the *nāgas* (8), and *nabhaḥ* (0).

Verses 28 to 33 describe the town of Śrīraṅgam, which is situated in the island formed by the two branches, the Kāvēri and the Kolliḍam, of the river Kāvēri. The image of the god Raṅganātha which is set up in the temple situated in this town is believed to have been originally worshipped by Brahmā and afterwards presented to the ancestors of Ikṣhvāku and worshipped by his descendants. On the day of the coronation of the lord Śrī Rāmachandra he made a present of the image of his family god Raṅganātha to his faithful ally and dependant, Vibhishana, the brother of Rāvaṇa. While taking this valuable gift, Vibhishana inadvertently placed it on the ground in the island of Śrīraṅgam, where it stuck fast and could not be removed. It is over this image that the extensive temple of Śrīraṅgam is believed to have been built, and the composer of the *sāsana* alludes in our document to this faith regarding the advent of Raṅganātha to Śrīraṅgam.

"*Pāpishṭha-Kṣhatrabandhuś cha*," one of the texts quoted in verse 43, occurs in the 17th chapter of the *Vishṇudharma*. Kṣhatrabandhu was a very wicked king and had committed several sins; but just before his death he unwittingly uttered the three syllabled name, Gōvinda, of Vishṇu, which virtuous act saved him from eternal perdition. In his *Tirumālai* the Vaishṇava saint Tondaradippodiy-ālvār also makes a reference to the story of Kṣhatrabandhu.³

The following are the names of places, etc., that are mentioned in the inscription under discussion:—Himāchala, Bhūrata-varsha, the Mahārāṣṭra, Kalinga, Pāṇḍya, Kanyākubja and Teliṅga countries: Mañchikōṇḍa; Āndhra-dēśa; the Pānāra, Kōna, Kuravāṭa and Ch(or)B(e)ṅgara provinces; the river Godāvari; Kōrukōṇḍa; Kōṭi; Tāḍipāka; the river Kāvēri; Śrīraṅga-puri; Kottāllaparru in the Pānāra country; Dēva; Villūru; Naṅgipūṇḍi; Penuṅgoṇḍa; Charakuvāṭaka; Tāmaravāṭaka; Monambagru; Peṇḍlikūnturu-cheruvu; Groppuṅgāli and

² In all probability the Bhaṭṭa Parāśara of our document was identical with the Bhaṭṭa Parāśara, the son of Śrīraṅganātha Bhaṭṭa and the grandson of Vēdāchārya Bhaṭṭa; he is also called, in the extract given in footnote 4, the seventh from Kūranātha, that is, Kūrattālvān.

³ *Moytta val-viṇaiyul-niṇṇu mūṇr-eḷutt-aḍaiya pērāl* | *Kattirabandum-aṇṇē parāṅgaḍi kaṇḍu koṇḍāṇ* | ("Has not Kattirabandu too attained the highest existence, being relieved from the powerful sins that were clustering thickly round him, by the three lettered name?"), *Tirumālai*, verse 4.

Uppungāli and the Pālēru-agrahāra. The following table gives the identification and situation of a majority of the places enumerated above :—

Name.	Mod. Name.	District.	Taluk.
Kōrukōṇḍa	Kōrukōṇḍa	Gōḍāvari	Rajahmandry.
Kōṭi	Kōṭi	Do.	Do.
Tāḍipāka	Tāllapākam (?)
Śrīraṅga-purī	Śrīraṅgam	Trichinopoly	Trichinopoly.
Koṭṭāllaparru	Kothalaparru	Kistna	Tanuku.
Dēva	Duvva	Do.	Do.
Villūru	Vilṭuru or Vēḷatūr	Do.	Vinikōṇḍa.
Naṅgipūṇḍi	Neggipūḍi	Do.	Tanuku.
Penunḡōṇḍa	Penukōṇḍa	Do.	Do.
Charakuvāṭaka	Cherukuvāḍa	Do.	Do.
Tāmaravāṭaka	Tāmarāḍa	Do.	Do.
Monambarru	Munamaru	Do.	Do.
Kāvēri river
The river Vāsishṭha Gōḍāvari	The river Gōḍāvari or a tributary of it.		
Himāchala	The Himalaya mountains.		
Bhārata-varsha	The ancient name of India.

ABSTRACT OF CONTENTS.

Verse 1. Invocation to Śiva, Pārvatī, Gaṇeśa and the Moon.

V. 2. Invocation to Śveta-Varāha, the third incarnation of Viṣṇu.

V. 3. States that the present age is known as the Kali Yuga.

V. 4. States that the portion of the earth stretching from the Himālayas to the southern ocean is called the Bhārata-varsha.

V. 5. Gives the boundaries of the Teliṅga-dēśa situated in the Bhārata-varsha, as follows:—On its north is the kingdom of Kanyakubja, on the south the Pāṇḍya country and on the west the Mahārāshṭra.

V. 6. The Teliṅga country was once ruled over by a king named Kōśami Nāyaka.

V. 7. His two ancestors, who belonged to a family known as the Mañchikōṇḍa family, were originally brought down to the Teliṅga country from the Gangetic valley by a king named Mukkaṇṭi.

V. 8. These two founded the city of Mañchikōṇḍa after their names, and their descendants were also known as of the Mañchikōṇḍa gōtra.

Vv. 9-10. On the death of Kōśami Nāyaka his son Gaṇapa ascended the throne.

Vv. 11-13. Gaṇapa was succeeded by Kūna.

V. 14. Mummadi Nāyaka was the son of Kūna.

V. 15. He married the daughter of the sister of Kāpaya Nāyaka.

¹ Read °सिद्धौ.

² Read पार्श्वेद्वान्.

³ Read निष्पलं.

⁴ Read वृ..

⁵ Read याचते.

⁶ Read पाञ्चगौयी भवद्भिः

⁷ Read °द्विगुणं.

V. 16. Though personally unwilling to assume the burden of his kingdom, he did so in deference to the wishes of his father.

Vv. 17-20. He conquered the countries of Pānāra, Kōṇa, Kuravāṭa, Cheṅgara and others lying on either bank of the river Gōḍāvarī. He ruled over his vast kingdom for a long time, and under him the people were in a very prosperous condition.

V. 21. His capital was Kōrukōṇḍa.

Vv. 22-23. Description of the capital town.

V. 24. King Mummaḍi allowed his younger brothers Śīṅgaya and Gannaya to govern the principalities of Kōṭipura and Taḍipaka respectively.

Vv. 25-27. Praises of king Mummaḍi. He seems to have had many vassals under him.

Vv. 28-33. Here the narrative turns from Mummaḍi to the island of Śrīraṅgam and the deity presiding over its temple, namely the god Raṅganātha.

V. 34. Begins with the genealogy of the donee, Parāśara Bhaṭṭa. His ancestor Śrīvatsabihna Miśra was born in the Hārīta gōtra and was a very learned man and held the *paurōhitya* in the temple of Raṅganātha.

V. 35. His son was Bhaṭṭa Parāśara, and he had many disciples, of whom the most illustrious was Vēdānta-vēdya.

V. 36. His son was also called Bhaṭṭa Parāśara.

V. 37. One of the illustrious relatives of Bhaṭṭa Parāśara was Vēdāchārya Bhaṭṭa (that is, the brother of the first Parāśara Bhaṭṭa).

V. 38. In the family of Parāśara Bhaṭṭa was born a learned and pious *guru*, also named Bhaṭṭa Parāśara.

Vv. 39-42. This person went on a tour to the Āndhra country, where many learned Brāhmanas became his disciples.

Vv. 43-45. Here several kings gave him rich presents such as gardens, wet lands, jewels and precious stones. King Mummaḍi Nayaka also presented him with the village of Kōṭṭāllaparru.

Vv. 46-50. This *āchārya*, having finished the mission of his human existence, went to enjoy the company of Viṣṇu (*i.e.* died). His mother Jaganmātā wanted to give away the property to her relatives; but, thinking that Śrīraṅga-nātha was her truest and nearest relative, made a gift of the village of Kōṭṭāllaparru to that god, with all her other belongings, such as gardens, houses, etc.

V. 51. This gift was made on a Thursday, the fifth *tithi* of the bright fortnight of the month Chaitra in the Śaka year 1280, expressed by *nabhaḥ* (zero), *nāga* (the mountains), *nētra* (the eyes) and *indu* (the moon).

Vv. 52-58½. The boundaries and other descriptions of the village of Kōṭṭāllaparru are given as follows:—

The village is situated in the Pānāra country to the west of the Vāsishṭha Gōḍavari. It is bounded on the north by Monambarru village, on the east by the village of Dēva, on the south by Viṭṭuru, on the south-west by Naṅgipūṇḍi and on the north-west by the village of Charykuvāḍaka.

Vv. 59½-63½. The usual admonitory verses.

No. 4.—THE PORUMAMILLA TANK INSCRIPTION OF BHASKARA BHAVADURA :
SAKA 1291.

By DR. V. S. SUKTHANKAR, PH.D.; POONA.

The position of the inscribed stones on the tank-bund.

Inked estampages of the subjoined inscription, which commemorates the construction of a tank, were prepared by the Madras Epigraphical Department in 1903, and it forms No. 91 of the Epigraphist's collection for the year 1902-3. It was briefly reviewed in the Annual Report on Epigraphy for 1903, and it has also received a short notice in an article by the late Mr. Venkayya entitled: Irrigation in Southern India in ancient times.¹ The record is incised on two slabs, one smaller than the other, set up in front of the ruined Bhairava temple at Porumāmilla in the Badvel Taluk of the Cuddapah District, situated in 15° 1' N. and 79° E. The latter district being very dry, cultivation is in general only possible with the help of artificial storing of water. The irrigation tank at Porumāmilla is, according to the District Manual, one of the largest in the Taluk. The inscription, apart from its historical importance, presents various other points of interest, not the least important of which is the light it sheds on the tank-building activity in ancient India.

As regards orthography, the inscription follows the same system which is to be observed in other inscriptions from the Telugu and Kanarese Districts. A superfluous anusvāra is inserted (1) before a nasal + consonant, as in *puṁnya* ll. 13, 46; also in ll. 19, 36, 89: (2) before *h* + consonant, as in *Vijayāmhvayaṁ* ll. 34, 35; also in ll. 57, 65: (3) before *un* as in *vijayōṁnnatāḥ* l. 36: (4) before *rm* as in *kaṁrma*° l. 82. We find also the doubling of a consonant after an anusvāra in *chaṁcheṇa*° l. 18. As in other inscriptions, we notice the mixing up of the two forms of *visarga-sandhi*, as in *taḥssaumya* in l. 23; also in ll. 29, 83, etc.; and the writing of *thth* for *tth* in *°rththana*° l. 100, and of *jhjh* for *jhh* in *°pāyḍjhjhitaṁ* l. 12. Other examples of

¹ See the Director-General's Annual for 1903-4, Part II., pp. 202 ff. — A resumé of the contents of the inscription is included in the new edition of the Cuddapah District Gazetteer.

incorrect orthography are the following : l. 113 *ru* for *ri* ; l. 39 *ri* for *ru* ; confusion of the sibilants *ś* and *s* in ll. 20, 22, 29, 37, 52, 54 and 95 ; *ṇṇ* for *nn* in ll. 66 and 83 ; confusion of *d* and *dh* in ll. 51, 104 and 109 ; sporadic adscript of *y* to an initial vowel as in *yētaḍ* (for *ētaḍ*) l. 21, *yēk=āiva* (for *ēk=āiva*) l. 105. The aspirates are sometimes distinguished from similarly shaped non-aspirates by means of a short vertical stroke added below the letters, as in the modern Telugu alphabet. There is inconsequence in the doubling of consonants after *r* : cf. ll. 7, 10, etc. on the one hand, and ll. 6, 16, etc. on the other. Rough *r* (doubled) is used once in the nomen proprium *Dēvarrāja* (l. 109). It remains to be remarked that the letters are incised between equidistant parallel lines running along the breadth of the slabs.—It is necessary to add a few words on the language of the inscription. Excepting the benedictory words at the beginning of the record and a few phrases employed further on to introduce some of the stanzas, the whole of the inscription is in verse. The language is extremely meagre Sanskrit, and the verses are devoid of poetic embellishment. The writer is indeed guilty of the gravest mistakes of grammar and syntax, most of which are noticed in the foot-notes to the text and translation. To mention just two of them here : in l. 37 *disi pūrvē pratishṭhitah* is used for *disi pūrvasyām pratishṭhāpitah* ; and the first sentence of v. 16 the *verbum actionis* is omitted.—In respect of lexicography the following uncommon words and expressions deserve notice : *kṛitī* (ll. 29, 39) = “ composition ” ; *taṭāka-māṭṛikī* (l. 47) = “ tank-nourished ”, on the analogy of *nadī-māṭṛikā*, etc. ; *bhramā-jala-gatī* (ll. 69, 90) = “ sluice ” (?) ; *madhya-kūrma* (l. 73) = “ elevated ground in the middle (?) ” ; *bhū-vara* (l. 79) = “ king ” ; *gāṅgāya* (l. 111) = “ gold ”.

The object of the record is, as remarked above, to commemorate the construction of the tank at Porumāmilla by king **Bhāskara** *alias* **Bhavadūra**, son of Bukka I. (v. 49). The following analysis gives a synopsis of the contents of the record : The grant commences with invocatory and introductory verses (vv. 1-10) : the succeeding stanzas give the genealogy of the donor, **Bhāskara Bhavadūra** (ll. 11-22) : the next few verses recount the merit attaching to the building of a tank (23-27) : then are given the details of tank construction and the specification of the site of the tank, date of its construction, etc. (28-45) : then the usual imprecatory and benedictory stanzas (46-49) : and lastly, the specification of the *adhikārin* of the tank, and the composer of the record (59-62). The only new facts in the history of the First Vijaya-nagara Dynasty¹ with which the inscription furnishes us are the following : (1) **Bhāskara** *alias* **Bhavadūra** (a name which is not known from any other inscription) was the son of Bukka I., and thus the brother of Harihara II. **Bhāskara** was placed in charge of the eastern provinces—which he ruled from the “ top of the sublime **Udaya-giri** ” (in the Nellore District) ; (2) **Bukka I.** had four brothers, *viz.* **Harihara**, **Kāmpana**, **Mārpa** and **Muddapa** ; and (3) **Anantarāja** was one of the ministers of Bukka I.—The *adhikārin* of the tank was **Dēvarrājan**, son of the minister (probably of **Bhāskara**) **Kumāragiri-Nātha** (v. 50).—The writer, who was rewarded with a gift of land, was the poet **Liṅgaya-Māchanāryya** (*i.e.* **Māchana**, son of **Liṅgaya**) of the family of the **Kautsas**, resident of **Namda-pura** (v. 51). On completion of the tank lands under it were handed over to a number of **Brāhmaṇas** (v. 45).

The question of the construction of the tank is shrouded in some obscurity on account of the unintelligibility of the termini used in the description of the tank.² It would be, therefore, as well to start with the facts regarding the tank as it now stands. I have been able to gather the following information through the kind courtesy of Mr. Banerji, the Collector of Cuddapah,

¹ A succinct and connected account of the facts in the history of this dynasty, gleaned from stone and copper-plate records, is furnished by Rao Sahab Krishna Sastri in his paper entitled “ The First Vijayanagara Dynasty ; its Viceroys and Ministers.” (See the *Director-General's Annual* for 1907-8, Part II., pp. 235 ff.)

² To Rao Sahab Krishna Sastri I am indebted for the explanation of several of the technical expressions.

whom I had addressed on the subject.¹ The tank, which is situated about two miles (and as the inscription also tells us) to the east of the village called Porumāmilla, is elongated in shape, being some 7 miles long and $2\frac{1}{2}$ miles broad. The bund consists of four natural hills connected by three short earthen dams, rivetted with Cuddapah slabs. The western flank thus consists of practically the range of hills which runs north and south between Porumāmilla and Badvāl. The total length of the artificial bund is about 4,500 ft.; the total length including the hills is about 14,000 ft. At the deepest section the bund is about 12 ft. wide at the top and 150 ft. at the bottom, and about 33 ft. deep. The tank has two sources of supply, one natural and the other artificial. The latter was constructed about 20 years ago. The natural feeder is a stream called the Maldōvi river.—The reservoir is provided with four sluices, two of which have been repaired in recent times and provided with screw-gear, and there are five weirs. This is the actual condition of the tank at present.

From the inscription we learn that in the twelfth century of the Christian era tank-building was looked upon as one of the seven meritorious acts which a man ought to perform during his lifetime. The tank at Porumāmilla was called *Anantarāja-sāgara*. It is also stated that for two years 1,000 labourers were working daily on the tank and the dam; and 100 carts were engaged in getting stones for walls which formed a part of the masonry work. The dam was 5,000 *rēkhā-danḍas* long, including the hills, 8 *rēkhā-danḍas* wide, and 7 high. Besides, the author gives us the twelve *sādhanas* of the Porumāmilla tank, and six *dōshas* of tanks in general. Much of this latter is clothed in very obscure language. Nevertheless with the help of the description of the tank given in the previous paragraph we are able to get a fairly clear notion of what the author wishes to convey.² In the *chatur-bhramā-jala-gaṭi* we have a reference to the four sluices; and in the range of hills forming the western flank of the tank we must look for an explanation of remarkable phrase *tadyōga-khamḍo giriḥ*. Again, as the Maldōvi river ends at the tank, the *triyājana* must needs refer to its length from the source to the point at which it enters the tank.—One fact which may be gleaned from the measurements of the tank preserved in the record is of no small significance. Knowing as we do the dimensions of the bund, in terms of the *rēkhā-danḍas* as well as in feet, we are in a position to compute the equivalent of this standard of linear measurement current in the Telugu District in the 14th century. For this purpose it would be safest to compare the values for the height of the bund, which, I imagine, would offer the least variation. In the above-mentioned Report of the Collector, 33 ft. is quoted as the height at the deepest section of the bund. Taking, now, 20 ft. as the minimum height for the bund of any large tank of that size, the average height of the bund in feet works out to be $(20+33) \div 2 = 53/2$ ft. This must roughly correspond to the 7 *rēkhā-danḍas* of the inscription. The equation will be $53/2 = 7$, and this gives us roughly $1\frac{1}{2}$ yard as the equivalent of the *rēkhā-danḍa*, which, by the way, corresponds approximately to the distance from the top of the shoulder of one arm to the tip of the middle finger of the other arm, measured along the chest, for an average man. I mention the latter fact, as it is well known that in primitive times a standardised (but locally varying) value of the lengths of portions of the human body served as units of length; cf. the Indian measures *aṅguli*, *hasta*, *danḍa*, and the European *foot*.³

One other feature of this record deserves mention here. Early in the beginning of the inscription (vv. 1-3) we find enumerated the characteristics of an edict (*sāsana-lakṣaṇa*), which include hints on composition and the significance of the metrical foot (*gaṇa*) with

¹ Some time ago, when I visited the site of the tank, I took the opportunity of verifying and correcting the statements in this report. Some few fresh observations which I made on the spot have also been embodied in the succeeding remarks.

² See notes 6-8 on p. 108 and 1-2 on p. 109.

³ Expressed by the chronogram *bhū-namdy-akṣhy-śka*, and in numerical symbols.

which a *śāsana* commences (v. 2). The latter is a curious specimen of superstition: the *gaṇa ma* (— — —), when standing at the beginning of a *śāsana*, secures bliss; *na* (○○○) in the same position secures wealth, etc.! Further we learn that in a faultless verse the *visarga* should stand at the end of the complete stanza and not at the end of the first half (v. 3)!

The inscription is dated on the 14th of the bright half of the month of Kārttika, in the cyclo year Saumya, corresponding to Śaka 1291 (expired) and Kaliyuga 4470. There is some doubt as to the week-day. The syllables *guru* in l. 58, which evidently introduce the name of the week-day, are clear enough; and the following letters must be read as *pushya*, as the vortical stroke between the aksharas *ru* and *pu* is nothing but an accidental depression in the stone. In that case it would seem that the week-day was Thursday, and the *nakshatra* Pushya. But Dewan Bahadur Swamikannu Pillai, whom I had addressed on the subject, informs me that the *tithi* ended on Monday, the 15th October, A.D. 1369, at about 7 *ghaṭikās* after mean sunrise; and the *nakshatra* for that day was Āśvini, which came to an end about 47 *ghaṭikās* after mean sunrise.

For purposes of orientation the localities Śrī-parvata (i.e. Śrī-śailam), Ahōbala, Siddha-vaṭa, Udaya-giri and Porumāmilla are mentioned. Of these only Siddha-vaṭa needs to be specially noticed here. Its denomination in the inscription is *deśaka*, i.e. subdivision of a country: therefore the name could well be, I think, linked with the modern *Taluk Siddha-vaṭṭam* in the Cuddapah District, the boundary of which is not far removed from the site of the tank.

A reference to Hēmādri's *Dānakhaṇḍa* (which is undoubtedly what is meant by *Hēmā-dri-kṛiti* in l. 39) shows that that work enjoyed the reputation of an authority in the Telugu country at the beginning of the 14th century of the Christian era.

TEXT.¹

[Metres: v. 1, *Anuṣṭubh* (Śloka); v. 2, *Śārdūlavikṛīḍita*; vv. 3-4, *Anuṣṭubh* (Śloka); vv. 5-7, *Śārdūlavikṛīḍita*; v. 8, *Māṇḍākrāntā*; vv. 9-10, *Anuṣṭubh* (Śloka); v. 11, *Śārdūlavikṛīḍita*; vv. 12-13, *Anuṣṭubh* (Śloka); v. 14, *Upajāti*; vv. 15-36, *Anuṣṭubh* (Śloka); vv. 37-38, *Śārdūlavikṛīḍita*; vv. 39-40, *Upajāti*; v. 41-43, *Anuṣṭubh* (Śloka); 44, *Śārdūlavikṛīḍita*; v. 45, *Anuṣṭubh* (Śloka); vv. 46-47, *Śalini*; vv. 48-50, *Anuṣṭubh* (Śloka); v. 51, *Śārdūlavikṛīḍita*; v. 52, *Anuṣṭubh* (Śloka).]

TRANSLATION.

(L. 1) May there be freedom from obstacles ! Salutation to the preceptors ! Salutation to the (various forms of) Gapa-patis⁷ who have Pushti (for their wives) !

(L. 2) The characteristics (*lakṣaṇa*) of an edict (are as follows) :—

(V. 1) Out of the five⁸ mystic syllables (*praṇava*) the sacred *bīju*⁹ (syllable) should be uttered first. One should avoid (the use of the letters) *cha*, *ka*, *ṣa*, *ha* in the *ṛitu* (6th), *adri* (7th), 10th, and *rudra* (11th) (syllables).

(V. 2) At the beginning of a composition (the *gana*) *ma*, consisting of three long (syllables and representing) the Earth, brings bliss ; *na* with many (i.e. all) short (syllables, which represents) THAT,¹⁰ (brings) wealth ; and *ya*, with the first (syllable) short (and representing) Water, (brings) gold ; *ja* with the middle (syllable) long, (representing) the Sun, (brings) disease ; *ra* with the middle (syllable) short, (representing) fire, (brings) fear ; *sa* with two short (syllables) in the beginning, (representing) Wind, (brings) destruction ; *ta* with a short (syllable) at the end, (representing) Space, (brings) lordship ; (and) *bha* with a long (syllable) at the beginning, (representing) the Moon, (brings) happiness.

(V. 3) Not having a *visarga* at the end of the first half ; absence of compounded words at the beginning ; and having a *visarga* (at the end as) *śekhara* : (these are) the best characteristics of an edict-stanza.¹¹

¹ Read °प्रधान°.

² Read हृद°.

³ Read °कम'द्वे.

⁴ Read °पाङ्ग°.

⁵ Read ण°.

...

⁶ Read °येण चरवे°. Note the hiatus ! In the original an *i*-sign is also added to *ru*.

⁷ The number of Gapa-patis is variously given by different authors. Cf. Bhandarkar, *Vaiṣṇavism*, *Saivism*, etc. (*Grundriss d. indo-arischen Philologie*, Band III, Heft 6, pp. 149 f.).

⁸ The dictionaries mention only one *praṇava*, namely, the syllable *Om*.

⁹ It is the mystic letter forming the essential part of the *mantra* of any deity (Apte's Dictionary).

¹⁰ The Earth, Water, Sun, etc. mentioned in this verse are the eight forms of the *Aṣṭamūrti* Śiva ; and seven of these agree with those enumerated by Kālidāsa in the introductory verse of the *Śakuntalā*, namely, the five *mahābhūtas*, the Sun and the Moon ; consequently the remaining one, which is referred to under *na-gana* with the pronoun *asau*, must be the sacrificing priest *kōtri*.

¹¹ Needless to say, the author himself does not follow the rules of versification laid down here.

(V. 4) He (alone) should frame an edict whose diction is elegant, who is conversant with *Śruti*, *Smṛiti*, *Purāṇa*, *Itihāsa* and *Āgama* (and is also) acquainted with the particularities of time and place.

(V. 5) May the merciful Śrī (Lakshmi), by whose extreme grace Hōramba (Gaṇēśa) brought about the weaving together (of events) in the entire world of movables and immovables,¹ (and) the lotus-born Creator (Brahmā) by mere volition brought into existence the gold-bright mundane egg, resting on the expanse of water, always bestow prosperity on the three worlds !

(V. 6) May Achyuta (Vishṇu) protect the three worlds, freed from misery, who, in the form of a boar, having extracted with the tip of his tusk the Earth submerged in the ocean, placed (her, i.e. the Earth) in (a corner of) that (ocean) and (on that account) obtained wondrous and matchless merit, (evidently) because there was altogether no such (merit) to compare with (known till then) as (that accruing) from the establishment of a tank.²

(V. 7) May the propitious (Śiva), the sole bestower of happiness on persons resorting to him, whose right and left eyes³ augment the rain and the herbs of the three worlds ; on (whose) brow (is *Agnī*), borne of the Waters,⁴ (whose) friend (is) the lord of riches (*Kubēra*), whose chariot is (the Earth) with jewels in her interior, (whose) abode (is) Śrīgiri (Śrīsailam), (and whose) bow (is) the Golden Mount (*Mēru*), protect you !⁵

(V. 8) May the Earth (bearing) plentiful crops always protect you !—she whose form is resplendent with (her) limbs, namely, the seven continents ; with *Mōru* for her head ; the rippling oceans of milk for (her) beauteous breasts ; decorated with *Rōhana*⁶ and other (mountains) ; with the glittering oceans for (her) sumptuous garments ; and beautiful with rivers and lotus ponds.

(V. 9) A son, a literary composition and a tank, (hidden) treasure, a Śiva temple, a forest(-grove), a Brāhmaṇa-village : (these) seven (kinds of) offsprings are the best.⁷

(V. 10) A performer of these and other meritorious works was the earth-ruler Bhāskara, surnamed Bhavadūra.⁸ His lineage I shall narrate.

(V. 11) The Moon (was) born from the Ocean of Milk. Saumya (was) the son of the Moon. In his race were born Purūravas and Nahusha ; from the latter king Yayāti. His son (was) Yadu. In this race of the Yādavas (was born) the azure-robed (Balarāma) and the blessed Hari. In (the age of) Kali was born in his family the illustrious king Saṃgama.

¹ Probably in his capacity of Vighnēśvara.

² What is meant is that the exploit of Vishṇu is quite insignificant when compared with the sinking of a reservoir, such as the one sunk by Bhāskara, the patron of the poet.

³ I.e. the Sun and the Moon.

⁴ In the sequence of creation, as described in the Upanishads, Water comes after Fire ; hence the latter is fancifully represented to be the father of the former.

⁵ This is a reference to the legend of Śiva slaying the demon Tripura.

⁶ *Rōhana* is the name of a mountain in Ceylon. It is not unlikely that a *dheani* of the sense *ārōhana* ('hip') is also intended.

⁷ In the Gaṇapēśvara Inscription of Gaṇa-pati (*Ep. Ind.*, Vol. III, pp. 88 ff.) the seven " offsprings " are, thus described :

Sampāditaṃ yathāvat utakṛitidhanavāhasuragēhātḥ |

sataṭākair yaḥ sasaptābhīr itaiḥ saṃtānavān bhavati ||

The Vanapalli plates of Anna Veṇa (Śaka 1300) also allude to them as *sapta-samtati* (*Ep. Ind.*, Vol. III, p. 61). In *Hemādri-kṛiti-mārgēṇa* (l. 29) we have again the word *kṛiti* used in the sense of ' composition.'

⁸ As remarked by Dr. Hultzsch in the report on Epigraphy for 1902-3 (see p. 6, para. 15), Bhavadūra seems to be a Sanskritised form of Bahādūr.

(V. 12) This king Saṅgama, having worshipped the gods Hari and Hara, obtained by their grace a son, king Harihara.

(V. 13) The supreme lords of the Middle Country¹ (*Madhya-dēśa*) extending from the eastern to the western ocean, viz. the celebrated (kings), of the Solar and Lunar races, were occupied in doing "foot-salutation" to him.

(V. 14) From his causing hostile kings to tremble his uterine brother was (known) in the world (as) king Kampana. After him his younger brother Bukka, the crest-jewel among kings, the husband of Lakshmi, was the enjoyer of the Earth, who was perfectly constant (to him).

(V. 15) (Then) were born Mārāpa and Muddapa, two brothers of king Bukka. And these five virtuous sons were incarnations of the Pāṇḍavas in the age of Kali.

(V. 16) Vāsudēva, who loves his worshippers and (who had acted) in former times (as) the messenger (and) the charioteer of the Pāṇḍavas, (having countless incarnations), became also the minister of these in the form of Ananta.²

(V. 17) Through having Anantārāja for his minister king Bukka ruled over the whole surface of the earth and acquired the glory of Dēvēndra.

(V. 18) His city, Vijaya by name, (was situated) on the bank of the Tunga-bhadra near (the temple of) the blessed Virūpāksha (Śiva), well propitiated on account of steady adoration.

(V. 19) Formerly the number of the sons of Śaśabindu (was very great) in the world. That is but a story ! (?) The countless sons of king Bukka were exalted through triumph.³

(V. 20) Out of these sons king Bukka had placed Bhāskara, exalted through the glory of independent sovereignty, in the eastern direction (of his empire).

(V. 21) And he, ruling from the top of the sublime Udaya-giri⁴ the earth freed from the thorns (of enemies), though Bhāskara, (i.e. the Sun, is still) the delighter of the Earth and beloved of the Brāhmaṇas.⁵

(V. 22) Making charities in various ways in keeping with the treatise of Hēmādri,⁶ he heard that the merit attaching to the gift of water was the greatest of all.

(V. 23) On the authority of the Vēdas : "Verily all this is water !"⁷ And the Śruti says that : "From water alone is produced Food ; (and) Food is Brahman !"

(V. 24) There can be no doubt (that) Water alone is the seed of the world of movables and immovables. Why speak more ? I shall describe the superiority of water (as follows) :—

¹ As the early Vijayanagar kings had no claim to sovereignty in any part of India north of the Vindhya, Madhyadēśa cannot have its usual significance, but must refer to the country lying between the eastern and the western ocean, namely, the Dekkan plateau.

² One must supply a verb like *kṛtavān* in the first half of the verse.

³ The construction of the first half of the verse is not quite clear to me. In Ch. 65 of the Drōṇa-parvan of the *Mahābhārata*, we are told that Śaśabindu had 10,000 wives, on each of whom he begat 1,000 sons. These, it is stated, he gave away to the Brāhmaṇas in the *Aśvamedha* sacrifice which he performed. The "countless sons" of Bukka are his meritorious acts like the *sapta-samāna* mentioned in v. 9.

⁴ This must refer to the fortification on the top of the Udaya-giri hill. Even now U. is an exceedingly strong hill-fortress.

⁵ The pun on the words *kuvalaya* ('night-lotus' and 'earth') and *devīja* ('Brāhmaṇa and Moon') is a very common example of the Virōdhābhāsa.

⁶ Namely, the Dāna-khaṇḍa. Hēmādri was the minister of the two Yādava kings Mahādēva (1260-71) and Rāmachandra (1273-1310). See Bhandarkar, *Early History of the Dekkan*, pp. 88 f.

⁷ The phrase *apō vā*, etc. is a part of the *mantra* with which water is purified. *Idaguh* is the word *idam* as it is pronounced by the Yajurvedins in the recitation of Vedic texts.

(V. 25) Even that (great) Śiva is the bearer of the Gaṅgā; Viṣṇu has the ocean for his abode; Brahmā is sprung from the water-born (lotus). Hence Water is superior to everything (else).

(V. 26) A shed for distributing water (*prāpā*), a well and a reservoir, a canal and a lotus-tank: the merit of (constructing) them is millions and millions (of times) higher in succession.

(V. 27) As the water of a tank serves to nurture both movable and immovable creation on (this) earth, even the lotus-seated (Brahmā) is unable to recount the fruit of merit (attaching) to it.

(V. 28) Having thus heard the supreme reward, king Bhavadūra, the pious soul, commenced to make the earth tank-nourished (*taṭāka-mātrikā*).¹

(L. 48) Its procedure (was as follows):

(Vv. 29-31) It (i.e. the tank) is situated in the country to the south of Śrīparvata (Śrīśaila), the great sacred place of pilgrimage; two *yōjanas*² to the east of the sacred place (*tīrtha*) called Ahōbala; in the division of the gentle blessed Siddhavaṭa-nātha; two *yōjanas* to the west of his (capital) Udaya-giri; and to the east of the flourishing city of Porumāmilla. I shall (now) describe in this edict the sequence of the period of construction of the tank:—

(Vv. 32-35) ³In the second half of the creator's life-time, in the Śveta-varāha *Kalpa*, in (the age of) the Vaivasvata Mannu, and in the 28th Yuga,—in that divine part of the country—in the first quarter of Kali, after the lapse of four thousand, four hundred and seventy—(in figures) 4470—years of mortals, and also after the (lapse) of Śaka years measured by the number of the earth (1), the Nandās (9), the eyes (2), and one (1)—(in figures) 1291—in the (cyclic) year Saumya, in the month called Kārttika, on the fourteenth (day) of the bright half, on the auspicious day of Guru combined with Pushya, when there was Karkāṭaka *lagna*, under the influence of well-chosen auspicious planets,—

(V. 36) Of the tank constructed (at the above specified time and place) according to (the requirements of) the *Śāstra* I shall in this edict describe the twelve constituents (*aṅga*⁴) for the benefit of future kings:

(V. 37) (i) a king endowed with righteousness, rich, happy (and) desirous of (acquiring) the permanent wealth of fame, (ii) and Brāhmaṇa learned in Hydrology (*pāṭhas-śāstra*), (iii) and ground adorned with hard clay, (iv) a river conveying sweet water (and) three *yōjanas* distant (from its source⁵), (v) the hill parts of which are in contact with it, (i.e. the tank),⁶ (vi) between these (portions of the hill) a dam (built) of a compact-stone wall, not too long (but) firm, (vii) two extremes (*śrīṅga*) (pointing) away from fruit(-giving) land (*phala-sthira*) outside,⁷ (viii) the bed extensive and deep, (ix) and a quarry containing straight and long stones, (x) the neighbouring fields, rich in fruit (and) level, (xi) a water course (i.e. the sluices) having strong eddies (*bhramā*) on account of the position of the mountain (*adri-sthāna*),⁸ (xii) a gang of men (skilled in the art of) its construction,—with these twelve essentials an excellent tank is easily attainable on (this) earth.

¹ With *taṭāka-mātrika* cf. the terms *dēva-mātrika* and *nadī-mātrika* in a similar sense.

² Taking a *yōjana* to be equal to 9 miles, this distance is only approximately correct.

³ Construe: *dhātōḥ parārdhakālē...divyē taddēta-ḥṛgē nirmitasya taṭākasya dvādaśāṅgāni vakṣhyāmi*.

⁴ These *aṅgas* are later on called *sādhana*s (l. 70 of the text) and are no doubt identical with the latter.

⁵ See above, p. 99.

⁶ This must obviously refer to the range of hills which is utilised to form a part of the dam.

⁷ I.e. below the tank.

⁸ This may be taken to be a clumsy description of the fact that at the egress the water is led over a stony bed along a tortuous line, so that it issues whirling round with great force, forming strong eddies.

(V. 39) While (i) water oozing (P) from the dam, (ii) saline soil, (iii) (situation) at the boundary of two kingdoms,¹ (iv) elevation (*kūrma*) in the middle (of the tank) bed,² (v) scanty supply of water and extensive stretch of land (to be irrigated), (vi) and scanty ground and excess of water : (these are) the six faults in this (connection).

(V. 40) Devoid of faults and adorned with a multitude of good qualities, renowned in the world by the name *Anantārāja*, this endless ocean, of which the water is sweet, was founded by king Bhāskara.

(V. 41) (There were) one thousand labourers (working) at the tank and dam every day, and a hundred carts (were employed) for the masonry work of the sluice and wall (*bhramā-bhitti*).

(V. 42) And this most excellent tank was completed in two years. There is, to be sure, no limit at all to the expenditure of money and grain in this (connection).

(V. 43) The measurements in terms of *rēkhā-damḍas*³ of the height, the width, and the length of the dam together with (the portion of) the hill (included in the) dam, are here given :

(V. 44) The dam, having eddying waterducts (i.e. sluices)⁴ (and) protected by Vighnēśa, (Gaṇa-pati), Īśvara) (Śiva), Viṣṇu, Bhairava, and the great Durgā, is one which has the enormous length of five thousand *rēkhā-damḍas*, height of seven and its width eight.⁵ And the land (is) excellent and yields plentiful crops in all seasons and contains groves.

(V. 45) This land was liberally given for the gratification of gods and Brāhmaṇas. Through the merit of this gift of land the tank was made to be an ornament (of tanks).

(V. 46) Just as the dam of a reservoir should not be injured, so likewise the *dharma*-dam of the ocean of kings. Therefore I, Bhāskara, repeatedly request the kings on earth to protect my charity.

(L. 99 f.) These are the ancient *ślōkas* of entreaty :

[Then follow three of the customary verses.]

(V. 50) The Officer-in-charge (*adhikārīn*) of this tank is the clever son of the minister called Kumāragiri-nātha, Dēvarāja by name.

(V. 51) Having obtained from king Raghu gold by the ororo, Kautsa gave (it as) *dakṣiṇā* to his preceptor, Varatantu, who had bestowed on him the fourteen branches of knowledge. By a descendant of him (*scil.* Kautsa)⁶ the illustrious Liṅgaya-Māchanāryya,⁷ of Nāmdapura, best of Brāhmaṇas and a follower of the Rīgyēda, the auspicious edict was composed.

(V. 52) (One) *khārī* (of land) producing paddy and (one) *khārī* of black-soil land,—(these) were out of regard given to him by Bhāskara, preceded by a libation (of water).

¹ Perhaps as, in this case, the position of the tank might lead to unpleasant consequences during a conflict between the neighbouring kingdoms.

² The bed ought to form a complete valley.

³ A standard of linear measurement roughly equal to 1½ yard. See p. 99.

⁴ For *bhramā-jala-gati* see note 8 on p. 108.

⁵ The pronoun *tad* in *tad-vistara* cannot be taken to refer to the noun immediately preceding, but must refer to the *sītu* of which the dimensions are being given. See l. 86 of the text.

⁶ The sense is that the poet belonged to the Kautsa *gotra*. There is, however, a confusion in the mind of the poet between Kautsa the patriarch, and Kautsa the pupil of Varatantu alluded to in the *Raghu-vamśa*, Canto 5, vv. 1 ff.

⁷ I.e. Māchana, son of Liṅgaya.

No. 5.—HARĀHA INSCRIPTION OF THE REIGN OF ISANAVARMAN, [VIKRĀMA SAMVAT] 611.

BY PANDIT HIRANANDA ŚĀSTRĪ, M.A., M.O.L., LUCKNOW.

This inscription was brought to my notice in March 1916. The stone slab on which it is written was found, I am told, some time ago at a village near Harāhā in the Bareilly district in the estate of the Rājā of Harāhā. A Thākūr of that locality took possession of it and, as has very often been the case with similar documents, used it for grinding spices. Some local Pandit reported the matter to Thākūr Prithvipāl Singh of Sarāphr, who wrote to Rājā Raghu Rāj Bahādur Singh of Harāhā and got hold of it. For some time it lay in the office of the "Lucknow Advocate," where it was shown to me by Mr. S. P. Sanyal, Rāj Sahib, the Managing Editor of the Journal. The Hon'ble Mr. R. Burn, I.C.S., the Chief Secretary to the United Provinces Government, at my suggestion, has secured it for the Lucknow Museum, where it has now been deposited as a present from the said Rājā of Harāhā.

It is incised with great care and neatness on a smooth slab of sandstone which measures about 2½' by 1' 4½". There are 22 lines of writing in it, cut in the characters of the northern class of Indian alphabets, resembling the Gupta script of about the 6th century A.D. The language used in the epigraph is Sanskrit verse throughout. Excepting a few slight injuries here and there, the inscription is in a very good state of preservation.

As to the orthography a few points are noticeable in the record. The writer has duplicated the symbol for *k*, when it is conjoined with *ra*; e.g., *-shakkra-* in l. 9. Consonants following the symbol for *r* are very often doubled as in *dhāsur-mmaru-* in l. 10. The rules of Sandhi are at times disregarded, as in *badhnamāiva*, l. 9, instead of *badhnamāivā*. We find *gh* in place of *mh* in l. 2 and *sh* in l. 13. Such a tendency to pronounce the aspirate *h* combined with a nasal like the aspirated guttural media is rather common in the north-west of India, where the word *śimha* forming part of proper names is generally written and pronounced as *sihgh*. In l. 15 *dhritā* is written for *dhṛitā*.

Two marks of punctuation are to be noticed in the inscription. One is a short horizontal stroke, which stands mostly for *ardhavirāma* (half-stop), and the other is a double perpendicular line which indicates the completion of a stanza, or *pūrṇavirāma*, i.e., full-stop.

The composer of the inscription does not appear to have been a poet of a very high order or a *Kavi* par excellence. The tautological expressions which are to be met with in different places are too glaring for a real poet. But the prosody seems to be all right, and in v. 9 the exigencies of the metre have even caused the author to use a wrong form of a word, writing *hṛiyā* for *hṛiyā*, which would have offended against the scansion.

The author of the eulogy appears to be rich in vocabulary, though perhaps he did not hesitate to put in Prakrit words, the use of which will be instanced by the word *-āgara-* in place of Sanskrit *ākara*¹ in l. 11, unless we take *ga* to be a simple mistake for *ka*.

The object of the inscription is to record that in the year 611, Śūryavarman, the accomplished son of the Maukhari king, Īśanavarman, while hunting, saw a small dilapidated

¹ *Āgara* (Sanskrit *ākara*) means a collection or mine. Cf. 'Sab gun kī āgar dhiyā, nāh bin bē hāl,' a proverbial saying equivalent to "great braggars, little doers" (*lit.*, you are a perfect mine of good qualities, my child, you only want a nose).

The word *akuṣhinēna* in line 8, which may be taken for *akaṣhinēna* or *akaṣṭilēna*, may have been a Prakrit form cf. *kuphā*, 'to fret' (from Sansk. *krudh*) or *kuphā*, 'to beat mercilessly.'

Śiva temple and had it rebuilt, making it much higher¹ than it was originally and white like the moon, and that he gave it the name of *Kaśmāśvara* (i.e., the Lord of bliss).

The name of Śūryavarman is new to the list of Māukhari princes known up to this time. Whether he was the heir or had any claims to the throne, our inscription does not say. From the description, however, which is given in ll. 17-19 it clearly follows that he was an accomplished son of Išṇavarman. According to the Aśṛgaṛh copper seal² inscription, which makes no mention of Śūryavarman, Išṇavarman was succeeded by Śarvavarman. The coins of both of these rulers, namely, Išṇavarman and Śarvavarman, are known to us.³ But no coin bearing the name of Śūryavarman has yet come to light. The reading of the names Śūryavarman and Śarvavarman is indisputable; for the lettering is clear both in the inscriptions and the coins. Therefore Śūryavarman must have predeceased his father, if he was not one of the *rāja-kumāras* or princes junior to the heir-apparent. Or could he have been a rival of Śarvavarman?

This inscription does not supply any geographical data, and it is impossible to say what part or parts of the country the rulers whom it describes held or governed. But it gives them the distinctive epithet of Mukhara, which in Sanskrit is used in different meanings. Why they were so called is not known with certainty. But according to Kaiyaṭa and also Vāmana, the two famous expositors of Pāṇini's system of grammar, who flourished probably about the 13th and the 7th century A.D. respectively, the term is a patronymic signifying the descendants of Mukhara, who must have been the *ādipurusha* or the first to bring his family into prominence and thereby caused it to be known after his name. Whether Mukhara was a proper or an attributive name, we have no means of ascertaining. But it will not be unreasonable to assume that it was a surname and that the man was so called for his being a 'leader' or for his fighting in the forefront of the armies which he led into action, as it is such characteristics only which would go to make a man the founder of a line. That Mukhara was a personage of such a distinction is evidenced by Bāṇa, who in the following statement clearly places him at the head of a family.

"Soon Gambhīra, a wise Brāhmaṇ attached to the king, said to Grahavarman, 'My son, by obtaining you Rājyaśrī has at length united the two brilliant lines of Pushpabhūti and Mukhara, whose worth, like that of the Sun and Moon houses, is sung by all the world to the gratification of wise men's ears.'"

As Pushpabhūti was an ancestor of Harsha, the well-known king of Sthānviśvara, the Mukhara in all probability was ancestor of Grahavarman, the ruler of Kanyakubja. He is not indeed mentioned in the inscriptions that have yet come to light; but possibly it is because of his being a remote ancestor.

The author of the *prasasti* appears to connect this dynasty with the Solar race. He says that the Mukharas or Māukharis were the descendants of the hundred sons whom Aśvapati obtained from Vaivasvata, or the seventh Manu, who is supposed to be born of the Sun and to preside over the present age. The name Aśvapati is applied to many individuals, of whom the king of Madra and father of Sāvitrī, the well-known heroine of an episode of the Mahābhārata, is very familiar. If that was the person whom the author of the composition had in view, the Mukharas, according to the tradition which was evidently current at the time when it was written, must have originally belonged to the north-western part of India, where Varāhamihira has located the Madras.⁴

¹ This is inferred from the pun on the word *saṃannatam-ākāśa* in the 20th stanza.

² Fleet, *Corp. Insep. Ind.*, Vol. III, pp. 219 ff.

³ Mr. R. Burn, *Jour. R. A. S.*, 1906, pp. 483 ff.

⁴ Cowell and Thomas, translation of the *Harṣacharita*, p. 128.

⁵ *Bṛhat-saṃhitā*, 14, 22.

That the family of the Maukharis is a very ancient one is proved, as Dr. Fleet¹ has already pointed out, by the legend *Mokhalinam* written in Mauryan Brāhmi characters on a clay seal which was secured by General Cunningham at Gayā. Evidently this is a Prakrit equivalent of the Sanskrit word *Maukharinam*, which is a derivative of *Mukhara* and signifies "of the Maukharis." From the scholia² referred to above it would appear that the term was possibly known to Pāṇini and also to Patañjali. That the Maukharis were potent rulers in the sixth and seventh centuries is evidenced by several inscriptions that have already been published. The same inference can be drawn from the accounts found in the work of Bāṇa, the well-known author of the *Harshacharita*, the historical romance of the 7th century A.D. The high esteem they commanded about the time of Harsha can be estimated from the manner in which Bāṇa speaks of them. While praising *Avantivarman*, the brother-in-law of Harsha, he says,³ "at the head of all royal houses stand the Mukharas, worshipped like Śiva's foot-print by all the world." This would go to indicate that these princes were not upstarts, but of good descent. That they were enterprising rulers would be seen not only from their description given in the commencement of our inscription, but from the fact that there was more than one branch of the family. The Maukharis, for instance, of the Barābar Hill cave inscription, as is clear from the line of descent given, were different from those of the Aśirgaṇḍ copper seal and of the present inscription. This surmise is supported by the references which have already been noticed.

As has already been remarked, the historical identity of the founder of the dynasty is not known. But the epigraphs that have so far come to light, while giving the line of descent, start with *Harivarman*. From *Harivarman* to *Īśānavarman* it runs as follows:—

The Mahārāja *Harivarman*, his son from *Bhaṭṭārikā Dēvi Jayasvāmini*, the Mahārāja *Ādityavarman*; his son from *Bhaṭṭārikā Dēvi Harshaguptā* the Mahārāja *Īśvaravarman*; his son, begotten on the *Bhaṭṭārikā Dēvi Upaguptā*, was the Mahārāja *Īśānavarman*.

Beyond giving ordinary praises of the first three princes, namely, *Harivarman*, who is said to have had the surname *Jvālāmukha*, *Ādityavarman* and *Īśvaravarman*, our inscription does not speak of any historical event which might have taken place in their reigns. Coming to *Īśānavarman*, however, it alludes to some of his exploits which appear to be historical. They are three, namely, first his conquest over the "Lord of the *Āndhras* with their troops of elephants," secondly, his routing the *Śūlikas* "possessed of an innumerable cavalry," and thirdly, his "driving away or victory over the *Gaudas*." The first of these is evidently mentioned in the Jaunpur stone inscription, which has been attributed to *Īśvaravarman*, and which mentions the *Āndhras* in the latter portion,⁴ but which is incomplete.⁵

Śūlika appears to be a new name, and I am not aware of any other epigraphic reference to it. Possibly it is identical with the *Śaulika* of the *Bṛhatsaṃhitā*⁶ and the *Mārkaṇḍēyapurāṇa*⁷ and is to be located in the south-east along with *Kaliṅga*, *Vidarbha*, *Chēdi*, etc. Unfortunately none of the hostile kings is named in this record; otherwise it would have been very valuable for chronological purposes.⁸

¹ *Corp. Ins. Ind.*, Vol. III, p. 14.

² The Scholiasts give only three illustrations, *Paunīkyā*, *Bhaunīkyā* and *Maukharyā*, under the aphorism (Pāṇ. IV. I. 79) which explains the formation of the words in the *shya* suffix.

³ *Loc. cit.*, p. 122.

⁴ The names of the queens are given in the Aśirgaṇḍ copper seal inscription, but omitted in this epigraph.

⁵ See Fleet, *Corp. Ins. Ind.*, No. 51, p. 229.

⁶ On this account it will be perhaps more appropriate to ascribe that inscription of Jaunpur to *Īśānavarman* and not to *Īśvaravarman*, as has been done by Dr. Fleet.

⁷ XIV, 8.

⁸ LV.

⁹ Dr. Fleet's remarks on the Jaunpur inscription, *loc. cit.*, No. 51, p. 229.

By far the most noteworthy point in this inscription is the date. I believe this is the only dated record of the Maukhari kings that has yet come to light. The year is thus given in words in v. 21: During the year of six hundred autumns increased by eleven,¹ when *Īśānavarman*, who vanquished his foes, was the lord of the earth. The era to which this year belongs has not been specified, but the use of the term *saradā* will indicate that it is identical with the *Mālava*, or *Vikrama*, era which, as the late Professor Kielhorn elucidated long ago, began in autumn (*sarad*).² Different questions connected with the origin, name and use of his reckoning have been fully dealt with by other scholars, and it will be superfluous to discuss them here. The corresponding date of the Christian era is 554.

Īśānavarman, as has just been said, was ruling in the year 611. As he was a contemporary of *Kumārāgupta* of *Magadha*, with whom, according to the *Aphsā* inscription,³ he was at war, and, as according to the *Āśirgaṇḥ* copper seal inscription he was the father of *Śārvavarman*, this record will go to fix the time of these rulers as well with great certainty. But this date of *Īśānavarman* calls for some remark. No dated record of his rule being available, scholars had to make conjectures regarding his date. Cunningham, for instance, gave *circa* A.D. 560 and Dr. Hoernle A.D. 564. Mr. V. Smith⁴ wanted to move it back and bring it to A.D. 502. But now the new epigraph has removed all doubts and established the date, and we can re-examine the dates on his coins as well as those on the coins of his son and successor, namely, *Śārvavarman*, that have been brought to light. The Hon'ble Mr. Burn has summarized their dates as follows :⁵—

(1) *Īśānavarman* : 54 (Cunningham, *Coins of Med. India*, ii, 12, and V. A. Smith in *Jour. Beng. As. Soc.*, 1894, p. 193) ; 55 (Cunn. *Arch. Surv. Rep.*, IX, p. 27, where the name is read as *Śāntivarman*).

(2) *Śārvavarman* : 58 (V. A. Smith, l.c.) ; 234 and 23-.

(3) *Avantivarman* : 57, 71, and 250.

Assuming that a new Maukhari era commenced about 500 A.D., he converted these dates into the following years of the Christian era :—

Īśānavarman 553.

Śārvavarman 553, 54 or 55, 557.

Avantivarman 556, 569, 570.

He further observed that the dates of *Śārvavarman* and *Avantivarman* overlapped and that it was possible to read 67 instead of 57 on the latter's coins.

In this connection I think the following observations will not be out of place. *Avantivarman* is known to us from the *Harshacharita* as the father of *Grahavarman*, the brother-in-law of *Harsha* and the husband of *Rājyaśrī*, who met his death at the hands of a king of *Mālwa* about 605 A.D. From the *Dśō-Baraṇār* inscription of *Jīvitagupta II* it would appear that he was the son and successor of *Śārvavarman* *Maukhari*.⁶ This synchronism will bring *Śārvavarman* and *Avantivarman* to about 560 and 580, respectively, giving an average of some 20 years to each of them, and make 67 as the more probable reading of the date of *Avantivarman*. But

¹ The dictionary gives 'redundant' as one of the meanings of *atirikta*. This would suggest that 11 is to be deducted from 600. But no instance is known to me where the word is used in this way.

² *Ind. Ant.*, Vol. XX, pp. 407 ff.

³ *Corp. Inscr. Ind.*, Vol. III, No. 42.

⁴ History and coinage of the Gupta period, *Jour. Beng. As. Soc.*, 1894, p. 195.

⁵ *J. E. A. S.*, 1906, p. 847.

⁶ The genealogy given in the footnote No. 3, page xi, of the translation of the *Harshacharita* by Cowell and Thomas cannot hold good as regards *Suñthitavarman*, the contemporary of *Ādityasēna*, who flourished about A.D. 647. (V. A. Smith, *Early History of India*, 3rd edition, p. 313.)

how to explain the dates on the coins of Śarvavarman and Īśānavarman? According to our epigraph the latter was ruling during the rainy season of the (Vikrama) year 611, i.e., the years 235 and 554 of the Gupta and Christian eras, respectively. That the dates on the coins which are expressed in hundreds and odd numbers belong to the Gupta era is also undoubted. How could then Śarvavarman issue coins in his own name when his father was alive and ruling the country? Obviously, therefore, there is some error in the reading of the dates on the coins, and the year of Śarvavarman is to be moved on. Cunningham noticed¹ one coin of Īśānavarman which is dated in the year 257. If he read the date correctly, Śarvavarman will have to be placed about the last quarter of that century, i.e., the 6th century of the Christian era.

Besides these dates in the Gupta era a few other dates, read on the coins of these Maukhari kings and on those of Tōramāṇa, have formed the subject of considerable discussion. But, as the date of Īśānavarman has now been indisputably settled, we cannot help accepting one of the two alternatives pointed out by Mr. Burn²; otherwise the dating of the coins of the Mūṇa rulers in the years of one and the same reckoning cannot be explained:—"Either the date on Tōramāṇa's coins is in a different era from that of the Maukharis or else this Tōramāṇa is not the father of Mihirakula." Besides there is another point. The Aphaṣṭ inscription alluded to above says that the Maukharis threw aloft in battle the troops of the Hūṇas, in order to trample them to death. This being the case, it looks very unlikely that the Maukharis would use an era of their enemy.

The dates on the coins of these kings appear to be doubtful; and until some better specimens are available for comparison, I do not like to hazard a conjecture. But it is not unreasonable to assume that, as Mr. Burn has already said, the Maukharis used a new era on some of their coins. The time of its commencement and the name of its originator are not known. But, if any of the Maukharis was the founder, I think it was Īśānavarman who had the highest claims to that honour; for, as we learn from the Aśirgaṇḥ seal inscription, of all the rulers of this line known to history he is the first to be styled *Mahārājādhirāja*. But in that case the probability will be that he took a date before his reign began, as a reign of 54 years, though not impossible, is not probable.

Our inscription sheds much light on another important question:—Where was the Vikrama era used in earlier times? Kielhorn said that the earliest known dates from V. 428 to 898 were all from eastern Rājputāṇā, chiefly from that part of eastern Rājputāṇā which borders on, or is included in, Mālava. He further said that, if we were to judge by the dates collected, the era spread first towards the north-east, to Kanauj and to Gwālīor and Bundēl-khaṇḍ, and afterwards towards the south-east and south to Mālava proper and Aphilvāḍ (including Kathiavāḍ), and in the tracts situated to the north of the Jumṇā and the Gauges very late dates of the era were seen. These statements are therefore to be modified, as the locality where the inscription was found lies in the Bērā Bankī district, which is beyond the limits of eastern Rājputāṇā, that is, in a tract lying outside Mālava. I cannot say for certain that it was found *in situ*; but from the very nature of it one can safely surmise that it was. Although it is a solitary instance, yet, assuming that this record belonged to the spot where it was first discovered, one can reasonably say that the Mālava or Vikrama era was used as early as the middle of the 6th century A.D. in the very heart of Oudh towards the north-east across the Ganges and the Gōmatī (Gumti), far away from the place of its origin.

The *prafastī* (v. 23) was composed by one Raviśānti, the son of Kumārasānti, who was a resident of a place called Garggarakṣa, and was engraved by one Mihiravarman. The

¹ *Arch. Surv. Rep.*, Vol. XIII, p. 81. He does not say if it is the same coin which he published in his *Coins of Med. India*, II, 12, or *Arch. Surv. Rep.*, Vol. IX p. 27.

² *J. R. A. S.*, 1906 p. 848.

identity of none of these persons is known, and we are unable to identify the locality of Garggarākṣa.¹ It is not impossible that the reading intended was Garggarākṣa, a name with which we may compare the Garggarākṣa of the Dāo-Banārk inscription of Jivtagupta.² In the term Garggarā one will at once recognize the name Ghāgrā, so called because of its rattling noise. Possibly it was a fort somewhere on the bank of the Ghāgrā, one of the chief tributaries of the Ganges.

TRANSLATION.

(V. 1.) Victorious is Bhava (i.e. *Śiva*), the source of bliss; the destroyer of the demon-
 Tāpura; the soul of all being; in whose heart the mind-born (Cupid) did not find room,
 though a woman (i.e. *Pārvatī*) forms one half of his body; whom the ascetics, who have
 suppressed their passions and destroyed the multitude of darkness (of ignorance), contemplate,
 and who is the cause of the gods that bring about the manifestation, the destruction and the
 maintenance of the universe.

(V. 2.) May the body of the Enemy of Andhaka (i.e. Siva) grant you an eternal abode—the body of Siva which has sparkling serpents on it; bears on the forehead the slender streak of the Moon, which dispels darkness; renders the shining row of skulls brown by the lustre proceeding from his eyes; and wears the skin of a lion reddened on account of the brilliance of the jewels on the hood of serpents.

(V. 3.) The Mukhara princes, who have vanquished their foes and checked the course of evil, are the descendants of the hundred sons whom king *Aśvapati* got from *Vaivasvata* (Manu) and who were conspicuous on account of their excellences.

(V. 4.) Among them king *Harivarman* was first born for the welfare of the earth, who became known by the name of *Jvālāmukha* (or, flame-faced), as he was honoured by the foes who were struck with terror when they saw his face red on account of the lustre of fire (i.e. anger) at the time of battle and as his splendour destroyed the wealth of the enemy and his fame pervaded the intervals of all the quarters;

(V. 5.) Whose name was worthy of fame and whose lovely excellent fame filled the worlds, while he remained, for the perpetuation of the moral laws in the world, on the path of virtue and discrimination like Manu.

(V. 6.) Like the Moon from the ocean king, *Ādityavarman* was born from him. Getting him, the Creator obtained, as it were, the full result of his laying down the regulations of right conduct for the four castes and stages of life.

(V. 7.) When fire was kindled during his sacrificial performances, the volume of smoke, black like pitch darkness, rising on all sides and increased through the tossing and whirling produced by the wind in the sky, made the crowds of peacocks noisy, as they mistook it for a large cloud.

(V. 8.) For the obtainment of martial glory he caused the birth of *Īśavaravarman*, the king whose soul was pure and who invoked Indra in many a sacrifice. In the pursuit of virtue other kings in their efforts failed to equal him, whose pious conduct had uprooted the character of the Kali Age and who possessed the glory of *Yayāti*.

(V. 9.) Qualifying his high bravery with political wisdom, his friendship by honesty, his lofty ambition by his noble descent, his liberality by fit recipients, his might of wealth by modesty, his youth by self-restraint, his speech by truthfulness, his manner of life by the injunctions of the *Śruti*, and his high prosperity by humility, he never felt tired in the world, though it was immersed in the darkness of the Iron Age.

(V. 10.) At whose sacrifices, when the round of the quarters was overlaid with the smoke which arose from the fire kindled constantly in accordance with the canons and which was darkly blue like streaks of collyrium, the multitude of peacocks became noisy, their minds becoming maddened; for they thought that the rainy season, having a line of clouds bending low because of the weight of the fresh water, had set in.

(V. 11.) As the Sun (rises) from the top of the Udaya mountain, as Indra is born from the Creator, as the beauteous *Kaustubha* jewel, which excels the moon in splendour, came out of the Milk Ocean, the illustrious king *Īśanavarman* was born from him, the most firm abode of greatness, maintainer of stability amongst the beings, a resplendent moon in the sky of the circle of princes.

(V. 12.) By whom, as by the rising Sun, the world, which was sunk in the darkness of the Kali Age, where the paths of virtue were consequently obscured, was again set to work, he being a benefactor of the world, eclipsing the lustre of water-lilies in the form of the foes, illuminating the collection of lotus-like faces of his friends, and being possessed of abundant majestic splendour;

(V. 13.) Who, being victorious and having princes bending at his feet, occupied the throne after conquering the lord of the *Āndhras*, who had thousands of threefold rutting elephants, after vanquishing in battle the *Sulikas*, who had an army of countless galloping horses, and after causing the *Gauḍas*, living on the seashore, in future to remain within their proper realm ;

(V. 14.) The victorious one, whose watches can only be determined by means of the water-clock,¹ as if it were at night, the world being encompassed in darkness and bewildered as to the beginning, the middle or the end of the day on account of the dust which rises from the earth rent asunder by the agitation caused by the marches of his ocean-like armies on their expeditions, screens the lustre of the orbit of the sun, and pervades the quarters ;

(V. 15.) By whom the earth was forcibly upheld like a broken boat, after fastening it on all sides by hundredfold virtues (or, strings), when it was sinking below the invisible ocean of the nether regions, being shaken by the storms of Kali ;

(V. 16.) Whose foes on the sacrifice-like battle-field gave up the ghost, when hit by (lit. having got) his arrows loosed from the bow fully bent by his arms, which were hardened owing to the growth of the wounds caused by the blows of the bowstring. When this king was ruling the earth, the three *Vēdas* were, so to speak, born afresh. Of him the illustrious *Sūryavarman* was born, who dispelled the darkness which originated in the advent of the Iron Age ;

(V. 17.) Who, possessing youth that was dear to the entire world, like the new moon, being calm and devoted to the study of the *Sāstras*, attained the highest proficiency in fine arts ; to whom Wealth, Fame, Learning and other [Muses] resorted, as if in emulation. Loving women are in the world highly devoted to a beloved lover.

(V. 18.) So long virtuous conduct had to bow down before the full grown Kali, so long the arrows of Cupid were capable of troubling the bodies of the fair sex, and so long did the goddess of wealth give up taking refuge with others, whereby she had to fear sudden breakdowns, as the Creator did not bring forth his body, pleasing to mankind.

(V. 19.) Who dragged forth by means of his arm, which was surrounded by the lustre of his sparkling sword, the Riches of hostile lands, whose eyes trembled for fear of seizure of the breasts, forcibly pressed them to his bosom, as a lover (would press) his sweethearts whose mind he knew, and caused them mostly to give up the thought of going to other men.

(V. 20.) By him, who raised those who were submissive (or low), an old and dilapidated temple of the slayer of *Andhaka* (*Śiva*) was seen while hunting, and it was raised at his wish and made an ornament of the earth, resplendent like the moon and known by the name of *Kaśmāśvara* (the Lord of Bliss) ;

(V. 21.) When six hundred autumns had become increased by eleven, while the illustrious *Īśānavarman*, who had crushed his enemies, was the lord of the earth,

(V. 22.) That temple of the Trident-wielder (*Śiva*), shining like an empty cloud, was (re)constructed at the time when the clouds, having the lustre of the wild buffalo and having rain-bows stuck to their borders, stretch a canopy over the quarters, with shining and extensive lightnings, thundering deep, and when the winds blow on all sides, shaking the *Nipa* (*Nauclea Cadamba*) trees with their branches bent low on account of the multitude of new flowers.

(V. 23.) *Raviśānti*, the son of *Kumāraśānti* and resident of *Garggarākṣa*, composed the preceding [*praśasti*] out of regard for the king.

It was engraved by *Mihiravarman*.

¹ See Dr. Fleet, *J. R. A. S.*, 1915, pp. 218 ff.

No. 6.—BHANDAK PLATES OF KRISHNARAJA I.: SAKA 694.

By V. S. SUKTHANAR, PH.D.; POONA.

The copper-plates which bear the subjoined inscription of the Rāshtrakūṭa king Kṛishnarāja I. were discovered at Bhāṇḍak, *Tahsil* Warōḍā, in the Chāṇḍā District of the Central Provinces. They were forwarded for examination by the Commissioner for the Nāgpur Division, through Dr. D. B. Spooner, to the Assistant Archæological Superintendent for Epigraphy, Southern Circle. I am now editing them from the original plates as well as a set of impressions kindly placed at my disposal by the latter.

The plates are three in number, each measuring roughly $10\frac{1}{2}$ by $6\frac{1}{2}$ ins., and weigh 340 tolas. The margins are folded over and beaten down, so as to serve as rims. The grant is engraved on the inner side of the first and the third plates, and on both sides of the second. The plates are pierced by a circular hole, $\frac{1}{2}$ in. in diameter, in order to receive the ring and seal, which are, however, missing.—The engraving is deep, but not neat. The letters, which are uncouth in shape, vary in size from $\frac{1}{4}$ to $\frac{1}{2}$ in. The letters *cha*, *pa* and *ya* have been most indifferently incised and are consequently difficult to distinguish from each other; so also the letters *va* (*ba*) and *dha*. The ligature *nta* is often so carelessly written as to be indistinguishable from *tta*. Some letters, again, sporadically show quite strange forms, as, for example, *su* in *rājasu* at the beginning of line 4, *śa* in *śarvarishu*, l. 3, *lē* in *balēna*, l. 28, etc.—The characters belong to the northern class of alphabets, and, like those of the Multai plates¹ of the Rāshtrakūṭa Nanda-rāja Yuddhāsura, represent the last phase of the acute-angled variety.² The medial *u* is marked by a short stroke slanting upwards, attached to the *mātrikā* at its right lower end; sporadically by a curve opening to the left, as, for instance, in the *śu* of *śuchi*, l. 3. The sign for the medial *ṣ* is a short vertical stroke appended to the top of the *mātrikā* on the left; and, only very rarely, by a stroke above the *mātrikā*. The central bar of *ja* slants downwards, but is not vertical; the lowest bar does not form a double curve, but merely slants downwards towards the right and only sporadically ends in a small notch. Those corners of the letters *kha*, *ga* and *śa*, which later develop into loops or triangles, are in our inscription marked by small projections or notches.³ The verticals on the right of the letters are short and project but little below the remaining portion of the signs.⁴ These palæographic characteristics are sufficient to establish the archaic character of the script and to prove that the plates belong actually to the period to which they refer themselves, viz. the third quarter of the eighth century of the Christian era.⁵ Our record contains specimens of initial *ā* in l. 2; initial *ī* in ll. 3, 8; initial *u* in l. 37; initial *ṣ* in l. 53; a cursive form of *ku* in ll. 5, 12, 23, etc.; and the following ligatures, *śa*

¹ Bühler, *Indische Palæographie*, Tafel IV, Col. XX.² Bühler, *op. cit.*, p. 50.³ E.g. *kha* in *mukhā*, l. 2, *mukhā*, l. 4; *ga* in *gōṭṭra*, l. 8, *vōga*, l. 10; *śa* in *praśāsati*, l. 11, *śikharāni*, l. 12, etc.⁴ In the *yē* of *yēn-tyam* (l. 31) we have an instance where the vertical stroke is altogether wanting.⁵ The Sāmāṅgaḍ grant of Dantidurga (ed. Fleet, *Ind. Ant.*, Vol. XI, pp. 110 ff.) and the Alā grant of Yuva-rāja Gōvinda (II.) (ed. D. B. Bhandarkar, *Ep. Ind.*, Vol. VI, pp. 208 ff.) are two Rāshtrakūṭa records which bear the dates Śaka 675 and 692, i.e. are dated earlier by 19 and 2 years respectively than the grant which is the subject of this article. The palæographic differences between these three grants are worthy of consideration. The alphabet of Gōvinda's grant is wholly different from that of our record. The script is entirely Dravidian in character; the letters are round in appearance, and are akin to those of the grants of the later Chālukyas of Bādāmi, the immediate predecessors of the Rāshtrakūṭas. The difference is clearly a local one and is perfectly consistent with the geographical limits over which the southern alphabet was current. Such is not, however, the case with the other inscription. The alphabet of the Sāmāṅgaḍ grant belongs to the same category as that of our grant, and represents an archaic variety of the Nāgarī. The difference lies, however, in its showing just those peculiarities which characterise the script of an epoch some decades later than that to which it refers itself. The regular sign for the medial *ṣ* in this grant is a curved stroke on the top of the letter, while the short vertical stroke on the left appears only occasionally as representing this letter. The right-hand portion of *gha*, *pa* and *śa* shows the development of long verticals on the right of these signs. The letters *kha*, *ga* and *śa* show distinct

l. 9, *ṅga* l. 36, *ṅghri* l. 17, *ṅcha* l. 6, *ṇḍa* l. 2, *ṇḍya* l. 27, *ksha* and *kshma* l. 14, *jña* l. 8, *lpha* l. 16, *shṭva* l. 4; and lastly final *t* (?) in l. 33.—As regards orthography, the only points worthy of notice are the following: (1) the use of *gha* for *ha* in *rājasighaḥ*, l. 4 (of. also l. 23); (2) no distinction is made between *b* and *v*; (3) no rule is followed with regard to the use of *anuvāra* in the middle of a *pāda*; (4) wrong conversion of the *anuvāra* into *n* before a sibilant in *°likhit-āṇsa°*, l. 14; (5) once the use of *da* for *dha* in *dadatā*, l. 5; (6) the use of the vowel *ri* for *ri* in *°trivishṭapa°* (for *°trivishṭapa°*), l. 7.—The grant commences with a symbol representing *om*. Then follows the stanza *sa vā-vyād-vēdhasa dhāma*, etc., which stands at the beginning of, I think, all the early Rāshtrakūṭa records. The rest of the composition is also in Sanskrit: the *prastuti*, the benedictory and imprecatory stanzas being in verse, the grant proper in prose. Most of the verses of this record are repeated with slight verbal differences in one or other of the following grants: the Sāmāṅgaḍ grant of Dantidurga,¹ the Alās plates of Gōvinda II.,² the Paithan³ and the Kāvī⁴ grants of Gōvinda III. Of these it approaches closest to the first mentioned, viz. the Sāmāṅgaḍ grant. The four verses 5, 9, 21 and 22 I have not been able to trace anywhere else. In recounting the exploits of Dantidurga all the early Rāshtrakūṭa grants repeat the two well-known verses, *Kāñchīśa°* and *sabhrāvibhaṇḍa°*, etc.⁵ Our grant has instead only one stanza, made up of the two half-verses belonging to the two stanzas, a deficiency which, I should imagine, is merely due to the negligence of the scribe. In other respects the execution is satisfactory. And with the help of this text we are placed in a position to correct the extremely corrupt text of the Sāmāṅgaḍ grant with respect to those verses which it has in common with our grant and which do not occur elsewhere.

The grant, as already remarked, is a record of the Rāshtrakūṭa king Kṛishṇa-rāja I. and is of particular importance, being the first record of the king to be discovered so far.⁶ Another grant which refers itself to the reign of Kṛishṇa I. is the Alās grant of his son Gōvinda II., while yet a *yuvārāja*; it was issued in Śaka 692, that is, two years previous to our record.⁷ The genealogy of the Rāshtrakūṭas given in the present grant commences with Gōvinda I., as in all other early grants of this dynasty, excepting the unfinished inscription from the Daśavatāra temple at Ellora⁸; and the details regarding his successors Kakka-rāja and Indra-rāja accord well with what we know of them from other records. Here again, as in the Sāmāṅgaḍ grant, the queen of Indra-rāja is described as being a Chālukyan princess, tracing her descent from the Lunar race on her mother's side. But from the new record we gather some more information about her, which in the mangled version of the Sāmāṅgaḍ grant was distorted beyond recognition. The defective *anuvāra* half-verse,

Śrīmad-yuvati-gaṇānām sādhuṇām-upa nā(sā) padam |

of the Sāmāṅgaḍ grant, stands for some original like

Śrīmad-Bhava-gaṇā nāma sādhuṇām-upamāpadam

which I translate with: 'Śrīmad Bhava-gaṇā by name, the (very) standard of comparison

developments of loops, where our record has only straight projections or notches. The middle bar of *ja* approximates more to the vertical, and the lower portion forms a distinct double curve. These facts are clear indications of a later palmographic epoch and raise suspicions against the *bona fides* of the grant. For this and other reasons I am inclined to entertain the gravest doubts regarding the authenticity of the Sāmāṅgaḍ grant. But, as I intend dealing with the question at length in a separate article devoted to the subject, I do not wish to enter into details here.

³ *Ibid.*, Vol. III, pp. 105 ff., and Plate.

⁴ *Ind. Ant.*, Vol. V, pp. 144 ff.

⁵ The Kāvī grant, vv. 8, 9; the Sāmāṅgaḍ, vv. 18, 17 (in the reverse order!); the Alās, vv. 5, 6; the Paithan, ll. 11-14.

⁶ Since writing these lines I have come to know of the recent discovery of another record of Kṛishṇa-rāja, viz. the Talegaon (Poona District) plates dated in the year Śaka 690, vide *Progress Report of the Archaeological Survey of India, Western Circle, 1913*, p. 54. [The inscription is published in *Ep. Ind.*, Vol. XIII, pp. 275-282.—F. W. T.]

⁷ Ed. D. R. Bhandarkar, *Ep. Ind.*, Vol. VI, pp. 203 ff.

⁸ Edited by Bhagvanlal Indrajī, No. 10 (p. 91) of the separate pamphlets of the *Arch. Survey of West India*

among virtuous and chaste women.' The name of the queen was therefore Bhavaganā. Dr. Fleet translates the corresponding half-verse of the Sāmāṅgaḍ grant as follows : 'She attained the position of honourable young women who are faithful wives.' On comparing my translation with that of Dr. Fleet there will be no doubt as to which reading is to be preferred. Coming to Kṛishṇa himself, in addition to his *birudas* Subhatuṅga and Akalavarsha, which we know from other inscriptions as well, he appears to have also assumed the title Śrī-pralaya-mahā-varāha. Besides these three *birudas* this record contains no further historical information about him, and it would therefore appear that it was issued in the early part of his reign : at any rate, before the event of the construction of the Ellora temple, which event is described with such pomp and ceremony in a later record of this dynasty.¹

With regard to the charge brought against Kṛishṇa by Dr. Fleet² that he 'had uprooted his relative Dantidurga, who had resorted to evil ways and appropriated the kingdom for the benefit of his family,' I hope this record of Kṛishṇa-rāja himself will have the last word to say and that too in a decided negative. The weak points of Dr. Fleet's theory have already been pointed out with sufficient clearness and force by Mr. Devadatta R. Bhandarkar recently in his article on the Alās plates of Gōvinda II.³ It is here sufficient to point out that Dantidurga was no licentious weakling, but a very powerful and, probably, also a popular king. In fact, he was the first king of his dynasty to assume the title of *Rājādhirāja-Paramēśvara*, or, to quote the words of Dr. Fleet himself, 'he was the real founder of the dynasty.'⁴ In our grant, just as in the Sāmāṅgaḍ grant, he is called the 'sun to the lotus (which was) his family'; both these records lay stress on his devotion to his mother in unmistakable terms. It is, therefore, preposterous to identify the relative of Kṛishṇa 'who had taken to evil ways' with the founder of the dynasty, Dantidurga, who had merited the epithet *sva-kul-ambhōja-bhāskara*. Besides, were Kṛishṇa really guilty of the murder, it is inconceivable that he should have tolerated the eulogy showered upon the murdered uncle in a grant of his own and coolly added that he ascended the throne after the victim of the assassination had gone to heaven!

The formal part of the grant records that the king, being encamped at *Nāndi-pura-dvāri*, granted on the occasion of a *saṁkrānti*, at the request of one Madana, the village of *Nagana-puri* to the Bhaṭṭāraka of the temple of Āditya in the town of *Udumvara-manti*. The concluding verse gives the name of the writer as *Vāmana-[nā]ga*.

The grant is dated in the Saka year 694 expired on the third day of the dark half of Āshāḍha, which was, as remarked above, a *Samkrānti*. Dewan Bahadur Swamikannu Pillai, who kindly examined for me the details of the date, informs me that the *tithi* mentioned in our record ended on the 23rd June (Tuesday) A.D. 772, at about one *ghaṭikā* after sunrise; the day was also the first day of the solar month Karkāṭaka by the Tamil rule. The Karkāṭaka *Samkrānti* fell on June 22nd (i.e. on the previous day) at a little before midnight. We are therefore led to assume that in the present case the first day of the civil month was called *Samkrānti*, though the astronomical *Samkrānti* fell on the previous day, a supposition which is countenanced by the practice actually followed in Southern India in certain well-known instances.

TRANSLATION.

Qs.

(Verse 1.) May he (*scil.* Vishṇu), the lotus on whose navel Brahmā has made (*his*) dwelling, protect you; and Hara (*i.e.* Śiva), whose forehead is adorned by the beautiful moon-crescent.

¹ Read ब्रह्म°.

² Read नान्दी°.

³ The w-sign (medial) is appended to the symbol for सि.

⁴ Correct, perhaps, to नागानी या°.

⁵ Read वहु°.

¹³ Read °तां वा.

¹⁴ Read °श्रीमता.

⁶ Read संवि°.

⁷ Read °वहु°.

⁸ Read °कक्ष.

⁹ Read सगरा°.

¹⁰ Read विष्टाय.

¹¹ Read °कृपानुबध्ना°.

¹² Read °सवि°.

¹⁵ Read फल°.

¹⁶ The last quarter of this Āryā is defective

(V. 2.) There was a king called Gōvinda-rāja [I.], a royal lion among kings, whose fame reached to the ends of the regions, (and who) pure (of conduct), lifting (his) scimitar (and) facing (them), destroyed his enemies in battles, just as the lustrous Moon, whose glory (i.e. radiance) penetrates to the ends of the regions raising the tip of (his) orb (above the horizon and sending his rays) straight forward, dispels at night the darkness.

(V. 3.) Invariably, when he saw on the battlefield the armies (of the enemies) confronting him, ringing with the loud laughter of warriors, forthwith he, biting (his) lip (and) knitting (his) brow, elevated (his) sword, (his) family, (his) heart and (his) pride.¹

(V. 4.) His son, the glorious Kākka-rāja [I.], was the gem of the (Rāshtrakūṭa) race, a king who was grateful (for services rendered), whose extensive glory was famed throughout the world, who stilled the sufferings of the distressed, (and) possessed the valour and the majesty of the lion, (thus) resembling (Indra), the king of heaven.²

(V. 5.) ³At the mere (sound of the) name of him fell straightway from the wives of his enemies, retreating from the laps of (their) lovers with (their) hair standing on end and trembling, (the following three things:) tears, armlets and also (their) minds, which were deranged by the impetuosity of their fright.

(V. 6.) While this king was governing the earth, the tame peacocks, eager for the advent of clouds, used to break out into cries (of delight), when they in the evenings caught sight of the turrets of his palaces, which were completely gray with the mass of smoke from the oblations of the twice-born (i.e. Brāhmanas).

(V. 7.) His son was Indra-rāja, as it were the Mount Mēru of the noble Rāshtrakūṭas, a prince whose expansive shoulders were bright though being scratched through the blows from the tusks of elephants from whose split temples trickled down ishor, and who had destroyed (his) enemies on earth.

(V. 8.) Every day people walked about in (his) palace ankle-deep through the water (sprinkled during) unceasing recitals of śānti-texts⁴ by Brāhmanas.

(V. 9.) ⁵The wealth of him, whose pair of feet were worshipped by a large crowd of princes who came to do homage (to him), was perpetually shared by virtuous men⁶ . . . with unclouded countenances.⁷

(Vv. 10, 11.) His queen, who had fulfilled (all) desires (of others);—who was pure like the lustrous moonlight (which), filling (all) regions, destroys darkness;—who was by her mother's side descended from the Moon⁸ and on her father's side from the Chulukyas (Chālukyas), called the glorious Bhavaganā⁹—was the standard of comparison among virtuous and chaste women: she freed the world from misery by protecting and maintaining (the needy).

¹ Better perhaps to take *garva* in the sense of *gurutā*—‘dignity’, ‘importance’.

² All the attributes apply to Indra as well. In his case, however, *hari-vikrama-dhāma-dhārī* is to be understood in the sense, ‘one who supports the place (covered by) the strides of Hari (i.e. Viṣṇu)’, referring to the form of the latter striding over the heavens in three paces. None of the earlier interpretations of this verse take into account this *ślēṣa*.

³ This verse is not found in any other Rāshtrakūṭa record.

⁴ These are recited for the averting of evil and the pacification of various deities.

⁵ This verse does not occur in any other Rāshtrakūṭa record.

⁶ *Tri-jagat-pravīṇaiḥ* does not convey any sense to my mind, and appears to be a mistake of the scribe who wrote off *tri-jagat* in place of something less familiar. Read perhaps *tri-gaṇa-pravīṇaiḥ* and translate: ‘by those versed in the triad of duties (viz. *dharma*, *artha* and *kāma*)’.

⁷ i.e. without being made to feel the subservience. ⁸ The Rāshtrakūṭas were themselves also *Sōma-vamśīs*.

⁹ The corresponding verse of the Sāmāṅgaḍ grant contains a *varietas lectionis* in the first half-verse. See above, p. 122.

(V. 12.) He, the best of kings, begat a righteous son from her like unto material well-being (*artha*) from prudence (*niti*), (a son who was, as it were) the future prosperity (*āyati*) prayed for by the whole of mankind,¹

(V. 13.) (*him*) who was known as the illustrious king Dantidurga, the sun to the lotus (*that was*) his family, who illuminated the spaces between the regions by the flood of his effulgence, the lustre of which was palpable.

(V. 14.) In the battles with this lion of the martial field the affrighted elephants (*which were his*) enemies, having pulled up by the root the posts (*namely, their*) shame,² have absconded, no one knows where.

(V. 15.) Before the bursting forth of the 'sprouts' of his prowess and (*his*) fierce anger the turreted fortresses of (*his*) enemies fall down along with their hearts.

(V. 16.) His devotion to (*his*) mother was demonstrated by (*the fact of his*) mother's making (*charitable*) donations of land in every village in (*his kingdom of*) four hundred thousand villages.

(V. 17.) Having in no time conquered Vallabha,³ who was (*even*) able to inflict crushing defeats on the lord of Kāñchi, the king of Kērala, the Chōla, the Pāṇḍya Śrī-Harsha and Vajraṭa by the prowess of his arm (*or arms*), he acquired the state of the 'Supreme King of Kings' and 'Supreme Lord.'⁴

(V. 18.) Through the power of his valour he brought under one (*royal*) umbrella this earth from the Sētu, where the coast-mountain has tossing waves flashing along the line of its large rocks, up to the Snowy Mountain (Himālaya), where the masses of spotless rocks are stained by the snow,⁵ as far as the boundary line beautified by stretches of the sandy shores of the eastern and western oceans.

(V. 19.) When that Vallabha-rāja⁶ had gone to heaven, Kṛishṇa-rāja, the son of the illustrious Kakka-rāja who relieved the sufferings of (*his*) subjects,⁷ became king.

(V. 20.) The career of that glorious Kṛishṇa-rāja, during which the circle of his enemies was completely swept away by the prowess of his own arm, was as stainless as that of Kṛishṇa (Vāsudēva),—

(V. 21.) ⁸who is famed to be of fierce disposition towards the fierce, a mighty repository of generosity towards the poor, most dear to women, and towards the prostrate Most-Highly-Gracious (Śubha-tuṅga),—

(V. 22.) who, constantly showering wealth on friends, arrows on enemies, love on young damsels, protection on the helpless, was famed in the world as the Untimely-Showerer⁹ (Akāla-varsha),—

¹ This half-verse occurs also in the Sāmāṅgaḍ grant. In the *editio princeps* appearing in the *JBBRAS*, this line was read as *nitāvacēmi-vāsēsha jagataḥ pālītāyati*[*ā*]; but the editor of the inscription did not translate the phrase *nitāvacēmi*-. Dr. Fleet in his article on the same grant, some time later (*Ind. Ant.*, Vol. XI, p. 112), after examining the plates, corrected the reading to *nitāvadāḥ*(or *tāḥ*)m=, etc., but followed the example of his predecessor in not translating the awkward phrase. The correct reading is evidently supplied by our plates. For the meaning of *āyati*, cf. *Kirātārjunīya* 2, 14: *raḥayaty āpad-upētam āyatiḥ*.

² Dr. Fleet's correction of *salajjā* of his text to *salajjāḥ* is obviously wrong, as his translation does not give a good sense.

³ i.e. the Chālukyan king Kirttivarman II. See Fleet's *Kan. Dyn.*, p. 391.

⁴ See above, p. 122.

⁵ For the idea implied by the word *kalambhita* cf. Kālidāsa's *Kumāra-sambhāva*, Canto 1, v.

⁶ A *biruda* of the Western Chālukya kings, probably adopted by the Rāshtrakūṭas as their successors.

⁷ Bühler's reading *kṛita-prajāvādha* and translation, 'who did not oppress his subjects' (*Ind. Ant.*, Vol. XII, pp. 182, 187), are both unsatisfactory. Why should he oppress them? As no impression is appended to his article, it is not possible to decide if the reading is not a mislection. *Kalata-prajā-bādha* corresponds exactly to the phrase *ārti-ārti-hārin* in a previous verse, and does not in the least presuppose that his predecessors had oppressed their subjects. [In the Talegaon Plates (*supra*, Vol. XIII, p. 279) Dr. Konow read *kṛita-prajā-vādha*. Perhaps we should here understand *prajābādha* as *prajā-dādha*.—F. W. T.]

⁸ This and the following two verses do not occur in any other Rāshtrakūṭa record.

⁹ To be understood in the sense: "raining in season and out of season."

(V. 23.) by which glorious Great-Deluge-Boar (Pralaya-mahā-varāha) was rescued the frightened Earth, which was sinking in the Kali ocean, which had overpassed (*its*) boundary.

(V. 24.) He, seeing (*that*) life, which is unsteady like the wind and the lightning, is without substance, established this *brahmadāya*, which is particularly meritorious on account of (*its being*) a gift of land.

(L. 40.) And this *Parama-bhaṭṭāraka Mahārāj-adhirāja Param-śvara*, the illustrious *Akālā-varsha*, the Lord of Prosperity and the Earth (*Śrī-prithivī-vallabha*), King of Kings (*Narēndra-dēva*) commands all the governors of kingdoms (*rāshṭra*), governors of districts (*viśaya*), governors of divisions (*bhāga*) and others (as follows) :

(L. 42.) Be it known unto you that,—Six hundred and ninety-four years of the Śaka era having elapsed, on (the occasion of) an eclipse, on the third (day) of the dark half of Āshāḍha, while encamping¹ at Nāndī-pura-dvāri,—in order to increase the religious merit and the glory of (Our) parents and of Ourselves, the village of Nagaṇa-puri, (*situated*) at a distance of a *gavyūti*² to the east of Udumvara-manti, has been given by Us at the request of Madana to the Bhaṭṭāraka of the temple of Āditya erected in the town of Udumvara-manti for the (*performance of*) *bali*, *charu*, *naivēdya*, worship and (*repairs of*) dilapidations.

(L. 48.) Its boundaries are noted (as under) :

to the east the village Nāgāma ;

to the south the village Umvara ;

to the west the village Antarai ;

to the north the village Kapiddha,—

thus determined by (*its*) four boundaries, excepting former gifts to gods and Brāhmaṇas ; and also the river along the boundary of Umvara-manti to the north of the Dēva-taḍāka (and) to the west of the Rājīni-taḍāka. Thus altogether one hundred *nivarttanas*.

(Vv. 25, 26.)

[Two of the customary verses.]

(V. 27.) (*This*) edict was written at the order of Akālā-varsha by the illustrious Vāmana-*[nā]ga* of benevolent and compassionate nature. . . .

Note by Rai Bahadur Hiralal, Extra Assistant Commissioner, Jubbulpore, C. P.

First of all I take Udumvaramatti to be identical with Umravati. Umravati means the town of Umar (*Ficus Glomerata*), the same as the Udumvara of the Sanskrit. That the pronunciation and spelling continue to be Umaravati in the vernacular will be seen from a cutting of a Marathi-English paper herewith enclosed. Exactly to the east of Amraoti at a distance of about 60 miles there is a village named Antaraḡaon in the Wardha Tahsil of the Wardha District, to the west of which and contiguous to it is another village Umaragaon. I take these to be identical with Antaraḡrāma and Umvaragrāma of the inscription. Nagaṇapuri, the subject of the grant, is not traceable nor Nāgāma and Kapiddhagrāma, which bounded it on its east and north. The Umvaragrāma was to the south of Nagaṇapuri and Antaraḡrāma to its west. If there is no mistake in interpreting the record, I should suppose that the villages have, for some reason or other, changed their sites, causing a confusion in the directions of their original positions.

The donor's camp was at Nandipuradvāri and I take this to be Nandora, 9 miles south of Antaraḡaon.

The villages in the vicinity of Antaraḡaon and Umaragaon are Jhersi, Borkhedi, Chargaon, Pipalasenda, Wargaoṇ, Echora, Kamthi, Hirora and Giroli, most of them named after trees, as Kapiddhagrāma and Nāḡāmagrama appear to be, and apparently the last two have disappeared, giving place to names derived from trees which later on abounded in the place where Kapiddha and Nāḡāma were situated.

¹ *Samāśrānti* can only refer to a dwelling-place, and the preceding word ending in *pura* evidently supports the idea of encampment. Nevertheless, the position of this word expressing locality right in the middle of others expressing time, is a little curious. ² A *gavyūti* is equal to 4,000 *daṇḍas* or two *krōśas* (Monier Williams).

Since some four villages give the clue for identification, we may take it that Nagapuri was situated somewhere at 20° 51' N. and 78° 44' E.

No. 7.—THE ĀRA INSCRIPTION OF KANISHKA II : THE YEAR 41.

By STEN KONOW.

This inscription was discovered in an ancient well in a nala known as Āra, two miles from Bāgnilāb, and was presented to the Lahore Museum by Dr. M. A. (now Sir Aurel) Stein. Mr. R. D. Banerji, to whom we owe this information, did not mention where Bāgnilāb is situated. Dr. Fleet therefore made inquiries through Dr. Spooner, and "it would seem that the place is the Ohah Bagh Nilab of maps, about ten miles south-south-west from Attock, and apparently on the south bank of the Indus at a part where the river, having made a sharp bend about eight miles below Attock, runs to the west for some ten miles : the latitude and longitude appear to be 53° 46' and 72° 12'."

According to Mr. Banerji, "the inscription is on a small piece of stone, measuring 2 ft. 8 ins. by 9 ins., and consists of six lines. The surface of the stone is extremely rough and uneven. The mason has not taken the trouble of planing the surface."

The inscription was first edited by Mr. Banerji,¹ and then by Professor Lüders.² Some valuable critical remarks were made by Dr. Fleet.³ The inscription is of considerable interest, and, at the instance of Dr. Fleet, I have therefore asked Mr. H. Hargreaves, Superintendent of the Archaeological Survey in the Panjab, to examine the stone closely. This he has very kindly done, and sent me a series of valuable remarks by his assistant Mr. Y. R. Gupte, together with new estampages and some photographs. I have given a preliminary report of the results obtained from these new materials in a paper on the Indo-Scythians,⁴ and I now publish the inscription with a plate prepared from the new estampages.

The characters are Kharoshthī of the Kushana period. With regard to individual letters we may note that the *e-mātrā* has been added at the bottom of the *akshara* in *devaputrasa*, l. 1, and in every initial *e*. The same is the case in the damaged letter at the end of l. 3, which Professor Lüders reads *ne*, but which I read *de*. The *jhe* of *Vajheshka*, l. 2, seems to be quite certain. The compound letter which I read *shk* with Professor Lüders has been transliterated *shp* by Mr. Banerji and Dr. Fleet and Mr. Gupte agrees with them. I think, however, that we must read *shk*. In the first place, as pointed out by Professor Lüders, the compound *shk* has exactly the same shape in the Zeda inscription. It is quite true that it is different in *Kanishkasa*, l. 2, and no doubt every record should, as pointed out by Dr. Fleet, primarily be judged separately on its own merits. This does not, however, imply that we should not take other facts than the mere shape of the individual letters into consideration. It is a well-known fact that the masons who executed the inscriptions were not always or even usually literate persons. We know from an inscription published by Mr. Pargiter⁵ that it was often done in such a way that the inscription was first drawn up with ink, and then executed by the engraver or the mason. This procedure partly accounts for the fact that the same letter often takes different shapes in the same inscription. As pointed out by Professor Lüders, the

¹ *Ind. Ant.*, 1908, pp. 58 ff.

² *Sitzungsberichte der K. Preuss. Akademie der Wissenschaften*, 1912, pp. 824 ff., translated *Ind. Ant.*, 1913, pp. 132 ff.

³ *JRAS.*, 1913, pp. 97 ff.

⁴ *Sitzungsberichte der K. Preuss. Akademie der Wissenschaften*, 1916, pp. 787 ff.

⁵ *Archaeological Survey of India, Annual Report*, 1910-11, pp. 78 ff.

analogy from other Kushana names such as Kanishka, Vāsishka, and Huvishka strongly favours the reading *Vajreshka*. Finally, the compound *shp* does not occur in any other known Kharōshthī inscription.

The name *Kanishka* has been written with a cerebral *ṇ* by Mr. Banerji. In order to justify my reading *Kanishka*, it will be necessary to go into details.

It is a well-known fact that two different *n*-s are used in Kharōshthī, one with a bent head, which the late Professor Bühler treated as the regular sign of the cerebral *ṇa*, and another consisting of a broken line with a curvature at the head, which he transliterated *na*. I have shown¹ that the two signs are regularly distinguished in this way in the Central Asian Kharōshthī manuscript of the *Dhammapada*, and that we can there lay down the rule that every single *n* between vowels became cerebral, while every initial *n* and every double *n* between vowels was dental. This is the same state of things which prevails in a series of modern vernaculars, and it should be noted that the cerebral pronunciation of a single intervocalic *n* is strongly rendered in Sindhi and other north-western tongues. We may safely infer that such was the case in the ancient speech of North-Western India, more especially if we bear in mind that the dialect of the *Dhammapada* manuscript certainly is a North-Western Indian form of speech. We would then naturally expect to find at least distinct traces of a similar distribution of the two *n*-sounds in Kharōshthī inscriptions. Nobody will, of course, think of judging these records after the exigencies of Sanskrit grammar. If we now examine the more important ones from this point of view, and assume, for the sake of argument, that the two signs are distinguished in the same way as in the Kharōshthī manuscript of the *Dhammapada*, we will find that the following is the state of things:

In the Taxila vase inscription of Sihla and Siharachhita only *ṇ* occurs, and always between vowels. The same is the case in the Muchai inscription of Sam. 61.

The Taxila plate of Patika has initial *n* in *nama*, *nagare*, *navakarmika*, and single *ṇ* between vowels in *utareṇa*, *Sakamunisa*, *Rohinimitreṇa*. On the other hand, we find against the rule *sarvabudhana* and *mahadanapati*, where it is perhaps possible to think of the influence of Sanskrit.

The Mahaban, Paja, Kaldarra, Panjtār and apparently also the Takht-i-Bāhi inscriptions only have *ṇa*, and always between vowels. On the Mathurā lion capital, on the other hand, we only find dental *na*. The Taxila inscription of Sam. 136 uses *ṇa* throughout, even when the *n* is initial. It will be seen that this is in accordance with the practice in the old Prakrits, and in both cases it is possible that we have here to do with an attempt at generalizing such features as were not clearly understood. At least I have grave misgivings about the use of a cerebral initial *ṇ* in the Prakrits.

I am unable to make any statement with regard to the Dewal inscription of Sam. 200 and the Skārah Dhēri inscription of Sam. 399, though the latter certainly in some cases writes *ṇa* between vowels.

The Loriān Tangai inscription of Sam. 318 has only *ṇa* and always between vowels, while no *n* occurs in the Hashtnagar image inscription of Sam. 384.

If we turn to the inscriptions of the Kanishka group, we have first the Sue Vihar inscription of Sam. 11, which is throughout under the influence of Sanskrit. Here the only instance of a cerebral *ṇ* is in *viharasvapini*.

The interpretation of the Zeda inscription is too uncertain to allow any inference. There are however some certain instances of *ṇ* between vowels.

In the Māpikiāla inscription of Sam. 18 we regularly find *n* in *navakarmigena* and *ṇ* in *kaneshkasa*, *gushana*, *daḍḍapayago*, *vespasiena*, *kujachiena*, *Buritena*, *viharakarnafaṇa*, *sainveṇa*,

¹ *Zeitschrift Windisch*, p. 88.

parivarena, etena and *Budhileṇa*. Against the rule is *ṇaṇa*, where however the reading as well as the interpretation are extremely doubtful, and further *apanage, taena, kusalamulena* and *sachha[ʃ] sana*. I do not think that these few exceptions in any way invalidate the rule, at least if we bear in mind what has been said about the way in which old inscriptions were engraved. The two short Kharoṣṭhī records from Māpikiśla published by Mr. Pargiter¹ have no instance of the dental *ṇ*, and the cerebral *ṇ* only occurs, in accordance with the general rule, between vowels.

The Shakardarra inscription of Sam. 40 has *ṇ* in *nikame* and always *ṇ* between vowels.

In the Āra inscription *ṇ* only occurs between vowels and is always cerebral with the exception of the dental *ṇ* in *Kanishkasa*.

The Wardak vase inscription of Sam. 51 is of the same kind as the Taxila inscription of Sam. 136, *ṇ* being used throughout, even when it is initial.

The Ohind inscription of Sam. 61, on the other hand, uses only *ṇ*.

N is always cerebral and occurs only between vowels in the Lahore Museum inscription of Sam. 68, the Jhaoli copper plate inscription, and some minor records, such as the inscriptions on the Lahore image No. 206, the Chārsada pedestal, the Swāt Buddha statuette of Buddhāmītra and Buddharaḥhita, and the Swāt bas-relief of Simhamītra. In the Pālāṣu Dhēri pedestal inscription, on the other hand, we find *ṇ* alone used, and, so far as I can judge, that is also the case in the inscriptions in the Kanishka stūpa, though I am not certain about the word which Dr. Spooner reads as *navakarmī*.

It will be seen that the most serious exception to the rule is the inscription on the Mathurā capital, and I think that even this exception can be satisfactorily explained. I hope to have shown² that the old language of the Śakas and the Kushāṇas was of the same kind as the old Iranian tongue spoken in ancient Khotan, and here the cerebral *ṇ* occurs only as a secondary development of an old dental *ṇ* combined with some other consonant. It is therefore quite natural that the Śakas who engraved the Mathurā inscription were influenced by the phonetic features of their own language. The form *Kanishka* in the Āra inscription must be explained in the same way. This name is certainly not Indian, but was coined in accordance with the rules of the old language of the Kushāṇas. Its *ṇ* must therefore originally have been dental, and, if it is often written as a cerebral in Indian records, that is due to the influence of the Indian dialect adopted by the Kushāṇas.

I think we have to infer from a consideration of the entire material at our disposal that the old Aryan language which is used in the Kharoṣṭhī inscriptions did in fact distinguish the dental and the cerebral *ṇ* in the same way as the Kharoṣṭhī manuscript of the *Dhammapada*. Though we have no certain instances of a doubled *ṇ* between vowels, we can safely assume that every initial *ṇ* and every compound *ṇ* between vowels was dental, while every single *ṇ* between vowels became cerebralized. The few exceptions can be explained through the phonetic tendencies of the Indo-Scythians themselves, through the influence of Sanskrit, and through the ignorance of the masons and sometimes also of the scribes. At all events, I think I am justified in transliterating the two letters in accordance with Professor Bühler's table and the state of things in the *Dhammapada* manuscript.

The reading and interpretation of the inscription still present many difficulties, and it will be necessary to make some additional remarks.

In l. 1 the only crux is the last word, which Mr. Banerji reads *pathadarasa*, Professor Lüders *kaśarasa*, while Dr. Fleet remarks that the only certain *akṣara* of the whole word is the last one. Mr. Gupte states that the reading *kaśarasa* seems to be the right one. The first

¹ *Ep. Ind.*, Vol. XII, pp. 299 f.

² *Sitzungsberichte*, 1916, pp. 787 ff.

akshara is not, he says, on a line with the others and is small. Its upper part is a little damaged. The letters *sa* and *ra* can be read on the stone, but have not come out in the impressions. I may add that some photographs which I owe to the kindness of Mr. Hargreaves corroborate Mr. Gupte's statement.

Dr. Fleet has drawn attention to the fact that after *kāisarasa* there is space for two more syllables. He says, "Lines 2 to 5 all end exactly one below the other.¹ We have no reason for thinking that the writer of the record would not run out line 1 to just the same measure. We can also see distinct indications that the writer did, in fact, put in two more syllables here, and so did make all the lines of equal length." I have asked Mr. Hargreaves to pay especial attention to this point, and he declares positively that, after a careful examination of the stone, he can find no traces of any letter after the *sa*. Mr. Gupte is of the same opinion and adds : "The estampages lead us astray owing to the roughness of the stone. Something looks like *ma*, and then comes a line which at first sight may be mistaken for a damaged *ta* or *ra*. Certainly there is sufficient room for two letters. But they were not cut, perhaps owing to the roughness of the material. After careful inspection the delusion about the letters vanishes. The supposed *ma* of the estampages looks too small and is much above the ordinary level of the line, and, if we examine the stone itself, we feel sure that it cannot be a letter. The ruggedness of the stone itself is responsible for the deception." It seems to me that we must accept this definite statement, and we have to admit that the title *kāisara* was indeed used by Kanishka II. Nor can there be any doubt that we have here the imperial title of the Roman emperors.

In l. 2 the reading *sambatsaraē* is certain. As pointed out by Professor Lüders, we similarly find *saṃvatsaraye* in the Patika inscription and *saṃvatsuraye* in the Mahabhan inscription. Dr. Thomas has² further found *sambatsarae* in the Takht-i-Bāhi inscription, and also in the Paja record³ we must read *saṃvatsare*, and the Sue Vihar inscription evidently has *saṃvatsure*. We find the same *ts* in this word in the Kharoṣṭhī records No. XV 155 (*saṃvatsare* 20 1 mahānuva maharaya Jitroga(?) Mayiri devaputrasa mase 2 divase 10 1 1 isa chhunammi), XV 166 (*saṃvatsare* 10 1 mahānuva maharaya Jitrogha(?) Māiri devaputrasa mase 2 divase 4 4 isa chhunammi) and XV 2 (*saṃvatsar[e*]* 10 mahānuhava maharaya Jitrogha(?) Vashmana devaputrasa mase 4 1 1 divase 10 isa chh[u]nammi) from Niya.⁴ I think the combination *ts* represents an unsuccessful attempt at writing the word correctly. The pronunciation was no doubt *chh*. The *b* in the Takht-i-Bāhi and Āra inscriptions agrees with the phonetic treatment of such compounds in the Kharoṣṭhī manuscript of the *Dhammapada*.⁵

The reading of the date *ekachaparīśae saṃ 20 20 1 Jethasa masasa di 20 40 1 ise divasa chhunammi* is according to Mr. Gupte almost certain. Only he thinks that the final vowel of *ekachaparīśae* is *i* and not *e*, and I follow him in reading so.

I have already remarked that I read the last word of l. 3 *khade* and not *khane*. Compare *kuvo khadao* in the Shakardarra and *kue karite* in the Paja inscription. In the Zeda inscription I would likewise read *khade kue muraḍasa marjhakasa Kanishkasa rajami*. The forms with *e* I think are nominatives.⁶

The second word of l. 4 was read *Dashaverana* by Professor Lüders. Mr. Gupte says the reading is very uncertain, especially the first letter. It seems to me, however, that the *da* is almost certain. The second *akshara* is probably *sha*, but might also be *na*. The third cannot, I think, be *ve*. I think I can distinctly read *fa*, and in one of the photographs there is a clear *o-mātrā* at the bottom, as will be seen from the reproduction of the *akshara* on the margin. The fourth *akshara* may be *te* or *re*, and I think *te* is more likely than *re*, because the lower perpendicular is slightly curved; compare the

¹ He seems to have overlooked the damaged final *akshara* of l. 3 and perhaps an *akshara* at the end of l. 4.

⁵ *Ind. Ant.*, 1908, p. 65.

⁶ Cf. *Festschrift Windisch*, p. 91.

ta in *mātara* in the same line. I therefore read *Dashafotēna*.¹ So far as I can see, an instrumental is exactly what we would expect in this place.

The following word or words are certainly, as Professor Lüders thinks, *Poshapuria putraṇa*. It follows however from the reading *Dashafotēna* that this can only be a mistake for *Poshapuria putreṇa*. Professor Lüders thinks that *putra* here means "member of," "belonging to." The frequent mention of the father's name in similar records, however, in my opinion makes it more likely that *Poshapuria* is the genitive of the name of Dashafota's father. Now we know² that several Śāka names ended in *i*, the regular termination of the nominative singular in the old Iranian language of Khotan, and these names in Kharōṣṭhī inscriptions commonly form their genitive in *ia* or *ya*; compare *Ayasia* on the Mathurā lion capital; *Imdofria* in the Taxila inscription of Sam. 136; *Datia* in the Kaldarra inscription of Sam. 118; *Kaviṣia* on the Māpikīāla bronze casket and *Kamagulya* in the Wardak vase inscription. I therefore read *Poshapuriaputr[e*]ṇa*, "by the son of Poshapuri."

The last word of l. 4 was read *puya* by Professor Lüders, and Mr. Gupte thinks he can see *pupha* or *puka*. The last *akshara* does not look like a *ya*, because the left leg has been prolonged upwards. Still I think we must read *puya*, because this word is necessary in the context. I think I can see traces of a letter after *ya*, which would then come exactly underneath the *de* of *khade*, and I read *puyae*.

The first word of l. 5 is according to Mr. Gupte certainly *atmaṇasa*: the stroke on the right hand side of the first *akshara* visible in the plate is due to the roughness of the stone.

The fifth line is quite uncertain. The first word is perhaps *jatishu*, though none of the *aksharas* is certain. The next I read with Lüders *hitae* though the first *akshara* does not look like *hi*, but might be *i*. Perhaps *sthitae* is intended. The third word has been read *ima* by Professor Lüders and *hima* by Mr. Banerji. The first *akshara* consists of two curves facing the left and separated by a horizontal stroke. Underneath there is moreover an incomplete circle, which might represent an *anusvāra*; compare (*ma*)*ham(tasa)* in the Patika inscription. The following *akshara* is certainly *mo*. In my Indo-Scythian contributions I proposed to read *dhammochala*, which might mean "religious expenditure." The horizontal cross-bar is however so pronounced that I think we must read *imo*. *Imo* is used as the accusative sing. of *ayam* in the Mathurā Lion Capital, and in the Prakrits the base *ima* is also used in the neuter. The next two *aksharas* are *chala*. I am inclined to separate *cha*, "and," and *la*, which I take to be an abbreviation of *lakha*, a lakh. The following sign is the numeral 1, and thereafter I would read *khipam[i] dhamada[ṇa*]*. The sign which I now agree with Messrs. Banerji and Lüders in reading *khi* I formerly thought to be the numeral 100, which had a similar form in a hand-copy of the Taxila record of Sam. 136 which I owe to the kindness of Sir John Marshall. After having seen the published facsimile plates of that record, however, I do not think this explanation possible. The *pa* of *khipami* can also be read *ya*, compare *puya[e]*, l. 4, and it was read so by Professor Lüders. It is however almost identical with the *pa* in *saputrasa*, l. 5. The *i* of *mi* is very indistinct, though, I think that I can see it.

If this reading is correct, it will be necessary to translate *khipami* "I throw in," "I expend"; compare the meaning of *kship* in *nikshēpa*. I would accordingly translate: "and I expend this (or, here) one lakh as a religious gift." We may compare the Panjāb record, where I would propose to read Sam 1 100 20 1 1 *Śravaṇasa masasa di praḍhame* (or, *prathame*) *1 maharayaṇsa Gushaṇasa rajumi Kasuasa pracha[deṣo] Moike Urumuja-putre karavide sivathale tatra cha (?) me dana mita* (or perhaps *khita*) *taṃka 1 1*, "in the year 122, on the first day of the month Śrāvaṇa, during the reign of the Mahārāja, the Gushaṇa,

¹ In my paper in the *Sitzungsberichte*, I have compared the Scythian name *Spargaphotes*, Thomas, *JRAS.* 1906, pp. 206 and 209.

² Cf. Lüders, *Sitzungsberichte*, 1913, pp. 419 ff.; Konow, *ibidem*, 1916, p. 798.

a Śiva temple (?) was caused to be constructed in the eastern quarter of Kasua by Moika, the son of Urumuja. And there two tankas were measured (or, expended) by me as a gift." Here we have a similar addition about a money gift and the same change of the person of the subject.

I give this explanation with great diffidence, but I cannot suggest a better one.

The inscription is dated on the 25th day of the month Jeṭha (Jyēṣṭha) in the year 41, during the reign of the *mahārāja*, the *rājāśīrāja*, the *devaputra*, the *kāśara* Kanishka, the son of Vajheshka. Mr. Banerji was of opinion that the Kanishka of the Āra inscription is the famous Kushapa, of whom we already possess a number of inscriptions. I agree with Professor Lüders and Dr. Fleet that that cannot be the case. Professor Lüders thinks that Vajheshka, the father of this second Kanishka, is the same Kushapa king who is elsewhere called Vāsishka, and that the year 41 must be one of the Kanishka era. After Vāsishka's death he accordingly assumes that the kingdom was divided, Kanishka II ruling in the north, while Huvishka held sway in India proper. Later on, however, Huvishka also became master in the north. Dr. Fleet, on the other hand, thinks that Vāsishka and Vajheshka, or, as he prefers to read, Vajheshpa, were two different persons, and that Kanishka II should be placed after Huvishka and Vāsudēva. He thinks that there was a revival of the line of Kanishka I some time after Vāsudēva, and that the Mānikīāla and the Āra records bear testimony to this revival. If I understand him right, these inscriptions would consequently be dated in another era and not in the one instituted by Kanishka. The chief difficulty, from Dr. Fleet's point of view, seems to rest with the fact that it is hardly conceivable how the title *kāśara* could have been adopted in India in the year 41 of the Kanishka era, supposing, as Dr. Fleet does, that this era is identical with the Vikrama era. I cannot see, however, how it is possible to maintain this latter view any longer after the results of Sir John Marshall's excavations at Taxila. It supposes that the Kanishka group preceded the Kadphises kings, and in that case it would be impossible to understand the fact that the strata of the Kadphises kings always lie at a deeper level than those of Kanishka and his successors.

If we admit that the Kanishka era is different from the Vikrama one, we have to choose between two possibilities. Either Kanishka established the Śaka era, as Professor Oldenberg and others maintain,¹ or his era starts from a point which has still to be settled. For the elucidation of this question it may prove of interest to examine how the oldest Kharoṣṭhī and Brāhmī inscriptions are dated.

I first turn to the Kharoṣṭhī records, and primarily to those which I would think are dated in the same era as the Taxila plate of Patika. I agree with Dr. Thomas² in thinking that this era must have been of Śaka institution.

1. Taxila inscription of Patika : *Samvatśaraye aḥasatatimae 20 20 20 10 4 4 Maharajasa mahamtasa Mogasa Pa[nemasa] masasa divase pañchame 41*, "in the seventy-eighth year, 78, (during the reign) of the Mahārāja the great Moga, on the fifth, 5., day of the month Panema."

Muchal inscription : *vashe akasitimae 20 20 20 20 1*, "in the eighty-first year, 81."

3. Mahaban inscription : *sa[m]vatśaraye 1 100 2*, "in the year 102."

4. Takht-i-Bāhi inscription : *maharajasa Gudufarasa vasha 20 4 1 1 sambatśarae tisatimae 1 100 1 1 1 Vesakhasa masasa divase prathame di 1*, "in the 26th year of Mahārāja Gudufara, in the hundred and third year, 103, on the first day, d. 1., of the month Vaiśākha."³

¹ Cf. Thomas, *JRAS.*, 1914, p. 990.

² *JRAS.*, 1913, p. 637.

The usual reading is *divase pañchame 5*, where the figure 5 is the numeral symbol of the Brāhmī.

5. Paja inscription : *samvatsare ekadāśa[śa*]timas 1 100 10 1 Śravanasa masasa di[va]se pañchadāśe 10 4 1*, "in the one-hundred-and-eleventh year, 111, on the fifteenth, 15., day of the month Śrāvaṇa."

6. Kaldarra inscription : *vasha 1 100 10 1 1 1 Śravanasa 20*, "year 113, the 20. of Śrāvaṇa."

7. Panjtār inscription : *Sam 1 100 20 1 1 Śravanasa masasa di praḥame* (or, perhaps, *prathamē*) *1 maharajasa Gushanasa rajami*, "anno 122, on the first, 1., day of the month Śrāvaṇa, during the reign of the Mahārāja the Gushana."

8. Taxila inscription of the Khushana king : *Sam 1 100 20 10 4 1 1 ayasa Ashadāsa divase 10 4 1*, "anno 136, on the 15. day of the first month Āshāḍha."

9. Dewal inscription : *Sam 2 100 Veśākhasa masasa divase aṭhame 4 4*, "anno 200, on the eight, 8., day of the month Vaiśākha."

10. Loriyān Tangai image inscription : *Sa 3 100 10 4 4 Proṭhavadasa di 20 4 3*, "anno 318, on the 27. day of Prōshthapada."

11. Hashtnagar image inscription : *Sam 3 100 20 20 20 20 4 Proṭhavadasa masasa divasahmi pañchami 4 1*, "anno 384, on the fifth, 5., day of Prōshthapada."

12. Skārah Dhēri image inscription : *vasha ekunachadūsatimas Ashadāsa masasa di 10*, "in the three-hundred-and-ninety-ninth year, on the 10. day of the month Āshāḍha."

Then follow the records of the Kanishka group :

13. Sue Vihar inscription : *Maharajasya rajatirajasya devaputrasya Kanishkasya savatsare ekadāśe 10 1 Daisikasya masasya divase aṭhaviśe di 20 4 4*, "in the eleventh, 11., year of the Mahārāja, the Rājātirāja, the Dēvaputra Kanishka, on the twenty-eighth day, d. 28., of the month Daisika."

14. Zeda inscription : *Sam 10 1 Ashadāsa masasa di 20 Utaraphagūṇa (?)*, "anno 11, on the 20. day of the month Āshāḍha, in Uttaraphālgunī."

15. Brass box lid inscription : (JRAS., XX, Pl. 1-3) : *Sam 10 4 4 sasthehi 10*, "anno 18, after 10 days" The remainder of this inscription has not been made out. The last word before the date is perhaps *Kanishka*.

16. Māpikiāla inscription : *Sam 10 4 4 etra purvae maharajasa Kaneshkasa Kartiyasa masa divase 20*, "anno 18, on the 20. day of the month Kārttika, at the said date, (during the reign) of the Mahārāja Kanishka." I think this is the correct translation, though I admit that the order of words is irregular. That is however also the case in the Zeda inscription, where we find *muraḍasa ma Kanishkasa* not only after *ise chhunamī*, but even after the words *khade kue*. Besides I do not think that the construction of *Kaneshkasa* with *Gushanavatasahvardhaka* is free from objection. In Sanskrit it would hardly be possible to form such a compound *sāpekshatvō*, because it is not at all *gamaka*.

17. Hidda inscription¹ : *Sambattarae aṭhaviśatīhi(tī) 20 4 4 mass 'Apelae sasthehi daṭahi 10*, "in the twenty-eighth, 28., year, in the month Apelaos, when ten, 10, (days) had passed."

18. Shakardarra inscription : *Sam 20 20 Proṭhavadasa masasa divase viśami di 20*, "anno 40, on the twentieth day, d. 20, of the month Prōshthapada."

19. Āra inscription : *maharajasa rajatirajasa devaputrasa kaśarasa Vajheshkaputrasa Kanishkasa sambattarae ekachaparīśai sam 20 20 1 Jeṭhasa masasa di 20 4 1*, "in the forty-first year, anno 41, (during the reign) of the Mahārāja Rājātirāja Dēvaputra, the Kaiser, the son of Vajheshka, Kanishka, on the 25. day of the month Jyāishtha."

¹ See Thomas, *J. E. Asiat. Soc.*, 1915, pp. 91 ff.

20. Wardak vase inscription: *Sam 20 20 10 1 masya Arthamesiya sasthehi 10 4 1*, anno 51, after 15 (days) of the month Arthamesi had passed."¹

21. Ohind inscription: *Sam 20 20 20 1 Ohetrasa mahasa divasa aṭhami*, "anno 61, on the eighth day of the month Chaitra."

22. Lahore Museum inscription of Sam 68: *Sam 20 20 20 4 4 Proṭhavatasa masasa divase shoḍaśe 10 4 1 1*, "anno 68, on the sixteenth, 16., day of the month Prōṣṭhapada."

23. Jhaoli copper plate: *savatsa . . . me di 10*, "in the . . . th year, on the 10. day."

It will be seen that a common way of dating runs through all these inscriptions. First the year is given and afterwards usually the name and the day of the month. In four cases, Nos. 1, 13, 17 and 20, the month is not an Indian, but a Macedonian one. In the oldest dated inscription from India proper, the Besnagar epigraph, the month is not mentioned. We read only (Lüders, List, No. 669) *rañō Kāśiputasa Bhāgabhadrasa trātārasa vasēna chatudasēna rājēna vādhamānasa*, "of the king Kāśiputra Bhāgabhadra, the Saviour, increasing with the fourteenth year in his reign," i.e. only the regnal year of the king is mentioned. Similarly in the Pabhōsā inscription of Udāka (Lüders, No. 904) we read [*Udākasa*] *dasamē savacharē*, "in the tenth year of Udāka." We shall have to reckon with the possibility that the use of eras and the mention of the name of the month was not an old Indian institution, but brought into the country by the Indo-Scythian invaders.

Let us now turn to such Kushana inscriptions as were intended not for the frontier districts, but for India proper. The materials are now conveniently put together in Professor Lüders' List. I disregard inscriptions where the name of the king is not mentioned, or where the date is too damaged to yield any certain result:

No. 925: *Mahārājasya Kāṇishkasya sam 3 hē 3 di 20 2*, "(during the reign) of the Mahārāja Kāṇishka, anno 3, the 3. (month of) winter, the 22. day."

No. 18: *Dēvaputrasya Ku[ni]shkasya sa[m] 5 hē 1 di 1*, "(during the reign) of the Dēvaputra Kāṇishka, anno 5, the 1. (month of) winter, the 1. day."

No. 21: *Mahārājasya rājātirā[ja*]sya dēvaputrasya Shāhi Kāṇishkasya sam 7 hē 1 di 10 5*, "(during the reign) of the Mahārāja Rājātirāja Dēvaputra Shāhi Kāṇishka, anno 7, the 1. (month of) winter, the 15. day."

No. 22: *Mahārājasya Kāṇishkasya rājyasamvatsarē navamē [9] māsē pratha 1 divasē 5*, "in the ninth, 9., year of the reign of the Mahārāja Kāṇishka, in the first, 1., month of the Rains, on the 5. day."

No. 23: *Mahārājasya dēva[putrasya] Kāṇishkasya savatsarē [10] gri 2 di 9*, "(during the reign) of the Mahārāja Dēvaputra Kāṇishka, in the 10. year, in the 2. (month of) summer, on the 9. day."

No. 149a: *Mahārājasya r[ā]jāt[ī]rājāsyā dēva[pu]trasya Shāhēr-Vāsishkasya rājyasamvatsarē [cha]turviṃśē 20 4 gr[i]shmāmāsē chaturthē 4 divasē triṃśē 30*, "in the twenty-fourth, 24., year of the reign of the Mahārāja Rājātirāja Dēvaputra Shāhi Vāsishka, in the fourth, 4., month of summer, on the thirtieth, 30., day."

No. 161: . . . *sya rājātirājāsyā [dēva]putrasya Shāhi Vāsishkasya sam 20 8 hē 1 di 5*, "in the 28. year (during the reign) of the [Mahārāja] Rājātirāja Dēvaputra Shāhi Vāsishka, in the 1. (month of) winter, on the 5. day."

No. 33: . . . *[Vā]s[i]shkasya rājyasamvatsarē 20 8 hē manta 3 di . . .*, "in the 28. year of the reign of . . . Vāsishka, in the 3. (month of) winter, on the . . . day."

¹ Cf. my edition of this record *Sitzungsberichte*, 1916, pp. 307 ff.

No. 35: *Ma . . . ra . . . sya dēva[pu]trasya [Hu]kshasya skunatt[sa] . . .*, "in the twenty-ninth [year] of the *Ma[hā]ra[ja] Dēvaputra Huksha*."

No. 13a: . . . *Huvishkasya saṁ 30 1 di 20*, "in the 31. year (during the reign) of *Huvishka* . . . on the 20. day."

No. 38: *Mahārajasya dēvaputrasya Huv[i]shkasya saṁ 30 3 gri 1 di 8*, "in the 39. year (during the reign) of the *Mahārāja Dēvaputra Huvishka*, in the 1. (month of) summer, on the 8. day."

No. 151a: *Maharajasya dēvaputrasya Huveshkasya saṁ 30 5 hēmata . . .*, "in the 35. year (during the reign) of the *Mahārāja Dēvaputra Huvishka*, (in the . . . month of) winter . . ."

No. 41: *[Ma]h[ā]r[ja]syā dēvaputrasya Huvishkasya saṁ 30 8 hē 3 di 10 1*, "in the 38. year (during the reign) of the *Mahārāja Dēvaputra Huvishka*, in the 3. (month of) winter, on the 11. day."

No. 149b: *Maharajasya rajātirajasya Huvishkasya savatsara chatarisā 40 hēmatamāsē 2 divasē 20 3*, "in the fortieth, 40., year (during the reign) of the *Mahārāja Rājātirāja Huvishka*, in the 2. month of winter, on the 23. day."

No. 43: *[Mahārājasya] Huvishkasya dēvaputrasya sa 40 5 va 3 di 10 5*, "in the 45. year (during the reign) of the *Mahārāja Dēvaputra Huvishka*, in the 3. (month of) the Rains, on the 15. day."

No. 45a: *Mahārājasya Huvekshasya savacharā 40 8 va 2 di 10 7*, "in the 48. year (during the reign) of the *Mahārāja Huveksha*, in the 2. (month of) the Rains, on the 17. day."

No. 48: *Mahārājasya Huvishkasya sa 40 8 hē 4 di 5*, "in the 48. year (during the reign) of the *Mahārāja Huvishka*, in the 4. (month of) winter, on the 5. day."

No. 51: *Mahārājasya dēvaputrasya Huvishkasya rājyasam 50 hē 3 di [2]*, "in the 50. year of the reign of the *Mahārāja Dēvaputra Huvishka*, in the 3. (month of) winter on the 2. day."

No. 42: *Śarasatama[?]-maharajasya Huvikshasya savas[i]rē ashṭapana gri[s]yamasa 3 divisa 2*, "in the fifty-eighth year (during the reign) of the *Śarasatama (?) Mahārāja Huviksha*, in the 3. month of summer, on the 2. day."

No. 58: *Ma[hā]rā[ja]syā r[ājā]tirajasya dēvaputrasya Huvashkasya saṁ 60 hēmatamāsē 4 di 10*, "in the 60. year, (during the reign) of the *Mahārāja Rājātirāja Dēvaputra Huvashka*, in the 4. month of winter, on the 10. day."

No. 60: *Mahārājasya r[ā] sya dēvaputrasya Vāsu . . . savatsarē 70 4 varsham[ā]rē prathamē divasē trisē 30*, "in the 74. year (during the reign) of the *Mahārāja Rājātirāja Dēvaputra Vāsu(dēva)*, in the first month of the rains, on the thirtieth, 30., day."

No. 66: *Maharajasya Vāsudēvasya saṁ 80 hana va 1 di 10 2*, "in the 80. year (during the reign) of the *Mahārāja Vāsudēva*, in the 1. (month of) the Rains, on the 12. day."

No. 68: *Mahārājasya Vāsudēvasya saṁ 80 3 gri 2 di 10 6*, "in the 83. year (during the reign of) the *Mahārāja Vāsudēva*, in the 2. (month of) summer, on the 16. day."

No. 69a: *Mahārājasya rājātirajasya dēvaputrasya Shāhi-Vāsudēvasya rājyasam[ā]rē 80 4 griṣhmamāsē divi 2 di 5*, "in the 84. year of the reign of the *Mahārāja Rājātirāja Dēvaputra Shāhi Vāsudēva*, in the second, 2., month of summer, on the 5. day."

No. 72: *Mahārājasya rājātirajasya Shāhi-Vāsudēvasya saṁ 80 7 hē 2 di 20*, "in the 87 year (during the reign) of the *Mahārāja Rājātirāja Shāhi Vāsudēva*, in the 2. (month of) winter, on the 30. day."

No. 78: *Rājā Vāsudēvasya samvatsarē 90 8 varshamāsē 4 divasa 10 1*, "in the 98. year (during the reign) of *Rājā Vāsudēva*, in the 4. month of the Rains, on the 11. day."

It will be seen that we have here to do with a different way of dating. The name of the month is not given. Instead the season is mentioned and the number of the month within the season. If we bear in mind that all these inscriptions are written in the Brāhmi alphabet, which we might style the national Indian script, and that they were all issued in India proper, it becomes likely that this change in expressing the dates is due to the influence of national Indian methods.

So far as I can see, we possess two other ancient inscriptions which immediately present themselves for comparison, *vis.*

No. 949 : *Maharajasya Trikamataasya sa 60 4 grī 3 dī 5*, "in the 64. year (during the reign) of the *Mahārāja Trikamata*, in the 3. (month of) summer, on the 5. day," and,

No. 59 : *Sv[ā]misa mahakshattrapasa Śōḍāsasa savatsarē 70 2 hēmainamāsē 2 divasē 9*, "in the 72. year (during the reign) of *Svāmin Mahākshatrapa Śōḍāsa*, in the 2. month of winter, on the 9. day."

Of these I have not sufficient materials for judging about the Bōdh Gayā record No. 949.¹ The Śōḍāsa inscription, which hails from Mathurā, like most of the Brāhmi inscriptions of the Kushanas, is, to judge from palaeography, certainly older than them.

We do not know for certain in which era the Śōḍāsa inscription of Sam. 72 is dated. I do not think it possible that it can be the same as in the Taxila plate of Sam. 78. I think that Patika, who issued that record, is identical with the Mahākshatrapa Padika of the Mathurā lion capital, which mentions Śūḍasa, i.e. Śōḍāsa, as Kshatrapa. In the Taxila plate Patika is not even Kshatrapa. Dr. Fleet² thinks that we have to do with two different Patikas; but I cannot agree with him, because I do not think it possible that the Taxila plate is as late as the Śōḍāsa inscription. Palaeographically I think we must place it before the Takht-i-Bābī record, and I should certainly think that it must go back to about the last years before or the very first years after the birth of Christ. The Śōḍāsa record is found on a sculptured stone-slab, and Sir John Marshall some time ago informed me that he thinks it impossible to relegate the sculpture to an earlier date than the 1st century A.D.³ I therefore think it necessary to assume that the Śōḍāsa inscription is dated in the Vikrama era. Moreover, so far as I can see, we have a distinct indication that the dating according to three seasons, each comprising four months, was later on considered as a characteristic feature of the Vikrama era. It is well known that in the oldest inscriptions which give a name to this era it is designated as a Mālava reckoning. In two of the most ancient instances of its use, in the Mandasōr inscription of the time of Naravarman and in the Mandasōr inscription of the time of Kumāragupta I, the season is expressly mentioned. Moreover, we have three inscriptions where the era is designated as *kṛita*. In the Bijayagadh inscription of Vishnuvardhana⁴ we read : *kṛitēshu chaturshu varshaśatēshu-aśṭāvinīśeshu 400 20 8 Phālgunābhakulasya pañchadaśīyām*, "after four hundred and twenty-eight, 428, *kṛita*-years, on the fifteenth of the dark fortnight of Phālguna"; the Mandasōr inscription of the time of Naravarman⁵ has : *śrīr-Mmālavaganāmnātē prastātē kṛitasamjñātē śkashashṭyadhikē prāptē samāśatachatuśṭayē prāvṛik(t)-kālē subhē prāpte . . . m[ā]ghē pranṛittē . . . dinē Āśvōjasuklasya pamohamyām*, "when the auspicious year four hundred increased by sixty-one, used in the illustrious Mālava gapa and named *kṛita*, had arrived, when the glorious rainy season had arrived, while the clouds were dancing, on the fifteenth day of the bright fortnight of Āśvōja"; and finally, the Gaṅgdhār inscription of the

¹ To judge from the remarks by Dr. Bloch, *Jo. Beng. As. Soc.*, Vol. LXVII, P. I., p. 282, it is perhaps dated in the Kanishka era.

² *JEAS.*, 1913, p. 1001.

³ *Gupta Ins.*, p. 253.

⁴ Cf. *JEAS.*, 1914, p. 985.

⁵ *Ep. Ind.*, Vol. XII, p. 320.

time of Viśvavarman¹ has : *yātēshu chatu[r]shu kritēshu satēshu saumyaishvāsttasōttarapa-dēsho²-īha vatsarēshu sukṛē trayōdaśadinē . . . Kārttikasya māśasya*, "when four hundred and eighty (P) *kṛita* years had elapsed, on the bright thirteenth day of the month Kārttika."

It is quite plain from these instances that the years of the Vikrama-Mālava era were at an early date characterised as *kṛita*. Sir R. Bhandarkar³ is inclined to explain this designation in such a way that the era "was invented by the people or astronomers for the purpose of reckoning years and was consequently originally known as *kṛita*, which means 'made.' " Dr. Fleet⁴ reminds us of the fact that the Vikrama era was never an astronomical era and suggests that there may be some connection between the designation *kṛita* and *Ki-li-to*, the name of a race which according to Hsüan-tsang seized the sovereignty in Kashmir after the death of Kanishka ; and Mahāmahōpādhyāya Paṇḍit Haraprasād Śāstri⁵ says that *kṛita* was the name of the first year of a cycle of years which was used in Vedic periods, though he admits that only in two of the three cases it is possible to divide the number of years, after the subtraction of one, by four. So far as I can see there is a much simpler explanation of the designation *kṛita*. It should be remembered that the years, and not the era, are so called. Now *kṛita* is the best throw in the play of dice, when the number of points is divisible by four.⁶ At the ritual play on the occasion of the Agnyādheya, the father and the son who take twelve *akshas* each win. I think this explains the designation of the old Vikrama-Mālava year as *kṛita*. It was divided into three seasons, each comprising four months.

It is evident that this arrangement of the year is no new invention of the establishers of the Vikrama era. It is simply an adaptation of the old Sāvana year with the three *chāturmāsya*s, and we are quite justified in assuming that this was the old national Indian arrangement.

A slightly different subdivision of the year is found in a number of ancient Brāhmī inscriptions, most of which hail from the Dekhan and Southern India. In the first place we have the inscriptions of the Āndhras (Lüders, Nos. 987, 1001, 1021 (P), 1024, 1100, 1105, 1106, 1107, 1120, 1122, 1123, 1124, 1125, 1126, 1146, 1147, 1186, 1195). It will be sufficient here to take one example, all the inscriptions being dated according to the same principle. The Kārṣṇ inscription of the 7th year of Puṣumāvi has : *rājā Vāsīṭhiputasa sāmī-Siri-P[uṣumāvisa] savachharē satamē 7 [g]imhapakhē pachamē 5 divasē pathamē 1*, "(during the reign) of the Rājan, the son of Vāsīṭhi, Svāmin śrī-Puṣumāvi, in the seventh, 7., year, in the fifth, 5., fortnight of summer, on the first, 1., day." It will be seen that we have here a slightly different method, the *pakhās*, fortnights, of the season and not the months being given. This same method is used by the Abhira Śīvarasēna (Lüders, No. 1137) ; by the Svāmin Virasēna (Lüders, No. 684a) ; by the Mahārāja Bhīmasēna (Lüders, No. 906) ; by the Rājan Aśvaghōṣa (Lüders, No. 922) ; by the Mahārāja Jayavarman (Lüders, No. 1828) ; by the Ikshvākus (Lüders, Nos. 1202, 1203 and 1204) ; and by the Pallavas (Lüders, Nos. 1196, 1200, 1205). It was evidently the prevailing one in the south.

The dating in the ancient inscriptions of the Western Kshatrapas, who certainly used the Śaka era, presents quite a different picture. To take an example, the Junāgaḍh rock inscription of Rudradāman (Lüders, No. 965) is dated : *rājā mahākshatrapasya gurubhīr-abhyastanāma Rudradāmanō varshē dvīsapitumē 70 2 Mārggaśīrsha-bahula-prat[ipadi]*, "(during the reign) of the Rājan Mahākshatrapa Rudradāman, whose name was repeated by the venerable, in the seventy-second, 72., year, on the first day of the dark half of Mārggaśīrsha." In this way all the

³ Ep. Ind., Vol. XII, p. 819.

⁴ Cf. Lüders, *Das Würfelspiel*, Berlin, 1907, especially pp. 51 ff.

⁵ Dr. Fleet suggested *saumyēshv-astita*,

⁶ J.E.A.S., 1913, pp. 996 and 998.

Kshatrapa inscriptions (Lüders, Nos. 962, 963, 964a, 965, 966, 967, 1133, 1135), and also the record of the Śāṅkāyana Vijayadēvavarman (Lüders, No. 1194) are dated. The Nahapāna record, No. 1174, gives an incomplete date (*vasē 40 6*).

It will be seen that we have here again the name of the month, as in the Kharōshthī records, with the addition of the *paksha*. If we bear in mind that the Western Kshatrapas were certainly Śakas or Yüē-chi, it becomes likely that the Śaka era which they used in their inscriptions was a direct imitation of the reckoning used by their cousins in the North-West, the additional mentioning of the *paksha* being perhaps a concession to the custom in the part of the country where they ruled.

From the whole state of things I think we must draw certain conclusions.

The oldest Kharōshthī inscriptions were dated in an era, of unknown origin, which was most probably based on foreign models. Kanishka and his successors used a different era, but, in their Kharōshthī inscriptions, recorded the dates in the same way as their predecessors, giving the name of the month and the day within the month.

A new era, known as the Śaka era, which was based on the same principles, but added the *paksha*, was later on established in Kathiawar and Central India.

The northern Kshatrapa Śōdāsa used a different method, which apparently represents the ancient Indian way of dating, with mention of the season, the number of the month within the season, and the day of the month. The same way of dating seems to have been considered as characteristic of the old Vikrama-Mālava era, and Kanishka and his successors adopted it in their Brāhmī records.

Now palaeographical and iconographical considerations point to a date in the first century A.D. for Śōdāsa and also place him earlier than Kanishka and the Western Kshatrapas.

I think we are forced to the conclusion that Śōdāsa dated his inscription in the Vikrama era, and that the method of dating used in that reckoning was adopted by Kanishka and his successors in such records as were destined for India proper, because it was the national north-Indian way of dating. Finally, it becomes impossible to maintain that Kanishka was the founder of the Śaka era and used it in his inscriptions, because then it becomes unintelligible why he should have changed the way of expressing the dates. I am still of opinion that the Śaka era was established by Vima-Kadphises. I have given my reasons in my Indo-Scythian contributions in the publications of the Berlin Academy for 1916 and I shall resume them below in my edition of Taxila inscription of Sam. 136.

We must therefore look to other indications in order to fix the starting point of the Kanishka era. Professor Lüders has drawn attention to M. Chavannes' statement¹ that the name Po-t'iao of the Ta Yüē-chi king who sent an embassy to China in A.D. 229 may be a rendering of the name Vāsudēva. If this should prove to be the case, the initial point of the Kanishka era cannot be earlier than A.D. 130 or later than A.D. 168. The Āra inscription would accordingly fall between A.D. 171 and 209, provided that it is dated in the Kanishka era; and I think we have no reason for doubting that, if we admit that Kanishka cannot be the founder of the Vikrama era.

Now Dr. Fleet² maintains that the use of the Roman imperial title "Kaisar" would not be possible at such a late date. He says: "The name Cæsar, as an appellation of the head of the Roman state, started with Julius Cæsar, to whom it belonged by birth. It was assumed, on adoption, by his grand-nephew and successor Octavianus, better known as Augustus from the title which was given to him by the Roman senate and people in B.C. 27. It was

¹ *T'oung Pao*, II, v, p. 489,

² *JRAS.*, 1913, pp. 104 f.

transmitted by Augustus, together with his own title, to his successors. And undoubtedly it was a very leading designation, along with Augustus and Imperator, of all the Roman emperors down to a certain time, and was probably the particular appellation by which they were most generally known and spoken of in popular usage in the western parts of the empire, though we may doubt whether the same was the case in the eastern parts. But there was an important change in the time of Hadrian (A.D. 117-38). He dropped the name Cæsar as a title of the emperor, and gave to it the application which it continued to bear after his time: namely, he transferred it to the second person in the state, the intended successor to the throne. And, though he did not make a Cæsar till A.D. 136, when he adopted and appointed L. Aelius Verus, his coins show that he abandoned the use of the title by himself in A.D. 125. Thus, from A.D. 125 the name Cæsar was no longer a title of the emperors, but had only a subordinate value . . . We are thus confronted by the position that the name Cæsar was taken up by a Kushan king as an imperial title in imitation of the Roman emperors when it had ceased to be a title of those emperors themselves. And this is sufficient in itself, I think, to upset Professor Lüders' application of the Kushan record."

I have consulted an eminent classical epigraphist, Professor E. Ziebarth, about this question. He informs me that all Roman emperors, with the exception of Vitellius (15-69 A.D.), used the title Cæsar. After Hadrian the use of the title was no more allowed to every prince but only to the emperor himself and his successor and co-regent. The title is used in inscriptions, in Europe and in Asia, at all times, and it is impossible to draw any chronological conclusions.

It is therefore quite allowable to assume that the Roman title could be adopted by an Indian ruler as late as A.D. 170. The Romans were repeatedly victorious in their wars in Mesopotamia and against the Parthians during the latter half of the second century; and there is nothing unlikely in the supposition that an Indian ruler in the North-Western Frontier districts should have adopted the Roman imperial title at that time. But soon the Roman power began to melt away in Asia; and there is nothing extraordinary in the fact that the title was not used in India any more.

In support of Professor Lüders' dating I have¹ drawn attention to the traditional tales about Khotan handed down by the Tibetans. We learn from them that "the king Kanika and the king of Guzan and king Vijayakirti, lord of Li (Khotan) and others, having led an army into India and overthrown the city of Soked (Sākēta), king Vijayakirti, obtaining many sarira, then bestowed them in that stupa of Phru-ño." This can only mean that the Khotan king Vijayakirti joined the Kushan king Kanishka in an expedition against Sākēta. I have compared this traditional account with the statement made by Tāranātha and in the Chinese biography of Aśvaghōsha, according to which the Yüehi king attacked Magadha in order to get hold of Aśvaghōsha, Sākēta being one of the towns which tradition mentions as the home of that saint. Vijayakirti would accordingly be a contemporary of Kanishka. Now Vijayakirti was the successor of Vijayasimha, whose queen helped to propagate Buddhism in Kashgar. Professor Franke has shown² that the introduction of Buddhism in Kashgar apparently took place about A.D. 120. Vijayakirti must accordingly have ascended the throne after that date, and he may roughly be assigned to the middle of the second century A.D. I have proved³ that the Tibetan traditional tales about Khotan are at least in part based on fact and that they should not be disregarded as fictitious.

It is in my opinion a remarkable fact that both the Chinese remark about Po-tiao and Tibetan tradition lead to the same conclusion, that Kanishka I belongs to the middle of the second century A.D. More definite information may reasonably be expected from excavations.

Ara inscription of Kanishka : Sam. 41.

STEN KONOW

SCALE .5

W. GRIGGS & SONS, LTD., PHOTO-LITH.

FROM ESTAMPAGES SUPPLIED BY MR. H. HARGREAVES.

The Āra inscription would accordingly belong to the last quarter of the second century A.D.; and with regard to the king Kanishka mentioned in it I do not think we can get beyond the suggestions made by Professor Lüders that he was a son of Vāsishka and probably a grandson of Kanishka I.

Dr. Fleet has objected that, even if we read *Vajheshka* and not *Vajheshpa* in the Āra inscription, the names *Vajheshka* and *Vāsishka* cannot easily be identified, nothing justifying us in assuming that *jh* and *s* are two different renderings of one and the same sound. He admits that *jh* can represent the voiced *s*-sound which is usually in phonetical works designated by *s*, but he does not seem to know any analogy to the rendering of such a *s* through *s*. I think however that we have a good analogy in another word which is used in Śaka and Kushana records, viz. in the title *kusulaa* in the Mathurā lion capital, *kusuluka* in the Patika plate, which is undoubtedly the same as the title *kujula*, *κοζουλο* used by Kadphises I. I agree with Professor Hultsch¹ that this is a Turkish word, though I do not identify it with *güjlü*, "strong," but with *güzel*, "beautiful."² At all events the different writing, with *s* and *j*, forms an almost exact parallel to the writings *s* and *jh* in the name of the successor of Kanishka I.

Kanishka II can only have held sway over a part of the Kushana empire and only during a short period. If we admit that the Mānikiala inscription belongs to the reign of Kanishka I, we have dates for him between Sam. 3 and 18, for Vāsishka between Sam. 24-28, for Huvishka between Sam. 29-60, and for Vāsudēva between Sam. 74-98. Kanishka II may, as supposed by Professor Lüders, have assumed sovereignty after Vāsishka's demise in the North-West. Later on however Huvishka seems to have conquered the North-West as well.

No. 8.—SANJAN PLATES OF BUDDHAVARASA.

By STEN KONOW.

These plates have already been published by Mr. A. M. T. Jackson,¹ who remarks that they were found "by Hasanji Kelia, a cultivator of Sanjān in the Umbargaon pētha of the Dāhānu Talukā of the Thānā district." I now edit the grant from impressions kindly prepared by Mr. H. Cousens.

There are altogether two plates, measuring $9\frac{1}{2}" \times 8\frac{1}{4}"$. According to Mr. Jackson, "they have raised rims, and are pierced with two holes for the connecting rings, of which the left-hand one, bearing a heavy copper seal with the figure of a lion walking to the left, still remains intact." The beginning and the lower corners of the first and the lower left-hand corner of the second plate have been damaged. In other respects the plates are in a fair state of preservation. The first plate contains twenty and the second nineteen lines, and the letters can mostly be read with certainty. The first line is much effaced and cannot be made out with certainty.

The characters belong to the southern class and might well belong to the latter half of the seventh century. Sometimes, however, quite peculiar forms occur. Compare *rū* in *-rūpum*, l. 2; *śa* in *śrīmatām*, l. 2; *-śira-*, l. 7; *-Daśaratha-*, l. 7; *-niśēsha-*, l. 12; *va* in *varō*, l. 5; *vya* in *-Mānavya-*, l. 2, etc. *ḍa* has a loop at the bottom; compare *-paunḍarika-*, l. 6; *bāhudaṁḍa*, l. 10; *Sēḍiva-*, ll. 22, 27, 34; *Lavanivaunḍēna*, l. 22; *Kaṇchāḍi-*, l. 24; *Viyāḍi-*, l. 24. The cerebral *ṇa* usually takes the form illustrated in Bühler's Table VII, column 21, numbers I-III. The form given as number IV, however, occurs twice in *-kalyāṇaparāḍhparāṇām*, l. 4. The dental *ṇa* has a loop. Both the *ā* and the *ai* mātrās are attached to the right-hand bar of *pa* in *-pautra-*, l. 29; *Pausha-*, l. 33; while the *ai* strokes are attached to the left-hand bar in *-paunḍarika-*, l. 6; *-prapautr-*, l. 29. A peculiar interest attaches to the sign for *la*. There are, as a matter of fact, two different forms of this sign, compare *sakala-*, l. 2, and *varāha-lamchhanam*, l. 5. On comparing the signs, it will be seen that the former corresponds to the *la* given under Nos. VI-IX in column 34 of Bühler's Table VII, while the latter corresponds to the first numbers of the same column, and still more closely to the most common *la* in Gupta inscriptions. These two different forms of *la* are used side by side in several inscriptions from the time of the Guptas onwards, and usually there does not seem to be any difference made between them. In the Sanjān plates, however, they seem to be differentiated according to a distinct principle. The former occurs in *sakala-*, l. 2; *Chalukyānām*, l. 5; *-tula-*, l. 6; *-pālana-*, l. 10; *-sajalajaladharapaṭalavyōmatāla-*, ll. 10 f.; *-dhavalavimala-*, l. 11; *Chalukyakula-*, l. 15; *-pālana-*, l. 16; *-vipula-*, l. 16; *kūṣālī*, l. 17; *-kula-*, ll. 18, 23; *-Uddhavāli-*, l. 24; *talavṛkṣhaṁ*, l. 25; *-kāliṇa-*, l. 29; *-Vilachchhēa*, l. 31; *bālī*, l. 31; *phalaṁ*, l. 35; *-nupālanaṁ*, l. 39, and further in *-Kōkkullī-* (P), l. 13, and *-Kalvīvana-*, l. 29. The latter occurs in *lōcha-*, l. 1; *-kalyāṇa-*, l. 4; *varāha-lamchhanam*, l. 5; *-lāḍḍha-*, ll. 8, 15; *-vallabha-*, ll. 9, 13; *Malla-*, l. 22; *Lavanivaunḍēna*, l. 22, and further in *-Pālakēśi-*, l. 9; *Sagula-*, ll. 21, 31, 34; *Varasigilēna*, l. 23. If we compare all these instances, it will be seen that one form of *l* is regularly used for a single uncompounded *l* between vowels, while the other form occurs when *l* is initial or combined with another consonant. There are, as will be seen, some exceptions to this rule. The intervocalic form is also used in *-Kōkkullī-*, l. 13, and *-Kalvīvana-*, l. 29, and the initial form in *Pālakēśi-*, l. 9; *Sagula-*, ll. 21, 31, 34; *Varasigilēna*, l. 23. It will be seen that all the exceptions occur in names, which cannot, of course, be viewed in the same way as ordinary words. The reading *-Kōkkullī-*, l. 13, is moreover quite uncertain. It can also be read *Kōkkulī* or perhaps even *Kōkkulī*. It is impossible to decide whether the *ō* is long

¹ *Journal Bomb. As. Soc.*, Vol. XX, pp. 40 and ff.

or short. At all events the name must be compared with the Eastern Chālukya *Kokkili*,¹ the Telugu-Chōḍa *Kōkili*,² the Chōḍa *Kōkili*,³ etc. The correct form seems to be a cerebral *l*, single or doubled. The name is certainly Dravidian. The same is probably the case with *-Kulvāna-*, l. 29. *Palakēṣi* is likewise in its first part a Dravidian name; compare Kanarese *puli*, tiger, where it is of interest that the *l* of this word is dental and not cerebral. Also the remaining names are most likely of a similar kind. At all events, it seems quite certain that in ordinary words the two forms of *la* are correctly distinguished as mentioned above.

Now it is a curious fact that we find exactly the same state of affairs in some other inscriptions, viz. the spurious plates of Dharasēna II of Valabhī, dated Śaka 400, and the spurious Gurjara grants of Śaka 400, 415, and 417.⁴ Here also there are some few exceptions. In the Bombay Museum Plates of Dharasēna II⁵ we find the sign which usually denotes an initial or a doubled *l* written in the name *Giriviligrāmaḥ*, l. 20, while the intervocalic form is used in *lagna* in *triṇāgralagna-*, l. 27. In the Umētā grant of Dadda⁶ we find *jīvalokaḥ*, l. 12, and *triṇāgralagna-*, Pl. II, l. 9, with the intervocalic, and the name *Gilaka-*, Pl. II, l. 15, with the initial *l*. In the Bagumrā grant⁷ we find the same words *jīvalokaḥ*, l. 11; *triṇāgralagna-*, l. 25, with the intervocalic, and the name *Ushilathana*, l. 18, with the initial form. The Ilāṣ plates⁸ likewise have *jīvalokaḥ*, l. 10, and *triṇāgralagna-*, l. 21, with the intervocalic, and the name *Akulēśvara-*, l. 14, with the initial form of *la*.

It will be seen that the exceptions are everywhere of the same kind. In the first place, we find some standing terms in which the *l* has been treated as intervocalic, though it is the initial of the second part of a compound word. There is nothing extraordinary in this. We know from the history of the Prakrits in India that compound words were often treated as one word and suffered such phonetic changes as resulted from the word-Sandhi. It is also of interest to note that the exceptional use of intervocalic *l* in these inscriptions always recurs in the same words, an additional proof that all these forged records proceeded from the same source. The remaining exceptions to the rule, where the initial form is used when a single *l* occurs between vowels, are all found in proper names, just as was the case in the Sanjān plates.

The necessary inference from this state of things is that at the time when these plates were engraved the sound of *l* differed according to its use. When it was initial or formed a compound consonant, it had a sound other than when it was used as a single consonant between vowels.

Now it is a well-known fact that a corresponding state of affairs is found in a number of Indo-Aryan vernaculars of the present day, such as Marāṭhī, Rājasthānī and Gujarātī. As I have shown elsewhere,⁹ every old initial *l* and such *l*'s as are derived from old compound consonants in Marāṭhī, and, I may add, in other languages of the same kind, remain dental, while on the other hand every old single uncompound *l* between vowels becomes cerebralised. I have also drawn attention to the fact that this is an ancient feature of certain Indo-Aryan vernaculars. In the so-called Pāisāchi dialects, which belong to the oldest Prakrits, it was already fully developed.¹⁰ According to the oldest Indian tradition the old Pāisāchi was spoken somewhere in the neighbourhood of the Vindhya,¹¹ and we have no information that the same

state of things prevailed in other old vernaculars. The use of two different *l*-sounds in a series of modern Indo-Aryan tongues, however, shows that it must at some period have spread over a wider area; and it would be of interest if we could find out when this new state of things had become established in the different places. It is not, however, possible to arrive at certain results.

There cannot, so far as I see, be any doubt that the use of two different signs for *l* in some Indian inscriptions, of which the one represents an old initial or doubled *l*, the other an old single *l* between vowels, can only be explained in the light of the modern vernaculars just referred to, the more so because those inscriptions hail from territories in which at the present day Marāṭhi and Gujarātī are spoken. But the difficulty is to decide when these grants were engraved.

With regard to the spurious Valabhi and Gurjara grants it is as yet impossible to arrive at certainty. We may state with confidence that they are later than the Kaira plates of Dadda II Praśāntarāga (A.D. 628 and 633), from which the writer's name Rēva or Rēvāditya has probably been taken. The Sanjān plates, on the other hand, purport to have been issued during the reign of the Western Chalukya Vikramāditya I, on the occasion of an eclipse of the sun on the new moon day of Pausa. Now we know¹ "that Vikramāditya I commenced to reign between some time in September A.D. 654 and July A.D. 655," and his son Vinayāditya must have ascended the throne about A.D. 680. I have consulted Professor Jacobi about the eclipses of the sun which were visible in Western India during this period, and he has kindly informed me that the only one that suits the case is the one that occurred on the 7th December A.D. 671. Of the other eclipses which, according to the Pūrṇimānta system, might come into consideration, viz. those of the 18th December A.D. 670, the 25th November A.D. 672 and the 27th November A.D. 680, the first and the last were not visible in India, and the eclipse of A.D. 672 was too unimportant. Professor Kielhorn has shown² that in early times the Pūrṇimānta system was in use in Southern India. The intended date would accordingly be the 7th December A.D. 671. And it would be possible to date the spurious Gurjara grants about the same time. It is in this connection of interest that the name of the writer of the Sanjān grant is Rēvagana; compare Rēva, Rēvāditya of the Gurjara grants. As we shall see, however, there are so many indications showing that the Sanjān plates are not genuine, that their date cannot be relied on. On the other hand I see no reason for assigning them to a much later date, and we may provisionally state that the cerebralisation of an uncompound intervocalic *l* in the Western Marāṭhā country can be dated back to about A.D. 700.

The orthography of the Sanjān grant is rather careless. Thus we find *am* for *ā* in -bhayamṇēka-, l. 15 : *i* for *a* in -ānviyaḥ-, l. 29 : *i* for *ī* in mahipati-, l. 11; mahipālana-, l. 16; -samakālīnaḥ, l. 29 : *ā* for *u* in -Pūlakēśi-, l. 9 : *ri* for *ri* in kriy-, l. 32 : *ē* for *a* in -bhayamṇēka-, l. 15 : *kt* for *tt* in daktā-, ll. 5, 21, 27, 36, 38; -kiñchiktula-, l. 6 : *ga* for *sa* in -gartra-, l. 7 : *na* for *ṇa* in -Harinā-, l. 4; Aṁbārāmēna-, l. 21; -pratiharēna-, l. 24 : *n* for *nn* in Mātridāna-, l. 23 : *pu* for *hu* in -Napaśa-, l. 7 : *bhi* for *dhi* in rājābhīrāja-, l. 13 : *ya* for *vya* in pitriyō-, l. 14 : *sa* for *sha* in -ābhīśiktānā-, l. 3. A consonant after an *r* is doubled in kārttikēya-, l. 4; -Arjjuna-, l. 12; -karhkaś-, l. 12; sarvo-, ll. 18, 19; nivartta-, l. 20; pūrveṇa-, l. 25; -mary-yādā-, l. 26; sarvādānam-, l. 27; -ārka-, l. 28; -chaturvēdusya-, l. 31; -kriyōtsarppanārttham-, l. 32; ulakāṭisarggeṇa-, l. 34; bahubhiḥr-vvasudhā-, l. 34; bhūmiharttā-, l. 38; pūrva-, l. 38, but not in -Arjuna-, l. 12, -chāturdanta-, l. 15, and, of course, not in -Harsha-, l. 8. Letters and syllables have not rarely been omitted. Compare yāva for yāvat, l. 25; yatnā for yatnād, l. 38; -niśēsha- for -niḥśēsha-, l. 12; Dvāśagrāmyā for Dvādaśagrāmyā, l. 19; -ādhikari for -ādhikārīnaḥ, l. 18, and perhaps Madanamgāśrayaḥ for śrīmad-Anamgāśrayaḥ, l. 17. A superfluous

¹ Ep. Ind., Vol. IX, p. 102.² Ep. Ind., Vol. IX, p. 102.

anusvāra occurs in -*rāshshtra*-, l. 18 ; -*saṁdliḥ*, ll. 25, 26 ; -*anēkaṁ*-, l. 30, and a superfluous visarga in -*ādhipatiḥ*-, l. 8 ; -*ōgrah*-, l. 8 ; *sutahs*-, l. 9 ; -*ānriyah*-, l. 29 ; -*Hiranyakēśiḥ*-, l. 30 ; *bahubhiḥ*-, l. 34 ; *bhūmiḥs*-, l. 35, while the visarga has been wrongly omitted in *saṁsādita*, l. 5 ; -*pratāpa*, l. 8 ; *bāhudaṁḍa*, l. 10 ; -*rāja*, l. 17.

The rules of Saṁdhi are constantly violated. Thus we find visarga instead of *ś* in -*parikarāḥ*, l. 27 ; visarga instead of *s* in *mahārājah*, ll. 9, 14 ; and visarga before sonants in -*yāgāḥ yat*-, l. 6 ; -*bhōgikāḥ nēkakulapradhūnaiḥ Mātri*-, l. 23 ; *nadhūyirah Rēva*-, l. 31. On the other hand, we find *ō* before surds in -*vijayō*, l. 15 ; *Mahīndārāmō*, l. 21 ; *parivāhō*, l. 26 ; -*vāpakō*, l. 27. When two vowels follow each other, they are sometimes wrongly combined ; thus, -*bhīṣhaṇātur*- instead of *bhīṣhaṇa ātur*-, l. 12. In other cases an *m* is inserted as a kind of Saṁdhi-consonant.¹ Compare *dukṣiṇa*=*m*=*iva bāhudaṁḍa*, l. 10 ; -*ōśadhī*=*m*=*iva tushṭikarō*=*m*=*Arjuna*=*m*=*iv*-, l. 12 ; -*chandramā*=*m*=*iva*, l. 16 ; -*Hiranyakēśi(h)*=*m*=*anēka*-, l. 30 ; *sahasrēṇa*=*m*=*aśva*-, l. 37. Other instances of wrong Saṁdhi are =*vinashṭam* *ava*-, l. 6 ; -*nyāyēna achāṭabhaṭapravēśyah ā*-, l. 28.

The language is Sanskrit. There are however several mistakes. The nominatives in *ō* of *a*-bases where no sonant follows ; forms such as *sīmaṣy-āpi*, l. 23, perhaps -*chaturvēdasya*, l. 31, and the use of the genitive instead of the dative in l. 31, and so forth, make it probable that the person who drafted the plates was more familiar with Prakrit than with Sanskrit. A form such as *Mahīndārāmō*, l. 21, is pure Prakrit, and the form *mātarā* instead of *mātri* in *saptamātarābhīṣikṭānā*, l. 3, is in accordance with the rule in Hēmaachandra's Prakrit grammar III, 46, that the Sanskrit word *mātri* becomes *mātarā* if it denotes a deity, *mātarā* being a Sanskritised form of this *mātarā*. Also the use of two different *l*'s points in the same direction. That the grant was drafted by a person who was not very well versed in Sanskrit is also shown by the use of parenthotic sentences in l. 4 (*bhagavā-pratyaksha-Harīnā tushṭēna varō daktah saṁsādita[h*] pratyayō varīthalamchhanam cha*), l. 3 (*kṛitachāṭvāmēdha-rājasūya-paunḍarikayājyāḥ yat=kiñchiktu(t=ku)laduritam tad=vinashṭam . . . dhamushmatā*) and so forth. Note also -*Rāmadēva-lat-pratimānam=iva*, l. 7 ; -*ānudhyātā*, ll. 10, 17 ; -*yasō*, ll. 11, 16, and so on.

Such occurrences cannot fail to throw some doubt on the genuineness of the plates. And other considerations lead to the same result.

I have already mentioned that the seal shows the figure of a lion. Now the Western Chalukyas used the bear crest,² and this is in accordance with l. 5 of the Sanjān grant. The invocation of the Varāha-incarnation of Vishṇu at the head of many Chalukya grants should, no doubt, be seen in connection with the use of this crest. It speaks strongly against the genuineness of the present grant that this stanza has been so much changed.

On the other hand, it cannot be urged against the genuineness of the plates that the grantor Buddhavarasa is not known from other sources ; for a Mahāsāmanta Buddhavarasa of the Śālukika family is known from the Tōrkhēḍō grant of Śāka 735.³ This Buddhavarasa was in possession of an estate known as the Siharakhī Twelve, which Dr. Fleet has identified with the present Serkhi, near Baroda, at 73° 8' E. and 22° 21' N. This place is not too far removed from Sanjān to make it unlikely that he was a descendant of the Buddhavarasa of the Sanjān plates, and the name of his family *Śālukika* can hardly be anything else than Chalukya. The later Buddhavarasa was a feudatory of the Rāshtrakūṭa king Gōvinda III ; and nothing prevents us from supposing that members of the old imperial Chalukya family, after its overthrow by the Rāshtrakūṭa's, served under the new rulers. I am thus inclined to think that the older

¹ Cf. Kielhorn, *Ep. Ind.*, Vol. IX, p. 268 and n. 3.

² Cf. Fleet, *Gazetteer of the Bombay Presidency*, Vol. I, Part ii, p. 299 n. 4.

Ep. Ind., Vol. III, pp. 53 ff.

Buddhavarasa is no fiction. This however does not affect the argument regarding the genuineness of the Sanjān plates. If we suppose, as I think we must, that they were drawn up at all events not long after the date they mention, it would be natural for the forger to insert real names and not fictitious ones.

Buddhavarasa states that he was the younger brother of **Pulakēśin II**, and styles himself *rājan*. Now we know that there was about the same time another Chalukya who held sway in the same part of the country, viz. the Gujarāt Chalukya **Śryāśraya Śilāditya**, of whom we possess two grants, dated in A.D. 669 and 691 respectively. The former has been edited by Professor Hultzsch¹ and contains the information that the grantor, the *yuvarāja* **Śryāśraya Śilāditya**, was the son of **Dharāśraya Jayasimhavarman**, the younger brother of **Vikramāditya I**. About **Dharāśraya** we only learn that his "power had been increased by his elder brother." **Śryāśraya** was residing at **Navasārikā**, the present **Nausāri**, where the plates were found. The latter grant, which comes from **Surat**, was published by **Bhagvānlāl Indrājī**.² Professor Hultzsch has shown that **Śryāśraya Śilāditya** must have held sway over a province that included **Navasārikā**. The villages granted by him were **Āsatṭigrāma**, **Kārmaṇya**, **Ōsumbhalā** and **Allūraka**. Of these **Āsatṭigrāma** is the present **Astgām**, seven miles east-south-east- $\frac{1}{2}$ -south from **Nausāri**; **Kārmaṇya** is the present **Kamrāj**, 72° 2' E. and 21° 18' N.; **Ōsumbhalā** is the present **Umbhel**, 73° 1' E. and 21° 11' N., and **Allūraka** the present **Alurā**, 73° 5' E. and 21° 12' N. There is accordingly no objection to assuming that another Chalukya prince at the same time ruled over a province in the present **Thānā District**.

In such circumstances I think we are justified in making use of the historical information contained in the Sanjān grant, and even the attribution of the name *Kōkkulī* to **Vikramāditya I** may very well be justified, if we remember that the name *Kokkili* recurs in the genealogy of the Eastern **Chālukyas**.

The genealogy of the **Western Chalukyas**, as given in the grant, carries us back to the **Paramēśvara Satyāśraya Pulakēśin [II] Prithivivallabha**, who had conquered **Harsha-Dēva**, the king of Northern India (**Uttarāpatha**). His son was **Prithivivallabha**, the *Rājādhirāja* **Paramēśvara Jayasri Kōkkulī Vikramāditya**, the *Mahārāja*; and the younger brother of his father was the *Rājan*, the **Paramamāhēśvara Madanaṅgaśraya** (or, *śrīmad-Anaṅgaśraya*), the glorious **Buddhavarasa**, by whom the present grant purports to have been issued. He claims to have conquered the terrible four-tusked elephants of the lord of the *gaṇa* of the **Achhatyana** or **Natyana**. I do not know what to make out of this name.

We further learn that **Buddhavarasa**, being in good health, while residing in **Pinuka**, on the occasion of an eclipse of the sun on the new moon day of **Pausa**, during the reign of **Vikramāditya I**, grants to **Sagulasvāmin Dikshita**, the son of the **Chaturvēdin Rēva**, a resident of **Kalvivana**, of the **Hārīti gōtra**, the **Taittiriya śākhā**, proficient in the various *sāstras* of the **Hiranyakēśins**, **Mahindārāma** and **Ambārāma** in the twelve-village-district (**Dvādaśagrāmī**) in **Avaranta** (**Aparānta**), at the sea-shore, and further the plots of **Sēḍiva** and **Malla**, the **Lavanivaṇḍa** and **Varasigila**. The name of the village to which these plots belonged has been lost. We may however perhaps supply the name **Māṭṛidinnagrāma** from l. 23. To the north and west it was bounded by the sea. To the east some localities are mentioned, which I cannot identify, viz. **Viyāḍi**, **Uddhavāli** (or **Uddhavālikā**), **Kanakōcharā** (or **Nakōcharā**), **Taṭāyikā**, and the eastern boundary, the **Vyāghrataṭāka**.

Mr. Jackson has identified **Pinuka** with the present **Pen**, the chief town of the *Tāluka* of the same name in the **Kolaba District**, situated at 18° 44' N. and 73° 6' E., and **Kalvivana** with

¹ *Ep. Ind.*, Vol. VIII, pp. 229 ff.

² *Verhandlungen des VII. Internationalen Orientalisten-Congresses*, Wien, 1888, Asiatische Section, pp. 211 ff.

the present Kelve, at 19° 36' N. and 72° 44' E., close to Mahim. Avaranta is evidently the same as Aparānta, the Northern Konkan. The Twelve-village District and Mātridinna-grāma would, if we consider that the northern and western limits are the sea-shore, have to be looked for in the country to the west of the river Amba; and it is possible that Mātridinna is a semi-Sanskrit form of the village name which is now Māndva.

I am not able to interpret the whole grant to my own satisfaction. The accompanying plate has been prepared from impressions which I owe to the kindness of Mr. Cousens.

1. 2 4 6 8 10 12 14 16 18 20

2 4 6 8 10 12 14 16 18 20

Sanjan plates of Buddhavarasa. The image shows a collection of 20 numbered plates, each containing a line of text in an ancient script, likely Pali or Sanskrit. The plates are arranged in two rows of ten. The text is written in a cursive style, typical of ancient Indian inscriptions. The plates are numbered 1 through 20, with the numbers appearing at the top of each plate. The text on the plates is a continuous passage, with some variations in the script across the different plates. The plates are made of a dark material, possibly stone or metal, and the text is inscribed on them. The overall appearance is that of a historical document or a collection of ancient inscriptions.

Handwritten text in Devanagari script, likely a manuscript page. The text is arranged in approximately 15 horizontal lines. There are two large circular holes on the left side of the page, suggesting it was once bound in a book. The ink is dark, and the paper appears aged and slightly discolored.

[father's] feet; who, like his right arm-staff, was capable of protecting the earth; whose fame was spotless and white, like the rays of the autumnal moon risen in the skies from which the mass of water-filled clouds has disappeared; who was terrible in his utterly violent effort of warding off the war elephants of (hostile) kings; who was causing satisfaction like a medicinal herb given to a sick person; who was victorious in every battle like Arjuna,—

(Ll. 14-19) His father's brother, the younger brother of Satyāśraya, who rejoiced in showing reverence to gods and Brāhmaṇas; who has obtained victory over the multitude of four-tusked elephants of the lord of the Achhatyana (?) *gaṇa*; who, like a moon in the sky of the lords of the Chalukya family, has acquired white, wide-spread, and well-known fame through protecting the earth; who meditates on the feet of his mother and father, the devout worshipper of Mahēśvara, Madanaṅgāśraya (or, the illustrious Anaṅgāśraya), the illustrious Buddhavarasa, the *rājan*, being in good health, instructs all the heads of districts, the heads of provinces and villages, the tribal chiefs and officials:

(Ll. 19-23) Be it known to everybody, that the estate Mahindārāma, adorned with the Ambārāma (or, a mango grove), on the sea-shore of the Dvādaśa-grāmi (Twelve-village district), in the village . . . within the Avaranta-vishaya, on the northern side, ten *nivartanas* in extent, has been given by me, and further, on the southern side of Sagula Dikshita's grove, the Sēdiva-field and the Malla-field, together with Lavanivaṇḍa and combined with Varasigila.

(Ll. 23-26) And the measure of steps of the border line (made) by the *bhōgikas*¹ of the Twelve(-district), the heads of several families, and the headman of Mātridinna village together with the door-keeper Kañchaḍi is in figures 30. They went to the east of Viyaḍi, Uddhavāli, Kanakōcharā and Taṭāyikā, in the distance of an arrow shot, up to the palmyra tree, five (?) *sha*.² To the east the limit is the Tiger-tank (*Vyāghra-taṭāka*), and its waterline measures 30 *sha*. To the south the limit is the boundary (of the village). To the west and to the north the sea-shore, 30 *sha*.

(Ll. 27-34) This is the surrounding limit, and, defined as to its four abutments, the Sēdiva field has been given, with all taxes, free from *vishṭi-prātibhōdikā*, with all the spaces within, according to the maxim of *bhāmichchhidra*, not to be entered by petty officials³ and soldiers, for as long a time as moon and sun (endure), to be enjoyed in succession by sons, grandsons, and great-grandsons, to the inhabitant of the illustrious Kalvivana, of the Hāriti *gōtra*, the Taittiriya *sākhā*, the foremost of those who are proficient in the various *sāstras* of the Hiraṇyakēśins, the son of the *chaturvēdin* Rōva, who lives in the foremost excellent town Vilachchha,⁴ to Sagula-Svāmin Dikshita, for the performance of *bali*, *charu*, *vaiśvadēva* and other rites, for the increase of the merit and fame of his mother and father and of himself, on the new-moon day of Pausha, on the occasion of an eclipse of the sun, by the illustrious Buddhavarasa, staying in the town of Pinuka, with his own hand, with libations of water; to Sagula Dikshita this Sēdiva-field (has been given).

(Ll. 34-39) Four of the customary verses.

(L. 31) Written by Rāvagaṇa.

¹ See *Ep. Ind.*, Vol. IX, p. 273 and n. 6.

² I do not know what is meant with *sha*, perhaps *śāṣṭkāṃsa*, cf. Kaṭṭiliya, p. 107.

³ Ch. *Ep. Ind.*, Vol. IX, p. 284 n. 10, and p. 296; Vol. XI, p. 176, and Lalla Dikshita's Commentary on the *Mṛichchhakaṭikā* (ed. Godbole, Bombay, 1896), p. 223: *chāṣaṣ kshudra-rishaya-bhōktā*.

⁴ I am extremely doubtful about the interpretation of this part of the grant, and a name such as *Vilachchha* does not seem to be likely.

No. 9.—A NEW ANDHRA INSCRIPTION OF SIRI-PULUMAVI,

By V. S. SUKTHANKAR, PH.D.; POONA.

The subjoined Prakrit record incised in the reign of the Āndhra king Sirī-Pulumāvi, 'King of the Sātavahana (family),' was discovered by Mr. T. Bajarao, Kauarese Assistant in the Office of the Assistant Archaeological Superintendent for Epigraphy, Southern Circle, during his tour of inspection in the Ādōni Taluk of the Bellary District, Madras Presidency. The estampages were prepared under the direct supervision of Rao Sahib H. Krishna Sastri and kindly placed at my disposal by him for publication. I am indebted to him also for many valuable suggestions in the matter both of decipherment and of interpretation of the record.

The inscription is engraved on the eastern face of a large natural boulder of reddish granito, known to the villagers as Jangli Gunḍu (Jungle Stone). The inscribed rock, which is firmly buried in the soil, lies midway between the villages Myākadoni and Chinnakadabūru at a distance of about eight miles due N. from the Taluk Head-quarters. The surface of the boulder has peeled off at various places, sometimes right up to the depth to which the letters were incised. The written surface, consisting of four lines of the inscription, covers an area of 8' by 3', and the height of the average letter is 2½". The engraving, though bold and neatly executed, is not very deep; indeed the "ducts" of the letters are so shallow that a superficial examination of the rock discloses hardly any traces of the record. It is worth noting that the words are separated from each other by small gaps, a circumstance which greatly facilitates the deciphering of the record. The fourth and last line of the inscription is considerably shorter than the rest, and commences much farther to the right than these. The closest inspection of the rock did not disclose any distinct trace of letters in the gap at the beginning, caused by the shortness of this line.

The alphabet resembles that of the Jaggayyapeta inscription of Purisadata.¹ Characteristic are the hooks with which the elongated verticals of the letters *ka*, *ṇa* and *ra* terminate, as well as the pedantic semi-circular arc used as the sign for the medial *i*. The signs for medial *ā* and *ē* show a tendency to droop downwards at their free ends. In spite of this similarity with the characters of the Jaggayyapeta record, there could be, as far as I can see, no objection on palæographic grounds to their being assigned to an epoch earlier than the third century, to which the Jaggayyapeta inscription is hesitatingly ascribed by Bühler, *Indische Palæographie*, p. 44.²

The number of epigraphic records belonging to the Sātavahana Dynasty, which had succeeded in holding sway over a large part of southern India for an unusually prolonged period, is remarkably small. In the Madras Presidency, besides the one I am now editing, there are only two inscriptions which refer themselves directly to the reign of a Sātavahana king,³ and these are both records from the Kṛṣṇā district, one of them being certainly a private record. So is the inscription under consideration a private record: it registers the construction

¹ Bühler, *Indische Palæographie*, p. 44, and Tafel III, Col. XVII, XVIII.

² See also his remarks in the *Arch. Surv. of Southern India*, Vol. I, p. 111. Excepting the tendency of horizontal lines which are unconnected at one end to curve downwards, there is no difference between the alphabet of our record and those which are figured in Table III, Col. X-XIII of Bühler's *Tafeln*, which would justify its being assigned to a later palæographic epoch. The curving downwards of horizontal lines is, in my opinion, as much an ornamental variation as the hooks at the ends of elongated verticals, which are to be observed as early as in an inscription of Sātakāṇi I. (Col. X), which Bühler himself assigns to 1-2 century A.D. With the semi-circular arc representing medial *i* cf. *gi* and *vi* in an inscription of Pulumāvi (Col. XI); *di*, *ni* and *hi* in an inscription of Sātakāṇi I. (Col. X); *ti* (twice) and *dhi* in those of Ushavadāta (Col. VII, VIII) and others much earlier.

³ See Lüders, *List of Brāhmī Inscriptions*, Nos. 1249, 1340.

of a tank by a certain householder (*gahapati*). The only other designation besides Puṣumāvi which the king receives here is *Raño Sātavahanānam*, 'of the King of the Sātavahanas.' One notices here the absence of the metronymic with which the names of the Sātavahana kings are as a rule accompanied, such as Gotamīputa and others.¹ Worthy of note also is the use of the family name Sātavahana, a term of comparatively rare occurrence in inscriptions.²

With the scanty information we have in our record about this Puṣumāvi an identification is precarious. There are in fact at least four kings with the name Puṣumāvi (or its variants) known to history; and the chronology of this dynasty is far from being satisfactorily settled. Mr. Vincent A. Smith,³ working upon the Puranic material supplied by Pargiter, gives us tentatively the following dates for the various Puṣumāvis:—

1. Puṣumāvi (I.), the fifteenth king of the dynasty, ruled some time before A.D. 59.
2. Puṣumāvi (II.), Vāsīthiputa, came to the throne about A.D. 135, and ruled for something like 28 years.
3. Puṣumāvi (III.), came to the throne about A.D. 163, and ruled for something like 7 years.
4. Puṣumāvi (IV.), came to the throne about A.D. 218, and ruled for something like 7 years.

For purposes of identification the Puranic king Puṣumāvi (I.), of whom we know next to nothing, may be rejected on palaeographic grounds. Further, if the lengths of reigns allotted to these kings in the list supplied by Mr. Vincent A. Smith happen to be correct, then the last two Puṣumāvis will also have to be rejected, as they are stated to have ruled only seven years each, while our inscription is dated in the eighth regnal year of the king. From this point of view the Puṣumāvi of our inscription will have to be identified with Vāsīthiputa sāmī-Siri-Puṣumāvi (II.), the [Σίρο]πτολεμαῖος of Ptolemy.⁴ A large number of records dated in the reign of this king have in recent years come to light. The year of his accession to the throne is, as remarked above, put down roughly at A.D. 135. Assuming a plurality of kings with the name Puṣumāvi, there is no other criterion in the inscription for identifying him further.

It was mentioned above that the object of the inscription was to record the sinking of a reservoir (*talāka*). There is, however, no reservoir or tank to be seen in the neighbourhood, to which the record may apply. But it may be remarked that the soil in the vicinity of the inscribed rock is alluvial, consisting of sand and finely powdered dust; so that the adjoining land might well at one time have formed the bed of a tank.

Among the localities mentioned in this record *Sātavahani-hara* is particularly interesting, as it occurs once again in the Hira-Hadagalli copper-plate inscription⁵ of the Pallava king Śivaskandavarman in the slightly altered form of *Sātāhani-raṭṭha*. I am not aware that the names of places mentioned in this grant of the Pallava king have been satisfactorily identified, so that the situation of *Sātāhani-raṭṭha* has been, as far as I know, a matter of conjecture. The inscribed boulder bearing the present record is, however, a sure landmark, as far as the situation of the locality is concerned. If, now, the find-place of the grant, Hira-Hadagalli, which is also situated in the Bellary District, be supposed to be not far removed from the subject of that grant, which is described as being located in the *Sātāhani-raṭṭha*, then the territorial

¹ See Rapson, *Catalogue of the coins of the Andhra Dynasty, etc.* (London, 1908), p. clxxxix.

² See Rapson, *op. cit.*, Index V, s. v. Sātavahana.

⁴ Rapson, *op. cit.*, p. xxxix.

⁵ *Ep. Ind.*, Vol. I, pp. 2 ff.

division Sātavahani-Sātāhani must have comprised a good portion of the modern Bellary District. The relation in which the *mahāsēnāpati* and the *gumika* stand to the *janapada* and the *gāma* which appear along with their names, is not explicitly mentioned. But, considering the position of these persons, one might hazard the guess that these military officers were feudal lords of the lands, holding them in the form of *jāgīrs*.

In conclusion, it may be remarked that the site of the inscribed rock is an important landmark, fixing definitely a point south of the Kṛishṇā to which the sway of the Sātavahanas extended.

TRANSLATION.

Success! On the first day of the first (fortnight of) the second month of Winter⁷ in the eighth year (of the reign) of Siri-Puḷumāvi, King of the Sātavahana (family), the reservoir was sunk by the householder (gahapatika) . . . resident in the village (of) Vēpuraka, belonging to the Captain (gumika) Kumāradata (Kumāradatta), in the country (janapada) of Sātavahani-hāra,⁸ belonging to the Great General (mahāsēnāpati) Khamdanāka⁹ (Skandanāga).

¹ From the stone and a set of impressions.

² Traces of the bracketed syllable are visible on the stone.

³ The consonant signs are almost certain; the vowel signs are all but obliterated, as at this point the rock has peeled off almost to the depth to which the letters were incised. Perhaps, we have to read *masi*, making with the foregoing numerical symbol 1 the word *paḍhamasi*.

⁴ Read *janapadē*.

⁵ We have probably to restore *gumikasa* (from Skt. *gaulmika*, 'captain'), which would accord well with the *mahāsēnāpatisa* of the preceding line.

⁶ This and the following word must, in my opinion, contain the specification of the *gahapatika*; the first (*gen. plu.*) is most probably a tribal name, and the second (*inst. sing.*) is the personal name. The reading of the first *aksharas* of the names must however be looked upon as problematic.

⁷ This is the season commencing with the dark fortnight of the month of Kārttika.

⁸ This is a clear case of the use of the word *hāra* in the sense of 'kingdom or district.' See Lüders, *List of Brāhmī Inscriptions*, Appendix, Index of miscellaneous terms s.v. *āhāra*.—In the Hira-Hadugalli copper-plates, (Lüders' List, No. 1200) this territorial division receives the designation *raṭṭha* (*rāshtra*). Thus *hāra* must correspond to *raṭṭha*.

⁹ Cf. the personal name Khamdanāga-sātaka occurring in a Buddhist inscription at Kanheri (Lüders' List, No. 1021).

No. 10.—THE NAIHATI GRANT OF VALLALA-SENA; THE 11TH YEAR.

By R. D. BANERJI, M.A., INDIAN MUSEUM, CALCUTTA.

The plate on which this grant is incised was discovered by some coolies, while digging some waste land, between the villages of Naihati and Sitahati in the Katwa subdivision of the Burdwan district of Bengal, belonging to Babu Baidyanath Chatterji, Zamindār of Sitahati, in January 1911. The piece of waste land on which the grant was discovered is called by the local people *Nai rājār bhūṭā*, "The ruins of Nai Raja's place." A copper cup, "*tāmra-kunḍa*," a vessel still in common use for divine worship in Bengal, was discovered at the same time. Subsequent excavations at the same place yielded some more utensils of worship :—

(1) A copper censer on two legs, one of which is peculiarly curved. Such censers are very often represented on the pedestals of images of the Pūla period (800-1200 A.D.).¹ This form is no longer used in Bengal. Dr. J. Ph. Vogel, when Officiating Director-General of Archæology, found similar utensils for *pūjā*, made of brass, in the Tirumalavadi Temple of Vaidyanātha, Trichinopoly district, Madras. The censer had a movable cover, which has now disappeared and of which the hinge only remains. It measures 7" in length and 4½" in height.

(2-5) Four small stands or cups, most probably intended to hold *pāṇi-saṅkhas*, or conch-shells. No. 2 measures 2½" in height, and the diameter of the top is 1½". No. 3 measures 2⅞" in height, and the diameter of the top is 1½". No. 4 measures 2" in height, and the diameter of the top is 1½". No. 5 measures 1½" in height, and the diameter of the top is 1¼".

(6-8) One elaborately carved and two plainly carved small conch-shells, used during *pūjā*. They are called *pāṇi-saṅkhas* and are not used for blowing. They are filled with water, and waved before the deity at the time of Āratrika.

(9-12) Four irregular pieces of oxidized zinc.

The nature of the finds indicates that the piece of waste land where the grant and the other objects were discovered is the site of an ancient temple. Local people say that some images made of gold, or covered with gold leaf, were found at the same place. Mr. Tārak Chandra Roy, M.A., when Subdivisional Officer of Katwa, interrogated the agent of the Zamindār of Sitahati, who denied all knowledge of them. Subsequent inquiries did not lead to the discovery of any such images, and Mr. Roy is inclined to regard the rumours as baseless.

Immediately after the discovery a reading of the record with excellent photographs was published by Mr. Roy in the Journal of the Bangiya Sāhitya Parishad.² A revised reading of the text was then published by Mr. Akshaya Kumāra Maitreya, B.L., of Rājshāhi, in the Bengali monthly journal "*Sāhitya*."³ Prof. Rādhāgovinda Basāk, of the Rājshāhi College, published a Bengali translation of this record in the same journal.⁴ Subsequently Dr. D. B. Spooner, B.A., Ph.D., F.A.S.B., Superintendent, Archæological Survey, Eastern Circle, undertook to edit this grant for the *Epigraphia Indica*, and prepared a version of the text and a translation. But he was unable to finish this task on account of pressure of work, and his discovery of the Maurya ruins of Pāṭaliputra diverted his attention, and in 1915 he permitted me to take up the work. Dr. Spooner's version of the text and his translation of it have been largely used in this article.

¹ Cunningham's *Maṅgābōdhi*, pl. xxviii.

² *Bangiya-Sāhitya-Parishat-Patrikā*, Vol. XVII, pp. 231-45.

³ *Sāhitya*, Vol. XXII (B. S. 1318), pp. 5-19; 27.

⁴ *Ibid*, pp. 575-85.

The record is incised on a single plate of copper, measuring 13½" by 15". A seal is attached to the top: like the seals of the other grants of the Sēna kings, it does not contain the name of the sovereign. It consists of a seated image of the ten-armed Śiva, known as Śadā-śiva. In the Edilpur grant of Kṣēśava-sēna the seal is expressly called *Sadāśiva-mudrā*.¹ The record bears sixty-four lines of writing, thirty-two on the first side and thirty-two on the second. The average length of the letters is 1½". The engraving has been neatly and carefully done, and on the whole the record is free from mistakes. The characters of the grant show the well-developed Bengali alphabet of the 12th century A.D., the beginning of which is to be seen in the Deopara inscription of Vijaya-sēna, the father of Vallāla-sēna. Among vowels the initial forms of *ī*, *ṛi*, *ḷi*, *ai* and *au* do not occur. Only *i* retains its old form and does not even approach the Bengali form. *a*, *ā* and *ā* show complete forms. *u* and *ū* have intermediate forms, and in these two cases the modern curved top strokes only are wanting. Among consonants *ka*, *na*, *chha*, *ta*, *da*, *pa*, *pha*, *bha*, *va*, *sa* and *ha* retain intermediate or transitional forms. The other letters of the alphabet show complete Bengali forms. The *anusvāra* still retains its old form, and the *anunāsikā* is used in two or three instances, e.g. *anyāñś-cha* (l. 35), *kshētra-kurāñś-cha* (l. 36). Final forms of *ta*, *na* and *ma* are used in many cases, and the doubling of consonants with a subscript or superscript *r* is optional. The language of the record is Sanskrit. With the exception of *om om namaḥ Śivāya* at the beginning of the first line, the first twenty-eight lines contain in verse the genealogy of the Sēna kings from the moon to Vallāla-sēna.

The first verse contains an invocation to Śiva in the form *Ardhanārīśvara*. The second is devoted to the praise of the Moon-God, in whose lineage the Sēnas were born. The third verse contains the important statement that the forefathers of Sāmanta-sēna ornamented the Rāḍhā country, proud of its fame for the maintenance of legal behaviour (*sud-āchāra*), with unheard-of glory. Verses 4-13 contain the usual genealogy of the Sēna kings. Fresh information is available in verse 7, where it is stated that Vijaya-sēna defeated a king named Sāhasāṅka. It is difficult to identify this Sāhasāṅka. According to my view of the chronology of the Sēna kings the year 1119-20 A.D., which is the initial year of Lakshmaṇa-sēna's era, must also be the first year of the reign of Lakshmaṇa-sēna: therefore, according to this view, the death of Vallāla-sēna occurred in 1118-19 A.D. Vijaya-sēna, the father of Vallāla-sēna, must therefore be placed in the last decades of the 11th century A.D.² This is the earliest possible date for Vijaya-sēna. According to the other view, Vallāla-sēna died in 1168-69 A.D.,³ and Vijaya-sēna reigned during the earlier decades of the 12th century A.D. Even if we accept the earlier date, it does not make it possible to identify this Sāhasāṅka. The only possible prince with whom it is possible to identify him is Sālivāhana, also called *Sāhasāṅka*, *Niḥsāṅka-malla*, *Maṭamaṭa-siṅha* and *Kari-varsha*, who is known from the Chamba grant of his son Sōmavarma-dēva (P) and who, according to the late Dr. Kielhorn, lived "about the middle of the 11th century A.D."⁴ In Southern India the only prince who is called Sāhasāṅka in an Epigraphic record is the Rāṣṭrakūṭa Govinda IV,⁵ who cannot be taken to be a contemporary of Vijaya-sēna. Another Sāhasāṅka is Sindhu-rāja, the Paramāra chief of Dhārā, the brother of Vākpati-rāja II and father of Bhōja-dēva, according to the *Narasahasāṅka-charita* of Padma-gupta. But he also belongs to the last decades of the 10th century or the first two of the 11th. It may be said that Sāhasāṅka is a synonym of Vikramāṅka or Vikramāditya. Even if we accept that, the difficulties of identification do not diminish. In North-

¹ *Journal and Proceedings of the Asiatic Society of Bengal* (New Series), Vol. X, pp. 99 and 104.

² *Memoirs*, A. S. B., Vol. V, pp. 103-07.

³ *Ep. Ind.*, Vol. VIII, Synchronistic table for Northern India, col. 7.

⁴ *Ibid.*, Vol. V, App., p. 81, note 6.

⁵ *Ep. Ind.*, Vol. VII, p. 36.

ern India Gāṅgēya-dēva is perhaps the only prince whose surname was Vikramāditya;¹ but, as he was dead before 1042 A.D.,² he cannot be said to have been the contemporary of Vijaya-sēna. The only possible person in Southern India is Vikramāditya VI of Kalyāṇi, the founder of the Chālukya-Vikrama era, who ascended the throne in 1076 A.D.³ We have not as yet come across the name Sāhasāṅka as a surname of this Vikramāditya, nor have we heard of his campaigns in Northern India. So the only possibility is the Chamba prince. In the troubled times when the last remnants of the Gurjara-Pratihāra empire in Kānyakubja or Pratihāra were being destroyed and when Chandra-dēva was trying to found the Gāhaḍavāla kingdom, Vijaya-sēna of Beugal may have come in contact with Sālivāhana somewhere in Northern India. Further information is to be found in verse 10, where it is stated that the principal queen of Vijaya-sēna was Vilāsa-dēvi. Vallāla-sēna was the son of Vijaya-sēna by Vilāsa-dēvi. Verse 14 states that the land granted as the *lakṣhīṇā* of the gift of the golden horse (*hēma-dēva-dāna*) on the occasion of a solar eclipse by the mother of the king was recorded by Vallāla-sēna on a copper-plate and given to the learned Ōvāsu, i.e. Ōvāsudēva-śarman.

The inscription records the grant of the village of Vāllahitthā, with habitable (*vāstu*), cultivable (*nāla*), and waste (*khila*) lands, measuring seven *bhū-pālakas*, nine *dronas*, one *āḍhaka*, forty *unmānas* and three *kikas*, measured by the *nala* called *Vṛishabha-sāṅkara*; with an annual income of five hundred *Kaparddaka-purāṇas*, in *Svalpa-dakṣhiṇa-vithi*, of the Northern *Rāḍhā maṇḍala*, of the *Varddhamāna bhukti*. This is the first mention in an ancient inscription of a *maṇḍala* named Northern Rāḍhā and of a *bhukti* named Varddhamāna. The Varddhamāna *bhukti* is mentioned in a new grant of Lakṣmāṇa-sēna, discovered by Bābū Amṛitya Chārṇa Ghōsha. The village of Vāllahitthā was granted by Vallāla-sēna as the *lakṣhīṇā* of the golden-horse gift made by Vilāsa-dēvi, the mother of the king, on the banks of the Ganges, on the occasion of a solar eclipse (*Sūryyōparāṅgē*), to the *āchārya*, the illustrious Ōvāsu-dēva-śarman, son of Lakṣmīdhara-dēva-śarman, the grand-son of Bhadrēśvara-dēva-śarman, and the great-grandson of Varāha-dēva-śarman, of the Bharadvāja *gōtra*, whose *pravaras* were *Bharadvāja*, *Angīras* and *Bṛihaspati*, and who was a student of the Kaṭhumi *śākhā* of the *Sāma-vēda*. The name of the donee presents some difficulties. In verse 14 he is simply referred to as the learned Vāsu (*Vāsu-vidushē*);⁴ but in the prose portion, where his lineage is mentioned, his name is written "Āchārya-Śrī-Ōvāsudēva-śarmanāṇē," which may also be read as "Śrī 3 Vāsudēva-śarmanāṇē" meaning the "thrice illustrious Vāsudēva-śarman." But in l. 63, in the verse which mentions the *dātaka* of the grant, the name occurs as "Ōvāsu" or "3 Vāsu," where we cannot take the first letter to be a numeral, because, if we do so, we shall be at a loss to explain it, as the syllable *Śrī* is absent before it. It is therefore better to take the name as Ōvāsu-dēva-śarman. The *dātaka* of the grant was the minister of peace and war (*Sāulhi-vigrahika*) Hari-ghōsha, and it was issued from the victorious camp at *Vikrama-pura* on the 16th day of *Vaiśākha* of the 11th year of the king's reign.

The boundaries of the village granted are as follows :—

It was situated to the north of the river *Siṅgaṭiā*, which lay to the north of the *Śāsana* of *Khāṇḍayillā*, to the north-west of the river *Siṅgaṭiā*, which lay to the north of the *Śāsana* of *Nāḍichā*, to the west of the river *Siṅgaṭiā*, which lay to the west of the *Śāsana* of *Amvayillā*, to the south of the southern boundary-wall (*Simāli*) of *Kuḍumvamā*, to the south of the boundary-wall on the west of *Kuḍumvamā* which runs to the west (*paśchima-gati*), to the west of the southern cattle track (*gōpatha*) on the south of the *Āṇagaddiā*, to the south of the boundary-wall which issues from the northern cattle track of *Āḍagaḍḍiā*, runs to the west and

¹ *Ep. Ind.*, Vol. VIII, App. I, p. 16.

² *Ibid.*, Vol. VIII, App. II, p. 7.

³ *Ep. Ind.*, Vol. II, pp. 299-302.

⁴ This has to be corrected into *adit-aurāṇa*.

reaches to the northern boundary-wall of Surakoṇagaḍḍiā, to the east of the eastern boundary-wall of Nāḍḍinā, to the east of half of the cattle track to the east of the Śāsana of Jalasōthī and to the east of half of the cattle track to the east of the Śāsana of Mōlāḍandī, (which runs) up to the (river of) Siṅgaṭiā. The village granted, Vāllahitṭhā, still exists in the Murshidabad district of Bengal, where it is now called Vāluṭiyā. This identification and the identification of some of the boundary villages have been made by Mr. Tārak Chandra Roy, M.A., Deputy Collector, when Subdivisional Officer of Katwa. Mr. Roy succeeded in identifying the following villages mentioned in the grant :—

- (1) Jalasōthī, a village still existing under the same name in the Murshidabad district of Bengal.
- (2) Mōlāḍandī, a village now called Murundi in the Burdwan district of Bengal.
- (3) Khāṇḍayillā, a village called Khāruliā at the present time, which is situated in the Burdwan district of Bengal.

I edit the grant from the original plate.

TRANSLATION.

Om ! Om ! adoration to Śiva.

V. 1. May Arddhanārīśvara (a form of Śiva, half male, half female), in (one) half of whose body, by the trembling caused by the movement of beautiful limbs, and in (the other) half by the force of the beginning of the dance, which was extraordinary as well as terrible, the double labour of acting is successful (or victorious), bestow prosperity on you, making the ocean of delight to overflow by the waves of sound of the Nāndī (a preliminary song of blessing) arising at the beginning of the evening dance of Śiva (*tāṇḍava*).

V. 2. He, the crest-jewel of Śiva (*Śrīkaṇṭha*), the god (who is) the beloved of night (*tamī-vallabha*), is prosperous : on whose rise the receptacle of water (ocean) becomes restless on account of increased joy, the god of love (*Smara*) becomes a hero in the three worlds, multitudes of white water-lilies become sleepless, the deer-eyed ones (ladies) forsake sulking, there is a rejoicing on account of plenty throughout the city of *Chakōra* birds.

V. 3. In his rising family were born princes (*rājaputtrāḥ*), ornamenting the Rāḍha country, illustrious on account of excessive practice of good behaviour (*sadācāra*), with a dignity not felt or seen before, whose principal aim was to grant protection to the universe constantly, who had flooded the sky by the waves of their white fame.

V. 4. In their family was born the truthful (and) mighty Sāmanta-sēna, who was a guileless receptacle of pity, who was like the illustrious mountain (*Himālaya*)¹ in making his friends, who were devoted to him for ever, realise the objects of their realms of fancy, who was the moon for the festive blossoming of the water-lilies, i.e. those dear to him, whose royal dignity was made radiant by his fame, which was like moon-light, (and) who was like the Sun at the end of the *Kalpas* (i.e. at the time of the deluge)² to the ocean of troops of his enemies.

V. 5. From him was born Hēmanta-sēna-Dēva who was a bee to the lotus-feet of him with the bull-standard (Śiva, whose *vāhana*, or emblem, was the bull), whose qualities were his ornaments, (and) who was like the destructive winter to his pond-like enemies :

V. 6. The masses of whose beautiful fame, which had travelled up to the confines of Indra's garden, were seen by the creator of the Universe (*Viśva-dhātṛ*) proudly as the line of geese, which by its movement had made his own realm radiant ; by Śaṅkara, with fear, as the returning (and therefore) overflowing stream of the Ganges ; (and) by Mādhava, with belief (i.e. trust or assurance), as the moving ocean of milk attracted by love for (his daughter) Lakṣmī.

V. 7. From him was born the lord of Earth called Vijaya-sēna, who was the overlord of all other kings, who had outshone Sāhasāṅka (*Vikramāditya*) by his deceitless prowess, whose fame was sung in the cities of the protecting deities of the cardinal points (*Dikpālas*).

V. 8. Torn and scattered on the earth from the nocklaces belonging to the deer-eyed ones (i.e. womenkind) of whose (Vijaya-sēna's) enemies, as they (the women) wandered in the middle of the forest, the Pulindas, longing to embrace closely the breasts of their beautiful women ornamented with garlands of *guñjā* beads, were carefully collecting the pearls (taking the pearls

¹ This mountain is supposed to contain all sorts of precious things upon which people come unexpectedly.

² At the time of the deluge twelve suns rise and dry up the mass of water.

to be *guñjā* seeds because they were) partly besmeared with the blood from wounds made in the soles of the feet by *darbhā* grass, and partly by the collyrium (of the eyes of the ladies) mixed with tears.

V. 9. It is said that king Kārtavīryya went into every house, holding (his) bow in hand, checking unrighteousness; but by the mere *mantra* recited at the time of his (Vijaya-sēna's) coronation all living beings, being freed from affliction, were placed in the path of righteousness.

V. 10. Vilāsa-dēvī was the principal queen (and) the crest-jewel of the ladies' quarter of this lord of the earth, as Padmālayā (*Lakshmi*) was the wife of Purushōttama (*Vishnu*) and Gaurī was of him whose crest was the young moon (*Śiva*).

V. 11. She (Vilāsa-dēvī) by the merit acquired by great austerities gave birth to a son (named) Vallāla-sēna, incomparable in virtue and dignity, who, a pre-eminent hero, a lion-like lord of men, ascended the high throne, which was like a mountain peak, after his father.

V. 12. The children of kings who were his enemies, while living in the houses of Śavaras, being crowned in pretence as kings by children (and) become proud, were seen by their mothers, with eyes atremble through joy and with sighing were forbidden through fear due to affection.

V. 13. The *Samsaptakas* (the well-known heroes of the Mahābhārata), impetuously embracing heavenly damsels purchased at the cost of their lives, which were (held as cheap as) grass, disport themselves in the *Nandana* forest till the end of the *Kalpas*,—this being considered, the way of his (Vallāla-sēna's) sword, which was like a series of gateways, with blue lotuses consisting of the eyes of heavenly brides, was entered by kings, whose fearlessness was instilled by the god of love (*Smara*).

V. 14. The donative grant (*śāsana-pada*) which the mother of this (king) gave (as *dakṣiṇā*) on the occasion of the gift of the golden horse on the day of a solar eclipse this king, who is to the good a cloud out of season for quenching the pains of poverty, gave, engraved on copper, to the learned Ōvāsu.

(Here follow the terms of the grant, the particulars concerning the estate granted, the name, genealogy, etc., of the donee, and the usual admonitory verses.)

No. 11.—SANGOLI PLATES OF HARI-VARMAN: THE 8TH YEAR.

By K. N. DIKSHIT, M.A., POONA.

These copper-plates, three in number, were first handed over to me, and subsequently presented¹ to the Prince of Wales Museum of Western India, Bombay, by Mallappa Isvarappa Baligār, inhabitant of the village of Sangōli or Sangolli, on the river Malaprabhā, in the Sampgaum *Taluk* of the Belgaum District,—a place well known in the annals of modern Karnatic history, as the native place of Rāyappa² Nāyak, a rebellious retainer of the Desai of Kittūr, who caused a considerable amount of trouble in 1829 A.D.

The owner is a coppersmith, and that might account for the plates coming into his possession. He says, however, that they are his ancestral property, for the last three or four generations, and he hoped to find in them a record of ancient times, conferring on his ancestors the 'Desat' of the country around Bāgalkot in the Bijapur District, from which place he says his grand-father came down and settled at Sangōli. The grant may, therefore, have been brought

¹ It was through the good offices of Mr. G. L. Gajendragadkar, B.A., Mamlatdar, Sampgaum *Taluka* that the owner, after much persuasion, consented to present the plates, which he said he was in the habit of worshipping daily.

² See the ballad describing the rebellion, published in *Ind. Ant.*, Vol. XIV, pp. 293 ff.

from that part of the country ; but the present *provenance* is quite in keeping with the known extent of the Kadamba dominions, Halsi or Palāsikā, one of the secondary Kadamba capitals being only 24 miles away from Sangolī.

The plates are three in number, rectangular with corners slightly rounded off, flat without raised rims, of uniform thickness and equal dimensions, each being $8\frac{1}{4}$ " long \times $2\frac{7}{8}$ " broad. Through a hole in each plate, $1\frac{1}{2}$ " in diameter, passes a heavy ring, $2\frac{1}{4}$ " in diameter. There is no emblem on the ring. Of the first and last plates only one side, of the middle one both sides, are inscribed. All the inscribed sides contain five lines each, except the reverse side of the middle plate, which contains six.—The letters are engraved with sufficient care, and are deep enough, except in places, where they are completely lost. They do not, however, show through the reverse. The average length of each letter is $\frac{1}{4}$ ". The plates together with the ring weigh about $2\frac{1}{2}$ lbs.

The alphabet closely agrees with that of all the other Kadamba grants, and is thus regular for the period and locality to which the grant refers itself. Comparing particularly with the other¹ two grants of Hari-varman, from Halsi, I find that the alphabets are identical in all the three grants, except the letters *ga*, *ta* and *śa*, which show a distinct loop at the bottom in the Halsi grant issued in the fifth year of the reign, which proves that both forms were in vogue at the period. Of individual *akṣaras* from the present grant the form of *a* in line 1 is noteworthy owing to the loop ; also the form of *ka* in l. 9, which has instead of a complete vertical line an oblique stroke up to the horizontal line and below it the vertical line as usual from the centre downwards. This form of *ka* has its origin in the late Kadamba period, and it continues to early Chalukya times.

The language is Sanskrit, the whole grant being in prose, except the first benedictory stanza and the usual verses at the end. The attributes employed to describe the Kadamba kings in general and Hari-varman in particular are such as are found in other Kadamba grants, except *Parama-māhēśvara*, which is worthy of note. The epithet *Śrī-nīlambānām* in l. 4 is introduced before *Kadambānām* merely to serve the purpose of alliteration, as other phrases² are introduced in so many other Kadamba grants. Another attempt at alliteration may be traced in the final obeisance to the three Brahmanical deities, i.e., *Namō Hari-Hara-Hiraṇyagarbhēbhyaḥ* l. 21.

As regards orthography, we find the doubling of the preceding consonant before *ya*, as in *anuddhyānā*^o l. 2, *vāddhyāya* l. 3, and before *ra*, as in *sa-gōttre*^o l. 12, *sa-gōttrāya* ll. 14, 15. But, on the other hand, we find *sa-gōtrānām* l. 3, *sa-gōtrēbhyaḥ* ll. 10-13, *sa-gōtrāya* l. 15. The consonant following *ra* is often doubled, as in *Śambhur-vvi*^o l. 1, *charchchā* l. 3, *kirttiḥ* l. 6, *Hari-varmmā* l. 7, *pravarddha*^o l. 8, *Atharvva*- l. 9, *dharmma-karmma* l. 9, *śarmma* ll. 10-15, *-paharttā* l. 17, *Bahubhir-vva*^o l. 18 ; but not in *Dharma*^o l. 5, *Garga*- l. 12, *śarma* ll. 12, 14. The use of the class nasal is preferred to that of an *anusvāra* in the body of a word, while the latter is retained at the end of a word, the only exceptions being *viśvēśhān-ja*^o, *jagatām-patiḥ* l. 1, *sa-pāntyan-Tē*^o, *Tēdāva-grāman-datta*- l. 16, and *uktañ-cha* l. 18. The final *Visarga* is as often as not changed into the following sibilant ; e.g. *anidhanas=Śambhu*^o l. 1, *dikṣhitas=śruta*- l. 6, *Māhēśvaras=Śrī*^o l. 7, *Yasas=sarmma* l. 13, *rājabhis=Saga*^o l. 18 ; but *rājāḥ sakala*- l. 6, *bhyaḥ sva-dharmma*- l. 9, *bhyaḥ Śiva*- l. 10, *bhyaḥ Śravishttha*- l. 13. The *Jihvāmūliya* is not used ; the *Upadhmāntya* is used twice ; e.g. *-kirttiḥ prajā*- l. 6, *-paraḥ parama*- l. 7. The *Samdhi*

¹ *Ind. Ant.*, Vol. VI, pp. 29 and 31.

² Cf. the following expressions, occurring in juxta-position with *kadambānām* ; viz., *sad-dharma-sad-ambānām*, *Ind. Ant.*, Vol. VI, p. 26 ; VII, 35 ; *āśritāmbānām* [*Epi. Carna.*, Vol. VIII, p. 12] ; *āśrita-jan-ambānām* [*Ind. Ant.*, Vol. VII, p. 33] ; *prajā-sādharan-āmbānām* [*Ind. Ant.*, Vol. VI, p. 23] ; *ādi-kāla-rājareḥ śimbānām* [*Ind. Ant.*, Vol. VII, p. 33] ; *śibudha-pratibimbānām* [*Ind. Ant.*, Vol. VII, p. 37].

rules are often violated; e.g. -*nām anēka* l. 4, -*saṁvatsarē āśva*^o l. 8, -*vriddhayē Atharva*-l. 9, -*śarmabhyah Garga*-l. 12, ^o*gōtrēbhyah Viṣṇu*-l. 12, ^o*bhyah Yaśaś*-l. 13, ^o*bhyah Chaūliya*-l. 14. The wrong class nasal is used in *Vaikuntha*-l. 11, which ought to be *Vaikunṭha*. The word *Chaūliya*, l. 14, perhaps stands for *chauliya*.

The plates record a grant by king Hari-varman of the early Kadamba dynasty of Vaijayanti. Since the publication of the Halsi¹ and Devagere² grants, which were the first to come to light, our knowledge of the dynasty has vastly improved, owing to the publication of seven³ more copper-plate grants, and two⁴ stone inscriptions, all from Mysore territory; so that now we are in possession of a genuine account of the origin, as well as a fairly certain genealogy for the family, thanks to the excellent paper⁵ by Dr. Kielhorn on the Tālagunda pillar inscription. From the earliest known grants Dr. Fleet was led to believe that the Kadambas were followers of Jainism;⁶ but all the records from Mysore since brought to light show that not only did they worship Brahmanical deities, and highly respect the Brahmans, but they were themselves linear descendants of a Brāhmaṇa. The more probable conclusion is that the Kadambas were very tolerant in religion, favouring with donations, now one sect, now another. On careful examination of all the published records we find that from Kākutṣtha-varman down to Hari-varman every king granted donations to Jaina ascetics, as well as to Brāhmaṇas.

The grant was issued from Vaijayanti, the modern Banavāsī in the First *Tāluka* of the North Kanara District. The donees were 23 Brāhmaṇas of 8 different *gōtras*, all well versed in the *Atharva-vēda*. Some of the *gōtra* names are very unusual, e.g. Kaimbala, Kālāśa, Śrāvishṭha, Valandata, Chaūliya. The fact may also be noted that there are very few Brāhmaṇas belonging to the *Atharva-vēda* at present in the Deccan, and Bombay Karnatic. The village granted was Tēdāva, of which no particulars are given, and which cannot be identified.

The date is given as the New Moon day (*Amāvāsyā*) of the month *Āśvina*, during the eighth regnal year of Hari-varman. This in itself would have given us no more data for fixing the chronology than the other Kadamba inscriptions supply; but the further specification of the date as *Viṣhupē*, no doubt, helps to some extent in doing so. Let us see how we can make use of this clue.

It is admitted on all hands that the Kadamba rule in the Deccan was displaced by the Chalukyan, some time before 570 A.D., and that Hari-varman, who must have been one of the last Kadamba princes, if not the very last, cannot be placed earlier than about the end of the first half of the sixth century A.D. On this hypothesis I began to calculate whether the *Amāvāsyā* in the month of *Āśvina* coincided with *Viṣhupa* or *Tulā-Saṁkrānti* (autumnal equinox) during any year about the same period. On consulting Diwān Bahādur L. D. Swāmikannu Pillai of Madras, I found that during the whole of the sixth century A.D. there were only three years in which the above astronomical phenomenon occurred; viz., during A.D. 507, 526 and 545. The first of these years is out of the question, as being too early for Hari-varman. Of the other two I think the year 545 is more probable than the year 526, as in the former case we should not have to leave a large gap unaccounted for, between the periods of Kadamba and Chalukya ascendancy. However, it is not unlikely that the year was 526. The date of the present grant must therefore be either Tuesday, the 22nd September 526 A.D., or Thursday, the 21st September 545 A.D.

¹ *Ind. Ant.*, Vol. VI, pp. 22-32.

² *Ind. Ant.*, Vol. VII, pp. 83-88.

³ *Ep. Ind.*, Vol. VI, pp. 14, 18; *Ep. Ind.*, Vol. VIII, p. 146; *Epi. Carna.*, Vol. IV, p. 136; Vol. V, p. 594; Vol. VI, p. 91; Vol. VIII, p. 12.

⁴ *Ep. Ind.*, Vol. VIII, p. 24; *Epi. Carna.*, Vol. VIII, p. 167.

⁵ *Ep. Ind.*, Vol. VIII, pp. 24 ff.

⁶ *Ind. Ant.*, Vol. VI, p. 22.

These conclusions admit of an independent corroboration. Dr. Fleet has recently published an article,¹ in which he states that the Pennkonda copper-plate grant of the Western Gaṅga Mādhava II. is perhaps the first genuine record of the Gaṅgas, which he would assign on palaeographic grounds to about 475 A.D. Now, assuming that the same Gaṅga king Mādhava II. was married² to a sister of the Kaṭamba Mahārāja Kṛishṇa-varman I., we may easily consider Kṛishṇa-varman I. to have lived about 475 A.D. and his elder brother Śānti-varman at a slightly earlier date, say 470 A.D. If we test the accuracy of our assumed dates for the present grant in this light, we find that in one case we leave a space of about [526-470]=56 years or so, and in the other of about [545-470]=75 years or so, to be bridged over by three generations, as Hari-varman was the great-grandson of Śānti-varman, grandson of Mṛigśā-varman and son of Ravi-varman. The assumption, involving a gap of about 75 years for the three generations, is the more probable, as the average period for a generation is in India calculated to be 25 years. So 545 A.D. is the most probable date for our record. The date of accession for Hari-varman, on this assumption, would be 538 A.D.

The accompanying plates have been prepared from impressions taken for me by the office of the Superintendent, Archaeological Survey, Western Circle, Poona.

² No less than four copper-plate grants mention this relation between the Gaṅgas and Kadambas; and, though the records are held to be spurious, there is no reason why the alleged alliance should be considered fictitious. The identity of Kṛishṇa-varman can be established from the fact that he is said in all the records which refer to him to have performed the celebrated Āśva-mēdha sacrifice (vide *List of Southern Inscriptions, Ep. Ind.*, Vol. VII, Nos. 112-115).

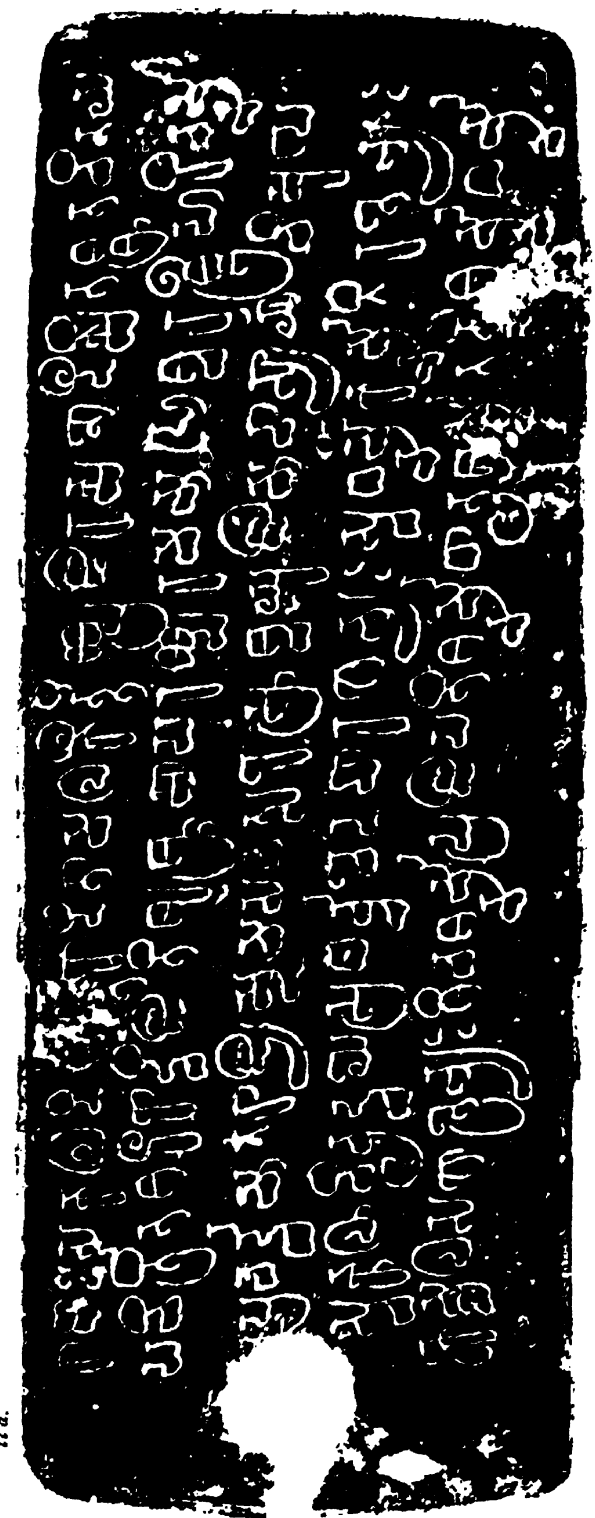

³ From the original plates and a set of impressions.

⁴ Read *mukṇṭa*; cf. *Ind. Ant.*, Vol. VI, p. 86; Vol. VII, p. 35; *Ep. Carna.*, Vol. IV, p. 136; perhaps the word was more common then in the form *mukṇṭa* than as *mukṇṭa*.

⁵ The word *Siddham* is written in the margin opposite l. 2.

⁶ Read *Vaikuntha*.

TRANSLATION.

(L. 1) Victorious is (*the god*) Śambhu, lord of all the worlds, on whom the crescent-shaped (lit. *young*) moon is a steadfast ornament crowning his matted hair, and who has neither beginning nor end.

(Il. 2-5) Success! In the victorious (*city of*) Vaijayanti, (*in the family*) of the Kadambas, who were consecrated in meditation upon the Lord Kārttikēya and the host of (*his*) mothers; who belong to the Mānavya gōtra (*lineage*) and are descendants of Hāriti; who studied³ the requital (of good and evil) as their sacred text and were well-versed in that; who are the (*very*) hips⁴ of the goddess of wealth, and who are famed to have stored immense religious merit throughout a succession of former births,

(Il. 5-7) the illustrious Hari-varman,—who is Lord Dharma⁵ incarnate, as it were, whose unspotted fame has pervaded all the different quarters, who has been initiated into (*the vow of*) protecting the subjects, whose body has been sanctified by means of learning (*combined*) with modesty, who is intent on the service of the Brāhmaṇas (lit. *twice-born*), and who is a great devotee of the mighty god (i.e. Śiva)—

(I. 8) in the eighth year of his flourishing reign, on the New Moon day of Āśvina on the (autumnal) equinox

(Il. 9-16) gave, for the prosperity of his dynasty, the village of Tēdśva, with all its eighteen subdivisions, along with water and (money as) Dakṣiṇā, to (*the following Brāhmaṇas*), who have thoroughly mastered the *Atharva-vēda*, and who are devoted to their religious duties and rites, by name Śiva, Prajāpati, Dhāt̥ri, Nandi, and Dharmma of the Kaimbala gōtra; Vaiṣṇava, Vasu, Nāga, and Maṇḍana of the Kālāśa gōtra; Vishṇu, Prajāpati and Pitri of the Garga gōtra; Kumāra, Tvasht̥ri, Skanda, and Varuṇa of the Kōtsa gōtra; Yaśaḥ Ayya, Paśupati and Mitra of the Śrāvishṭha gōtra; Vana of the Chaūliya gōtra, Prajāpati of the Valandata gōtra, and Kumāra of the Kāśyapa gōtra.

¹ Read °garbhābhyaḥ.

² Read prajābhyaḥ.

³ I follow Dr. Kielhorn in translating the difficult phrase *pratikṛita*° (*Ep. Ind.*, Vol. VI, p. 17).

⁴ The meaning is that the Kadambas constituted the very bulk of the goddess of wealth; i.e. they were very rich.

⁵ The god of righteousness, viz. Yama; or Yudhishthira, the renowned king.

(ll. 17-20) He who revokes this will have committed the five deadly sins; he who protects will share the fruit (*arising*) from the religious merit (*of the donation*); as has been said: 'By many kings, Sagara and others, has the earth been enjoyed; he who at any time possesses it also gets the fruit. He who deprives (*another of*) land given by himself or by others will be tormented in hell for sixty thousand years, together with his forefathers. *Let there be success!

(l. 21) A bow to (*the gods*) Hari, Hara, and Brahmā (Hiranyagarbha)! Hail to the subjects!

No. 12.—UDAYAMBAKAM GRANT OF KRISHNA-DEVA RAYA : SAKA 1450.

By S. V. VENKATESWARA, M.A., AND S. V. VISWANATHA, M.A., KUMBakonam.

The grant is on three copper-plates bored at the top and secured by a ring, attached to which is the seal, bearing the Vijayanagara emblem of a boar and the figures of the sun and the moon on the upper half, and on the lower half some characters, probably corresponding to *Śrī Venkaṭāśa*, as suggested by Dr. Hultsch¹ in regard to the seal attached to the Kāniyūr plates of Venkaṭa II. The plates, which are in good preservation, belong to the Śaṅkarāchārya of the Conjeeveram maṭha, who very kindly lent them for examination.

The plates measure $8\frac{1}{2}$ in. by 7 in., except in the middle, which is $10\frac{1}{2}$ in. by 7 in. on account of the arch at the top. The ring has a diameter of 1 in., and the seal of $2\frac{1}{2}$ in. The holes through which the ring passes have a circumference of $1\frac{1}{2}$ in. All the plates have raised rims. The writing is legible and runs right across the breadth of the plates, as usual. As in other Vijayanagara plates of the period, the first and third plates are inscribed only on one side, and the middle one on both sides. The plates are ruled. The inscription contains 99 lines in all, and the average height of a line is $\frac{1}{4}$ in.

The language of the inscription is Sanskrit, or Sanskritized Kanarese, as in the *birudas* of the king (ll. 25 to 29). The inscription is in verse, and the usual metres are employed, the Anuṣṭubh, the Śārdūla-vikrīḍita, Sragdharā, etc. Not only is the poetry of a low order, but the rules of metre are transgressed here and there; e.g. in verses 34 and 32 the halves *Chandraśekhara-Sarasvatyaḥ śiṣhyāyāmitatējasē* and *śtoshnādi-dvandvaduḥkhatītiya cha mahātmanē*, which are out of accord with the Anuṣṭubh, the metre of the verses. In many places where the metre is faulty, however, it is due to a mistake of the scribe, e.g. *śriyam iha līkritya* in verse 28, which should be read *śriyam iha bahalīkritya*. If in this case the scribe has left out letters in a word, elsewhere he has added superfluous ones, e.g. *jaladhi* in verse 21, *prati* and *nuta* in verse 22.

The characters are Nandināgari, except the signature, or rather the name of the tutelary deity¹ at the bottom, which is written in Kanarese. There are several orthographical peculiarities. There are many instances of a redundant *anusvāra*, especially before conjunct consonants, as in other Vijayanagara plates.—*pūṁnyaiḥ* for *pūnyaiḥ* (l. 7), *aṁnyān* for *anyān* (l. 20), *hiranṁya* for *hiranya* (ll. 36, 37). But we have also instances of redundant *visarga* in *śiraḥś-chumbi* (l. 1) for *śiraś-chumbi*, *°bhuvanaḥ-stūyamāna* for *bhuvana-stūyamāna* (l. 18). In conjunct consonants the former member is often omitted. This error is specially noticeable in connection with the consonants *ta* and *da*. Cf. *°mayādēva°* for *°mayād dēva°* (l. 5); *tasy-āsitanaya°* for *tasy-īst tanaya°* (l. 6); *udabhūtasmanāra°* for *udabhat tasmān nara°* (l. 11); *bhuja-balātām* for *bhuja-balāt taḥ* (l. 16); *tadhāma* for *taddhāma* (l. 4); *chatu-śmā* for *chatus-simā* (l. 84); *a-gajō-bhūtaḥ* for *a-gaj-ōdbhūtaḥ* (l. 4); *nṛisimh-ēndrā tasmāt* for *nṛisimh-ēndrāt*

¹ *Ep. Report* for 1891, p. 6. See *Ep. Ind.*, Vol. III, pp. 236 ff.

taśmāt (l. 22). There is the usual confusion in the writing of the sibilants; of. *bhābhāś* for *bābhāś* (l. 17), *bhūyāś* *śrēyāś* for *bhūyāś* *śrēyāś* (l. 54), *śāśā* for *śāśā* (l. 27), *chātū-śimā* for *chātū-śimā* (l. 84) and *śishya* for *śishya* (4, 86, 87). It is interesting to note that in the Poḍavūr and Kāṭṭapaṭṭa grant¹ of the same king six years earlier we find *śishya* written for *śishya* (l. 82). Thus all three letters *śa*, *sa*, *sha* were used indiscriminately. The influence of the Dravidian languages in the pronunciation of Sanskrit words is clear in *tāmra* for *tāmra* in l. 92, and in *varuśa* for *varuśa* in l. 96. Udayambākam, the name of the village granted, is spelt Wudayambākam as the result of the same influence.

The inscription records the grant of Udayambākam, a village near Tirukkalukkuṇṇam in the Chingleput district, by Krishṇadēva Rāya of the second Vijayanagara dynasty to Sadāśiva Sarasvatī, the disciple of Chandrasēkhara Sarasvatī of the Śāṅkarāchārya maṭha at Conjeeveram.

It is noteworthy that in this grant, and in that of Poḍavūr referred to above, there is no special purpose for which the grant was made, as in the grant of Vijaya-Gaṇḍagōpālā²—which expressly says that it was made 'for the attainment of the highest *dharma*' 'by feeding 108 Brāhmins every day.' The terms of the gift are the same as those given in the other plates of the king. It is curious that, though the gift was made to the Āchāryas of the maṭha and their descendants in the apostolic line, it is not made inalienable, as we should have expected; '*Bhōktum dātum chāpi nij-ēchchhayā*' (v. 41).

The date of the grant is Śaka 1450, the cyclic year Virōdhin, month Vaiśākha, constellation Viśākhā, and *tīthi* Pūrṇimā.

Many of the names of places given in the grant correspond to the names of villages in the district of Chingleput:

'Tirkkalē-kunnarēṇḍāru' is probably the modern Tirukkalukkuṇṇam,³ 'the hill of the sacred kites,' which is much resorted to as a place of pilgrimage, or may it be Tirukkālīkkāḍu in the Conjeeveram Taluk?

Kaḷattūr is another name for Oṭṭivākkam, five miles from Chingleput town, and a station on the South Indian Railway.

Maṇappākkam is an insignificant village, a mile from Kaḷattūr.

Udayambākam, the object of our grant, is about 4 or 5 miles from Kaḷattūr.

Kāshira-nadī is the Sanskrit name of the Pālār river.

Prallayannūr is the modern Palayanūr in the Madurāntakam Sub-District.

Puṇyapaṭṭu is Punnampattū in the Chingleput Sub-District.

The name of the donee is Sadāśiva Sarasvatī, a pupil of Chandrasēkhara Sarasvatī. Chandrasēkhara and Chandrachūḍa are variant forms of the same name. Further, the name Chandrasēkhara in our grant is probably an engraver's error for Chandrachūḍa. The metre requires the latter form: '*Chandrasēkhara-sarasvatyāś śishyāy-āmita-tējasē*' has one syllable more than is allowed by the rules of metre in the *pāda* of an Anuṣṭubh verse. If we read Chandrachūḍa for Chandrasēkhara, there is no such metrical difficulty. If so, the donee Sadāśiva of our grant was a pupil of Chandrachūḍa, the donee in the earlier grant of the same king.⁴ Some time in the interval between the two grants (1521 and 1527 A.D.) Chandrachūḍa must have died, and his disciple Sadāśiva must have succeeded him. Thus we get the names of four successive teachers of the maṭha, as mentioned by us in our introduction to the grant of Vira-nṛsiṃha Rāya.⁵ In connection with the latter grant we have

¹ *Ep. Ind.*, Vol. XIII, pp. 122 ff.

² *Ep. Ind.*, Vol. XIII, p. 194.

³ Tirukkalukkuṇṇam is in Kaḷattūr-kōṭṭam. See the inscriptions of that place edited in *Ep. Ind.*, Vol. III, No. 38.

⁴ *Ep. Ind.*, Vol. XIII, pp. 122 ff.

⁵ *Ep. Ind.*, Vol. XIV, pp. 231 ff.

also given extracts from the *Gururatnamālāstava*, and have identified the donees of these grants. Our identification of the donees with the *Gurus* of the Śaṅkarāchārya *maṭha* is supported by the epithets used in the grant before us: 'the wearer of holy beads' (*rudrākṣha*), 'whose body is besmeared with holy ashes,' 'one who is above the pairs of opposites,—heat, cold, etc., which give pain,' 'Guru who has the form of Śiva.'

We have already shown elsewhere that Krishṇa-dēva Rāya's gifts at holy places are confirmed by inscriptions. His conquest of Kalinga is referred to in various stone inscriptions.¹ His suzerainty over Aṅga and Vaṅga must be regarded, however, as an empty boast. It is possible to understand *Ā-Gaṅgā-ūtra-Laṅkā*² as referring not to the Ganges river, but to one of the rivers of Berar (Wainganga or Penganga). There is no confirmatory evidence of the Vijayanagara Rāja having extended his arms as far north as the Ganges. Nor is there any evidence of the conquest of the Chēra country by Narasa, father of Krishṇa-dēva Rāya. There is an anachronistic reference to an invasion of Krishṇa-dēva Rāya in the *Kēraḷōtpatti*, the traditional history of the Malayālam country. But the west coast of South India was practically independent.

The Kanarese *birudas* of the king were mostly borrowed from those of the kings of the first dynasty,³ as also the titles Rājādhirāja and Rāja-paramēśvara.

² One of the *birudas* of Dēvarāya II in the Satyamaṅgalam plates, edited by Dr. Hultzsch in *Ep. Ind.*, Vol. III, pp. 35-41, is *Bhāvā-ātīlāṅghī-bhūpāla-bhūjaṅga*, which is a Sanskrit rendering of *Bhāshage tappuwa rāyara gaṇḍa*. The *birudas* in that grant are mostly the same as in ours:

राजाधिराजसेनली यी राजपरमेश्वरः ।

भावातिलङ्घिभूपासमुज्ज्विददीप्सलः ॥

मूढरायरगण्डाकः परराजभयंकरः ।

हिन्दुराट्मुरवाणी बन्दिबगेष वक्षते ॥

Dr. Hultzsch translates these passages as follows:—

"He bore the surnames (*birudas*) Rājādhirāja, Rājaparamēśvara, 'the disgracer of kings who break their word,' 'the disgracer of the three kings (of the south),' 'the terrifier of hostile kings' and 'the sultan (*swatrāṣa*) among Hindu kings.'"

TRANSLATION.

(ABRIDGED.)

Verses 1-3. The usual benedictory verses in praise of Śambhu, the Varāha incarnation of Hari, and Gauṇḍa.

Verses 4, 5. The descent of the family from the moon.

Verses 6-8. The first historical kings of the dynasty: Timma, Īśvara, and Narasa.

Verse 9. The gifts made by Narasa in Rāmōsvaram and other places.

¹ Read चतुष्ठीमा°.

² Read नी.

³ Read भा.

⁴ शासनेन would be necessary here to suit the meaning, but the metre would be disturbed. शासनेन सभापतिः, which is found in the other grant edited by us, is certainly a better reading.

⁵ Read ताव.

⁶ Read क्रिमिः.

⁷ Read शिष्यप्रशिक्षेः तष्टिभ्यः.

⁸ Shows the verse has only two pādas.

⁹ Read सदु.

¹⁰ Read ताव.

¹¹ Read स्वदत्ताद्दि.

¹² Read ००००.

¹³ Read पालनीयो.

Verses 10, 11. Exploits of Narasa. His capture of Seringapatam, defeat of the Chola, Chēra, Paṇḍya, and Musalman kings, of the chieftain of Madurā, and the king of Orissa, and his suzerainty over the Dakhan—from Laṅkā to the banks of the Gaṅgā (probably the Pēṅgaṅgā of Central India).

Verses 12, 13. Birth of his sons Vira-nṛisimhēndra and Kṛishṇa Rāya.

Verses 14-17. Praises of Vira-nārasimha and his gifts in holy places in South India.

Verse 18. Death of Vira-nārasimha.

Verse 19. Accession of Kṛishṇa Rāya.

Verses 20-22. Praises of Kṛishṇa Rāya.

Verse 23. His gifts.

Verses 24-26. His *birudas*, such as *Rājādhirāja*, *Vira-pratāpa*, etc.

Verses 27, 28. His praises.

Verses 29, 30. In the year 1450 of the Śāli-vāhana Śaka era, the year named Virodhin, in the month of Vaiśākha, on the *tithi* Pūrṇimā, and *nakshatra* Viśākhā,

Verse 31. (Is given) on the banks of the Tuṅga-bhadra, near the temple of Śrī Virūpāksha, to the great sage working for salvation, the great saint and anchorite.

Verses 32-33. Whose body is besmeared with holy ashes, who wears a necklace of *rudrāksha* beads, who is high-souled and talented, who has practised the eight-fold path of the Yōga; who is compassionate to all beings, (but) is (himself) above the pairs of opposites like heat and cold, which only give rise to pain; who is possessed of knowledge and freedom from attachment; who is master of himself.

Verse 34. (To this) Guru, who is Śiva incarnate, Sadā-śiva Sarasvatī, disciple of Chandra-sēkhara Sarasvatī,

Verses 35-43. The village of Udayambākam, otherwise known as Kṛishṇarāya-puram, in Paḍa-vidu mahārājya, in Jaya-chōla maṇḍala (Jayam-kōṇḍa Chōla maṇḍala), comprising the town of Tirukkaḷu-kunram and the fort of Kalattūr in Veḷimala nāḍu in the *śimā* (district) of Chingleput, on the banks of the Pālār. The boundaries of the village are, Prallayannūr to the west, Maṇappāk to the north, Kalattūr to the east, Puṇya-paṭṭu to the south.

The said village is marked by clearly defined boundaries on its borders.

The grant includes the right of enjoyment of eight kinds of interest in the land, viz. treasures in it, mines, rocks, tanks, gardens, trees, etc.; and the right of possessing it for ever or parting with it at will (by sale to another). The rights over the land are to descend from the donee to his disciples, their disciples, and so on in the apostolic line. The grant was made in a ceremonial way, with water and with gold.

Verses 44, 45. The grant was composed by Sabhāpati and engraved by Viranāchārya.

Verses 46-50. The usual admonitory verses.

‘Śrī Virūpāksha.’¹

¹ On Virūpāksha and the devotion of the Vijayanagar house to Śiva and Nāga worship, see our note in the introduction to the Conjeeveram plates of Kṛishṇa-dēva Rāya (*Ep. Ind.*, Vol. XIII, No. 8).

No. 13.—PARTABGARH INSCRIPTION OF THE TIME OF [THE PRATIHARA]
KING MAHENDRA-PALA II. OF MAHODAYA: SAMVAT 1003.

BY RAI BAHADUR PANDIT GAURISHANKAR HIRACHAND OJHA.

Some time ago a friend of mine wrote to me of the existence of an inscribed stone at Partābgarh, the contents of which no one in the locality could read, except the date, Samvat 1003, which was plain enough. I hurried to the spot at the first opportunity available and found the inscription containing a series of grants described below. The stone in question was affixed to a Chabūtrā, or platform, near Chenrām Agravāl's Bāwri (a well with steps leading to it) at Partābgarh, the capital of the State of that name in southern Rājputānā. On examination I found the record to be of great historical importance; and at my request the Mahārāj Kumār of Partābgarh was kind enough to present it to the Rājputānā Museum, Ajmer, where it is now deposited. In spite of being constantly exposed to the inclemencies of weather, the stone is in a fair state of preservation and can easily be read, only a few letters here and there being indistinct. A portion of the stone at the left-hand top corner is broken off, and the commencement of the first five lines is lost.

The inscription contains 35 lines of writing—34 full lines and one line only 1' 8" long—which cover a space of 2' 6" broad by 2' 2½" high. Except for four verses (ll. 1-4) at the beginning of the first, five and a half (ll. 14-19) at the beginning of the second, a laudatory verse (ll. 30-31) at the end of the third and an imprecatory one (ll. 34-35) at the end of the fourth part, the inscription is in prose.

The characters belong to the northern class of alphabets of the 10th century and show no special peculiarities except, in two instances (*°paryantō*, l. 11; *°paryantum*, l. 24), the medieval form of *rya*, without the lower right-hand stroke as well as the separate sign of *r* on the top, as is found in the Udaipur (in Rājputānā) inscription¹ of the time of the Guhila Rājā Aparājita, the Jhālrapāṭaṇ inscription² of the time of Durga-gaṇa, etc. Line 13 contains numerical symbols *sam* and *lri* for 100 and 10 respectively.

The language is Sanskrit throughout, corruptions and solecisms being frequent in the last three grants. A locative was probably intended in l. 20 *°śriśammē* (read *°śarmmaṇi*) *cha vyāpāraṁ kurvatē* (read *kurvatī*), and a passive construction suddenly ends in active in ll. 20-22, '*Mādhavēna sūtēna vādhayati*.' The neuter gender is grossly misused in ll. 24-25, while '*āghāṭa*' is neuter in l. 28 and masculine in l. 32. Cases do not agree in l. 31 '*°rājēna sutaḥ*' (read *sūtēna*), while the rules of Sandhi are not observed in some cases (ll. 2, 4, 14, 18, etc.) and misused in others (ll. 11, 12, 27, etc.). Other grammatical irregularities are shown in the footnotes accompanying the text.

Some *dēśi* words of the local dialect are used in Sanskrit composition. *Harirshēśvara* in l. 12 is to be divided into *Hari* and *Rishēśvara*, the latter being a modification of *Ṛakhēśur*, still used in the vernacular of these parts for *Rishīśvara*. *Arahaṭēna* (l. 26) is the instrumental form of *Arahaṭa*, a Persian wheel, the Sanskrit form being '*araghaṭṭa*.' *Kiṭika* (l. 26) is Sanskritized from *kiṭī* or *kiṭā*, a matting screen, akin to Sanskrit *kaṭa*. *Kōsavāhē* (l. 31) is applied to as much land as can be irrigated by one *kōsa*, or leather bucket, and *māṇi* (l. 31) is a local measure of twelve maunda. *Chausarā* (l. 33) is a garland of four strings. *Metta* (l. 29) is the Prākṛit form of *mātra*. *Palikā* (l. 33) is probably used for *pulī*, or bundle of leaves. *Ghāṇā* (l. 33) is an oil-mill and *Palikā* (l. 33) is a measure of capacity approximating to six *ṭolā* and commonly called *paṭī* or *paṭā*.

¹ *Ep. Ind.*, Vol. IV, p. 31.

² *Ind. Ant.*, Vol. V, p. 181.

The meaning of *sādhāra* (ll. 26 and 32) is not clear: it may mean 'with the adjacent grounds' or may be an abbreviation of *sādhārana* (common). *Vaha* (l. 32) is the common highway and *kuchchha* (ll. 26 and 28) is a field bordering on a stream.

As regards orthography, it may be noted that *v* is used for *b* throughout and *n* for *ṇ* in some instances: *punya* (l. 11, twice), *hiranya* (ll. 13 and 24), *śuranya* (l. 17) and *grīhṇāti* (l. 30). Dental *s* is used for the palatal in *ājñāsravana* (l. 12), and *śudrīśaṇ* (l. 18) is an example of the converse. Consonants are mostly doubled after *r*, but the necessary doubling is not shown in *prōlārīta* (l. 15), *patatrīṇah* (l. 16) and *āchchhetā* (l. 35). The doubling of *t* before *r* is seen in *puttra* (ll. 6 and 8), *pittroḥ* (l. 11), and *hitattri*^o (l. 13), but not everywhere (e.g., *putra* in ll. 5, 6, 7). *n* at the end of a word is not joined generally to the next word (ll. 20, 21, 22, 29). The *anuvāra* is used for the appropriate nasal in *kāhīṇkyāṇ gūṇāyātāṇ* (l. 11), *lōṅgita* (l. 16), *daṁgajō* (l. 17), *ghōṁtā*^o (l. 23), *likhyaṁtā* (l. 28), *kshētramitaritāṇ* (l. 29), *bhavanītu* (l. 1), *chīntā* (l. 18), *taṁttra* (l. 20); it is wrongly replaced by *m* in *param-bha*^o (l. 7) and is redundant in *mānāmwaya* (l. 15) and *chīṁntya* (l. 23). Of the class-nasals, *ṇ* is frequently used (ll. 15, 22, etc.), once wrongly for *ṇ* (*pañcha*, l. 26); *ṇ* occurs in ll. 15 and 19 and once wrongly in *vaṇṣa* (l. 25); and *ṇ* in l. 16. Omissions of *visarga* (ll. 4, 5, etc.), its redundant use (ll. 20, 21, 30), and instances of letters (ll. 10, 27, 30, 31) and particles (ll. 23, 18) left out are specified in the footnotes. There are no symbols for *avagraha*, *jihvāmūliya* or *upadhmāntya*. The necessary punctuation marks are omitted in some places (ll. 2, 3, etc.), and there are redundant lines (ll. 1, 3, etc.) in others. Other mistakes are pointed out at the proper places.

All the grants recorded in the inscription are in favour of shrines attached to the monastery of Hari-Rishīśvara, who originally belonged to Daśapura (l. 12). Under its management were the shrines of Vaṭa-yakshiṇī Dēvi (ll. 12, 33), Indrāditya-dēva or Indrarājāditya-dēva (ll. 23, 28) and Trailōkya-mōhana-dēva (l. 33), which were situated at the village of Ghōṇṭā-varshika, where there was also a temple dedicated to Nityapramudita-dēva (l. 23). Chief among the deities was Indrāditya-dēva, who is spoken of as " (the deity) of Ghōṇṭā-varshika " (l. 28), while Trailōkya-mōhana-dēva is spoken of as " (enshrined) within the grounds of Indrāditya-dēva " (l. 31). This pre-eminence is borne out by the verses (ll. 1-2) in praise of the sun-god (Indrāditya-dēva), which precede those (ll. 3-4) extolling Durgā (Vaṭa-yakshiṇī Dēvi), who is the donee proper of the first grant.

The occasion of the grant of a village to Vaṭa-yakshiṇī Dēvi by the king of Mahodaya in Samvat 1003 was used by the authorities of the monastery for the purpose of consolidating on one stone all the grants in favour of one or other of the temples attached to it. Such consolidation of grants belonging to one institution, but issued at different periods, is not rare in Rājapātānā. We have an instance of it in the Vasishṭha temple inscription¹ at Mount Ābū.

The inscription is naturally divided into four parts:—

I. A grant of a village in favour of Vaṭa-yakshiṇī Dēvi, issued by Mahārāja Mahēndra-pāla-Dēva II. of Mahodaya (Kanauj), dated Samvat 1003, or A.D. 946 (ll. 1-14).

II. A grant of a village, etc., in favour of Indrāditya-dēva by Mādhava, the provincial governor of Ujjain (under the same king), at the request of Chāhamāna Indra-rāja, a feudatory chief, without date (ll. 14-27).

III. A grant of a field in favour of Indrarājāditya-dēva by Bhartṛi-paṭṭa, son of Khōmmāṇa, dated Samvat 999, or A.D. 942 (ll. 27-31).

IV. Minor grants to different deities by different persons, undated (ll. 31-35).

¹ *Ind. Ant.*, Vol. II, p. 256.

PART I.

The first grant recorded in the inscription—though it is not the first from a chronological point of view—begins with two benedictory verses invoking the sun-god, followed by two similar verses in praise of the goddess Durgā (ll. 1-4). It is issued from the capital at Mahōdaya and gives the genealogy of the donor as follows:—

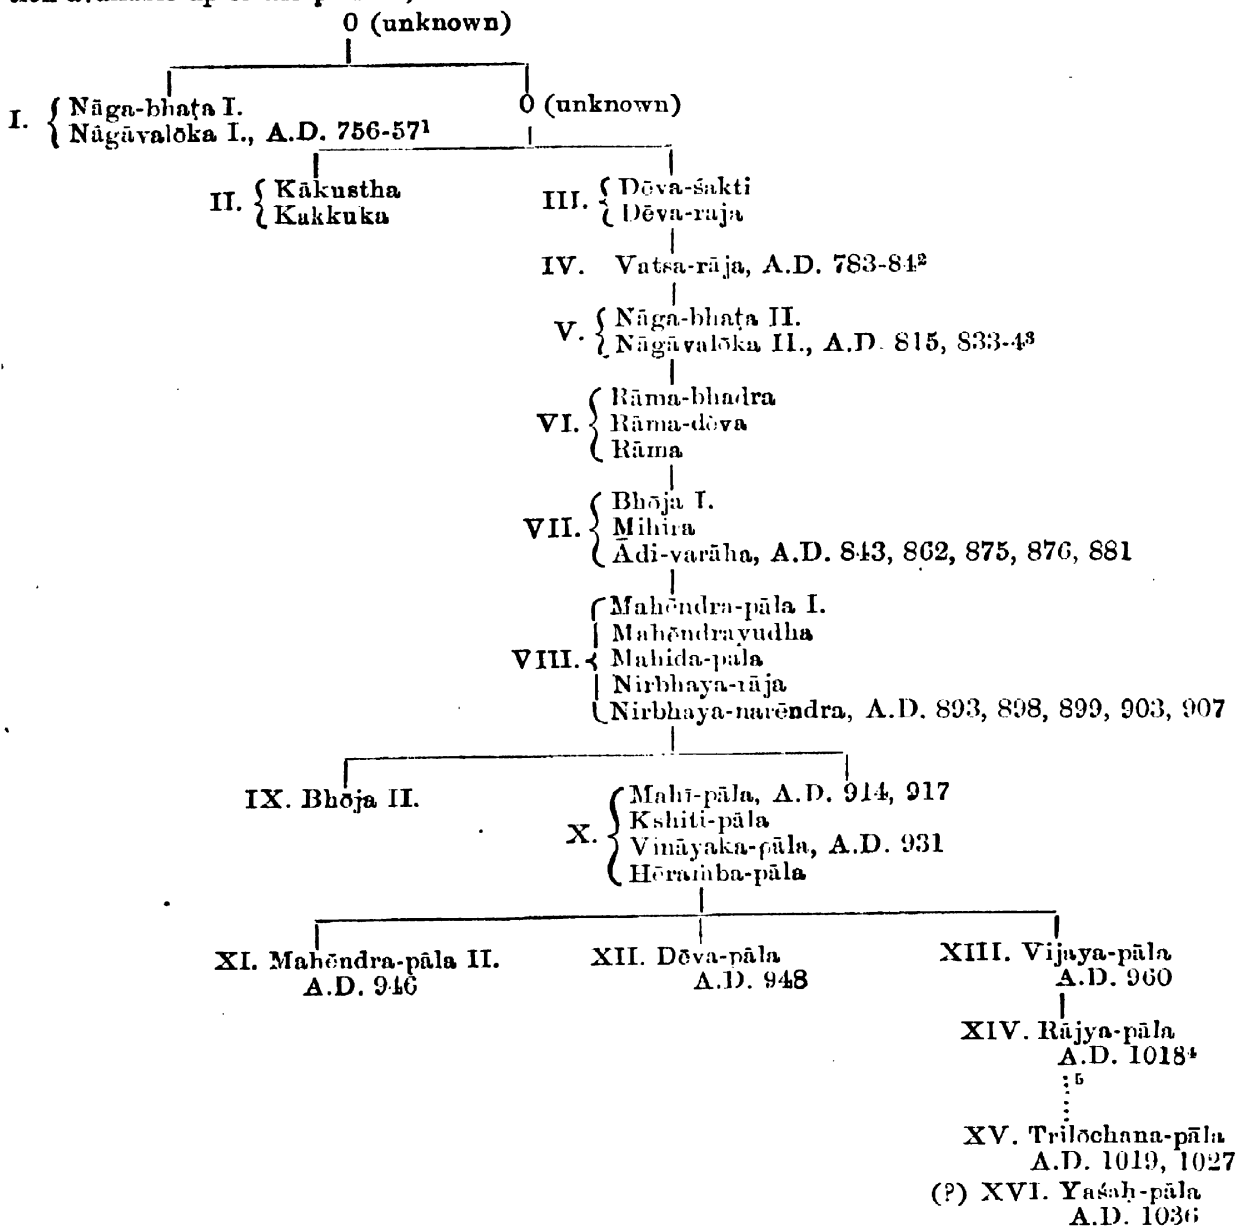

1. Mahārāja Dēva-śakti-Dēva, a devotee of Viṣṇu;
2. His son, born of [queen] Bhūyikā-Dēvi, Mahārāja Vatsa-rāja-Dēva, a devotee of Mahēśvara (Śiva);
3. His son, born of [queen] Sundarī-Dēvi, Mahārāja Nāga-bhaṭṭa-Dēva, a devotee of Bhagavatī (Durgā);
4. His son, born of [queen] Īsaṭā-Dēvi, Mahārāja Rāma-bhadra-Dēva, a devotee of the sun-god;
5. His son, born of [queen] Appā-Dēvi, Mahārāja Bhōja-Dēva, a devotee of Bhagavatī;
6. His son, born of [queen] Chandra-bhaṭṭārikā-Dēvi, Mahārāja Mahēndra-pāla (I.), a devotee of Bhagavatī;
7. His son, born of [queen] Mahādēvi-Dēvi, Mahārāja Vināyaka-pāla-Dēva, a devoted of the sun-god; and
8. His son, born of [queen] Prasādhana-Dēvi of the Devathāddhi (?) family, Mahārāja Mahēndra-pāla-Dēva (II.), a devotee of Mahēśvara (ll. 5-9).

The last-named king enjoins all and sundry residing in the village of Kharpara-padraka, —in the holding of Tala-vargika Harishada, and situated in the vicinity of Ghōṇṭā-varshikā, in the western Pathaka (district) of Daśa-pura,—and the residents of the neighbourhood, that the said village Kharpara-padraka, with all rights belonging thereto, has been bestowed by him, for all time to come, at the request of Dhana-śūra, upon the goddess Vata-yakṣiṇī Dēvi, (whose shrine is) connected with the Maṭha (monastery) of Hari Rishiśvara, versed in all the four Vēdas, resident of Daśa-pura, on an auspicious day, after bathing in the Kāhinkī Gaṅgā, for increase of religious merit to the donor's parents (ll. 9-12). The grant is written by Purōhita Trivikrama-nātha, under orders from Jajja-nāga, is dated the fifth day of the dark half of Mārgga (Mārga-śirsha), in the Samvat year 1003 (A.D. 946), and is signed by Śrī Vidagdha, "his own hand" (l. 13).

The name of Mahēndra-pāla (II.), son of Vināyaka-pāla, comes to our knowledge for the first time from this inscription. There seems to be a *double entente* in the word *prasādhana*, in which the writer pays a compliment to the queen-mother, by name Prasādhana-Dēvi, by calling her the 'ornament of the family of her birth' (l. 9). The name of this family Devathāddhi (?) is not quite clear for purposes of identification. Of the names and places mentioned Mahōdaya (Kanauj) and Daśa-pura (Mandasor), and the names of the kings and queens call for no remark. Kharpara-padraka is the modern village of Kharōṭ, 7 miles south-east of Partābgarh. Ghōṇṭā-varshikā¹ can be identified with Ghōṭārsi, 7 miles east of Partābgarh and about 8 miles north-east of Kharōṭ. The Kāhinkī Gaṅgā (the river Kāhinkī) cannot be identified. Jajja-nāga was probably the *Dātaka* of the grant. Vidagdha appears to be the Governor of the province who issued this grant under his own signature.

¹ The name of this village is spelt as Ghōṇṭā-varshikā (l. 10), Ghōṇṭā-varshika (l. 23) and Ghōṇṭā-varshi (l. 34).

The genealogy of the Pratihāra kings of Mahōdaya (Kanauj), in the light of the information available up to the present, would stand thus :—

¹ This date is from a photograph in my possession of an unpublished copper-plate grant from Hānsōṭ, in the district of Branch (Bombay presidency), issued by the Chāhamāna prince Bhartri-vaḍḍha (Bhartri-varḍha) II, a feudatory of king Nāgāvalōka.

² From the Jaina *Hari-vaṃśa Purāṇa* (Bom. Gazetteer, Vol. I, part II, p. 197).

³ The *Prabhāva-charita* speaks of the death of king Nāgāvalōka of Kānya-kubja, grand-father of Bhōja, as taking place in Vikrama year 890 (A.D. 833-34) (Nirṇayasāgara Press ed., p. 177, verses 720-725). The Nāgāvalōka of the *Prabhāva-charita* can be identified with no other than Nāga-bhaṭa II. of Kanauj, and the date seems to be accurate, as the first known date of Bhōja I. is A.D. 843.

⁴ This date of Rājya-pāla is given by Al-Uṭbī in his *Tārīkh-i-Yamīnī* (Elliot's Hist., Vol. II, p. 45), where he speaks of Rai Jaipāl as the ruler of Kanauj when Sultan Mahmūd of Ghaznī invaded it. He was killed the next year (A.D. 1019) by the Chandōla prince Vidyā-dhara, son of Gaṇḍa, and Trilōchana-pāla succeeded him.

⁵ The dotted line in the table indicates a successor, not necessarily a son.

Dēva-pāla of Mahōdaya is mentioned in the *Śtyadōṇi* inscription (*Ep. Ind.*, Vol. I, p. 177) as the son of Kshiti-pāla, which is evidently a synonym of Mahi-pāla; but the same Dēva-pāla is identified by the editor of that inscription with *Haya-pati* Dēva-pāla, son of Hērāmba-pāla, from whom Yaśo-varman obtained the celebrated image of Vaikuṇṭha, mentioned in that king's Khajurāho inscription. This has led to the identification of Hērāmba-pāla, the father of this Dēva-pāla, with Mahi-pāla or Kshiti-pāla, the father of Dēva-pāla of Mahōdaya. The fact that Hērāmba and Vināyaka are synonyms lends colour to this view, the result of which is the identification of two kings with two sets of names—

- (1) Mahi-pāla and Kshiti-pāla ; and
- (2) Vināyaka-pāla and Hērāmba-pāla,

which is accepted by scholars up to the present and is given in the genealogical tree above ; but this identification is based on very slender evidence. That Dēva-pāla, son of Hērāmba-pāla, who is introduced by the minor title of *Haya-pati* (lord of horses) is the same as Dēva-pāla of Mahōdaya cannot be established on the casual mention of the former in an inscription of a king of a dynasty other than his own. *Haya-pati* was never the accepted title of the Pratihāra kings of Mahōdaya and is not met with in their inscriptions ; and there is no ground for assuming that a scion of the paramount dynasty of the Pratihāras was ever known by that appellation. Besides Mahi-pāla and Vināyaka-pāla are known to be two different kings of Mahōdaya with different dates which do not overlap ; and there is no reason to justify their identification. If this view is accepted and the identification of Hērāmba-pāla with Mahi-pāla set aside, this part of the genealogy would stand thus :—

VIII. Mahēndra-pāla I.

PART II.

The second grant begins with a panegyric in praise of the Chāhamāna family of kings, which is spoken of as having been the source of great pleasure to king Bhōja-Dēva. Then mention is made of Gōvinda-rāja of this dynasty, who fought against many foes ; his son Durlabha-rāja and his son Indra-rāja, who built the great temple dedicated to the sun-god (ll. 14-19). We learn further that Mādhava was 'the great feudatory lord and governor' at Ujjayini and Śrīśarman—appointed by Kōkkaṭa, who was the commander-in-chief serving at the feet of Paramēśvara (i.e. Mahēndra-pāla II.)—was carrying on the affairs of state at Maṇḍapikā (ll. 19-20).

The aforesaid Mādhava, son of Dāmōdara, being 'great feudatory, great governor and *Chargé d'Affaires*,' and having come to Ujjayini on business, bathed at the temple of Mahā-kāla,

worshipped the god Śiva and meditated on the unreality of life and wealth, bestowed, on the **Mina-samkrānti** day, the village of **Dhārā-padraka**, with all its appurtenances, for repairs to, and maintenance of daily services at, the temple of **Indrāditya-dēva** at **Ghōṇṭā-varshikā**, a place associated with **Nityapramudita-dēva**, at the request of the great feudatory **Indra-rāja**, son of **Durlabha-rāja** of the **Chāhamāna** race. He therefore enjoins all residents of the village and the neighbourhood to observe this order (ll. 20-26). A further endowment of a field by the river-side to the north of the village, irrigated by a Persian wheel, and of five matting screens for the erection of a flower porch is recorded (l. 26). The grant is signed by **Mādhava** and countersigned by the **Vidagdha** (l. 27) of the first grant.

The names of the warlike **Chāhamānas** eulogized in this grant are not known from any other record. It was probably a local dynasty of the **Chāhamānas** which had entered into a subordinate alliance with king **Bhōja-Dēva I.** and helped him in his wars, thus giving the overlord 'great pleasure.' **Indra-rāja** built a temple to the sun-god (**Indrāditya-dēva**) and applied to the governor of **Ujjain**, appointed by his overlord, the king of **Kanauj**, evidently **Mahendra-pāla II.** of the first grant, for an endowment for its upkeep. The grant is not dated; but we find from the third grant that the temple of **Indrāditya-dēva** was existing and was well-known after the name of the builder (l. 28) four years before the date of the first grant. We thus have reason to suppose that the request of the builder to the provincial representative of his overlord to secure a permanent endowment for it must have immediately followed its erection and preceded the gift of **Bhartṛi-paṭṭa** recorded in the grant following. Thus this grant is evidently prior to the third, and is consequently the first, though not by many years, as is evident from the signature of the same governor, **Vidagdha**, affixed to both the grants. The custom of provincial governors countersigning grants issued by subordinate chiefs relating to lands in their (the governors') jurisdiction is borne out by the evidence of the **Ūnā** plate of the time of **Mahendra-pāla I.** of **Kanauj**, where **Dhika** countersigned a grant of **Bala-varman**, a feudatory of the king (*Ep. Ind.*, Vol. IX, p. 6).

Mandapikā is **Māṇḍū**, where another officer **Śrī-śarman**, appointed by the king's commander-in-chief, resided. **Dhārā-padraka** is probably **Dharyāvad** (in **Mēwār**), situated near the boundary of the **Partābgarh** State. The matting screens referred to were to be used, evidently, in the periodical festivals in which the throne of the deity is placed in a porch of flowers and leaves temporarily erected over it.

PART III.

This grant records that **Mahārājādhirāja Bhartṛi-paṭṭa**, son of **Khōmmāna**, enjoins his descendants to maintain in perpetuity, and not to interfere with, the enjoyment of the bestowal of a field named **Vavvūlika** (**Babbulika**) by the side of the river **Nandyā** in the village of **Palāsa-kūpikā**, made by him upon **Indrarājāditya-deva** of **Ghōṇṭā-varshi** for increase of merit to himself and his parents (ll. 27-30). The boundaries of the field are defined (ll. 28-29), and a customary verse extolling the donor and the donee follows (ll. 31-32). The date is given as the first day of the bright half of the month of **Śrāvaṇa** in the **Samvat** year 999 (A.D. 942).

Bhartṛi-paṭṭa of this inscription is **Bhartṛi-paṭṭa¹ II.**, son of **Khōmmāna III.** of **Mēwār**, belonging to the **Guhila** family. Another inscription of his reign is dated **Samvat 1000** (A.D. 943).² **Palāsa-kūpikā** is probably the present **Parāsīn**, about 15 miles south of **Mandasor**. The river **Nandyā** and the village of **Varāha-palli**, mentioned in the boundaries, cannot be identified at present.

¹ *Ind. Ant.*, Vol. XXXIX, p. 191.

² *Annual Report on the working of the Rajputana Museum, Ajmer, 1914, p. 2.*

PART IV.

This part records minor grants :—

I. The gift of a field named **Chhittullāka**, in which 10 *Māṇis* of seed could be sown, and which was irrigated by one leather bucket, in favour of **Indrāditya-dēva**, by **Dēva-rāja**, son of **Chāmuṇḍa-rāja** (l. 31).

II. The gift of a field, called **Uṁdiyāka**, with boundaries defined, in favour of **Trailōkya-mōhana-dēva** in the grounds of **Indrāditya-dēva**, by **Indra-rāja** (ll. 32-33).

III. The [permanent] endowment of one **Palikā** [of oil] per oil-mill, five bundles of foliage, 100 garlands of four strings, on the ninth day of the bright half of the month of **Chaitra**, together with two *pulas* of saffron and one [*pala*] of betel-nuts from the trading community in the month of **Chaitra**, in favour of the **Vaṭa-yakshiṇī Dēvi** (ll. 33-34).

IV. The gift of **Dhāḍivāha** field, in which 10 *Māṇis* of seed could be sown, and of **Mōchcha** field, to the north-east of **Ghōṇṭā-varshi**, requiring 10 *Māṇis* of seed, from persons not mentioned and in favour of deities not specified (l. 34).

Then follows the usual verse extolling the giver of land and condemning the usurper (l. 35), after which the name of the engraver of the inscription is given as **Siddhapa**, son of [**Sa**]tya and the date as **Samvat 1003 (A.D. 948)**.

Dēva-rāja, son of **Chāmuṇḍa-rāja** (l. 31), appears to be a scion of the **Chāhamāna** family mentioned in the second grant, and **Indra-rāja** (l. 32) is the builder of the temple of the sun (ll. 18-19) himself.

The inscription is a fragment of a larger text, likely a royal decree or a historical record. It is written in an ancient script, possibly Devanagari, and is heavily damaged and partially obscured by a dark, irregular shape. The text is arranged in a grid-like pattern, with lines of text running horizontally across the page. The characters are small and closely spaced, typical of ancient inscriptions. The overall appearance is that of a weathered stone or metal surface with a significant portion of the original text missing or covered.

Ant.*, Vol. XV, pp. 112 and 140; and *Ep. Ind.*, Vol. V, p. 209) *sarō* itself represents 100, as it is not followed by the symbol for 100.¹⁰ The symbol *sam* is used to represent 100 and *lpi* to denote 10. Thus *sam lpi* means 100 × 10 = 1000. In the inscriptions of the 9th and 10th centuries, the symbol for 3 being the same as the numerical figure, it has been purposely omitted with the symbols to avoid the ambiguity of the date in figures being read as 31003. Hence the figure for 3 has been inscribed only at the end.¹¹ Read °त्रिविक्रमनाथ°.¹² Read लो.¹³ This stroke is redundant.¹⁴ Read व.¹⁵ Supply संविदितम् or सुविदितम्.¹⁶ Read °पर्यन्तः.¹⁷ Read यथा.¹⁸ Read °हयुषीश्वर° (हरि + ऋषी°).¹⁹ Read °त इति म°.²⁰ Read व्यः.²¹ Read यथा.²² Read लो.²³ Read हि°.²⁴ Read °नाम्बरः.²⁵ This stroke is redundant.

No. 14.—LAKSHMESHWAR PILLAR INSCRIPTION OF THE YUVARAJA
VIKRAMADITYA.

By LIONEL D. BARNETT.

The town of Lakshmēshwar is the head-quarters of the Lakshmēshwar *tāluka*, which is an outlying part of the Miraj State within the limits of the Dhārwar District, Bombay. It is situated about thirty-six miles south-east of Dhārwar, and is shown in the Indian Atlas quarter-sheet 41, 3. E. (1904), in lat. 15° 8', long. 75° 31'. Its ancient name is found as *Porigere* in the record now published, and elsewhere as *Purigere* and *Puligere*, which forms were sanskritized as *Purikara* and *Pulikara*: it is still preserved in the name *Huligere-bana* of a part of the lands of the town (see Vol. XIII above, p. 179). For some facts of the early history of the place the reader may be referred to Vol. XIII above, p. 178. From this town comes the present inscription, which I edit from two ink-impressions and a plain squeeze placed at my disposal by the late Dr. Fleet,¹⁵ which are now in the British Museum.

The inscription is on two faces of a stone pillar which in 1892 was standing at the local *Kachēri*, along with a large number of other inscriptions which had been collected there for safe preservation. The first face, bearing ll. 1-40, has an inscribed area of about 7 ft. 1 in. in height and 1 ft. 2½ in. in width; on the second face, comprising ll. 41-55, the inscribed area is about 3 ft. 6½ in. in height and 1 ft. 2 in. in width. The state of the stone is very bad: ll. 39-48 are wholly illegible, and there are many gaps and doubtful readings elsewhere.

The character is Kanarese, of a type characteristic of the early eighth century. The letters on the first face, which, though somewhat sprawling and irregular, are on the whole graceful and clean-cut, average between ¾ in. and 1 in. in height; but on the second face a difference of type is noticeable, which possibly began from l. 41, and is very obvious from l. 46 onwards,

⁹ Read छे.

¹⁰ Read वणिवर्गेण.

¹¹ Read पुग.

¹² Read क्ष.

¹³ Read °वर्ष°.

¹⁴ Read च.

¹⁵ Read °वर्ष°ति.

the letters becoming ruder and clumsier, with a height varying from $\frac{3}{4}$ in. to $1\frac{1}{2}$ in. As will be seen below, a new section begins on or about l. 46, and probably it was inscribed by a different hand. The record contains all the test-letters kh, ñ, j, b, and l, and all of them, with the exception of l, are of archaic forms. Examples of kh appear in l. 12, of ñ in ll. 10, 18, of j in ll. 2, 3, etc., of b in l. 8. The l is usually of the ancient type, with the tail prolonged in a curve round it towards the left; but in *illī*, l. 21, *telliga*, l. 29, and possibly in the last word of l. 32, we find a cursive form almost identical with the modern Burmese letter. On the whole, then, we may safely ascribe the character to about A.D. 725; and hence we may conclude that the Yuvarāja or Heir-Apparent Vikramāditya mentioned in it as granting the constitution embodied in it to the burgesses of Porigere was no other than Vikramāditya, son of Vijayāditya, of the dynasty of the Western Chalukyas of Bādāmi, who about this time, A.D. 725, was ruling the province as Heir-Apparent, and subsequently, about A.D. 733, succeeded his father as Vikramāditya II.

The language is Kanarese prose, of the oldest dialect known. Typical of it are the following flexions: the accusative in -ān, as in *jīcitāṅgaḷān*, l. 10, *poḷalān*, l. 24, *viṭṭiyān*, l. 35; the genitive in -ā, as in *Porigereyā*, ll. 2-3, *soṇageyā*, l. 33, *irppattā*, l. 34, *keyyā*, ll. 84-85; the locative in -uḷ, as in *māsaduḷ*, ll. 12, 22; the curious accusative *Vāraṇasivadam*, ll. 50-51, with which we may compare the locatives *Bāraṇasivadol*, above, Vol. VII, p. 204, and *Vāraṇasivadul* in *Ind. Ant.*, Vol. XIX, p. 145, l. 13; the verbal forms *kāvodu*, l. 10, *envodu*, l. 21, *apporoge*, l. 13, *koṭṭor*, l. 50, *koḷvoṇ*, l. 50, *uḷvār* or *uḷvor*, l. 31, *āḍadu* (imperative?), ll. 6 ff., and *aḷidona*, l. 52. In *āḷko*, l. 12, there seems to be a use of ḷ instead of ḷ. The name *Kupparma*, l. 46, is of a type similar to that of *Uḍayarma* in the Narēndra inscription B, Vol. XII above, p. 321, l. 28. A considerable number of words are of lexical interest, as *ara*, l. 46 (cf. *piriy-araṅge* in the Baṅkāpūr inscription above, Vol. XIII, p. 174); *are-vāḍa*, l. 31; *gutta*, l. 22; *kūḷ*, l. 30; *pāka-daṇḍa*, l. 19 (cf. *kīru-kula*); *rāva*, l. 22; *soṇage*, l. 33; *atsāha* in the sense of "generous gift," "bounty" (cf. the inscription of Vēma Redḍi above, Vol. VIII, p. 14, verse 6, l. 13, and the Kaḷas record of Gōvinda IV, l. 5, Vol. XIII above, p. 329), besides some of which the reading is not quite certain.

The purport of the inscription is to record the mutual obligations and rights of the Royal authorities, represented by the Heir-Apparent Vikramāditya, and of the Mahājanas (Brāhmaṇa householders) and burgesses of Lakshmēshwar. The preamble (ll. 1-5) is as follows: "Hail! the social constitution which the Heir-Apparent Vikramāditya has granted to the Mahājanas and the burgesses and the eighteen *prakṛitis*¹ of Porigere (is as follows)." The charter then proceeds to specify the position of the royal officers and their relation to the municipality in the following terms (ll. 5-10): "The king's officers are to protect those of the houses that are untenanted,² the king's gift, the king's proclamation, authoritative testimony of good men (?), constitutional usage, copper-plate edicts, continued enjoyment of (*estate*) enjoyed . . . the lives of the five *dharma*s."³ Then comes the section defining the duties of the townspeople (ll. 10 ff.).

¹ The "eighteen *prakṛitis*" would naturally seem to denote the eighteen royal ministers, on whom see the *Kaṇṭīya*, translation, p. 25 and (list) p. 23, *Pañchatantra* (Bombay S. S.), iii, p. 50, ll. 17 ff., *Mahābhārata*, *Saṁhā-parvan*, v. 38, *Rājatarāṅgi*, i. 120 and iv. 141, *Ind. Ant.*, Vol. XXV, p. 183, and note 82, Kittel's Dictionary, s. v. *aṣṭādaśa-pradhāna*. But this will not suit the present context, which states that the constitution was granted by Vikramāditya to the *prakṛitis* and others. Hence we must understand *prakṛiti* here to denote the classes of the population. The division of the population into 18 classes is well known: see Kittel, s. v. *aṣṭādaśa-jāti*, and the Eighteen *Samayas* mentioned in *Progress Report of Asst. Archaeol. Supt. for Epigraphy, Southern Circle*, 1914-15, p. 106 (which speaks of *padineṣa-bhūmi-samayattār*), and *Ep. Carn.* X, l. Kl. No. 70.

² For this suggested translation, and for several others in this paper, I am indebted to Mr. R. Narasimhachar.

³ Mr. Narasimhachar suggests that this refers to the life (*pañcha-prāṇa*) of *dharma* (can it be the life of children and men in the four *āśramas*?).

It begins with the Mahājanas or Brāhmap burgesses (ll. 10-23): "This is the municipal constitution for the Mahājanas. A tax that (*every*) occupied house shall pay once every year¹ in the month of Vaiśākha to the governors of the district: each several household for festival expenses (?), the highest households (*paying*) ten *paṇas*, the intermediate households seven *paṇas*, the lower five, the lowest three: all previous usages, viz., *putṭige*,² . . . fines for theft and minor delinquencies, (*fines for*) the ten offences,³ likewise what is known as property of childless persons: (*all these*) shall be paid in to the guild there in the month of Kārttika. A *gutta*⁴ shall be paid for (? to) the *rūva* in the month of Māgha." Then after a reference, unfortunately only half legible, to the government of *pāṇḍis* and *setṭis* in the town (ll. 23-24), we have the article on the braziers (ll. 24-29): "For the guild of braziers (*every*) occupied house (*shall pay*) for festival expenses (?), the highest households twenty *palas* . . . the intermediate fifteen, the lower ten, the lowest five; total, one *tole*."⁵ Next to be mentioned are the *śilmen*; but the articles from this point (l. 29) to l. 35 are very obscure and the reading in many places doubtful. Then come about ten lines which are almost wholly illegible. They cover the bottom of the first face and the top of the second face. On l. 46, the fourth line of the second face, we find a distinct change in the character of the writing; it has become larger, and more coarse and clumsy. Possibly this change may have begun from the first line of the second face (l. 41); but ll. 41-45 are too much defaced to allow of any conclusions of the kind.

ll. 46-55 record a supplementary endowment: "Also the field granted to (?) the *ara* of the fortunate Kuppārma the three-hundred households and the Gāmuṇḍa of the province, together with the *goḍigar* (?), have granted. He who may appropriate it shall be accounted equal to persons who should destroy Benares, (*or*) persons who should kill a thousand Brāhmanas and a thousand cows."

TEXT.⁶*First face.*

- 12 or-āḷke orṃme Vaiśākha-māsadu!
- 13 deśādhipatigaḷ=apporoggo kuḍuva
- 14 terē uttamam=appa okkal=mi *¹⁰

¹ Understanding *āl* as = the Tamil *āṇḍu*.

² Probably a kind of measure; or possibly a tax on births.

³ See J. Jolly, *Recht und Sittē*, p. 123 f.

⁴ Mr. Narasimhachar suggests a connection between this word and *guttige* (contract or monopoly, or tax thereon).

⁵ Thus the local *tole* (*tulā*) contained 50 *palas*.

⁶ From the impressions.

⁷ I conclude that the inscription began with the symbol for *ōm*, as there is a space for it, on which the stone is badly worn.

⁸ Read *sat-prame*.

⁹ These two *akṣaras* are very uncertain. The first looks like *śā*, but it might be *oḷā*; the second is like a *ḍa* with the top curled back towards the left, and is surmounted by the sign for the vowel *i*.

¹⁰ The *mi* is not quite certain, and the next syllable is quite illegible.

Lakshmeshwar inscription of the Yuvaraja Vikramaditya.

¹ It is not quite clear whether this letter is meant for *chhā* or *chā*; I have decided for the former in accordance with grammatical rule (see Kittel's *Grammar*, p. 178).

² Most of these seven *aksharas* are more or less uncertain, and no sense can be obtained from them.

³ Or possibly *velade*.

⁴ The subscript letter which I read as *lā* is not quite clear; apparently what is meant is *uḷvār* or *uḷvor*.

⁵ Or possibly *ilti*, with a cursive *l*.

⁶ The *ei* (if that is the right reading) is written above the line, having apparently been omitted by the error of haplography.

⁷ Or possibly *gāḍi*.

No. 15.—CHANDRAVATI PLATES OF CHANDRA-DEVA : V. S. 1150 AND 1156.

BY DAYA RAM SAHNI, M.A., RAI SAHIB.

These plates, which are six in number, were found at Chandrāvati, in the district of Benares, at the same spot on the left bank of the river Ganges as the Chandrāvati plate of Chandra-dēva of Vikrama-Samvat 1148, published by Dr. Sten Konow.¹ Chandrāvati, pronounced Chandrauti, is a village situated on the river Ganges in the *pargana* of Katōhir (anc. Kathchali), a short distance to the east of the metalled road from Benares to Ghāzipur, three miles south of Kaithi and fourteen miles from the district head-quarters. It has long been, and still is, the chief village in the *pargana* of Katōhir. The village is now entered by a ruined gate on the west. Upon the southern wall of this gate is an inscription of Vikrama-Samvat 1797. The village contains two Jaina temples, to which we shall refer later on.

The plates under review were enclosed in a strong box of stone, measuring 3' 1½" × 2½" × 1' 6½" high, provided with a lid of the same material. The box and the lid were transferred to the Lucknow Museum in 1912, where they, as well as the plates, are now preserved. The stone box was exposed to view by the erosion of the river bank. The fact was reported to the Executive Engineer of Benares, who had the box and its contents safely brought over to his office and presented them to the Lucknow Museum at the suggestion of the Director-General of Archaeology in India, who has kindly authorized me to edit them. The transcript published below was prepared in 1912, when, on a personal visit to Chandrāvati, I made the topographical notes that are subjoined. The same visit enabled me to identify with certainty some of the localities mentioned in the plates.

The plates are well preserved and measure 2' 3" long by 1' 3¼" broad. They are all pierced with a circular hole, 1½" in diameter, in the middle of the upper part, and were fastened with three copper rings, to the biggest of which was soldered a stout copper seal, bearing the legend Śrīmach-Chandradēva in Nāgarī characters. Above and below the legend are a flying figure of Garuḍa and a conch-shell in conformity with the Vaishṇava faith of the king who issued the plates. These are engraved on one side only. The characters are Nāgarī. The height of the letters averages ⅝". The language is Sanskrit throughout, the historical portions being in prose, the rest in verse.

In respect of orthography and spelling the following points may be noted. No distinction is made between *ba* and *va* and *ś* and *s*; syllables are sometimes omitted, as *kana* in *ālō-kana* l. 17 and *va* in *iva* l. 18; consonants after *ra* are doubled or not in accordance with the optional character of the grammatical rule concerned; the *anusvāra* is used for *n* in *haran narakam* l. 23 of the second inscription. We also notice *tri* for *tri* l. 2, *ri* for *ra* in *kirina* l. 22. Several examples of superfluous punctuation are also noticed, especially in the third, fourth and the fifth plates, on which the names of the donees are engraved. We have only one example of the lingual *ḷ*, in the name Maḷivāḍa in l. 11 of the second inscription.

The six plates described in this paper contain two documents, both issued by king Chandra-dēva of Kānyakubja (Kānauj) in the years Vikrama-Samvat 1150 and 1156 respectively.

These inscriptions are interesting; for they supply the old official names of a large number of localities, which are discussed below in another paragraph. But there is another point which is equally interesting. The only dates so far known of king Chandra-dēva are Vikrama-Samvat 1148 (A.D. 1090-1) and 1154 (A.D. 1097-8). The inscriptions published here supply two more dates, namely Vikrama-Samvat 1150 (A.D. 1092-93) and 1156 (A.D. 1098-99), thus extending Chandra-dēva's reign by at least two years. We learn from the Basāhi plate of

¹ *Ep. Ind.*, Vol. IX, pp. 302 sq.

Mahārāja-putra Gōvindaachandra-Dēva that his father Madanapāla-Dēva was ruling in Vikrama-Samvat 1161. We may, therefore, assume that Chandra-Dēva must have died and his son Madanapāla-Dēva succeeded him some time between Vikrama-Samvat 1156 and 1161. We have for Chandra-Dēva no earlier dates than V. S. 1148. So we cannot yet determine the date of his coming to the throne of Kānyakubja, which he is said in the inscriptions to have conquered.

PLATES OF VIKRAMA-SAMVAT 1150.

The first document is inscribed on five plates, comprising a total of ninety lines. It begins with an invocation to the Goddess Śrī, consort of Viṣṇu, favourite deity of the kings of the Gāhaḍavāla family, and goes on to describe the genealogy of the donor, king Chandra-Dēva, and his conquest of Kanauj. This is followed by the royal order announcing that the *Parama-bhaṭṭāraka Mahārāj-ādhirāja Param-ēśvara Param-māhēśvara Śrīmach-Chandrāditya-Dēva*, after bathing at the *Svarga-dvāra tīrtha* at the confluence of the Śarayā and the Ghargharā in Ayōdhyā, conferred on a body of 500 Brāhmaṇas (*pañchaśata-saṁkhyēbhyaḥ*) the *pattalā* of Kāṭhēhālī with the exception of certain villages formerly given to temples, Brāhmaṇas etc., on Sunday the fifteenth day of the dark half of the month of Āśvina in the year Samvat 1150 (expressed both in words and figures), on the sacred occasion of a solar eclipse. The date corresponds to A.D. 1093, October 23. He also gave away the village of Sarisōḍa in the *Vṛihadṛihēvaṁkānai pattalā* for the residence of the same community of Brāhmaṇas. The document winds up with nine verses, the first seven of which are of an imprecatory nature. The eighth mentions the name and the parentage of the scribe Hridayadhara, son of the illustrious Śivastambha, and the last eulogizes the donor Chandra-Dēva as the king by the resoundings of whose copper-plates bearing grants of land, "at the time of their being engraved with rows of closely written lines, the universe has become deafened."

It is interesting to note that one of the *ghāṭs* of Ayōdhyā still bears the name of Svarga-dvāra. The *pattalā* of Kāṭhēhālī is now known as Kāṭhīr, the largest *pargana* in the district of Benares. "It is bounded on the south by Athaganwan, Shecopur and Jahlpur, on the east by the Ganges and the *pargana* Barah of *Taḥsil* Chandauli, on the west by Kol Aslah and on the north by the small *pargana* of Sultanipur and the river Gumti." Its ancient boundaries (*chatur-āghāṭa*), as recorded in this inscription, were "Kōllakanandivāra *pattalā*, the Gōmatī, Bhāgirathī and Varanā." We may assume that the *pattalā* of Kāṭhēhālī was nearly co-extensive with its modern representative; for, though one of the old boundaries, Kōllakanandivāra has not been identified with certainty, it is not impossible that it is the same as Kol Aslah which now marks the western limit of the Kāṭhīr *pargana*. We note in support of this that Kol Aslah is also a *pargana* and its first component may well be a remnant of "Kōllaka."

TRANSLATION

(ll. 14-30, 35-36).

(Lines 14-6) He (Chandrāditya-Dēva) respects, informs and commands, according to their position, all the people resident at the *pattalā* of Kāṭhēhālī, and visitors, and also Kings, Queens, *Yuvarājas*, counsellors, commanders of troops, chaplains, chamberlains, keepers of records, superintendents of stores, physicians, astrologers, superintendents of gynæceums, envoys, officers in charge of elephants, horses, towns, mines, stations, districts and *gōkulas* (cattle stations) and others, as follows :—

(Ll. 16-26) The transitoriness of this world is, indeed, known to you. Prosperity is charming to the eyes only for a few days, like the beauty of the flowers of the spring season.

The life of men is always moving, like a heap of sand on the bank of a river flowing along the slope of a mountain. The enjoyment of the pleasures, sweet in the beginning, bitter in the end, is difficult to digest, like oil-cakes. The senses are hard to deal with, always given to their selfish ends, and averse to discriminating between good and bad, like the coquetry of prostitutes. Youth lasts only for a few seconds, like a cluster of bubbles of water. Therefore we too, having resolved—according to the authentic precepts of the Vedas, not disagreeing with all the *Śāstras*—that the giving of land leads one to the attainment of the abode of Hari, Hara, Brahmā, and Indra, after having bathed at the Svarga-dvāra *tīrtha* at the sin-effacing (confluence) of the Sarayū and the Ghargharā at Ayōdhyā—also called Uttara-Kōśala—, on Sunday the fifteenth day of the dark half of the month of Āśvina, in the year eleven hundred increased by fifty, also in figures Samvat 1150, Āśvina, vadi 15, Sunday, on the sacred occasion of a solar eclipse—after having duly satisfied the sacred texts, divinities, saints, men, beings and the group of the departed ancestors—after having worshipped the sun, whose splendour is potent in rending the veil of darkness—after having praised him (Śiva) whose crest is a portion of the moon and whose body consists of the earth, water, fire, air, ether, the sacrificing priest, the moon and the sun—after having performed adoration to the holy Vāsudēva, the protector of the three worlds—after having sacrificed to fire an oblation of abundant milk, rice and sugar—after having offered oblations to manes—have conferred the above-named *pattalā*, with its water and dry land, hills and forests, ravines and saline wastes, stones, mines of iron and salt, with and including its groves of *madhūka* and mango trees, enclosed gardens, bushes, grass and pasture land, clearly defined by four boundaries consisting of the Kōllakanandivāra *pattalā* and the rivers Gōmatī, Bhāgirathī, and Varāṇā, with the exception of certain specified villages formerly given to temples, Brāhmaṇas and to *vikaras*,¹ upon five hundred Brāhmaṇas of the different names and *gōtras* specified below, versed in the four Vedas with their divisions—(confirming our gift) with (the pouring out) from the palm of our hand of water purified with *kuśa* grass and *gokarna* (and) ordaining (that it should be theirs) as long as the sun and moon (endure). The village of Sarisōḍa in the Vṛihaḍṛihēvamkāṇai *pattalā* has (also) been given away for the residence of the same community of Brāhmaṇas.

(Ll. 26-30) Aware of this, you will present to them every usually rendered kind of income, the due share of the produce, the *bhōga*, *kara*, *turushkadāṇḍa*, *pratyādāya*, *viśhayadāna* etc.² In this *pattalā* the villages (given to) the temples, Brāhmaṇas and to persons deprived of hands, are the following:—Villages of temples: Bhaṇḍadaha, Udēlī, Paṇihali, Khajuri, Talabhāma, Bhāyī, Laghuvaḍaviṇḍī, Malēṇī, Dūpā, Umdharaumbhā, half of the village of Bhāgama, Jigaṇā, Laghukamavali, Sēmchalavaṇa, Chaṭhatarā, Sōṇaka, Adhiva, Upalāṅcha, Vṛihatsiū, Vṛihatyaṁchalāma, Sōṇadahā, Kadhivi, Aṇadaurā, Aṇadauri, Čamēkha, Kuṇḍāma. Brāhmaṇa villages: Chudavāsadvādaśaka, Talahuti. The villages belonging to *vikaras*¹: Chirivili, Sēmveli, Gulavaṭa, Vaḍathalā, Divākaksha and Čilāḍa.

(L. 35) Hṛidayadhara, the son of the illustrious Śivastambha, fond of saluting the Brāhmaṇas and belonging to a pure Kēyastha family, has written this copper-plate of the Brāhmaṇas, smooth like a fresh leaf, and adorned with lines in which the lettering is quite clear. What should I speak of the King Chandra, by the sound produced from whose copper-plate grants given to Brāhmaṇas and divinities, at the time of their being engraved with rows of closely written lines, the universe has become deafened.

¹ The word *vikara* would naturally mean 'tax-free'; but we may expect a more technical meaning. In the case of Kirttipāla's inscription of Samvat 1167 (*Ep. Ind.* Vol. VII, pp. 94, 96) Kielhorn took the word as proper name of a village.—F. W. T.]

² On these taxes see Vol. XI, p. 21 and ref.

PLATE OF VIKRAMA-SAMVAT 1156.

This document is inscribed on one plate only and comprises twenty-four lines of writing. The inscription begins with the remark that this grant was made after a munificent gift of gold and other valuables equal to the king's weight (*tulā-purusha*) and a thousand cows before the beautiful image of the illustrious *Ādi-kēśava*. After the usual genealogical information the inscription goes on to record that the *Parama-bhaṭṭāraka Mahārāj-ādhirāja Param-ēśvara Param-māhēśvara Śrīmad-Chandr ditya-Dēva*, having bathed at the *ghaṭ* of *Śrīmad-Ādikēśava* at the confluence of the rivers *Gaṅgā* and *Varaṇā*, bestowed thirty villages in the *Vṛihadṛihēdēvarāṭha pattalā* and two villages in the *Kaṭhēhalī pattalā* upon the same five hundred *Brāhmaṇas* who were the donees in the previous copper-plates of *Vikrama-Samvat 1150*. The inscription also records the dedication of the village of *Majauḍa*, situated in the *Vamkāṇai pattalā*, together with all its revenues, for the maintenance of the shrine of *Śrī-Chandramādhava* at *Chandrāvati*. The grant was made in the year *Samvat 1156*, on Saturday, the third day of the bright half of the month of *Vaiśākha*. The date corresponds to A.D. 1100, April 14.

The temple of *Chandramādhava* is no longer extant. Mr. Chhote Lal, Executive Engineer, Benares, has expressed the opinion¹ that this designation of the town was probably given to it by *Chandra-Dēva*. Similarly we may assume that the shrine was also founded by the same king and that it was for this reason that he selected it for his special grant on this occasion. On my visit to *Chandrāvati* I learnt that the site of a *Śvētāmbara* Jaina temple in the village is still known to the Hindu inhabitants of *Chandrāvati* by the name of *Chandramādhō*. There are two inscriptions in this temple. One of them, bearing the date *Vikrama-Samvat 1757*, is built in the north wall, and the other, which is dated in the *Vikrama-Samvat* year 1564, is carved on the base of an image of *Sāntinātha* worshipped in this temple. It seems obvious that the temple of *Chandramādhava* must have disappeared before *Vikrama-Samvat 1757*, when the Jaina temple was constructed on its site. The temple was probably washed away by the river. The box which contained the six plates was found near the modern site of the temple. We may assume that they were deposited in the temple and escaped destruction because possibly they were buried deep in the ground or a little further away from the river bank. Copper-plates bearing records of grants of land and other gifts to religious establishments have been frequently found buried under the foundations or floors of buildings for whose maintenance they had been issued. The other five plates which were issued in favour of the five hundred *Brāhmaṇas* were preserved in the same box with the *Chandramādhava* plate, because, we may infer, those *Brāhmaṇas* were the trustees or guardians of the temple. This should account also for the special favour shown to them by the king in bestowing upon them a large number of villages by two consecutive grants in the course of six years.

TRANSLATION

(ll. 1, 9-21, 24).

(Line 1) Ōm. After giving away gold etc. equal to his own weight and a thousand cows before the excellent image of the divine (and) illustrious Ādi-kēśava

(Ll. 9-21) Victorious is he, the illustrious Chandraditya-Dēva, the Parama-bhaṭṭāraka, Mahārāj-ādhirāja, Param-ēśvara, the devout worshipper of Mahēśvara, who, by his arm, has acquired the sovereignty over the glorious Kanyakubja In the pattalā of Vṛihadṛihēdēva-
raṭha, the villages Gōimjara, Mayaḍasiṭha, Gaṃgahaḍa, Dēūli, Śapātakasirisi, Bhaḍauhā, Takauli, Maṇia, Ghaḍasiṭha, Kōsaṇḍa, Indirī, Māṇḍu, Paṭaṇā, Kāṭhālī, Gaḍasaṃḍā, Kaṅ-
kalasī, Gōūḍī, Chchhatēmbu, Kaithnōṇḍī, Bharathī, Laghukōli, Chandavali, Maṭivāḍa, Maluyī, Pakāḍīā, Vudharāmauyī, Saṃkhavāyī, Vamaṇā, Dighavamṭa, Varēṭhā, these thirty villages, in figures also, villages 30; also, in the pattalā of Kāṭhēhālī, two villages, Takaura, Pavaṇāhapura, making thirty-two villages in both the pattalās : in these (villages) (the king, Chandra-Dēva) commands, informs and directs all the people, resident and visitors, also Kings, Queens, Yuvarājas, counsellors, commanders of troops, priests, physicians, astrologers, superintendents of gynæceums, envoys, officers in charge of elephants, horses, towns, mines, stations and gōkulas : The transitoriness of the world should, indeed, be known to you ; prosperity is charming to the eyes only for a few days, like the beauty of the flowers of the spring season ; the life of men is always moving, like a heap of sand on the bank of a river flowing along the slope of a mountain ; the enjoyment of the pleasures, sweet in the beginning, bitter in the end, is difficult to digest like oil-cakes ; the senses are difficult to deal with, averse to discriminating between good and evil, like the coquetry of prostitutes. Therefore, we, too, having considered, with the help of authentic precepts of the Vēdas and the Smṛitis, not disagreeing with all the Sāstras, and having bathed at the glorious Ādi-kēśava ghaṭṭa at the sin-effacing (confluence) of the Ganges and the Varanā, on Saturday, the akshata third day of the dark fortnight of Vaiśākha, in the year eleven hundred increased by fifty-six, to-day on the akshata-

¹ त is engraved above the line.

tritiyā, in the *yugādi parvan*, after having duly satisfied the sacred texts, divinities, sages, men, beings and the group of departed ancestors—after having worshipped the sun, whose splendour is potent in rending the mass of darkness—after having praised him (Śiva) whose body consists of the earth, water, fire, air, ether, the sacrificing priest, the moon and the sun, and whose crest is a portion of the moon—after having performed adoration to the holy Vāsudēva—after having sacrificed to the fire an oblation of abundant milk, rice and sugar—after having offered oblations to the manes—have given away the above-mentioned villages with their water, dry land, hills, forests, ravines, saline wastes, stones and mines, of iron and salt, together with and including their groves of *madhūka* and mango trees, enclosed gardens, bushes, grass and pasture land, with their four boundaries clearly defined, to the five hundred Brāhmaṇas, versed in the four *Vēdas* with their four divisions, whose different names and *gōtras* are recorded in the copper-plate pertaining to Kaṭhōhalī, (confirming our gift) with (the pouring out) from the palm of our hand of water purified with *gōkarna*¹ and *kūśa* grass, and ordaining (that it should be theirs) as long as the sun and the moon (endure). Aware (of this), you will present to them every kind of income, the due share of the produce, the *bhōga*, *kara*, *turushka-danḍa* etc. At the same time the village of Majuḍa in the *Vamkāṇai pattalā*, with all usually rendered kinds of income, has been given as a grant to (the temple of) the divine and illustrious Chandramādhava at Chandrāvati for purposes of worship.

(L. 24) (The deed) was engraved by Mādhava, the son of the illustrious Gaṅgādhara, who made (the image of) the illustrious Chandramādhava, which puts to shame the other (images).

Of the localities mentioned in the plates the most interesting are Laghukamavali and Chandavali. The first is probably the same as the modern Kamanli, situated 8 miles south of Chandrāvati. It was here that a plate of Singara Vatsarāja² and 21 Gāhaḍavāla plates³ were found. We may presume that the village was divided into two portions, the "smaller Kamavali" and the "larger Kamavali." Chandavali, situated 18 or 20 miles south-east of Chandrāvati, is a *Tahsil* in the Benares district. The following is an alphabetical list of the other localities referred to in the plates, with their modern names as far as I have been able to ascertain them :—

(1) Adhiva.

Ādi-kēśava ghaṭṭa. There is a bathing *ghaṭ* at Benares which still bears this name.

Aṇadaurā.

Aṇadaurī.

Bhaḍauhā. This is the same as *Baḍuā*, situated in Kaṭchir *pargana* 3 miles south-west of Chandrāvati.

Bhaṇḍadaha. Same as Bhaṇḍahā, situated 2 miles north of Chandrāvati.

Bhāgama.

Bharathī.

Bhāyī.

Bṛihatsiū.

Bṛihatyaṁchalāma.

Chamōkha.

Chaṭhatarā.

Chchhatēmbu.

Chilāḍa.

¹ The meaning of this word is not clear. Gōkarna is the name of a place of pilgrimage on the Malabar Coast. Perhaps *kūśa* grass of that place was considered to be of extra sanctity. [See above, Vol. XI, p. 303 and ref. to Kielhorn. *Indian Antiquary*, Vol. XV, p. 10, n. 57.—F. W. T.]

² *Ep. Ind.*, Vol. IV, pp. 130 sq.

³ *Ep. Ind.*, Vol. IV, pp. 97 sq.

- Chirivili.
 Chudavāsa.
 Divākaksha.
 Dēūli. There is a village Deoria, 4 *kōs* south of Chandrāvati.
 Dighavamṭa. This is identical with Dighavat, a *pargana* in the Chandrāvati *Taḥsil*.
 Dūpā.
 Gaṅgahadā. Same as Gaṅgēhara, 18 miles to the south of Chandrāvati.
 Gaḍasamdā. This is identical with Gaḍasara, a village south of Kaṭāri.
 Ghadasitha.
 Gōimjara.
 Gōūḍi. This is the same as the village Gauri, situated 6 miles west of Chandrāvati.
 Gulavaṭa. Known by its modern name Guravaṭa ; it lies 3 miles south of Chandrāvati.
 Indinī.
 Jigaṇā.
 Kadhivō.
 Kaithnōṇḍi.
 Kaṅkalāsi.
 Kathāli. A village named Kaṭāri is situated 8 miles west of Chandrāvati.
 Khajuri. Is a village or Mahalla near *Chungī*.
 Kōllakanandivāra *pattalā*, possibly the same as the modern *pargana* of Kol Aslah.
 Kōsaṇḍa.
 Kuṇḍāma. There is a village Kuṇḍā 10 miles to the south of Chandrāvati.
 Laghukōli.
 Laghuvaḍaviṇḍi.
 Majuaḍa is probably Mahuar, situated 2 miles to the south-east of Chandrāvati.
 Malēni.
 Malivāḍa. Majwar is a *pargana* in *Taḥsil* Chandauli.
 Maluyi is a village lying 8 miles to the south of Chandrāvati.
 Māṇḍu. There is a village Maḍuā-dih, 16 miles south of Chandrāvati.
 Mania. A village called Manai is situated across the Gauges, 2 miles to the east of Chandrāvati.
 Mayadasitna.
 Pakadī. There is a village Pakadi 8 miles south of Chandrāvati.
 Papihali is a village 3 miles south of Chandrāvati.
 Paṭaṇā is situated 6 miles north of Chandrāvati.
 Pavaṇahapura.
 Saṁkhavāyi.
 Sapātakasirisī. Sirisiti is a village 6 miles south of Chandrāvati in *Amupur pargana*.
Pātaka means "outlying hamlet."
 Sarisōḍa. Sarasvar or Sarasval is a village 2 miles south-east of Chandrāvati.
 Sēmveli. A village named Simari is situated 14 miles to the north-east of Chandrāvati.
 Sōmchalavaṇa.
 Sōṇadahā, known by its modern name Sōnadahām, is situated between the 5th and 6th miles on the Benares-Ghazipur Road.
 Sōṇaka.
 Takauli. There is a village named Tikāri 4 *kōs* to the east of Chandrāvati.
 Takaura.
 Talabhāma.
 Talahuti.
 Uḍēḍi.

Umdharaumha. There is a village Udharā 8 miles to the south of Chandrāvati.

Upalsicha.

Vadathalā, modern Barathala, is a village lying 3 miles to the south of Chandrāvati.

Vamapā.

Vamkānai pattalā.

Varēthā.

Vudharāmauyi. There is a *pargana* named Mavai, in the *Tahsil* of Chandavali.

Vrihadrihēdēvarāṭha pattalā.

Vrihadrihēvamkānai pattalā.

List of Donees.

No. 16.—BEVINAHALLI GRANT OF SADASIVA-ĀRAYA : SAKA 1473.

By PROFESSOR S. V. VENKATESWARA, M.A., AND S. V. VISWANATHAN, M.A., KUMBakonam.

These plates were obtained by Rao Sahib H. Krishna Sastri from Bashir ud-Din Ahmad, Esq., the Collector of Raichur, and are now in possession of the latter. We edit the inscription from excellent ink-impressions supplied to us by Mr. Krishna Sastri.

The inscription is on seven copper plates, which measure 10½ in. by 7½ in. All the plates are engraved on both sides, except the first and the last, which are inscribed on one side. The rims of the plates are raised a little. Holes are bored at the top of the plates to let in a ring intended to hold the plates together. The hole measures 6 in. in diameter. The plates are numbered in Telugu-Kannāḍa numerals.

The characters of the inscription are Nandi-Nāgarī, and the language Sanskrit, and the whole is in verse, excepting *Śrī Gaṇādhipataye namaḥ*, and the signature at the bottom *Śrī Virūpākṣa*, which is, as usual, written in large Kannāḍa characters. The metres used are the usual Anuṣṭubh, etc. The inscription is practically free from mistakes, and there are only a few orthographical peculiarities worth noticing. Stops are not supplied in their proper places. Mistakes of this kind have been corrected in the text. In the latter portion of the inscription long *ī* is represented only by a loop over the consonants. A case of redundant *anusvāra* is found in *°kaṁnyā* in l. 105, and various instances where *anusvāra* and *visarga* have been omitted are noted in the footnotes to the text. We find a needless reduplication of a consonant after *r*, as in *sānur=Ddēvaṇa* in l. 161. There is confusion in these plates also, as in other plates of the Vijayanagara kings, though not to so great an extent, between the sibilants *śa* and *sa*, e.g. *°nāṇīyaśiva* in l. 73 f. for *°nāṇīyasiva*; *°nīlaśītām* in l. 76 in the place of *°nīlasītām* and *°vēsmanah* in l. 126 instead of *°vēsmanah*. In one instance long *ī* is represented by a vertical stroke and an *i*-loop over short *i*, as if the latter were a consonant, e.g. l. 301. A conjunct consonant is, as usual, expressed by combining the full form of the first consonant and the secondary form of the second consonant. The vernacular sound *r* is represented by an *r* sign over the consonant *r*. Instances of these are:—*mārru* in l. 80 and *Āravīṭṭi* in l. 104. The forms *tāmra-sāsana* in l. 309, *vōshadhi* in l. 78, and *Vobāmbikā* in ll. 24-25 are due to vernacular pronunciation.

The inscription records the grant of the village of Bēvinahalli, otherwise known as Rāmasamudram, with a small hamlet by name Ponnāpurī to learned Brahmans of various *Gōtras* and *Sūtras*. The grant was made by Rāma-Rāja, the Karṇāṭa minister and brother-in-law of Sadāśiva-Rāja, at the request of a subordinate Muhammadan chieftain Ainana Malukka, who seems to have been a great patron of Brahmans. The village granted is styled '*gaṇa-bhōgyam*,' to be enjoyed by Brahmans and subordinate ministers of the king, a very small portion being allotted to the gods Hari and Hara. It is given in perpetuity as *sarva-mānya* to be enjoyed by the donees and their successors. The boundaries of the village, the details regarding the donees, their *Gōtras*, *Sūtras* and the number of shares that fell to each are likewise clearly set forth in the grant.

The inscription gives in detail the genealogy of the family to which Rāma-Rāja belonged. It is, however, somewhat different from others, in that in the place of Śrīraṅga-Rāja, the third in the line and the father of Rāma-Rāja, we find Śrī Rāma-Rāja. This probably is a mistake on the part of the engraver.

The genealogy of Rāma-Rāja.

Śrī Rāma-Rāja.

|

Rāma-Rāja.

The year in which the grant was made is given in numerical words *Gur-āśva-vēda-śītāṃsu*, i.e. 1473. The date of the grant is thus Śaka 1473; Virōdhikrit; Āshāḍha; bright Dvādaśī; Monday. Thus all the details regarding the date are given. We have to add here that the date as given in Appendix A to *Epigr. Rep.*, 1914-1915, p. 8, 'Śaka 1473, Virōdhikrit; Āshāḍha *su. di. 11*' is not correct, as the week day is there omitted and the *tilthi* is given as *Ekādaśī* instead of *Dvādaśī*.¹

As regards the names of persons occurring in the grant, Sadāsiva-Rāya had a large number of ministers and subordinate chieftains under him. The most powerful of these was Rāma-Rāja, the Kurnāṭa minister and brother-in-law of the king; Rāma-Rāja was the *de facto* sovereign in the reign of Sadāsiva until his death, which took place at the battle of Talikōṭa, 23rd Jan. 1565. His place in the Vijayanagara court was taken by his brother Tirumala, whom we know as a great author and who set up the third Vijayanagara dynasty. Rāma-Rāja is seen to bear various *birudas* (vv. 55-58), of which *Antembavaragaṇḍa* and *Aibiruda-rāya rāhula-vēśy-aika-bhujāṅga* are the most important.

We are told in the record that it was as a result of the request of Ainana Malukka to Rāma-Rāja that the village was granted by Sadāsiva. Ainana Malukka was evidently therefore a Muhammadan subordinate chieftain under Sadāsiva-Rāya. About Ainana Malukka Rao Sahib H. Krishna Sastri has inserted in his report² the following note from Mr. Henry Cousens' *Guide to Bijapur*:—

"About 2 miles away to the east of Bijapur is the tomb of Ain-ul-Mulk." "It is a square, massive-looking building, surrounded by a very elegantly shaped dome. Within upon the walls are some very pretty stucco work in the shape of great pendants hanging down upon the face of each. This is the burial place of Ain-ul-Mulk, one of the officers of Ibrahim I, who rebelled against him and was killed near Bijapur in 1556. Beside the tomb is the mosque." "The Muhammadan chief Ainana Malukka must evidently be identical with Ain-ul-Mulk, whose sympathy for the Brāhmanas deserves to be noticed. In Vol. III, p. 381, of Briggs' *Perishta* we find mention made of Mullik Ein-ool-Mulk Geelany, who was a friend of Rāmarāj and was treated by him as a brother on account of his bravery. Geelany is perhaps the chief Ainana Malukka referred to in the inscription." Since both the father and the son are known by the same name in our inscription, it is difficult to find out to which of these exactly the references will apply.

The village granted is divided into 135 *virittis* and allotted to various Brahmanas and ministers of the king, leaving a very small portion to the gods. The total number of *virittis* distributed among the donees comes to only 133³, while according to the grant there ought to be 135. There is thus a mistake here that cannot be accounted for. The names of the Brahmanas, their fathers' names, their *Gōtras*, *Sūtras* and the number of shares allotted to each are appended below in the form of a table:—

¹ [According to Mr. L. D. Swamikanan Pillai's *Epigrammeris* the date regularly corresponds to Monday, June 15, A.D. 1551.—H. K. S.]

² *Epigraphical Report*, 1914-1915, p. 112.

(82) Basavappa	Mailapura Madarasa	Bhāradvāja	Yajus	1	

Among the names specially interesting to us are Rāyasa Venkaṭādri, the son of Timmayy-āmātya, who may certainly be identified with Rāyasam Venkaṭādri, son of Mosalimaḍugu Timmarāja, who is mentioned in the Ūnamāñjēri plates and the Tiruppukkuḷi stone inscription (No. C. 175 of 1916, Madras) as a subordinate of Sadāsiva Rāya. It is clear from our plates, however, that there are two Venkaṭādris, both sons of ministers of Achyuta by name Timma. The other Venkaṭādri is the son of Kāmarasa Timm-āmātya. The Rāja seems to have provided for some other sons of ministers as well, as indicated by the names 74, 76, 78, 80 and 81.

The names of donees are derived from Sanskrit or from colloquial Kannada corruptions of Sanskrit names. In a few cases only do they seem to be connected with territory. The most interesting of the latter is Mailāpura Mādarasa, which seems to suggest the modern names Mylapore and Madras. The etymology of the word Madras is uncertain, and we may well suggest for Madrasa-patnam of the East India Company's records the origin from some Mādarasa in the 16th century or earlier. In any case our inscription is nearly a century before the foundation of Fort St. George and is probably the oldest record suggestive of a derivation for the word 'Madras.' That Mailapur is one of the very oldest parts of Madras is clear from the Syrian Christian traditions regarding the visit of St. Thomas to that place. [We cannot also ignore the fact that Mailāpura is mentioned as suburb of Bōvinahalli in l. 278 f.—H. K. S.]

It is clear from the above table that of the 80 Brahmins among whom the land was divided 46 were students of the *Yajur-vēda*; 31 of the *Rig-vēda*; and of the remaining 3 it is not stated to which *Śākhā* they belonged. This is interesting on account of the non-mention of the *Sāma-vēda* and of the *Sūtras* to which the *Sāma-vēdin* Brāhmaṇas belonged. Among the *gōtras* rare in South India at the present day are Kapi *gōtra* of Nos. 45 and 47; Vasishṭha *gōtra* (No. 38); and Agastya *gōtra* (No. 79). It is possible that Kapi *gōtra* is a contraction of Kapila *gōtra*. These *gōtras* were not unknown in South India in earlier times. We find two names of donees of the Kapi *gōtra* in the Tāṇḍantōṭṭam plates¹ of Pallava Vijaya-Nandivikrama-varman. One of them belongs to the Āpastamba-*sūtra* and the other to the Prāvachana-*sūtra*. In the same plates we have four donees of the Vasishṭha *gōtra*, all of whom are of the Āpastamba-*sūtra*.

After the names of the donees, etc., have thus been given, there appear in the grant the surrounding villages, the neighbouring locality and certain other marks for identifying the places granted. These are recorded in the Kannada dialect, the *Dēśa-bhāṣā*, as it is called in our grant.

The edict was composed by Sābhāpati Svayambhu at the order of the king. The engraver of the grant is Viranāchārya, son of Virana.

⁷ The same reading is found in the Krishnāpuram plates of Sadāsiva-Rāya (*Ep. Ind.*, Vol. IX). The British Museum plates have भूताम्भुरगेंद्र. Prof. Kielhorn corrects this into भूतां नरकेंद्र, while Dr. Sten Konow proposes °ताम्भुरगेंद्र. The last seems to be the best reading.

ABSTRACT OF CONTENTS.

(Verses 1-3) Invocation to Śambhu, the Varāha *avatāra* of Viṣṇu, and Gaṇḍeśa.

(Vv. 4-8) The genealogy as far as Narasa.

(Vv. 9-11) Praises of Narasa ; his generosity and exploits.

(Vv. 12 and 13) Mention of Vira-Nṛsiṃha and Kṛishṇa-Rāya as the sons of Narasa by Tippāji and Nāgalā.

(V. 14) Mention of Raṅga and Achyutadōva-Rāya as the two other sons of Narasa by Ōbāmbikā.

(Vv. 15-19) The conquests of Vira-Nṛsiṃha ; his gifts at the various places of pilgrimage and death.

(V. 20) Kṛishṇa-Rāya ascends the throne.

(Vv. 21-23) Praises of Kṛishṇa-Rāya, etc.

(V. 24) Achyuta, Kṛishṇa-Rāya's brother, succeeds him.

(Vv. 25 and 26) Praises of Achyuta-Rāya.

(V. 27) Veṅkaṭadōva-Rāya succeeds his father Achyuta.

(Vv. 28-30) At the death of Veṅkaṭa Sadāśiva, the son of Raṅga, the lord of earth, by Timmāmbā, was installed on the throne of Śrī Vidyānagari by king Rāma of Karṇāṭa, a brother-in-law of Sadāśiva.

(Vv. 31-35) Praises of Sadāśiva.

(Vv. 36-40) The titles of the king.

(Vv. 41 and 42) Praises continued.

^४ In Kannada characters.

(Vv. 43 and 45) In the *Śaka* year *Guṇ-āśva-vēda-sītāmsu* (i.e., 1473), according to the *Sāliyāhana* reckoning in the year *Virōdhikṛit*, in the month of *Āshāḍha*, on the *Dvādāśī* day of the bright fortnight, on Monday (is made the gift) on the banks of the *Tuṅgabhadra*, in the vicinity of *Viṭṭhalōśvara*, to Brahmins of various *gōtras*, *sūtras*, etc., who are well-versed in the *Vēdas*.

(Vv. 46-50) The object of the grant is the village of *Bēvinahalli*, otherwise known as *Rāma-samudra*, with the hamlet of *Ponnāpura*. It was situated in *Raudakundi* *śīmā*, in *Kēlavaḍi nāḍu*, in the *vaḷita* of *Hastināvati* (*Anegondi*) to the east of *Guḍūru* and *Somanahalli*, to the south of *Jālihalli*, to the west of the borderland between the villages of *Jālihalli* and *Kāraṭika* and to the north of *Kāraṭika*.

(Vv. 51 and 53) The terms of the grant, as commonly seen in all *Vijayanagara* grants.

(Vv. 54-57) The genealogy of the *Āraṇṇi* family down to *Rāma-Rāja*.

(Vv. 58-63) Praises of *Rāma-Rāja*, his titles, etc.

(Vv. 64-68) Mention that the grant was made at the request of *Ainana Malukka*, the son of the chief *Ainana Malukka* of the *Kanyārna* race.

(V. 69) The village was split up into 135 *vṛttis*.

(Vv. 70 and 71) Grant to *Śambhu* and *Vishṇu*, the village deities.

(Vv. 72-151) The names of the donees, etc., the shares ranging from 4 to $\frac{1}{3}$ of a share.

(V. 152) The boundaries and certain marks of identification of the places granted are described in the language of the country (*dēśa-bhāṣā*).

(Lines 247-307) Written in the *Kannāḍa* language.

(Vv. 153 and 154) The edict was composed by *Sabhāpati Svayambhu*.

(V. 155) The engraver of the grant *Virāṇa*, son of *Virāṇa*.

(Vv. 156-160) The usual admonitory verses. *Śrī-Virūpāksha*.

No. 17.—THE KUDIYANTANDAL GRANT OF VIRA-NRISIMHA : SAKA 1429.

By PROFESSOR S. V. VENKATESWARA, M.A., AND S. V. VISWANATHAN, M.A., KUMBAKONAM.

The grant is engraved on three copper-plates, bored at the top and secured by a ring. They were discovered by us in the *maṭha* of the *Śaṅkarāchārya* of the *Kāmakōṭi pīṭha* of *Conjeeveram*, who was kind enough to lend them to us for examination and publication in the *Epigraphia Indica*.

The plates measure 7·9 in. by 6·8 in., except in the middle, where they are longer, 10·3 in., on account of the arch at the top. The ring has a diameter of 2·5 in. The holes through which the ring passes have a diameter of ·6 in. The plates were apparently secured by a seal in the *Vijayanagara* fashion; but the seal was missing in them as handed over to us. All the plates have raised rims. The writing runs throughout across their entire breadth. It is quite legible, except in a few places. The first and third plates are engraved only on one side, the second on both sides. The inscription contains 85 lines in all, excluding the signature at the bottom. The height of each line is ·3 in. on the first plate and ·2 in. on the others. In the signature the letters are larger than elsewhere.

The language is *Sanskrit*, and the whole inscription is in verse, except the opening invocation to *Gaṇādhīpati*. The metres used are those which are generally found in the *Vijayanagara* plates—the *Śārdūlavikṛīḍita*, *Anuṣṭubh*, *Śragdharā*, etc. The poetry is of a very low order. The characters are *Nandi-nāgarī*, except the signature, which is in *Kannāḍa* characters, engraved at the bottom of the last plate.

The inscription abounds in **orthographical irregularities**. Stops are often omitted at the end of a verse, though the half verses are always marked off by a single vertical stroke. The omissions have been marked and supplied in the text below. There are innumerable instances of confusion between the use of the long and the short *i* and *u*. Noteworthy among these are *mūla-stambhāya* for *māla-stambhāya* in line 2; *navanītam* for *navanītam* in line 9; *Pururavā°* for *Purūravā°* in line 12; *Tippāji* for *Tippāji* in line 34; *Śivarupinē* for *Śivarāpinē* in line 72. These mistakes could hardly be due to the ignorance of the engraver, and are partly accounted for by the fact that both long and short vowels are represented by similar kinds of marks over or under letters. The letters *ya*, *va*, *pa*, *ta* and *na* assume forms which are capable of passing into one another. In a few instances the terminations for the Imperfect and the Pluperfect third person singular are left out, e.g., *vyatāni* for *vyatānīt* in line 33. As in other plates of the Vijayanagara dynasty, a conjunct consonant is expressed by combining the full form of the first with the secondary form of the second consonant; e.g., *rya*. The confusion of consonants to be compounded is seen in line 41 (*shra* for *rsha*), l. 77 (*vra* for *rva*), l. 84 (*mradhyē* for *rmadhyē*). The influence of the Dravidian languages in the pronunciation of Sanskrit words is clear from *irāja* (for *rāja*) in l. 55, *idam°* (for *īdam°*) in l. 80, *Mallaṇāsāri* and *Viraṇāsāri* (for *Mallaṇāchārya* and *Viraṇāchārya*¹) in ll. 82, 83, and in *Achchuta* (for *Achchuta*) in l. 85.

The inscription is very important, as the first copper-plate record that we have of **Vira-Nṛsiṃha** of the second Vijayanagara dynasty. It makes the king the son of **Narasa Avani-pālaka** by **Tippāji**. This **Narasa**, better known as **Narasa-Nāyaka**, is supposed to be the founder of the Tuluva dynasty. But the plates before us have the genealogy thus:—**Timma Bhūpati**, **Īśvara Kṣhitipālaka**, and **Narasa Avani-pālaka**.

The titles seem to imply that the nearest ancestors of 'Narasa Nāyaka' were ruling kings and not merely local chieftains. The king **Vira-Nṛsiṃhendra**, *alias* **Vira Sri Nārasimha**, assumes the titles **Rājādhirāja**, **Vira-pratāpa**, etc. It is interesting that **Kṛṣṇa-Rāya** is referred to as *mahāpati*, while his brother was yet ruling. This circumstance lends weight to the view that the brothers were ever friendly, and that **Kṛṣṇa-Rāya** succeeded to the throne only after the demise of his elder brother **Narasimha**. Cf. *Tasmāi guṇēna vikhyātē kṣhitēr indrē divaṁ gatē tatopyavārya-rīrya-śrīb Kṛṣṇa-rāya-Mahāpatē* in the Udayambākam grant of **Kṛṣṇa-dēva-Rāya** (Pl. II, Side 1, ll. 8, 9). At the same time this passage enhances the credibility of the tradition embodied in the *Kṛṣṇarājaviṣayamu* of **Kumāra-Dhūrjati**, a Telugu poet who lived later in the same century. He states that **Kṛṣṇa-Rāja** succeeded his father directly. It is quite possible that **Narasa** left the throne to his sons, who were both apparently crowned in his lifetime.

The village granted is **Kudiyāntaṇḍal** in the **Chingleput** district. The boundaries of the village are not clearly engraved on the grant. The village is situated in the **Varakkāṭaru** *simā*, **Kāliyār-kōshṭha**, **Kānci nādu**, **Paḍaviḍu rājya**, in **Jaya(mkoṇḍa)-Chōla maṇḍala**. It was bounded on the north by **Kaḷakūṭṭaru**, on the east by **Śurittiluru**, on the south by **Sittelpakkam**, and on the west by **Kunantāgal**.

The donee is **Mahādēva Sarasvatī**, the disciple of **Sadāśiva Sarasvatī**, a teacher undoubtedly belonging to the *maṭha* of **Śaṅkarāchārya**. This point has to be made out here at some length. Remarkings on the plates of **Kṛṣṇadēva-Rāya** lent for examination by Mr. Venkateswara, the Epigraphist to the Madras Government states as follows: " . . . it looks suspicious why the name **Śaṅkarāchārya** is not mentioned even incidentally in any one of the copper-plates under reference." (Enclosure to G. O. No. 1260-Public, dated 25th August 1915, page 117.) Elsewhere in the same report he remarks on the grant of **Vijaya-Gaṇḍa-gōpāla** as follows: "Mr. Venkateswara Ayyar is editing in the *Ep. Ind.* an earlier copper-

¹ As we find in other Vijayanagara copper-plates.

plate grant, which belongs to the same *maṭha*, but is not included in Appendix A. . . . It is not clearly stated in the record if the *maṭha* presided over by the Śaṅkarārya herein referred to was identical with the Śaṅkarāchārya *maṭha* at Conjeeveram."

In the first place, the Āchāryas of the *maṭha* have each a proper name like Mahādēva, Sadāśiva and Chandrasekhara, while all of them are styled Śaṅkarāchārya by the people. This will be clear from the *Guru-paramparā* of the *maṭha*, extracts from which we reproduce below, and which must be at least three centuries old. Secondly, the attributes of the great Śaṅkara such as *parama-hansa parivrājakachārya*, etc., are found in these copper-plates. Thirdly, the plates make it clear that the donee was a great teacher of Advaitism : cf. line 68 *śitōshnādī-dvandva-duḥkha-vyatitāya mahātmanē*. Also, *nigamānta-rahasyārtham śishyēbhyah suvivṛinvaṭe* in the grant of Vijaya-Gaṇḍagopāla. The teacher is styled *tapasvin* in the present grant, and *Śiva-chētas* and *Yati-rāja* in the plates of Kṛishṇadēva-Rāya, and also an exponent of the *māya-vāda*. Fourthly, the Āchārya has his seat in Kāñchi-puram, and the plate of Vijaya-Gaṇḍagopāla locates the *maṭha* as situated to the west of the temple of Hastiśaila-nātha. Unless the critic could prove the existence of another *maṭha* at Conjeeveram to which the above attributes can be applied, there seems to be no point in calling in question the identification of the *maṭha* to which the grants were made with the *maṭha* of Śaṅkarāchārya at Conjeeveram. As a matter of fact the *maṭha* owns, even at the present time, lands in Ambikāpuram and various other villages granted in these copper-plates.

The date of the grant is Śaka 1429, Śukla, Māgha, on the occasion of the *Mahādaya*, which is considered a very auspicious conjunction of constellations. The week-day is not mentioned, nor is the *tithi*. But the mention of the cyclic year is important. It shows that Vira-Nṛsiṃhōndra must have ascended the throne at the latest by 1506 A.D.

The chief interest of the grant, however, is that, taken together with the copper-plates of Kṛishṇadēva-Rāya and Vijaya-Gaṇḍagopāla, it enables us to determine approximately the date of the great Śaṅkarāchārya. The *Gurus* of the Śaṅkarāchārya *maṭha* named in the plates are—(1) Śrī Śaṅkara-yogin, 1291 A.D., (2) Sadāśiva, Mahādēva and Chandrachūda, and Sadāśiva, contemporaneous with the Vijayanagara kings Vira-Nṛsiṃhōndra and Kṛishṇa-Rāya (1506 to 1527 A.D.). Fortunately for us, we find these names in the old list of the Āchāryas preserved in the *maṭha*. One of the teachers, the third in apostolic descent from Sadāśiva (1527 A.D.), composed a *Guru-rāja-ratna-mālā-stava*, of which the following are the closing stanzas :—

* * * * *

निजनीष्ठद्वयहेतिखेदं त्यज नेपालनृपालपूज्यपादः ।

स पुरो मम साधु सन्निधत्तां विपुलानन्दसदाशिवी प्रमत्तः ॥

 संपूर्णः ।

The fact that the *gurus* after the 16th century are not mentioned in this *stōtra* may be taken as indicating that there has been no addition to it since the author's lifetime. The author cannot be regarded as an authority regarding the generations of *gurus* remote from his time; but the tradition embodied by him in relation to that epoch may be treated with some consideration. The *guru-paramparā* of the *maṭha*, as gathered from this work, may be thus arranged :—

- | | |
|-----------------------|--------------------------|
| 1. Śaṅkara. | 28. Bodha. |
| 2. Surēśvara. | 29. Sachchidānandaghana. |
| 3. Sarvajña. | 30. Chandrasēkhara. |
| 4. Satyabodha. | 31. Chitsukhendra. |
| 5. Jñānānanda. | 32. Vidyāghana. |
| 6. Śuddhānanda. | 33. Śrī Śaṅkara. |
| 7. Ānandajñāna Yōgin. | 34. Sacchidvilāsa. |
| 8. Kaivalya Yōgin. | 35. Mahādēva. |
| 9. Kṛipāśaṅkara. | 36. Gaṅgādhara. |
| 10. Mahēśvara. | 37. Pūrṇabodha. |
| 11. Chiddhana. | 38. Brahmānandaghana. |
| 12. Chandrachūḍa. | 39. Ānandaghana. |
| 13. Sachchidghana. | 40. Paraśiva. |
| 14. Vidyāghana. | 41. Bodha. |
| 15. Gaṅgādhara. | 42. Chandrachūḍa. |
| 16. Sadāśiva. | 43. Chidvilāsa. |
| 17. Surēndra. | 44. Mahādēva. |
| 18. Vidyāghana. | 45. Chandrasēkhara. |
| 19. Śaṅkarēndra. | 46. Vidyātīrtha. |
| 20. Chandrachūḍa. | 47. Śiva Yōgin. |
| 21. Paripūrṇabodha. | 48. Śaṅkarānanda. |
| 22. Sacchitsukha. | 49. Sadāśiva. |
| 23. Chitsukha. | 50. Mahādēva. |
| 24. Chidānandaghana. | 51. Chandrachūḍa. |
| 25. Prajñāghana. | 52. Sadāśiva. |
| 26. Chidvilāsa. | 53. Paraśiva. |
| 27. Mahādēva. | 54. Ātmabodha. |
| | 55. Śivēndra. |

It will be clear from the above genealogy that, though some names occur more than once, it is only at wide intervals. The Āchāryas mentioned in the copper-plate grants of Vira-Nṛisimha and Kṛishṇa-dēva-Rāya are the 49th to 52nd in the list. The identification is confirmed by the mention of the Nepalese king in the *śloka* referred to above. Bühler has noted¹ that a certain *Swāmin* of South India went to Nepal about 1503 and that he was named Sōmaśēkharānanda. Our copper-plates show that Chandraśēkhara Sarasvatī was also named Chandrachūḍa. 'Sōmaśēkhara' may be another variant, as it has the same meaning. It is more than merely possible that the Sadāśiva of the *śloka* may have sent one of his disciples, Chandrachūḍa, *alias* Sōmaśēkhara, to Nepal at the request of its king. The date of our grant of Nṛisimha is 1506, and then the *Swāmin* was Mahādēva, a disciple of Sadāśiva. It follows therefore that Sadāśiva may have lived till 1506. If so, his sending a *śishya* to Nepal in 1503 may be accepted as a fact.

It remains to consider who was the *guru* in the genealogical list corresponding to Śrī Śaṅkarārya *guru alias* Śaṅkara Yōgin mentioned in the copper-plate grant of Vijaya-Gaṇḍa-gōpāla. There are in the list only two such names which could be thought of, viz. No. 19 Śaṅkarēndra and No. 33 Śrī Śaṅkara. The date of the plate being 1291, it could hardly be of the time of No. 19, as in that case there would be 30 generations from him to Sadāśiva of 1503 A.D., covering a period of only two centuries. So the Śaṅkara of the plate should be identified with No. 33. We then get 16 generations for a period of 215 years, i.e. on the average $13\frac{1}{2}$ years for a generation. This should not be regarded as a low figure,² as in most cases a man becomes the head of the *maṭha* only when advanced in years, and is generally succeeded by the oldest among his disciples. Counting back at the same rate of $13\frac{1}{2}$ years, we get the 9th century A.D. for the great Śaṅkarāchārya. It has been shown elsewhere³ that this date agrees with all known or inferable data, external and internal, in relation to the date of Śaṅkarāchārya.

The engraver of the grant is Virapāchāri, son of Mallapāchāri. Elsewhere they are styled Virapāchārya and Mallapāchārya. But *āchāri* or more properly *āsāri* is a Dravidian word which means 'artisan' even now. It may therefore be assumed that the engraver was of the *āsāri* or artisan caste. This caste had a practical monopoly of work on metals, wood or stone.

As regards the descendants of Mallapa we know that Virapa, his son, surnamed *tvashṭri*, the engraver of the present grant, was engraver to Kṛishṇadēva-Rāya and Achyuta-Rāya; and that he had a son, also named Virapa, who was the engraver to Sadāśiva-Rāya.

Of the localities mentioned the following may be identified with villages of modern times in Chingleput and North Arcot districts :—

Varakāṣṭaru is probably the same as Velkūru in Chittoor *tāluk*.

Kaḷakāṣṭaru is the same as the village of the same name in Palmanūr *tāluk*, N. Arcot district.

Suriṭṭiluru is perhaps the same as Suruṭṭal in Arcot.

Sittaleppākkam is the same as Sittaleppākkam in Arcot.

Kuḍiyāntaṇḍala is known to-day by the name Kuḍiyāntaṇḍala in N. Arcot district.

ABSTRACT OF CONTENTS.

V. 1. Invocation to Śambhu.

V. 2. To the boar incarnation of Viṣṇu.

V. 3. To Gaṇeśa.

Vv. 4 & 5. Descent of the family from the moon through Buddha, Purūravas, Āyus, Nahusha, Yayāti and Turvasu.

Vv. 6, 7 & 8. Genealogy as far as Narasa, who was born of the son of Dēvaki (Bukka) as Kāma was from the son of Dēvaki (Kṛishṇa).

V. 9. The munificent gifts of Narasa in holy places.

Vv. 10 & 11. His exploits and victory over his enemies such as the Chēras, Chōlas, Pāṇḍyas, etc.

Vv. 12 & 13. To that king were born of Tippāji and Nāgalā Dēvi, the sons Vira-Nṛsiṃh-hēndra and Kṛishṇa-Raya, who were brave yet well-behaved, as Rāma and Lakshmaṇa were born to Paṅktiratha (Daśaratha) of Kausalyā and Sumitrā.

V. 14. The brave Vira-Nārasimha, seated on his jewelled throne at Vijayanagara, eclipsed in fame and policy other kings of the world like Nṛiga, Nala and Nahusha. He ruled the kingdom between the eastern and western mountains, drawing to him the hearts of all people.

Vv. 15 & 16. His gifts at holy places such as Chidambaram, Kālahasti, Tirupati, Śrī-raṅgam, Kumbhakōnam, Conjeeveram, Ahobalam, Gokarna, Rāmasētu, etc.

V. 17. His praises.

V. 18. His *virudas*.

Vv. 19-21. Praises of the king.

Vv. 22-27. In the Śaka year 1429 according to the Śālivāha reckoning, in the year, Śukla, in the famous month Magha, in the holy Mahōdaya, on the bank of the Tuṅgabhadra, in the vicinity of Śrī Virūpāksha (the gift was made) to the Guru Mahādēva Sarasvatī, the disciple of Sadāśiva Sarasvatī, etc.

Vv. 27-31. Name of the village granted with its boundaries, etc.

V. 32. Praises of the king Vira-Nṛsiṃha for the grant.

V. 33. The engraver of the grant was Virapāsāri, son of Mallapāsāri.

V. 34. The merits of charity.

Signature in Kannaḍa, Śrī Virūpāksha.

No. 18.—THE TRUE LONGITUDE OF THE SUN IN HINDU ASTRONOMY.

THE SIDDHĀNTA-ŚIRŌMAṆI.

BY ROBERT SEWELL (I.C.S., RETIRED).

(Continued from *Epiq. Ind.* XIV. p. 66.)

257. In my last article I have given Tables for finding the longitude of the sun, both mean and true, at any time of any year according to two of the great Indian astronomical authorities, the *First Ārya-Siddhānta* or *Āryabhaṭīya* of Āryabhaṭa (A.D. 499) and the *Present Sūrya-Siddhānta* (exact date unknown, introduced about A.D. 1100). The present Table affords similar information for the *Siddhānta-Śirōmaṇi* (12th century).

As soon as I obtain definite assurance as to the value assigned by Brahmagupta to each of the twenty-four base-sines of angles, I shall be able to provide a similar Table for his *Brahma-Siddhānta* (A.D. 628). For the present this is not possible. We know that the sine-values given in detail in the *Sūrya-Siddhānta* (ii, 15-22) were the same as those used by Āryabhaṭa six centuries earlier (see *Ārya-Siddhānta*, *gīṭikā-pāṭa*, v. 10, and the Hindi Commentary by Udayanārāyan Singh—*Mozaffarpur*, 1906—with list of differences between the sines); but according to the printed Benares edition of the *Brahma-Siddhānta*, with which one MS. copy in the India Office agrees (see II, *Spashṭa-adhikāra*, vv. 2-5), Brahmagupta used a totally different set of sine-values, and these actually erroneous ones, while the values used a century before his time and 500 years later were as nearly as possible mathematically correct.¹

Seeing no reason why Brahmagupta should have made his calculations by a set of sines that may be condemned as positively wrong, in opposition to the correct set in use before his day, I have instituted enquiries in order to ascertain whether perhaps the Benares edition of his *Siddhānta* may have followed a MS. which by some mischance contained a copyist's error, equally the source of error in the MS. in the India Office. Unfortunately two other MSS. in the India Office and one in the Bibliothèque Nationale in Paris are wanting in the passage which contains the sine-values.

Oxford possesses no copy. I have sought for information from India, but this is not yet to hand.

I hope to be allowed hereafter to publish a Table for work by the *Siddhānta-Śirōmaṇi* assimilated to Table I of the *Indian Calendar*, which will enable us to ascertain the tithi, yoga, nakshatra and solar month according to that authority as easily as we have been enabled to do according to the *Ārya*- and *Sūrya-Siddhāntas*; and this will, I hope, be followed by similar Tables for work by the *Ārya* and possibly by the *Brahma-Siddhānta*.

Epigraphists will then be in a better position than heretofore to judge of the authenticity of inscription dates.

In case my Tables should be considered over-minute in detail, running as the entries do to several decimal points, I would ask readers to remember that they are designed as standard Tables for the settlement of the closest possible cases. Such a case as is mentioned in my former paper (*above*, Vol. XIII, 2, §§ 206, 207, on the cycle of *Jupiter*) proves that permanent reference Tables can hardly be too accurate. I have found other cases somewhat similar in

¹ Sin. 90° = radius. With π (ratio of diam. to circumf.) = 3.14159 the radius = 3437'74967. The *Sūrya-Siddhānta* and *Ārya-Siddhānta* radius is 3438'. The *Brahma-Siddhānta* value of Sin. 90° or radius is 3270', which implies a ratio π = 3.303. The ratio according to Archimedes (B. C. 250) was 3.14286. If the ratio 1 : $\sqrt{10}$ mentioned in the *Sūrya-Siddhānta* should be adopted, we should have the ratio 3.16223. Brahmagupta's implied ratio, 3.303, is quite different from any of these.

calculating the intercalated and suppressed lunar months by the *Siddhānta-Sirōmaṇi*. In ordinary cases it will always suffice to work with merely the whole numbers.

Elements of the Siddhānta-Sirōmaṇi.

258. The *Siddhānta-Sirōmaṇi* by Bhāskarāchārya dates, it is believed, from about A.D. 1150, though Dr. Bhau Dāji (J. R. A. S. n. s. I. 392) placed it in about 1105. It was used in some tracts and for some periods—we have yet to learn which—for the preparation of local almanacks. My future Tables will embrace the period A.D. 1100 to 1750. The earlier date will suffice for safety, and it is not necessary to work for years later than 1750.

According to this authority the length of the year from mean Mēsha-saṁkrānti to mean Mēsha-saṁkrānti is $365^d 6^h 12^m 9^s$ or $365^d.258437500$.

Its sine-values of angles are the same as in the *Ārya-* and *Sūrya-Siddhāntas*, with radius taken as equal to 3438'.

For the sun's mean motion in days, hours, etc., see Table XLIII (*above*, Vol. XIV).

The twenty-four base equations are given in col. 9 of Table XLVII of the same article with the differences per minute of anomaly angle (*col. 10*), and in fuller detail in Table XLVII, A, cols. 9-10.

The epicycle of the sun not being considered as contracted at any part of the orbit, as it is in the *Sūrya-Siddhānta*, and the circumference of the epicycle being given as $13^\circ 40'$ or $820'$, the equation (α being the sun's mean anomaly, or the angular distance of the mean sun from the perigee-point of his orbit) is $\frac{13^\circ 40'}{360^\circ} \sin. \alpha$, or $\frac{820'}{21600} \sin. \alpha$, or finally $\frac{41}{1080} \sin. \alpha$.

This *Siddhānta* postulates a constant forward shift in the line of apsides of the sun's orbit. This shift is more rapid than the *Sūrya-Siddhānta's* shift and amounts to $0''.0174$ or $1''.044$ per annum, and to $11' 18''.6$ or $11' 31''$ in the 650 years succeeding A.D. 1100.¹

According to the *Siddhānta-Sirōmaṇi* the Kaliyuga began, or in other words K. Y. 0 began, with a conjunction at celestial longitude 0° or 360° of mean sun, mean ~~planets~~ and other planets at the moment of mean sunrise or 6 A.M. on Friday 18th February B.C. 3102 or 18th February $0^h 0^m 0^s$ *Laika* time. This was the moment of mean Mēsha-saṁkrānti in that year. True Mēsha-saṁkrānti, the moment when the true or apparent sun touched long. 0° , occurred by the same authority on Tuesday 15th Feb. in that year at $19^h 52^m 21\frac{1}{2}^s$ after mean sunrise.

The interval between these two occurrences, which we call the *śodhya*, and which is the time occupied by the sun in travelling over the arc of the equation-angle, was $2^d.171971$ or $2^d 4^h 7^m 38\frac{1}{2}^s$ according to Dr. Schram's calculation (*see "Indian Chronography,"* Table, p. 16).²

259. In the matter of the sun's equation and true longitude it should be noted that every entry in cols. 6 to 9 of Table XLVIII C has been separately calculated from the value of his mean anomaly at each twenty-four hour period measured from the moment of true Mēsha-saṁkrānti, by use of the *Siddhānta-Sirōmaṇi* equation Table.

¹ The shift according to the *Ārya-Siddhānta* is nil.

" " *Brahma-Siddhānta* $0''.144$ per ann.

" " *Sūrya-Siddhānta* $0''.1161$ "

" " *Siddhānta-Sirōmaṇi* $1''.044$ "

" " *2nd Ārya-Siddhānta* $0''.1388$ "

(Jacobi, *Epig. Ind. I. 441*.)

² For explanation of technical matters see above, Vol. XIV, §§ 249-255.

260. The forward shift of the sun's apsis, while leaving the sun's mean longitude unaffected, causes a slight change every year in the sun's mean anomaly (his mean distance from the perigee-point), this becoming each year proportionally less as the perigee-point moves forward. And since the shift induces a corresponding, though very minute, change in the velocity of the sun (considered as a planet) at all times of the year, the sun's equation and true longitude are each year a little different from what they were in the year previous.

The change in mean anomaly is stated in Table LI below.

The change caused by the shift of the apsis in the equation and true longitude of the sun at true Mēsha-saṁkrānti amounts to only 2" (actually 1".9675) in the 300 years on either side of K. Y. 4500, which is the base-year of my main Table XLVIII C,—the annual change being at the rate of about 0".0066 per annum.¹

The corresponding time-difference, or change in the *sūlhyā*-value, is about 0^s.16 per annum (actually 0^s.15975) by which amount the *sūlhyā*-value at true Mēsha-saṁkrānti increases every year. In 300 years this amounts to 47^s.925 or about 48^s. (For particulars see Table LII.)

261. The length of the solar year from mean Mēsha-saṁkrānti to mean Mēsha-saṁkrānti according to this Siddhānta being 365^d 6^h 12^m 9^s, it differs from that of the *Ārya-Siddhānta* year of 365^d 6^h 12^m 30^s by 21^s every year since K. Y. 0. The difference-Table given in *Indian Chronography*, p. 61, is here reprinted for ready reference (Table LIII). The difference is cumulative from K. Y. 0. In A.D. 1120, which is the very earliest date possible for the *Siddhānta-Śirōmaṇi* to have come into use (it was probably 30 years later), the moment of mean Mēsha-saṁkrānti by that authority was already 1^d 0^h 37^m 21^s earlier than the same according to the *Ārya-Siddhānta*, and the difference between them increased with every subsequent year. Consequently both mean and true Mēsha-saṁkrānti by the *Siddhānta-Śirōmaṇi* always fell respectively on the day previous to their occurrence by *Ārya-Siddhānta* reckoning, the time of which is given in the "*Indian Calendar*," Table I, cols. 13 to 17.

When therefore we are examining a date and have worked in the ordinary way for settlement of details by the *Ārya-Siddhānta*, using the *Indian Calendar* process for finding the values *a*, *b*, *c*, *s* and *n*, if we desire to find roughly the value of *s* according to the *Siddhānta-Śirōmaṇi* by use of the new Table XLVIII C below for determination of the nakṣatra by that authority, we must take the Table value of *s* (cols. 8-9) not for the Day-number given in the Table, but for the day next following. *E.g.*, if we suppose that preliminary examination of a date by the *Indian Calendar* process proves the record-date to be Day 120 (as measured from 1st Jan.) and that Table I, cols. 13-17, shews that by the *Ārya-Siddhānta* true Mēsha-saṁkrānti took place on Day 85, then in order to ascertain the equation and longitude of the sun by the *Siddhānta-Śirōmaṇi* we must take the details given in Table XLVIII C not as given for (120—85) Day 35, but for Day 36, that number of days having elapsed since true Mēsha-saṁkrānti by the latter authority. For accuracy the difference between the times of true Mēsha-saṁkrānti by the two authorities must be allowed for.

262. Since the Table-entries are for each twenty-four hour period from true Mēsha-saṁkrānti in any year it is necessary to know the number of hours and minutes since sunrise of the occurrence of true Mēsha-saṁkrānti in the year in question, and deduct the sun's movement during those hours and minutes, in order to arrive at his true longitude at mean sunrise of the given day. For this purpose we may use Tables XLIX and L (in Vol. XIV above).² The

¹ Minus for years earlier, plus for years later, than the base-year.

² These stand exact for the *Ārya-Siddhānta*, but are close enough for general use. For absolute exactness see my last article (above, Vol. XII, § 243).

method for finding these hours and minutes is detailed in *Indian Chronography*, pp. 27, 28, 61, 62; but to save reference it is repeated here, with the accompanying Table.

To find time of true *Mēsha-saṁkrānti* by the *Siddhānta-Śirōmaṇi*; (i) *The longer rule.* Take the moment of true *Mēsha-saṁkrānti* by the *Ārya-Siddhānta* from Table I of the *Indian Calendar*, cols. 13 to 17, adding 30^s in odd A.D. years, none in even (*Hint 20*, p. 79, *Indian Chronography*). Add the *śodhya* by that authority—always 2^d 3^h 32^m 30^s. This gives time of mean *Mēsha-saṁkrānti*. Deduct for every year of the Kaliyuga expired at the given date the amount obtained from Table LIII below. This gives time of mean *Mēsha-saṁkrānti* by the *Siddhānta-Śirōmaṇi*. Deduct the amount of *śodhya* noted in Table LII below for the given year; for great exactness it may be found from col. 3, difference for the year in minutes and seconds being calculated from the entry for the beginning of each century: for close approximation take, without further calculation, the century entry in col. 4. The result is the required time of true *Mēsha-saṁkrānti* by the *Siddhānta-Śirōmaṇi*.

(ii) *The shorter rule.* Take the *Ārya-Siddhānta* time of true *Mēsha-saṁkrānti*—the first process in (i). Add together the amounts gathered from Table LIII—the third process in (i)—and the number of minutes for the century in col. 5 of Table LII. Deduct the total from the *Ārya-Siddhānta* time of true *Mēsha-saṁkrānti*. The result gives the required time of true *Mēsha-saṁkrānti* by the *Siddhānta-Śirōmaṇi* with sufficient exactness for ordinary purposes. Examples are given in *Indian Chronography*, p. 27, and need not be repeated.

My future Tables will entirely do away with the necessity of finding the moment of true *Mēsha-saṁkrānti* by the *Siddhānta-Śirōmaṇi*, the correct time being given for each year.

263. Calculation for the correct tithi-index by the *Siddhānta-Śirōmaṇi* may for the present be considered as sufficiently carried out by work according to the *Ārya-Siddhānta*; there will often be a difference between the two. Correction of the equation (see above, Vol. XIV, § 247, ii, the tithi) may cause a difference of one unit in the tithi-index, and there may be a slight difference in consequence of a different mean anomaly value requiring the equation to be calculated from a different base-angle.

Construction of the Main-Table XLVIII.

264. In order to conform to my similar Tables for the *Ārya-* and *Sūrya-Siddhāntas* (above, Vol. XIV, Tables XLVIII A and B), I have worked for the year K. Y. 4500, expired, A.D. 1399-1400. The first thing was to fix the exact value of the sun's mean anomaly in that year at the moment of true *Mēsha-saṁkrānti*.

From Dr. Schram's fixture of the sun's equation of the centre by the *Siddhānta-Śirōmaṇi* at that moment in K. Y. 4000 as 2° 8' 52".761328955 and in K. Y. 5000 as 2° 8' 59".319753357 we find the equation in K. Y. 4500 to be 2° 8' 56".040541156, or, in 10,000ths of the circle, 59.691670842.

From Prof. Jacobi's determination of the position of the sun's apsis (I take perigee, not apogee) at that moment as 258° 55' 12" in K. Y. 4000 and 259° 12' 36" in K. Y. 5000 we find the perigee-point in K. Y. 4500 to be 259° 3' 54", or, in 10,000ths of the circle, 7196.250 (exact).

The sun's mean anomaly at any moment is 360° minus the longitude of perigee and the equation of the centre. This, using the above figures, gives us his mean anomaly at that moment in K. Y. 4500 as 98° 47' 9".959458844 or, in decimals of a minute for purposes of calculation, 98° 47' 16.5990981; or, in 10,000ths of the circle, 2744.058329158.

Tested by the sine-and-equation-Table (Vol. XIV, Tables XLVII and XLVIII A) with use of the most accurate possible details (for method see text § 256, above, Vol. XIV) I find

that the result of calculation from that amount of mean anomaly gives the sun's true longitude as exactly $360''$ down to four decimals of a second. The figures, then, are accurate for the moment of true Mēsha-sāṁkrānti in K. Y. 4500.

The sun's mean longitude at any moment is his true longitude less the equation of the centre, here $360^\circ - 2^\circ 8' 56'' \cdot 040541156$ or $357^\circ 51' 3'' \cdot 959458844$, or, in 10,000ths, 9940·308329158.

These figures are given for the moment of true Mēsha-sāṁkrānti at the head of the main Table.

Example.

265. An inscription is found dated "Śaka 1571 Virōdhin, 15 kṛishṇa of Mārgasīra, Sunday, (*nakshatra*) Pūrva-Āshādhā, 24 Dhanus."

We work first by the Tables of the *Indian Calendar* in order to obtain a close approximation according to the *Ārya-Siddhānta*.

The year was K. Y. 4750 expired, or A.D. 1649-50. Its samvatsara-namo was Virōdhin. In that year the lunar month Āshādhā was intercalated.

Calculation for the lunar tithi proceeds as usual—

			<i>d.</i>	<i>w-d.</i>	<i>a.</i>	<i>b.</i>	<i>c.</i>
(Beginning of lunar year)	63	1	29	415	212
(Table IV. Intervening days)	294	0	9558	670	805
			357	1	9587	85	17
(Eqn. b, Table VI)			211		
(Eqn. c, Table VII)			54		
(Tithi-index) $t=9852$							

The day, 357, was (Table IX) 23 Dec. 1649 A.D. The week-day was 1 Sunday. The value of t shews that at mean sunrise of that day the tithi was 15 kṛishṇa (Table VIII).

For the nakshatra, as by the rough rule—

($c \times 10$)	170
(Constant)	7207
					7377
(Less eqn. c)	-54
(Sun's true longitude)	$s, =$	7323 ¹
(Tithi-index (above))	$t, =$	+9852
(Nakshatra-index)	$n, =$	7175

This nakshatra-index shews (Table VIII) that by the equal-space system of nakshatras the moon stood, at mean sunrise of the day in question, in Pūrva-Āshādhā.

¹ Calculation by Tables XLVIII A and B shews that this value of s at mean sunrise of the Sunday in question is correct according to the *Ārya-Siddhānta*, the actual value being 7322·8775. By the *Sūrya-Siddhānta* it was 7320·7094.

For the solar month and date—

Table I, cols. 13-17, shews that true Mēsha-saṁkrānti in the given year took place on day 87 (measured from 1 Jan.), Wednesday, at 14^h 2^m after mean sunrise. The interval to Dhanus-saṁkrānti (*Indian Chronography*, Table XVIII) was 246^d 7^h 18^m.

d.	w-d.	h.	m.
87	4	14	2
246	1	7	18
333	5	21	20

The Dhanus-saṁkrānti took place late in the day on day 333 and by all rules the civil day called "1 Dhanus" was day 334, (6) Friday. The given day (above) being 357 there are 23 intervening days to be added to 1 Dhanus.

d.	w-d.
1 Dhanus=334	6
23	23
24 Dhanus=357	1 (Sunday).

The day of the date was therefore in solar reckoning Sunday 24 Dhanus. Thus all the details of the date are proved correct by the *Ārya-Siddhānta*.

What would be the correct description of the date if it had been calculated by the *Siddhānta-Śirōmaṇi*? i.e. how would Sunday 23 Dec. 1649 A.D. have been described?

Since true Mēsha-saṁkrānti always took place by that authority a day earlier than by the *Ārya-Siddhānta*, the Sunday would have been 25, not 24, Dhanus.

The details of the tithi may, for present purposes, be taken as the same by both authorities, or almost the same.

To find the sun's true longitude, *s*, by the *Siddhānta-Śirōmaṇi*, we must first ascertain the moment of occurrence of true Mēsha-saṁkrānti in the given year by that authority. Future Tables will state this in the same way that Table I, *Indian Calendar*, does for the *Ārya-Siddhānta* (cols. 13-17). For the present it must be sought for. The rule is given above.

The given year was K. Y. 4750. Table LIII gives us the difference between the times of Mēsha-saṁkrānti according to the *Ārya-Siddhānta* and *Siddhānta-Śirōmaṇi* due to the difference in their year-lengths.

		h.	m.	s.
Diff. in 4000 years	...	23	20	0
700 "	...	4	5	0
50 "	...		17	30
		27	42	30

or 1^d 3^h 42^m 30^s. Add to this the difference due to shift of apsis—here, shortly, 48^m (col. 5). Total difference 1^d 4^h 30^m 30^s.

	d.	h.	m.	s.
(Table I) True Mēsha-saṁk. by <i>Ārya-Siddh.</i>	87	14	2	30
Less	— 1	4	30	30
True Mēsha-saṁk. by <i>Siddh.-Śirōmaṇi</i>	...	86	9	32
				0

True Mēsha-saṁkrānti by the *Siddhānta-Śirōmaṇi* took place in the given year on day 86 (measured from 1 Jan.) or Saturday 22 Dec. A.D. 1649.

The day of the inscription (measured from 1 Jan.) was 357. $357 - 86 = 271$, i.e. the inscription-day was 271 periods of 24 hours each after the moment of true Mēsha-samkrānti, and that moment was $9^h 32^m$ after mean sunrise.

Table XLVIII below shows that at $9^h 32^m$ after mean sunrise on Day 271 (measured from true Mēsha-samkr.) the sun's true long., in 10,000ths of the circle, was 7365·9104. We deduct the sun's true motion for 9^h (on Day 271, Table XLIX) 10·6500 and for 32^m (Table L) 0·6084. Total 11·2584. $7365·9104 - 11·2584 = 7354·6520$. This is the exact sun's true long. at mean sunrise on the given day, Sunday 23 Dec. 1649. $s =$ (say) 7355 (the *Ārya-Siddhānta* gave this as = 7323, as we have seen above). Add the tithi-index, 9852, and we find n , the nakshatra-index, = 7207 by the *Siddhānta-Śirōmaṇi*.

Table VIII shows that the moon was by the equal-space system in Pārva-Āshādhā. But it is almost certain that in the matter of nakshatras the *Siddhānta-Śirōmaṇi* followed the *Brahma-Siddhānta*, and, if so, the moon at mean sunrise would have been in Uttara-Āshādhā and this would have given its name to the day.

Thus the details 24 Dhanus and Pārva-Āshādhā were correct according to the *Ārya-Siddhānta* for mean sunrise of 23 Dec. A.D. 1649 (they were also correct by *Sūrya-Siddhānta* calculation); but the correct details for the same date, if originally calculated by the *Siddhānta-Śirōmaṇi*, would have been "25 Dhanus" and "Uttara-Āshādhā."

266. This being so, the necessity for Tables for correct calculation by the *Siddhānta-Śirōmaṇi* and *Brahma-Siddhānta* is at once apparent; for, as matters stand, most chronologists, finding in a record-date the description of the solar month and nakshatra seemingly wrong by one place each, would class the date as irregular in two respects; and in using it for fixing the accession-date of a king, would give it scant attention. Whereas it was in fact perfectly correct and regular in all respects, but was calculated by a different standard authority from that followed by the modern verifier.

Prof. Jacobi's special Tables (*above*, Vol. I), no doubt, enable these problems to be worked out; but they are rather troublesome to handle, and do not yield the time-result so easily as does calculation by the a, b, c method which he first introduced to us. His later Tables (Vol. XI, p. 158 ff.) can be made available; but before using them the day of the solar month has to be accurately determined; and, like the *Indian Calendar* method, they are wanting in sufficiently close fixture of the sun's true longitude at the given moment.

NOTE.

The figures in the following Table are correct for K. Y. 4500, A.D. 1399-1400. In ordinary work for computation of the sun's true longitude ("s" in the *Indian Calendar* system) they may be taken as applicable to all years during which the *Siddhānta-Sīromani* was in use.

But for very great accuracy in other calculations the figures are subject to the following alterations:—

(Cols. 2, 3, 4, 5).—Sun's mean anomaly and mean longitude. For every 100 years earlier than A.D. 1400 add (cols. 2, 4) $1^{\circ} 45' 0558$, or (cols. 3, 5) 0.8106 . For every 100 years later deduct the same.

(Cols. 6, 7).—Sun's equation of the centre. For every 100 years earlier than A.D. 1400 deduct (column 6) $0'' 6558$, or (col. 7) 0.0051 . For every 100 years later add the same.

TABLE XLVIII-C.

ELEMENTS OF THE SUN'S LONGITUDE FOR THE HINDU SOLAR YEAR,

according to the Siddhānta-Sīrōmaṇi,

in periods of 24 hours each from the moment of the true Mēsha-samkrānti,

the astronomical beginning of the solar year.

(Exact for K. Y. 4500, A.D. 1399-1400. See Text §§ 260, 264.)

Siddhānta-Sīrōmaṇi.

24-hour periods from true Mēsha-samkrānti :	Sun's mean anomaly (or mean sun's distance from perigee- point) (“C”).		Sun's mean longitude.		Sun's equation of the centre. +		Sun's true longitude (“S”).

No. 19.—TWO INSCRIPTIONS FROM KURGOD.

BY LIONEL D. BARNETT.

Kurgōḍ is a village in the Bellary *tāluka* of the Bellary District, Madras: it is shown in the Indian Atlas sheet 58 (1827) as "Koorgode," in lat. 15° 21', long. 76° 54', about fourteen miles north-north-west from Bellary. The records now published give the name in the full form of Kurugōḍu; and the first of them puts the place in the Ballakundā *vishaya* (l. 17) or Ballakunde *nāḍ* (ll. 19, 47),—known from other sources as a three-hundred district,—which, again, it puts in the Kuntala country (ll. 14, 17). The name Kurugōḍu seems to mean "(the hill) having a small or low top," from *kuru* and *koḍu*, with reference to one or another of the hills which lie on the north and west of the place. The inscriptions place here a hill-fort (see A, vv. 12, 13, and B, l. 9). They speak of it in bombastic terms; but it seems to have been in ancient times really a fortress of strength and repute, as it is mentioned in the list of strongholds which were reduced by the Hoysala king Vishṇuvardhana I (see *Ep. Carn.* XI. Dg. 25, p. 55) and Ballāla II (see Vol. XIII above, p. 176).

In 1801 Major Colin Mackenzie found at Kurgōḍ a stone tablet, nearly five feet high and three feet wide and about eleven inches thick. He removed it with the consent of the principal inhabitants, and it is now in the Imperial Museum at Calcutta. This stone bears two inscriptions, one on its front and the other on the back, the first of which, A below,¹ was brought to notice by a translation which was furnished to Major Mackenzie and was published in 1807 by Colebrooke in *Asiatic Researches*, Vol. IX, p. 433; see also Colebrooke's *Essays*, Vol. II, p. 240. That translation was not a very satisfactory one: to say nothing of its numerous errors of omission and commission, it introduced, quite gratuitously, the name of Śālivāhana into both the dates, regarding which point and its connections see Dr. Fleet's paper on "Śālivāhana and the Śaka Era" in *Journ. R. As. Soc.*, 1916, p. 809. I now edit the two records from ink-impressions placed at my disposal by the late Dr. Fleet, which are now in the British Museum.

A.—OF SOMESVARA IV AND THE SINDA PRINCE RACHAMALIA II:
SAKA 1095 AND 1103.

This record is on the front of the stone. Over it there are sculptures as usual: in the centre a liṅga; at the sides, the bull Nandi and probably a cow and calf; and above them, the sun and moon. The writing covers an area of about 3 ft. 8½ in. in height by 2 ft. 9 in. in width, and is in an excellent state of preservation.

The characters are Kanarese, about ¼ in. in height on the average. They are well formed, of the upright type characteristic of the period. They include in line 1 three interesting letters which have been illustrated by Dr. Fleet in *Ind. Ant.*, Vol. XV, p. 364: the opening syllable *śri*, about 2¼ in. high, is elaborated so as to present on the right side the front part of an elephant; and the *dra* of *chandra* and the *bha* of *Śambhava*, of the same height, are treated so as to form the front parts of two birds. With this may be compared the inscription *Ep. Carn.* XI (Chitaldroog), Cd. No. 47, which boasts of its engraver's skill in feats of this kind. In the same line the *ā* of *Śvayambhū* and the upper part of the *ai* in *trailokyā* are drawn out and expanded into ornamental designs, and the *i* in *chumbi* is enlarged. On the last line also a number of subscript vowels and consonants are prolonged downwards in sweeping flourishes. The inscription is also remarkable for the frequent use that it makes of the special characters for *m*, *y*, and *v* noted above, Vol. XII, p. 335. Thus in lines 1-3 the proportion of the special to

¹ This record is entered as No. 253 in Professor Kielhorn's List of the Inscriptions of Southern India, Vol. VII above, appendix.

the regular *m* is 4 to 1, in lines 30-33 it is 15 to 10; the proportion of the special to the regular *v* in lines 1-3 is 4 to 14, in lines 30-33 it is 10 to 12.¹ The special *y* occurs 17 times. The *anusvāra* is written sometimes above, sometimes on the right side of the preceding *akṣhara*.

The inscription has the unusual feature of being composed in three languages. Vv. 1-3 are Sanskrit; v. 4 is Prakrit;² and all the rest of the record is Kanarese, ll. 15-17 being prose, followed by poetry (vv. 10-24), including in verse 6 a metre, *Utsāha*, which is not of common occurrence, with occasional short prefaces in prose, a prose passage (ll. 32-35), a verse (v. 25), more prose (ll. 35-37), a verse (v. 26), and then prose from l. 38 to the end. The Sanskrit is ordinary. The Prakrit is more interesting. It is intended to be in the Śaurasēni dialect, and comes fairly near to success: thus its *-achchhā*, *-rakkhā*, and *Ḍachchhā*, as regards their internal consonants, are justified by the forms *achchhi*, *rakkhāsa*, and *Ḍachchhā* authenticated for Śaurasēni (Pischel, *Gramm. d. Prakrit-sprachen*, pp. 219, 220, 216 respectively), though the *ḷ* of *Ḍachchhā* is wrong, as is also *-vachchhā* (Śaurasēni *vakkha*: Pischel, *ib.*, p. 221). The rather rare word *ukkēra* deserves mention: see Pischel, *ib.*, p. 90. 'The Kanarese is of the ancient dialect in the metrical portions (an exception being *horeya*, l. 20); the prose is in the medieval language, with some vacillation as regards the conversion of initial *p* to *h* (e.g. *Piriya*, l. 36, *paḍuval*, ll. 40, 47, 48, *paḍuvala*, l. 41, *pū*, l. 40, but *Hāhe*, l. 40, *Hiriya*, l. 44, *hōha*, l. 48, etc.). The spelling *akale* may be noted: Kittel gives only *akale*. The archaic *ḷ* is nowhere used. There is an instance of the accusative ending in *-a*, *tanna* (l. 20), on which see Dr. Fleet's remarks above, Vol. XI, p. 3, and note. Lexically interesting are: *°odbhayād*, l. 4; *gaṃgarim*, ll. 18-19; *irkkeyune*, l. 21; *aḍagunti*, l. 26 (cf. the Bankāpūr inscription, l. 26, above, Vol. XIII, p. 171); *takkil*, unploughed land,³ ll. 40 ff.; *kammata*, l. 40; *dharmmēta*, l. 41; *hole*, ll. 41 ff.; *chinnageykada*, "goldsmith's work," l. 50 (with the phrase *chinnageykadanakharanigaḷ* there we may compare *māṇikya-nakhara*, *m°-nakara*, *m°-nagara*, *māṇika-nakhara*, and *māṇiku-nakara* in *Inscr. of Śravaṇa Beḷgoḷa*, Nos. 91, 94-5, 97, 106, 129), and *saṭṭ[ḥ]g-āyūṃ*, l. 50.

The inscription, though in reality a connected whole written at or soon after the time of the second date given in it, divides itself into three parts: the end of the first part, in l. 44, is marked by three conch shells, and the end of the second part is marked by one such shell at the end of l. 47. The first part, after eight introductory verses, mentions the Western Chālukya Sōmēśvara [IV] Tribhuvanamalla as the reigning king of Kuntala, ruling at the *nele-viḍu*, the standing-camp or cantonment,⁴ at Kalyāṇa (l. 16). It then proceeds to sing the praises of the province of Ballakunde (vv. 10, 11) and the hill-fort (*durga*) of Kuṇṇugōḍu (vv. 12-16), which is fancifully said to hold in check the Chōlas, Gūjaras, *Lālas* (people of Southern Gujarāt), Pāṇḍyas, and Telugas (v. 13), and then goes to give an account of the family of the Sinda Mahāmaṇḍalēśvaras ruling in Kuṇṇugōḍu under the suzerainty of the Western Chālukyas. The first of them to be mentioned is the reigning prince, Irmaḍi-Rāchamalla, i.e. Rāchamalla II (v. 17); and we are told that his race sprang from an eponymous hero Sinda, born from the union of a Nāga king with the radiance from Śiva's sword (v. 18). In the lineage of Sinda arose Rāchamalla [I],⁵ who by Sōvala-dēvi begot Iruṅḡuḷa (vv. 19-20); the latter by Bala-dēvi had two sons, Rāchamalla II and Sōma (v. 21). Rācha-

¹ This includes the ligature *rov*, which regularly presents the special form.

² An instance of Prakrit occurring in the middle of a *prafasti* is found in *Ep. Carn.*, Vol. XI, Dg. No. 41.

³ I take this opportunity to call attention to the use of this term in the Ittagi inscription A, l. 81, above, Vol. XII, p. 49.

⁴ On the meaning of the term *nele-viḍu* see Dr. Fleet's paper "Neleviḍu: Appayanaṇiḍu" in *Journ. R. As. Soc.*, 1917, p. 115.

⁵ This Rāchamalla I is probably identical with the Sinda Rāchamalla who is known from other sources to have been ruling Ballakunde, in conjunction with his elder brother Irmaḍi-Bhīma (Bhīma II), as feudatories of Jagadēkamalla II (*Progr. Report of Asst. Arch. Supt. for Epigr., South. Circle, 1913-14*, pp. 87 f.).

malla II's prosperity, due to his devotion to Śiva, is described (vv. 22-24). Next we are introduced to a high minister of Rāchamalla I, the General and *Haḍapuvāḷa* (bearer of the royal betel-bag) Bēchirāja (Bēcharasa or Bēchaiya), who built a temple to Śiva-Svayambhū and presented a memorial on the subject to Piriya-Rāchamalla, i.e. Rāchamalla I, who accordingly granted for its endowment in Śaka 1095 an estate which he vested in a certain Bāla Śivāchārya, an *āchārya* of the Kālamukha and Lākuliśvara theology,¹ as trustee (ll. 33-44).

The second part (ll. 44 to 47) tells us that in Śaka 1103 Irmaḍi-Rāchamalla, i.e. Rāchamalla II, made an endowment, comprising the village of Jintegrāma and certain other concessions, to the same temple and trustee.

The third part (l. 48 to the end) records a grant of some land at Kurugōḍu to the same temple. And it then proceeds to tell us that, as the record euphemistically puts it, when Bēchirāja was going to Kailāsa in bodily form, that is, when he had died and his corpse was being cremated, his wives Bailiyakka and Malpāniyakka entered the fire, that is, immolated themselves with his corpse by the rite of *Suttee*, and, just before doing that, obtained the permission of the ruling prince for the making of certain other grants, naturally to the same temple.²

The inscription contains two dates, regarding which Dr. Fleet has given me the following remarks:—"In the first date (l. 38 f.) the details are: the cyclic year Vijaya, being the Śaka year 1095 (expired, = A.D. 1173-74); the new-moon *tithi* of Mārgasīra; Sōmavāra (Monday); an eclipse of the sun. This date is an irregular one, in that the given *tithi* had no connection with a Monday: it answers to Thursday, 6 December, A.D. 1173, on which day it ended at about 20 h. 16 m. after mean sunrise (for Ujjain). Also, though there was a total annular eclipse of the sun, it was not visible in India.

"In the second date (l. 45) the details are: the cyclic year Plava, being the Śaka year 1103 (expired, = A.D. 1181-82); the full-moon *tithi* of Kārttika; Sōmavāra; an eclipse of the moon. This date, also, is irregular, as the given *tithi* here again had no connection with a Monday: it answers to Saturday, 24 October, A.D. 1181, on which day it ended at about 6 h. 18 m. after mean sunrise (for Ujjain); and there was no eclipse."

Geographical names are fairly numerous in this record. The chief are: Kuntala (ll. 14, 17); the *nelc-vidu* Kalyāṇa (l. 16); the country of Ballakunde (ll. 17, 19, 41, 47); Kurugōḍu (ll. 20-1, 23-4, 39, 48); the rivers Nirahaḷla (l. 39) and Uppuvalla (l. 48); Bāḍanahaṭṭi (l. 41); Biyanahaṭṭi (l. 42); Arakere (ll. 42, 48); Doṁḍavaṭṭi (l. 43); Śrīpura (l. 45); Tekkekāl (l. 46); Araliyahāḷu (l. 47); Haṁgave (l. 47); Goṇanahāḷu (l. 47); Jintegrāma (l. 47); Orvāyalūr (l. 48); Maṇivār (l. 49); and Sūgūr (l. 49). Of the site of Kurugōḍu, the modern Kurgōḍ, we have already spoken. The Ballakunde district, in which it lay, is mentioned as a three-hundred district in an inscription of A.D. 1107 at Huvvinamaḍagu in Mysore (*Ep. Carn.*, Vol. XI, Chitaldroog, Dg. 128; cf. *ibid.* 126, and *Progress Report of Asst. Arch. Supt. for Epigr., South. Circle*, 1913-14, p. 88), and evidently was a division of the Sindavāḍi country, on which see Dr. Fleet's note in *Ind. Ant.*, Vol. XXX, p. 257.³ It took its name from what is now an insignificant village on the western bank of the river Hagari or Vēdavati in lat. 15° 32', long. 77°, marked on the Indian Atlas sheet 58 (1827) as "Bullakoondy"; it lies about fifteen miles north-east-by-north from Kurgōḍ. Bāḍanahaṭṭi appears on the same map as "Badanhutty," about two miles S.S.W. from Kurgōḍ; Orvāyalūr

¹ See *Progress Report of Asst. Archæol. Supt. for Epigr., Southern Circle*, 1907-8, p. 88, 1914-15, pp. 88, 91, 101, and my remarks on the Yēwūr inscr. G, above, Vol. XII, p. 337.

Another epigraphic record of a case of *Suttee*, also attended by the making of grants, is found in the Beḷatūru inscription of A.D. 1057, Vol. VI above, p. 215.

It appears also in *Ep. Carn.*, Vol. XI, Dg. 126, 128.

perhaps as "Woravoy" ("Wórvayee" in the Registration List of Bellary District), some seven miles W. of Kurgōḍ; Maṇivūr as "Munnoor" (i.e. Maṇūru), on the river Tuṅgabhadra, in lat. 15° 29', long. 76° 47'; Sūgūru as "Soogoor," also on the Tuṅgabhadra,¹ in lat. 15° 29', long. 76° 48'. Goranahālu (if I have read the name aright) may possibly be "Goranhully," some sixteen miles S.W. from Kurgōḍ; and Tekkekāl may be safely identified with Tekkalakōṭe ("Tekkulkota" of the old maps), in lat. 15° 32', long. 77° 1½', the ending *kōṭe*, *kōṭa*, "fort," being a later addition, as in Bāgalkōṭ, the ancient Bāgaḍage.

The Sinda Princes.

The Sinda race² claimed to belong to the Nāga-vaṁśa, or lineage of the mythical Snakes, and the members of it usually bore the title of "lord of Bhōgavati." Including the dynasty of Kurgōḍ, we know of several reigning houses of this stock. The earliest branch that appears on record is that which ruled in Bāgaḍage (now Bāgalkōṭ) as feudatories of the Western Chālukyas at the end of the tenth and beginning of the eleventh centuries. Of them we have the pedigree: Kammayyarasa—Pulikāla (Śaka 912)—Nagātiyarasa (Śaka 955)—Polasinda—Sēvyarasa (see *Ep. Ind.* above, Vol. III, p. 230; Kielhorn's *List*, *ibid.*, Vol. VII, app., Nos. 144 and 156).

Not very long after this we find another and a far more important branch, the Sindas of Erambarage (Yelburga), ruling in the same neighbourhood. The chief of these were Āchugi II, c. A.D. 1122, who governed the Kisukāḍu Seventy and the Nareyaṅgal Twelve as a feudatory of the Western Chālukya Vikramāditya VI; Permāḍi I, c. A.D. 1144, who ruled over the same provinces as well as the Kelavāḍi Three-hundred and the Bāgaḍage Seventy under Vikramāditya VI and Jagadēkamalla II; Chāvunḍa II, c. A.D. 1163-9, originally a feudatory of the Western Chālukya Taila III, who administered the Kisukāḍu Seventy, the Bāgaḍage Seventy, and the Kelavāḍi Three-hundred; and four sons of Chāvunḍa, Āchugi or Āchidēva III, A.D. 1163, Permāḍi II, A.D. 1163, Bijjala, A.D. 1169, and Vikrama, A.D. 1169 (see *J. Bo. B. R. A. S.*, Vol. XI, p. 219 ff.; *PSOI*, Nos. 67, 83; *Ind. Ant.*, Vols. IX, p. 96, and XXX, p. 266; Kielhorn's *List*, *Ep. Ind.*, Vol. VII, app., Nos. 218, 224, 233-4, 243). Āchugi II and Permāḍi I waged successful wars against the Kādambas of Gōve (Goa) and the Hoysaḷas of Dōrasamudra. But the glory of their dynasty was short-lived: towards the end of the twelfth century the Hoysaḷas consolidated their kingdom to the north of the Tuṅgabhadra, and before their risen star the Sindas of Yelburga apparently faded out of existence.

To this branch belonged a family that has left a record of itself in an inscription at Sūḍi, which will be published with others from that town in this journal. We learn thence that Āchugi or Ācharasa II, the son of Siṅgarasa II (a son of Āchugi I), begot by Siriyā-dēvi Permāḍi-dēva and Chāvunḍa II. Chāvunḍa married another Siriyā-dēvi, a daughter of Bijjala the Kaḷachurya; and their sons were Bijjala and Vikkayya (Vikrama). Vikkayya was ruling over Kisukāḍ, under the suzerainty of his cousin the Kaḷachurya Saṅkama, at the time of the grant (*Dyn. Kan. Distr.*, p. 576).

Yet another branch under the suzerainty of the Western Chālukyas is that represented by the *Mahāmaṇḍalāśvara* Muṇja, ruling under Vikramāditya VI over the province of Arasibiḍi in Bijāpūr; he was the son of Sindarāja, who in turn was the son of Bhīma, governor of the Pratyāṇḍaka Four-thousand (see above, Vol. III, p. 306; Kielhorn's *List*, *ibid.*, Vol. VII, app., No. 189; *Ind. Ant.*, Vol. XXX, p. 266).

Another section of the same race was that which bore the title "lord of Karahāṭa" (in the Sātārā District); cf. *Ep. Carn.*, Vol. VII, 1, Hl. 20, 50, Vol. XI, Dg. 42. To this belonged

¹ This is proved by the reference to a temple of the river-goddess, l. 49.

² See, generally, *Dynasties of the Kan. Distr.*, pp. 281 n., 299 n., 443, 450, 452, 458, 460, 462 f., 476 f., 485, 488, 497 f., 572-8.

the Sindas of Belagavatti, who at one time ruled over the Eḍavatte-nāḍ in Bellave, the Muduvalla Thirty, the Narigaḷige Forty, etc. They were descendants of Chātṭarasa I, whose grandson, Chātṭarasa II, was reigning in 1117 A.D.; the last of them on record is Haravira or Viradēva, in 1244-7. Of this family was a certain Īśvara at Haḷavūr, governing parts of the Banavāsi and Sāntaḷige provinces in 1165-72 A.D. under the suzerainty of the Kaḷachuryas (see *PSOCI*, No. 119; *Mysore Inscr.*, No. 32, p. 60; *Ind. Ant.*, Vol. XXX, p. 378; *Ep. Carn.*, Vol. XI, Dg. 42; Kielhorn's *List*, above, Vol. VII, app., No. 238). In the same connection belong the *Mahāmaṇḍalēśvara* Īśvara-dēva in Koppaḷe about 1180 A.D., who is said to have conquered the Yādavas, etc. (see *Ep. Carn.* VIII, 2, Sb. No. 276), and Īśvara-dēva of Belagavatti in 1193 A.D. (ib., Sa. No. 4).

We may also mention the following: Mulgunda-Sinda Jātarasa, who was governing the Kadambaḷige Thousand in 992 A.D. (*Ep. Carn.*, XI, Dg. No. 114); the *mahāśāmantā* Sindarasa, administering the *vaḍḍa-rāvula-sūṅka* of the Noḷambavāḍi Thirty-two Thousand under the Chāḷukyas in 1108 A.D. (ib., JI. No. 12); and the *mahāśāmantā* Barmadēvarasa in Arasibiḍi (*Ind. Ant.*, Vol. XXX, 1901, p. 266). Some references to minor Sindas in these regions of the Dekhan are to be found in *Ep. Carn.*, Vol. VIII, 2, Sb. Nos. 209, 293, 295, and Vol. XI, Hk. No. 23.

Finally we may notice a branch of the family in the Central Provinces. Here have been found records of a number of kings at Bastar, dating from 1065 A.D. onwards, who claimed to belong to the Chhinda or Chhindaka (i.e. Sinda) branch of the Nāga-vaiṣṇa, and bore the title "lords of Bhōgāvati" (*Ep. Ind.*, Vol. IX, p. 174; Vol. X, pp. 31, 35, 37, and perhaps 40; *Progr. Rept. Asst. Arch. Supt. for Epigr., South. Circle*, 1908-9, p. 111). The family-name as given here, Chhinda or Chhindaka, supplies us with the true etymology of the word Sinda: evidently the two words are identical, Sinda being the Dravidian equivalent (cf., e.g., Kanar. *sattige* from *chhatṭrikā*). The Chhinda race is mentioned (under the form *Ohhanda*) as one of the thirty-six Agni-kulas in Chand Bardāi's *Prithvīrāj Rāsō*, I, p. 54, of the Nāgarī-prachārīṇī Sabhā's edition. It would thus seem that the Chhindas or Sindas were originally a family sprung from some Nāga tribe in the Central Provinces or thereabouts, whence some of them migrated towards the west.

Native legend supplies fanciful accounts of the origin of the race and its name. The present record (v. 18) tells us that the eponymous hero Sinda was born from the union of a Snake-king with the flashing sword in Śiva's arm (possibly an attempt to connect etymologically the name Chhinda or Sinda with the Sanskrit root *chhid*, "cut"); and again it announces in v. 22 (as also does B, v. 11) that his descendant Rāchamalla II was suckled by a tigress and had a cobra's dilated hood as an umbrella, which seems to point to some rites practised in the Sinda family to commemorate miracles supposed to have happened to their eponymous ancestor.¹ Light is thrown upon the two latter verses by a passage in the Bāgaḍage record (*Ep. Ind.*, Vol. III, p. 230 ff., ll. 10 ff.), where we are told that, when the serpent-king Dharapendra and his wife came upon the earth from the nether world, she gave birth at Ahichohhattra, in the region of the river Sindhu (i.e. in Sindh), to a babe, which was hence named Sinda; the serpent-king gave him into the charge of a tigress, and on his attaining manhood made him king of that country; Sinda then married a Kaḍamba princess, and by her had three sons, from whom the Sinda family was descended. Here the birth of Sinda is localised at Ahichchhatra (literally, "Snake-umbrella"), now Rāmnagar in the Bareilly District, apparently for no other reason than because popular etymology found in its name an allusion to the device of a Nāga on the stato-umbrellas of the Sinda princes. We find a similar legend

¹ In the verse of A the suckling by the tigress and the cobra-umbrella may be referred grammatically to Sinda; but in B they are clearly predicated of Rāchamalla.

in the record of Īyara of Haḷavūr already mentioned (above, p. 269), according to which Sinda was the offspring of Śiva and the river Sindhu, and Śiva created a tigress to suckle him.

The memory of the Sindas' connection with the territory in the neighbourhood of Bellary is still preserved in local names: see Dr. Fleet's note on the Sindavādi country in *Ind. Ant.*, Vol. XXX, p. 257. A clear trace, as Dr. Fleet has pointed out to me, survives in the name of Sindanūr, "Sinda's Town," in the Mudgal division of the Nizam's territory, which is marked as "Sindunoor" in the Indian Atlas sheet 58 (1827), in lat. 15° 46', long. 76° 49', about twenty-nine miles north-by-west from Kurgōḍ.

TRANSLATION.

(Line 1.) Homage to the blessed Lord Svayambhū !

(Verse 1.) Homage to Śambhu, beauteous with the yak-tail fan which is the moon kissing his lofty head, the foundation-column for the construction of the city that is the threefold world !

(Verse 2.) Victorious is he of brilliant glory, fulfilling the objects of desire, pervading all worlds, emperor of gods, dispeller of Daityas' pride, embracer of Pārvatī, Śambhu to whom sages bow, the Svayambhū who is god of gods.

(Verse 3.) Homage to that Śambhu on whose conquest of the haughty Three Cities by the fiery ray from his frontal eye the multitude of gods' skulls were restored to life by the nectars streaming from his oozing moon-digit, and praised him in delight; and who smiles as Gaurī embraces him in an access of terror at the clamour arising thence.

(Verse 4.) Victorious in victory over women is he whose magnificent breast has been given the same colour as the covering saffron lying on Gaurī's full bosom, who is truly skilful in crushing Kandarpa's pride, who has three flashing eyes, who protects the company of the

¹ After this word there are three *saṅkhas* on the stone, marking the end of that part of the record.

² The writer first wrote the figures 1102, and then corrected the 2 into a 3, not very successfully.

³ The syllable *Go* is somewhat doubtful.

⁴ After this figure is the sign of a *saṅkha*.

⁵ Instead of *Or vāyalūriṁ* as two words, read *Oṟvāyalūriṁ*.

⁶ Read *mūḍaḱ*.

gods, through whom tremble the columns in the foundations of the structure of the three worlds, the friend of Lakshmi's Lord [Vishnu], Śambhu engaged in sport,¹ the Svayambhū.

(Verse 5.) May he whose majesty is extolled by the goddess Fortune's Lover [Vishnu], the darling of the Mountain's Daughter [Umā], who illumines the regions of space with the radiance of the high ruddy rubies on the diadems of the princes of gods and demons bowing at his feet, who wears the Sadyōjāta-face,² the god Svayambhū, with joy of soul ever grant us fortune in devotion and prosperity.

(Verse 6.) May Śambhu, whose two lotus-feet are grazed by the broad diadems of the brilliant King of Gods [Indra], the King of Kings [Vishnu],³ and the multitude of princes of Daityas, and who bears the eight bright forms of water, earth, air, sky, fire, sun, moon, and soul,⁴ grant us (our) desire.

(Verse 7.) May Śambhu, who, pervading and protecting the fourteen worlds from the seat of his three Powers of Will, etc.,⁵ creates prosperous life in the multitudes of all beings, dwelling in the souls of votaries, everlastingly with joy bestow a revelation of himself in the lotus of my spirit!

(Verse 8.) May Śambhu of surpassing majesty preserve us—he who praises for her supreme simplicity the great mountain Himavat's Daughter, who, when she saw the little moon-crescent on his locks, (and) when through the bright light spreading over his moon-like brow in lovely lustre there was the phenomenon of a full moon, cried: "Lo, O God, the young moon has grown to an over-full moon!

(Verse 9.) A place of beauty is the continent of Jambūdvīpa, which is surrounded by the seven seas, seven continents, and seven ranges of central mountains; as in the region of Bharata belonging to this continent there is to be seen a province [Kuntala], the lord of the goddess of this land of Kuntala, which is famed for displaying to the eye exceeding brilliance, is a moon expanding the lotuses of the Chālukya race, an Indra of bright semblance.

¹ I understand *namma-Sambhū* as *nama-Sambhu*, comparing such expressions as *Nṛīta-Ganapati*, *Gita-Gōvinda*, etc.

² This is one of the *pañcha-mukha* or five faces or phases of Śiva. The beginning of this cult appears in the *pañcha-brahma-mantra*, i.e. Taitt. Āraṇyaka X. 43-47, in which Sadyōjāta, Vāmadēva, Aghōra, Tatpuruṣa, and Īśāna are worshipped; Śāyaṇa in *loco* says that Sadyōjāta is the western face, Vāmadēva the northern, Aghōra the southern, and Tatpuruṣa the eastern. This is elaborated in the *Pañcha-brahma Upaniṣad* (especially § 7); and the *Bṛiṅj-Jābāla Upaniṣad* i. 8 says that from the Sadyōjāta face arose Earth, thence the Nivṛitti Kalā, etc. The Southern Śaivas teach that Īśāna is the supreme phase, having the function of grace (*anugraha*), and termed *mūrti* ("embodied"); Tatpuruṣa, termed "mouth" (*vaktra*), with the function of concealment (*śirodhāna*), pervades all souls as *antaryāmin* and conceals the nature of the universe by means of the *sapta-jāla* arising from the Nāda and Bindu; Aghōra, termed "heart" (*hṛidya*), has the function of dissolution (*saṁhāra*); Vāmadēva, termed "secret organ" (*guhya*), with the function of maintaining the cosmos (*sthiti*), keeps souls fettered in the illusion of Māyā and induces discriminate perception (*viśūṇa*), etc., from the Bindu; and Sadyōjāta, termed "body" (*mūrti*), with the function of creation (*śṛishṭi*), unites bodies to souls. Cf. Nallasvami Pillai's translation of Anupandī's *Śiva-ūna-siddhiyār*, p. 156 n. The formula quoted in *Sarva-darśana-saṅgraha* (Calcutta edn., 1872, p. 93) identifies Īśāna with the head, Tatpuruṣa with the mouth, Aghōra with the heart, Vāmadēva with the secret parts, and Sadyōjāta with the feet; cf. Cowell and Gough's translation, p. 117. Cf. Gopinatha Rao, *Elements of Hindu Iconography*, Vol. II, pp. 64, 97 f., 366 f., 375-9, 384, 388, 404. See also *Mrigēndra Āgama* iii. 8, and also on the ritual *Kāraṇa Āgama* i. 64.

³ *Rāja-rāja*: cf. Śubara-śaṅkara-vilāsa ii. 29, *ananta-bhūṣitaṇ-īlādharma-rājan*.

⁴ Cf. *Mahābhārata* VII. cii. 67 (Pratapchandra Ray's edn.), the opening stanzas of *Abhiñāna-sakuntala* and *Mālavikāgnimitra*, etc.; see also Nallasvami Pillai's *Studies in Saiva-siddhanta*, p. 93 ff., and Gopinatha Rao, *Elements of Hindu Iconography*, Vol. II, pp. 403 ff.

⁵ Namely, Thought (*jñāna*), Will (*icchā*), and Action (*kriyā*).

(Lines 15-17.) And as regards his titles : Hail ! the asylum of the whole world, beloved of Fortune and Earth, the great Emperor, the *paramēśvara*, the *paramabhaṭṭaraku*, ornament of Śatyāśraya's race, embellishment of the Chālukyas, the fortunate Tribhuvanamalla Vira-Sōmēśvara-dēva, in a course of continually increasing prosperity reigning for as long as moon, sun, and stars endure at the standing-camp at Kalyāṇa in the enjoyment of pleasant conversations, then—

(Verse 10.) As one may call it "the land of Kuntala, the brilliant graceful brow of the Lady of the ocean-encompassed Earth," there is displayed of the radiantly brilliant land of Kuntala a high forehead-ornament, the county of Ballakundā, haunted by extreme good fortune, like a jasmine on the braided tresses, quivering in sportive grace, of the Lady Earth.

(Line 18.) If it be asked how this is :—

(Verse 11.) Adorned with pure creeping-plants, eager bees, (and) rice-crops, never a village failing; with *gaṇḡas*, yeomen, wealthy and charming persons, never a village failing; with temples of gods, never a village failing; with worthy votaries, never a village failing—the mid-county of Ballakunde is delightful, in truth (*like*) the spring.

(Line 19.) So the midst of the county—

(Verse 12.) The stronghold of Kurugōḍu puts to shame the strongholds of the oceans on the right and left; surpassing strongholds of woods and hills on the adjoining sides, it displays itself (*like*) a central mountain, impassable to all.

(Verse 13.) This fortress of Kurugōḍu holds in control the Chōḷa; it verily threatens the Gārjara; truly it rules over the Lāḷa¹; it presses sorely upon the Pāṇḍya; it confronts with opposition the monarch of the Telugus; in the matter of warfare it waxes seven times greater—a marvel! who can disturb it?

(Lines 21-22.) As regards the outer town of this fastness :—

(Verse 14.) It is resplendent around this Kurugōḍu with rows of *tilakas* [*symplocos racemosa*], *tamālas* [*xanthochymus pictorius*], palmyras [*borassus flabelliformis*], plantains, *vakulas* [*mimusops elengi*]; with lines of trumpet-flowers [*bignonia suaveolens*]; with clumps of fig-trees [*figus religiosa*]; with multitudes of citron-trees [*citrus medica*], camphor-trees, *kāsaras*,² *karnikāras* [*pterospermum acerifolium*], silk-cotton trees, *lavalis*,³ clove-trees [*myristica caryophyllata*], mangoes, *kinśukas* [*butea frondosa*], and cocoanut palms; and with parks of all seasons.

(Line 23.) Furthermore, in this town—

(Verse 15.) The wealthy make naught of the Wealth-giver [Kubēra]; the jewellers there laugh at the Lord of the Ocean [Varuṇa]; the rulers resemble Manu; famed among men, it is verily like Bhōgāvati.

(Verse 16.) A home of devotion; a site of devotion; an established order (?) of devotion; a (*seat of*) growth of devotion; a realm of devotion; a treasure of devotion—the spirit of devotion to Śiva has come and settled in this Kurugōḍu.

(Verse 17.) There has arisen in sooth a ruler of this town, whose bosom wears the charming saffron of the breasts of the Lady Fortune, the peerless Irmaḍi-Rāchamalla [i.e. Rāchamalla II].

(Line 25.) With regard to this king's lineage :—

(Verse 18.) When a lord of snakes, deeming the brightly flashing lustre of the sword in the long arm of the Gracious [Śiva] to be a female snake, had embraced it with delight of spirit, there was born Sinda, joy of all the world.

¹ Seil., the native of Lāṭa, Southern Gujarat.

² Either the *Mesua ferrea* or *Rottleria tinctoria*.

³ The *Averrhoa acida* or *Cicca disticha*.

(Verse 19.) When thus the line of king **Sinda's** descendants had waxed great, there grew to greatness the **Blessed Rāchamalla [I]**, a darling of Earth, exceedingly valorous, beloved of Victory, beloved of Fortune.

(Verse 20.) To king **Rāchamalla-dēva [I]**, lord of the damsel Fortune, who bore as his crest-jewel Śiva's feet, and to the good lady **Sōvala-dēvi** was born a wooer of the goddess Fame, (*namely*) **Iruṅḡḷa**, peer in blessings to all monarchs, exalted in blessings, a giver of gracious largesses of gold craved by suitors.

(Verse 21.) To (*their*) joy there were born to the blessed **Iruṅḡḷa**, lord of the damsel Earth, and to **Bala-dēvi**, who was a seat of lofty virtues, sons who were in respective distinction a **Bhīma** and a **Pārtha [Arjuna]**, as one may aver without untruth: to wit, king **Irmadi-Rāchamalla [i.e. Rāchamalla II]**, endowed with goodly glory pervading the regions of space, and the fortunate king **Sōma**.

(Line 29.) As regards the greatness of the elder of these two:—

(Verse 22.) As he possesses the majesty of one who joyfully sucked and consumed a tigress's milk (*and*) had the unique umbrella of a Snake,¹ and bears as tokens of royalty these yak-cows, the offspring of the yak, a multitude of high-bred elephants, a throne of honour, and royal insignia, to whom is not peer in pride the blest **Gōvinda of the Sindas, Rāchamalla II**, scion of the lineage of the Snake-lords?

(Verse 23.) Possessing majesty, enjoying a singularly high degree of world-famed happiness, illuminating the world by his fame, a new Lotus-eyed [**Vishṇu**], renowned in the **Nandana-park** of polity, reducing the impurity of the **Kali (Age)**, far removed from impurity, is the ornament of kings **Rāchamalla II**, skilful in arts, that **Trivikrama**² in the circle of battle.

(Verse 24.) As the Gracious [**Śiva**], approving of him among all votaries of the earth, granted him a lasting boon, **Rāchamalla-dēva II** obtained royal fortune as a constant gift of grace.

(Lines 32-35.) As the kingdom of the **Mahāmaṇḍalēśvara Rāchamalla-dēva II**, who is thus renowned, was continuing in increasing security:—as regards the greatness of him who lives upon the lotuses of his feet, solely devoted to **Śiva**, purifying the **Gotra** of **Kaśyapa**, son of **Āchharasa**, a General Officer, destroyer of **Telugus**, manager of his lord's affairs, a modern *yugandhara*,³ a sun in the sky of the **Vājasanēya** race, crest-jewel of ministers, receiver of the grace of boons from the god **Svayambhū**, the High Minister, the Bearer of the **Betel-bag, Bēchirāja**:

(Verse 25.) The Bearer of the **Betel-bag**, the General **Bēcharasa**, having offered immediately substance and body⁴ to the god, alone in the world was favoured with a revelation of **Śiva**.

(Lines 35-36.) So this **Bēcharasa** having raised a temple to the god **Svayambhū** and presented to his lord a memorial regarding the holy cult—

(Lines 36-37.) The **Mahāmaṇḍalēśvara Piriya-Rāchamalla-dēvarasa [i.e. Rāchamalla I]** for the personal enjoyment and theatrical entertainment of the god **Svayambhū**,—the local **Āchārya** there, a person devoted to—hail!—the major and minor disciplines, scriptural study, meditation, spiritual concentration, observance of (*the vow of*) silence, and worship of **Śiva**, as regards whose greatness—

¹ See above, p. 269.

² This epithet is chosen to indicate (1) that the king has the attributes of **Vishṇu**, and (2) that he is extremely valiant (*tri-rikrama*, "triple prowess").

³ Literally, "supporter of the age." The title has been given to some ancient Jain teachers of supposed catholic importance.

⁴ Cf. the North Indian phrase *man tan dhan*, "soul, body, and property" (devoted to the deity).

(Verse 26.) The excellent **Bāla Śivāchārya**, immeasurable in strength of will, maintaining the **Lakṣmīśvara** traditional lore and **Kālamukha** doctrines, applies himself to ascetic devotion as to a sport—

(Lines 38-44.) Having washed the feet of this **Bāla Śivāchārya**, with pouring of water, on Monday, the new-moon day of **Mārgaśīra** of the 1095th **Śaka** year, the cyclic year **Vijaya**, on the occasion of an eclipse of the sun, granted an estate to the god **Svayambhū**: viz. in the field east of **Kurugōḍu**, west of the **Nirahalla** stream, 3 *mattar* of unploughed land; on the west of the king's *kammata*¹, 1 *mattar* of *sau*²; to the east of **Puṇḍarika's** Tank, 1 flower-garden; in front of (the temple of) the god, 2 oil-mills; of the eastern field of **Hāhe-kallu** [the Doll's Stone], west of the boundary of the dry-lands³ of **Ballakundo**, 12 *mattar* of unploughed land; on the south of the **Jujube-tree** Tank of that town, 5 *mattar* of red land (*kisa*); in **Bāḍanahatti**, south of the grounds of the *dharma*, 1 *mattar* of unploughed land; in the same, to the south of the road to **Biyanahatti**, 450 *kamma* of red land; to the south of the village of **Biyanahatti**, east of the field of the god **Bhīmarātha**, 1 *mattar* 450 *kamma* of unploughed land; in **Arakore**, of the two grounds on the east of the road to **Domḍavatti**, 700 *kamma* of red land; on the north of the *baṭṭumbey* of the same place, 5 paddy-fields⁴; below **Puṇḍarika's** Tank, 3 paddy-fields; this much was formerly granted by **Rāchamalla-dēva** I.

(Lines 44-45.) Furthermore, the **Gōvinda** of the **Sindas**, warrior to the wanton emperor of **Pātāla**, lord of **Bhōgavati** best of cities, endowed with constant boons from **Vira Kālī-dēva**, the **Mahāmaṇḍalēśvara Rāchamalla-dēvarasa** II,

(Lines 45-48.) on Monday, the full-moon day of **Kārttika** of the 1103rd **Śaka** year, the cyclic year **Plava**, during an eclipse of the moon, on the occasion of making **Sripura** an **Agrahāra**, after washing the feet of **Bāla Śiva-deva**, with pouring of water, granted for the god **Svayambhū's** personal enjoyment, theatrical entertainment, offerings of food, restoration of worn-out (buildings), the *Chitra* and *pitṭra*,⁵ scriptural study, lectures on the **Vaiśeṣika**, class-reading⁶ of the *Śiva-dharma-purāṇa*,⁷ and charitable gifts of food, the one [entire] village of **Jintagrāma** with its former bounds, within the county of **Ballakunde**, situate on the east of the boundary of the dry-lands⁴ of **Tokkoḱal**, south of the bound of **Araḷiyahālu**, west of **Huṅgave**, north of the bound of **Gorānahālu** (?). Likewise, in the fields of **Kurugōḍu**, to the east of the **Uppuvalla** stream, 3 *mattar* of red land; to the east of **Orvāyalūr**, west of the boundary of the dry-lands of **Arakore**, 1 *mattar* 300 *kamma* of unploughed land.

(Lines 48-50.) Furthermore, when they were entering the fire on the occasion when **Bēchaiya** was going to **Kaṭṭāsa** in bodily form [lit. by his body], his lawful wives the

¹ Possibly this is the same as the modern *kamata* (see Kittel, s.v.), but I doubt it.

² This would seem to be connected with *saruḷu*, *sauḷu*, "brackishness," also "muriate of lime."

³ *Hole*, dry land unsuitable for growing rice.

⁴ *Gadde-kattu*, ground suitable for growing paddy.

⁵ See *Ind. Ant.*, Vol. XXXVIII, p. 52.

⁶ Cf. *khaṇḍikada dharma*, *Ep. Carn.* VII. 1, Hl. No. 66. A *khaṇḍika* is a class of students (ib. III. 1, TN. No. 27; VII. 1, Sk. No. 185; IX. Bn. No. 6; III. 1, TN. 27).

⁷ A broken called *Śiva-dharma*, perhaps the same as this, is mentioned in *Ep. Carn.* Vol. VII. 1, Sk. No. 185. Cf. Aufrecht's *Catal. Catal.* s.v.

⁸ *Hole*: Mr. Narasimhachar suggests however that this is a variant for *hola*.

⁹ *Oḍale*: Mr. R. Narasimhachar in a letter to me has kindly pointed out that this is the instrumental case of *oḍal* with suffix -e. "Though *Kēśirāja*," he adds, "limits the suffix -e to neuter words ending in -a (*Śāhamaṇi-darpana*, s. 107), we have examples of the suffix used in words of other genders and endings: *aḷḷige* ('with affection'), *Ajita-purāṇa* i. 77-8; *muni-paṭiye pāle-paṭṭuḷu* ('it was stated by the lord of sages'); *atkaru taṭke-gryḍu* ('having embraced with affection'), *ḷileye nuṅguva mṛityu* ('Death which swallows with ease')."

devoted Baiḷiyakka and Malpāṇiyakka made a request to the king, and (with his permission) granted in the grounds of Maṇivūr, south of (the sanctuary of) the goddess Tungabhadra, east of the boundary of the dry-lands of Sūgūr, 2 mattar of unploughed land. On the (?) mintage,¹ jointly with the goldsmith-burgesses, there was granted on the *duḷa* 2 *viśa* 2 *kīṇi*; also on their buying 2 *so[llage?]* and on their selling 2 *so[llage]*; also in the shops a tax of one ladleful.²

B.—OF THE SAME REIGN.

This epigraph, an unfinished one, is carved on the back of the stone which has inscription A on its face.—The writing covers an area of approximately 2 ft. 4½ in. in height and 2 ft. 9 in. in width. It is much worn, and in places is almost illegible; but careful study has made it possible to recover practically the whole of the text; and it has been found worth illustrating by a plate to exhibit some features in the characters mentioned below.

The character is a good Kanarese, similar in type to that of A. The letters vary in height from ½ in. to ⅞ in. The scribe is fond of flourishes. In line 1 the first word, *Śrī*, is almost as ornate as in A; the *r* in *chandra* is curled round the *d* in bold floral decoration; and some other letters are prolonged upwards in sweeping flourishes, while several subscript letters on the left-hand margin of various lines are similarly extended downwards. Some letters are much larger than the rest: for instance, *vē* in *Śambhavē* (l. 1), *ṭha* in *kaṇṭham* (l. 4), *ḷa* in *Mahakāḷa* (l. 16), *kaṃaḷa* (l. 27), and *dhavaḷa* (l. 28), and *ṭha* in *nātha* (l. 16). The special characters for *m*, *y*, and *v* are common, as in A. In ll. 1-3 the special *m* occurs 14 times, the ordinary *m* only 7 times; the special *v* is also very frequent, and the peculiar *y* appears 9 times.

The language is Old Kanarese, prose and verse, with introductory formula and verse 1 in Sanskrit. Of some lexical interest are *udhṛigu* (l. 3), *unmuktā* (l. 4), *unmantra* (l. 35), the prefix *ud* expressing high degree. As regards orthography, we may note that the archaic *ḷ* never occurs in words where it is primitive; but, as if to make amends for this, it is written wrongly in four Sanskrit words—*kuḷa* (l. 6), *Mahākṛṇḷa* (l. 16), *kaṃaḷa* (l. 27), and *dhavaḷa* (l. 28),—and in the last three of these the character is made exceptionally large, as if to bid defiance to laws of grammar. Final *-m* alternates with *-v* before vowels, and it is sometimes hard to decide which is the true reading.

The record refers itself to the same reign as A. It opens with an invocation of Udbhava-Rāchamallēśvara, a phase of the god Śiva, which we shall find explained below, ll. 19-21; and after the regular verse of salutation to Śiva (v. 1) comes a stanza adoring the god under the name Rāchamallēśvara (v. 2). After a fanciful description of the ocean (v. 3: see note *in loco*) we are informed that in Jambū-dvīpa lies Bharata-kṣhētra, and in the latter is the province of Kuntala, the reigning sovereign of which is Tribhuvanamalla Virasōmēśvara-dēva (IV). In Kuntala is the county of Ballakunde (v. 4), and in Ballakunde is the hill-fortress of Kuṛugōḍu, which is described in glowing terms (ll. 8-12). The Sinda Rāchamalla (I), Mahāmaṇḍalēśvara of Kuṛugōḍu, is then eulogised with due fulness (ll. 12-14); and we learn that in the course of his pious and glorious reign he was favoured with an epiphany of the god Śiva and his attendant spirits (ll. 14-18); he accordingly rose to exceedingly high estate in life, and after death was translated to *śilōkya* in Śiva's heaven, subsequently appearing on earth as a manifestation of Śiva in the form of a self-created Liṅga³

¹ Mr. Narasimhachar suggests that this may mean a place or shop.

² For the explanation of this passage I am again indebted to Mr. Narasimhachar. The ladleful is perhaps of grain.

³ The Śaiva Āgamas recognise six kinds of Liṅgas, viz. (1) *svāyambhūva*, self-created, (2) *dāṇa-liṅga*, prepared by Śiva, (3) *daiva*, set up by gods, (4) *ārśha*, prepared by Rishis, (5) *gāṇava* or *gāṇavat*, set up by Śiva's Ganas or goblin troop, and (6) *mānuṣha*, prepared by godly and instructed men (*Kāntika Āgama*, ch. 50, vv. 35-38). Cf. Gopinatha Rao, *Elements of Hindu Iconography*, Vol. II, pp. 79-82, 86.

on the west of the temple of Svayambhū (Śiva) in Kurugōdu, where a sanctuary was raised and worship paid to him under the name of Udbhava-Rāchamallēśvara, "the god Śvara of Rāchamalla in (miraculous) revelation" (ll. 18-21). We then learn that Rāchamalla I begot by Sōvala-dēvi Iruṅgōḷa (not Iruṅguḷa, as in A), who by Ēchala-dēvi begot Rāchamalla II (ll. 21-22); and upon the power and blessed estate of the last-named our poet dilates in ll. 23-26. We may note the statement that his hero was suckled by a tigress, was covered by the hood of a cobra, rode on elephants, and had Kalidēva as the tutelary god of his race (v. 11); on this see above, p. 269. It is then announced that in his reign there was a high minister, the royal-treasurer Rēchirāja, the son of Sāyidēva (Sāvidēva or Svāmidēva) and Savitri, and Sāyidēva was the son of an older Rēchirāja by Rōkāmbikā-dēvi (ll. 30-35). The inscription here breaks off; presumably it was intended to record an endowment of the temple of Udbhava-Rāchamallēśvara by the Mahāmaṇḍalēśvara at the instance of the younger Rēchirāja.

TRANSLATION.

(Line 1.) To the blessed Udbhava-Rāchamallaśvara (*homage*) !

(Verse 1.) (Identical with v. 1 of inscription A.)

(Verse 2.) May the blest Lord of the Great Mountain's Daughter—he who is a mass of radiance,⁴ who has famous eternal birth, that most illustrious one who is glorious with the name of Rāchamallaśvara, whose name is boundless, whom all the bright Sāmans praise, lovely in his own nature, terrible, bearing the moon on the tip of his braided locks, beloved of the souls of renowned men, having a statoly eye in his brow—fulfil for us the object of (*our*) desire !

(Verse 3.) Like a moving jewel-mine appears the Ocean, bearing the stamp of a king, as the lines of the waves in its waters are (*his*) two arms, the fair turtles (*his*) feet, the little fish (*his*) eyes, the brilliant pearls (*his*) teeth, the *kulīśu* fish (*his*) nails, the shells (*his*) neck, the fine turquoises (*his*) bright hair-tips, the lustrous coral (*his*) mouth, the rubies forsooth (*his*) palms.

¹ After *śrī* is written the syllable *ri*, projecting beyond the line.

² The engraver has left out these three syllables without marking the omission.

³ Read *Rājach-chhri*.

⁴ Perhaps a reference to the revelation of Śiva in the form of a fiery Liṅga, the Liṅgōl-bhava (see above, Vol. XIII, p. 158 n.).

(Lines 5-6.) In the realm of Bharata (*forming part*) of Jambū-dvīpa, which is surrounded by the deep Ocean thus described, there is the province of Kuntala ; in it—

(Lines 6-7.) Hail ! when the reign of the asylum of the whole world, beloved of Fortune and Earth, the great Emperor, the *paramēśvara*, the *paramabhaṭṭāraka*, ornament of Satyāśraya's race, embellishment of the Chālukyas, the fortunate Tribhuvanamalla Vira-Sōmēśvara-dēva [IV], was advancing in increase, then—

(Verse 4.) The mid-county of Ballakunde is indeed conspicuous wherever it is seen, being perfect in beauty, as though it were a mirror held ever to the end of the lovely face of that lady the Kuntala-land, who is beauteous as a curling lock on the glorious brow of that dame the Bhārata-land thus described.

(Lines 8-9.) So as regards the beauty of the outer town of the mountain-fortress of Kurugōḍu in the midst of this county, which may be called a charming jewel-mirror of that lady the brilliant royal city, and which like the mountain of Bharga [Śiva] is for all impassable to foes :—

(Verse 5.) The outer town, thickly clothed with groves, is beautiful like the stars' path [the sky] when studded with royal swans (*as they fly*) ceaselessly amidst the noise of the clouds,¹ (*or*) like the (*dark blue*) breast of (*Vishṇu*) lying in the Milk-Ocean.

(Lines 10-11.) Moreover, as regards the interior of this town—

(Verse 6.) As though the Lord of the Ocean, from a great fear lest the submarine fires should eagerly suck up the waters within him, had lodged in this town the nine (*kinds of*) jewels, there are (*here*) the jewels of chivalry, jewels of graceful damsels, jewels of . . . , choice jewels, jewels of warriors, jewels of good men and followers, jewels of elephants, horses, and other things.²

(Lines 12-13.) Now, as regards the greatness of Rāchamalla-dēva, who is renowned as the ruler of this town, the Mahāmaṇḍalēśvara, sun to the lotuses of the Sinda race, warrior to the wanton :

(Verse 7.) As Rāchamalla was dispensing gifts to the whole earth, a man of noble courses, blest of nature, who reverently did homage to Bharga [Śiva], victor over the companies of his foes, steady in duty, having the firmness of Mēru, a sun to the lotuses of good men, best of kings, comely as Cupid, majestic, consuming hostile monarchs, master of the whole series of arts, skilful, lover to the goddess Fame :—

(Line 14.) So as he was (*engaged*) in this enjoyment of pleasant conversations—

(Verse 8.) As amidst the wondering admiration of the earth king Rāchamalla, treating most bountifully the good votaries whose objects of desire are noble by gratifying them with all gifts of kine, land, gold, food, drink, etc., was acting as an Īśvara [Śiva] (*and*) a Boon-giver [Vishṇu], and was brilliantly advancing in the course of his reign, the god [Śiva] one day appeared in revelation :—

(Lines 16-18.) Then the Lord of Pārvati [Śiva], accompanied by Nandinātha, Nandi, Mahākāla, Virabhadra, and the rest of the goblin troop, and attended by Hari, Viriñchi [Brahman], the gods, the demons, the Nāgas, and the rest of the famous Immortals' company, came down ; and king Rāchamalla, reverently gazing and offering salutation, with joy made the lotuses of his hands to form a bud³ ; and Hara, the lotus of his face gently smiling, held

¹ Cf. *Mēgha-dūta* i. 12.

² With this list of nine *ratnas* may be compared the Buddhist list of the seven *ratnas* in *Dharma-saṅgraha*, § 85, with the references given there.

³ That is, he clasped his hands in the *añjali*.

out the hand of security, to the end that he should behold Kailāsa¹; and (*the king*), deeming it a great act of grace, having with much magnificence entertained with pomp the goblins and performed worship of Śiva—

(Verse 9.) Having thus performed the worship of Śiva, so that it caused exceeding admiration to the world, Rāchamalla established for his descendants prosperity of rule (*in bearing*) the burden of earth, being while still in the body attended by the tokens (*of royalty, namely*) stately horses, brilliant yak-hair fans, and white umbrellas; (*and*) even after attaining a place in the world of Śiva, he formed a Liṅga for the earth by union therewith.

(Lines 20-21.) So having come and stood at the western side of (*the temple of*) the god Svayambhū of the town of Kurugōḍu, and arisen in the form of a Liṅga so as to delight the whole world, he became very famous under the title of "The God Udbhava-Rāchamalla-śvara." Moreover, as regards the line of his descendants—

(Verse 10.) To this Rāchamalla, who was a lion to the mighty elephants his furious foes, and to Sōvala-dēvi was (*born*) in their estate a son, the world-renowned Iruṅgōla; and to him and to Ēchala-dēvi was (*born*) a son perfect in chivalrous conduct, king Rāchamalla II, a blest Nārāyaṇa of the Sindas.

(Line 23.) So, if it be said: "why is it impossible for any to overcome (*him*) by finding weak points in him and warring with the might of a Nala?"—

(Verse 11.) As a tigress gave (*him*) to drink the milk of her breasts, a Lord of Snakes raised (*over him*) its hood as an umbrella, the elephant is (*his*) graceful seat of honour, a brilliant troop of yaks give soft quivering beautiful fans, (*and*) Kalidēva in sooth is ever the tutelary deity of his race, who are able to overcome Rāchamalla II?

(Line 24.) Moreover—

(Verse 12.) As the god Vira-Kalidēva, (*who is*) Abhava [Śiva], constantly grants (*to him*) noble fortune by the rise of continual boons; as Fortune places success of sweet speech, success of splendid warriors, and success of fame (*white*) like the radiant moon and jasmine, in (*various*) parts, (*namely*) in (*his*) resplendent mouth, in (*his*) two arms, (*and*) in the circle of space (*respectively*)²; can there come now any who are able to prevail against the warrior king Rāchamalla II?

(Lines 26-30.) Being thus a subject of glory and praise—Hail! Rāchamalla-dēva II, renowned as "the Mahāmaṇḍalēśvara who has attained the five *mahā-sāhasas*, lord of the Ballakundā land, lord of Bhōgāvati best of towns, sun to the lotuses of the Sinda race, warrior to the wanton, having the victorious banner (*with the device*) of a tiger and a host of four divisions³ inspiring fear in arrogant feudatory princes, he whose white fame travels through the ten regions of space, the emperor of Pātāla, he who has attained his power by the constant grace of Vira-Kalidēva's lotus-feet, who guards the heads of attendant feudatory princes, who gives without saying nay to suppliants," being in control of the kingdom at the town of Kurugōḍu with enjoyment of pleasant conversations,—

(Line 30.) as regards the lineage of the one who lives upon his lotus-feet, the high minister, the especial kinsman of sages, the treasurer Rēchirāja:—

(Verse 13.) Hail! To Rēchirāja, who was sprung from the blest Lunar race and belonged to the Harita family, a creeping-plant of goodly fame to the Kammo caste, celebrated by the

¹ That is, Śiva held out a hand in the *abhaya-mudrā* or gesture indicating protection and security, as a promise that the king should be translated to Kailāsa, Śiva's paradise.

² An instance of the rhetorical figure *yathā-samkhyā*.

³ Namely, infantry, cavalry, horse, and elephants.

best of good poets as being the ground (*supporting*) a star-high Tārā's Mountain¹ of dignity, and to the devoted virtuous Rēkāmbikā-dēvi was born a son, the minister Sāyidēva, a minister who terrified foes.

(Verse 14.) As with Rāma Rāmā [Sītā] is radiantly present, as with the Lord of the Gods [Indra] Paulōmi, as with the Home of Fortune [Vishṇu] Lakshmi, as with the Disembodied One's Foe [Śiva] Umā-dēvi, as with the Stars' Lover [Chandra] the lady Rōhini, so with the blest Sāyidēva, majestic among ministers (?) was Sāvitrī, exceedingly faithful to her lord, conspicuous.

(Lines 33-34.) So to this Svāmidēva and Sāvitrī-dēvi—

(Verse 15.) To the brilliant blest Svāmidēva and to the devoted virtuous Sāvitrī was born one enjoying fortune, having the radiance of the sun, the lotus of whose heart was void of fear, that seed of righteousness, a Cupid to radiant ladies, a celestial tree to sages, a meeting-place for the goddess Fame, a lord of the ocean of his own high verses of prayer, a most magnificent king of the *sumanas*,² this Rēchirāja.

NO. 20.—TAXILA INSCRIPTION OF THE YEAR 136.

By STEN KONOW.

This inscription was discovered by Sir John Marshall in the course of his excavations at Ancient Taxila during the winter 1912-13, and published by him in the Journal of the Royal Asiatic Society for 1914,³ with additions and a plate in the same Journal for 1915.⁴ Valuable remarks have further been published by Messrs. Thomas,⁵ Fleet,⁶ Boyer,⁷ and Bhandarkar,⁸ and the record has been utilised in my Indo-Scythian Contributions.⁹ It is of such importance that it is advisable to record it in the pages of the Epigraphia.

Concerning the discovery of the inscription Sir John states that it was "made in a small chapel immediately west of the so-called 'Chir' stūpa. The chapel in question is built in a small diaper type of masonry, which came into vogue at Taxila about the middle of the first century A.D. and lasted for about a hundred years. Its entrance faced the main stūpa, and near the back wall opposite this entrance, and about a foot below the floor, I found a deposit consisting of a steatite vessel with a silver vase inside, and in the vase an inscribed scroll and a small gold casket containing some minute bone relics. A heavy stone placed over the deposit had, unfortunately, been crushed down by the fall of the roof and had broken both the steatite vessel and the silver vase, but had left the gold casket uninjured and chipped only a few fragments from the edge of the scroll, nearly all of which I was, happily, able to recover by carefully sifting and washing the earth in the vicinity. The cleaning and transcription of the record was a matter of exceptional difficulty, as the scroll, which is only $6\frac{1}{4}$ inches long by $1\frac{1}{8}$ inches wide and of very thin metal, had been rolled up tightly, face inwards, in order that it might be enclosed in the silver vase; moreover, the metal of which it is composed is silver alloyed

¹ This seems to be the Kishkindha-parvata in Ōdra-dēśa, on which Dēvi was worshipped by the name of Tārā (*Matsya Purāṇa*, xiii. 46), being apparently identified with the epic heroine Tārā, the wife of Vālin (*Rāmāyaṇa*, IV. 15 ff.; *Mahābhārata*, Prat. Ray's edn. III. 279).

² Meaning either "king of sages" or "king of gods" (Indra), according as we translate *sumanas*.

with a small percentage of copper, which had formed an efflorescence on the surface of the extremely brittle band, with the result that I could neither unroll it without breaking it, nor subject it to the usual chemical treatment. By the use of strong acid, however, applied with a zinc pencil, I was able to remove the copper efflorescence and expose, one by one, the punctured dots of the lettering on the back of the scroll, and then, having transcribed these with the aid of a mirror, to break off a section of the scroll and so continue the process of cleaning and transcription. In this way I succeeded in making a complete copy of the record from the back of the scroll, while the letters were yet intact. Afterwards I cleaned in like manner and copied the face of each of the broken sections, and was gratified to find that my second transcript was in accurate agreement with the first." Later on Sir John, by means of other methods, was able to clean the scroll more effectively, and succeeded in presenting a photographic reproduction of practically the whole inscription.

The characters are Kharoṣṭhī of the early Kushāṇa type. As in other Kharoṣṭhī inscriptions, the length of vowels and diphthongs has not been marked. In the case of *a*, *i*, and *u* it is usual to retain this peculiarity in transliterating, while *e* and *o* are often marked as long, if we have no special reasons for assuming that they are short. The only consistent transliteration is, however, not to use the sign of length in the case of *e* and *o* any more than in the case of *a*, *i*, and *u*. *E* and *o* are, of course, always long in Sanskrit; in the Prakrits, on the other hand, they are sometimes long and sometimes short, just like other vowels. I shall therefore write *e* and *o* throughout, though most of the *e*-s and all the *o*-s occurring in the inscription are probably long. With regard to individual letters we may note the sign for *ṇa* in *-ṇati*, l. 4, and *f* in *Indafria*, l. 2. The voiced and voiceless dentals are carefully distinguished; compare *pradisthāvita*, ll. 1 and 2; *rajaṭirajasa*, l. 3, etc. The compound letter *tva* occurs in *bodhisatva*, l. 3. The same sign has hitherto been transliterated *tm* in *atmaṇo*, l. 5. The only reason for this latter writing is that the corresponding Sanskrit word *ātmanah* contains a *tma*. If that had not been the case, nobody would have thought of reading otherwise than *tva*. Prakrit is not, however, Sanskrit, and I have no doubt that the correct reading is *atvaṇo*. In the first place we know from the Ara inscription¹ that there was another compound *tma*, and it is not at all likely that there should be on the one side two different compounds for *tma*, and on the other two different meanings of one of them. Moreover the usual Prakrit forms *atta* and *appa* cannot well be derived from Sanskrit *ātman*, but both seem to go back to an intermediate form *atvan*, just as *sattva* becomes *sutta* as well as *sappa*. Another compound occurs in *pradisthāvita*, ll. 1 and 2; *vasthaveṇa*, l. 2. It will be seen that it is used both instead of Sanskrit *sta* and of Sanskrit *stha*. As a rule, it can be stated that the compound is rarely used in Kharoṣṭhī inscriptions except in foreign words and such as can be considered as Sanskrit loanwords.² *St* as well as *sth* regularly became *tth* in the dialect. It is a well known feature of the Prakrits that an *s* causes aspiration of a neighbouring consonant, and the necessary link between *st* as well as *sth* and *tth* is *sth*. Similarly we find *stth* in the Iranian name *Hashtkuna* in the Wardak vase inscription.³ It is therefore just as natural to transliterate the compound *stha* as *sta*; and, if we consider its shape, it is evident that the lower portion is identical with the letter *tha* and has nothing to do with *tu*. I therefore write *stha* and consider this as a semi-learned writing which does not represent the phonetical features of the dialect.

With regard to orthography, we may note, in addition to the use of the compound *stha*, that *ya* represents a Sanskrit *ja* in *puyae*, ll. 4 and 5. The writing is not over careful. Thus we find *a* for *e* in *putraṇa*, l. 2, *prachaga*, l. 4, and perhaps in *ma*, l. 5. Syllables have been left out in *Tachhasio*, for *Tachhasilae*, l. 3; *arahana*, for *arahantana*, l. 4; *sarvasana*, for *sarvasatvana*, l. 4, and *-salohina*, for *-salohidana*, l. 4.

¹ Above, p. 143.

² Cf. Lüders, *SBAW.*, 1914, p. 416.

³ Cf. Senart, *Je. Asiat.*, XI, iv, p. 574. Konow, *SBAW.*, 1916, p. 808. Mr. Pargitor reads *Kashkuna*.

The greatest difficulty connected with the interpretation of the inscription rests with the word *ayasa*, l. 1. "Sir John considered it as the gen. of *Aya*, or *Azes*, and explained it to mean that the record was dated in an era founded by *Azes*, and this era he identified with the *Vikrama* era. Messrs. Thomas and Fleet were of opinion that the word could hardly be the name of a king, because no royal title is used. They further maintained that, if *ayasa* were really the name of a king, it would place the inscription in the reign of this king, who would then most likely have to be identified with the *Khushana* mentioned in l. 3. "Dr. Thomas propounded the possibility of considering *ayasa* as the gen. of a demonstrative pronoun, and Dr. Fleet adopted the explanation and translated¹: "In the year 136 : on the day 15 of this (present) month *Āshāḍha*," or "In the year 136 : on the day 15 of the month *Āshāḍha* of this (year)."

A form *ayasa* of the base which we know from Sanskrit *ayam* is, of course, possible, though I do not think it a likely one. But the use of such a pronoun in this place is not in agreement with the practice in other old inscriptions. The use of *atra*, *etaye*, etc., in *atra divase* in the Sue Vihar inscription, *etaye purvaye* in the Patika plate, and so forth, cannot be compared, because such expressions always follow after the mention of the month and the day and recapitulate the whole dating, just as *īsa divase* in the present record.

M. Boyer agrees with Messrs. Fleet and Thomas in thinking that *ayasa* is not the genitive of *Aya*, *Azes*. He explains *ayasa* as standing for *ayyasa* and this further as corresponding to Sanskrit *ādyasya*. The month *Āshāḍha* he thinks may have been called *adya* because the year was *āshāḍhādi*. I do not know any old date which might be compared. Mr. Bhandarkar likewise explains *ayasa* as a Prakrit form corresponding to Sanskrit *ādyasya*, but thinks that it has been added because there was, in that year, a second, intercalated, *Āshāḍha*.²

Sir John Marshall is quite right in comparing the wording "of the Taxila copper-plate" where we read *samvatsaraye ahasatatimae 78 maharajasa mahantasa Mogasa Panemasa masasa divase panchame 5*. I do not know of any other old inscription where we find a similar addition between the mention of the year and the month. If, however, *Ayasa* is the name of a ruler, the inscription must, as urged by Messrs. Thomas and Fleet, be dated during the reign of this king.

Dr. Fleet further remarks that, if *Ayasa* were the name of the king ruling when the inscription was deposited, this would tend to mark him as the *Kushana* king referred to in line 3. Such an inference is not, however, necessary. The so-called Takht-i-Bahi inscription is dated during the reign of Gudufara, but in honour of another prince, and the same can very well be the case in the Taxila record.

The chief difficulty in explaining *Ayasa* as the name of a king rests with the fact that no royal title is used in connexion with the name. I have thought of the possibility of explaining this anomaly by assuming that *Aya* was the ruler, not of Taxila, but of the donor's home Noacha, and that *Azes* II might have spent his last days as a local ruler of Noacha. Such an assumption cannot, however, be substantiated by any fact, and the absence of every royal designation is so extraordinary that I think we must abandon Sir John's explanation of the word *ayasa* altogether.

Provisionally, therefore, I am inclined to adopt the explanation of Mr. Bhandarkar. We do not know how *dy* was regularly treated in the old dialect of the North-Western frontier. In the Shāhazgarhi and Mansehra versions of the Aśoka edicts *dy* becomes *j* in *aja*, Skr. *adya*, but in *uyana*, Skr. *udyāna*, it becomes *y* as in Pāli. It is possible that the same development

¹ JRAS., 1915, pp. 317 f.

² Cf. Fleet, JRAS., 1914, p. 998.

has taken place in *adya*, and I think this explanation, for the time being, the most likely one, though I am far from feeling certain about it.

Urasakeṇa I take to be the name of the donor. The correct reading of this word is due to Dr. Thomas, who explains it as meaning "of Uraśa" and indicating the nationality, not the name, of the donor. Though M. Boyer is of the same opinion, I prefer to explain *Bahaliṇa* as the national name, Sanskrit *Bahlīkēna*. In the North-Western dialect in which the inscription is composed, the general rule seems to be that intervocalic *k* became a soft spirant and was eventually dropped in Indian and Indianised words, while it was commonly retained in foreign names and loan words which had not become naturalised. Thus in the Mathurā lion capital we find *samanumotakra*, *nakraraśa*,¹ *mahasaghiana*, *kusulaśa*, but *Padika*, *Miyika*, *koraka*; in the record under discussion we have *prachaga* and *Bahaliṇa*, but *Urasakeṇa*. *Urasaku* is, moreover, a very likely name, containing the element *sāka*, strength, which is rather common in Iranian.²

The reading of the word after *Urasakeṇa* is not certain. Sir John, who originally read *Dhitaphria*, has finally adopted the reading *Lotaphria*. Dr. Thomas suggests *Intaphria* or *Vim̐taphria* and sees in this name a variant of *Vindaphurna*, *Undopherres*, *Gondophernes*, etc. So far as I can judge from the photograph the reading *Intaphria*, or, as remarked by M. Boyer, rather *Intafria* is the most likely one. The second *akshara* is not, however, to judge from a photograph which I owe to the kindness of Sir John Marshall, *ta* but *da*. The *anuvāra* at the bottom of the letter seems to be certain, and the top is also different from *lo*, l. 5. I would therefore provisionally read *Indafria*, though I admit that *Lomdafria* is also possible. At all events the form is certainly the genitive sing. of a name ending in *fri*. Compare *Ayasia* in the Mathurā lion capital; *Datia* in the Kaldarra inscription; *Kavīśia* in the Mānikīāla bronze inscription³; *Kamagulya* in the Wardak vase inscription.

Dhamaraie may be the oblique form of a *dhamaraī*, which would represent a Sanskrit *dharmarājī*. This again might be a shorter form of the word *dharmarājikā*, a stūpa. M. Boyer has, however, drawn attention to the fact that in another Taxila inscription we find *Tachhaile agadhamaraie*, which seems to represent a Sanskrit *Takshasilā agradharmarājikē*. It is, therefore, more probable that we have to assume a form *dharmarājika* with the same meaning as *dharmarājikā*, though it is impossible to make any definite statement.

According to Professor Vogel⁴ *dharmarājikā* is more especially a stūpa the erection of which was ascribed to king Aśoka, the *dharmarāja*. M. Boyer⁵ has, however, shown that this explanation is not quite certain, and I think the word can also be explained as meaning a stūpa containing relics of the Buddha, the real *dharmarāja*. At all events *dhamaraia* must denote the Chir stūpa itself, and this stūpa M. Boyer is inclined to identify with the Kunāla stūpa mentioned by Hsüan-tsang.

Tachhasie is, of course, miswritten for *Tachhasilae*, the oblique form of *Tachhasila*, Sanskrit *Takshasilā*.

Tanuvaa was explained by Sir John as the name of some locality at Taxila. M. Boyer thinks that the word represents a Sanskrit *tanuvaya*, "sacrifice of the body," and is the name of the Bōddhisattva chapel mentioned in the next word. He compares the *Vyāghriyātaka*. To me the dropping of the *ya* makes some difficulty. Though I admit the ingenuity of the explana-

¹ The compound *kra* in these words certainly denotes a guttural spirant.

² See Justi, *Iranisches Namenbuch*, p. 509.

³ Mr. Pargiter reads *kavōtia* and does not consider the form as a genitive. I read *Kavīśia ckhātrapasa G(r)anāfryaka ckhātrapa-putrasa daṇamukho*, "gift of the Kshatrapa Kavisi, the son of the Kshatrapa Granāfryaka." Cf. *SBW.*, 1916, p. 798.

⁴ *Archaeological Survey of India, Annual Report, 1903-04*, p. 223.

⁵ *loc. cit.*, p. 294.

tion, I prefer to see in *tanuvae* the genitive of a female name *Tanuva* which would then signify the founder of the *Bodhisattva* chapel.

The various forms of the name which is here written *khushanasa* have been discussed by Dr. Fleet,¹ who did not then know the present record. The initial aspirate reminds us of the *χ* in the Greek legend of some of the coins of Kujula-Kadphises; and, if we compare these two writings, it becomes probable that the first letter of the name was originally a guttural spirant, and, to judge from the *g* in *gushanasa* in the Panjtār inscription and *gushana* in the Māpikiāla record, a voiced one. I have no doubt that Count Staël Holstein² is right in combining the name *kushana* with Chinese *yüe-chi*, older *güt-shi* or *gür-shi*. I am further convinced that a short form *kushi*, corresponding to *yüe-chi*, occurs in *koshano*, which is used in the coin legends of Kanishka and his successors. Dr. Fleet³ considers this *koshano* as an adjective in the nom. sing. I hope, however, to have proved⁴ that the whole legend is composed in a language which is, to all practical purposes, identical with ancient Khotani. The only exception would, if Dr. Fleet were right, be the word *koshano*. In old Khotani this form can only be the genitive plural of a *koshi*; it cannot by any means be explained as a nominative singular of an old *a*-base. In that case it would have sounded *koshani*. Dr. Fleet thinks that, if we explain *koshano* as a genitive plural, we must arrange the words of the legend "in an order in which they were not intended to be taken." In two Junnar inscriptions, however, we find a genitive plural denoting nationality after a personal name exactly in the same way as in the Kanishka coin legends. Compare No. 1154 in Professor Lüders' List, *Yavanasa Irilasa Gatāna*, "of the Yavana Irila, of the Goths," and No. 1182, *Yavanasa Chitasa Gatāna*, "of the Yavana Chita, of the Goths," where the Yavanas (i.e. Europeans) Irila and Chita are evidently described as belonging to the people of the Gatas, i.e. Goths.⁵

Though I agree with the Count in assuming the existence of a short base *koshi* in such forms as *koshano*, I am unable to understand how he came to deny the existence of another form *kushana* or *kushāna*. The new Taxila inscription proves, as remarked by Dr. Thomas,⁶ the existence of such a word, which is in itself a very likely one. Compare the two forms *a-she* and *a-she-na* which the Chinese used to denote the ancient royal family of the Turks. The only difficulty is whether the first *a* of this word is short or long. This question would be solved if the reading *kushānaputrō* in the Māt inscription were certain. There is, however, a mark above the *na* in this word, and Count Staël Holstein reads *kushānān putrō*. I therefore prefer to read *kushāna*, leaving the question as to the length of the *a* open.

In the last line the photograph favours the reading *nivanae*, as stated by Dr. Thomas. M. Boyer explains *a-de* as Sanskrit *agratah*, principally, and *samaparichago* as Pāli *sammāparichāgā*. Instead of the latter it would be possible to assume *sa me parichago*, "this my gift."

The most important questions connected with this record are its date and the identity of the *Kushana* ruler mentioned in it.

Sir John Marshall has shown that the record was found in strata which belong to the Kadphises kings and are deeper, i.e. older, than those of the Kanishka group. So far as I can see, his excavations have finally established the priority of the two Kadphises kings to the Kanishka group. On the other hand, Sir John has left the question open which of the two Kadphises kings is meant. He says,⁷ "The next important point is to determine which of the Kushan kings is referred to as reigning in that year. That he is identical with the nameless Kushan ruler mentioned in the Panjtār record of fourteen years earlier, is probable;

⁷ *JRAS.*, 1914, p. 990.

and here, again, I think Dr. Fleet may be correct in identifying the latter with Vima-Kadphises.¹ On the other hand, it is also possible that Kujula-Kadphises may be meant. The monogram on the scroll is characteristic of coins of Vima-Kadphises, but is also found on coins of his predecessor. Again, the title *maharajasa rajatirajasa* also suggests Vima-Kadphises; indeed, it was stated by several speakers during the discussion on the date of Kanishka that Kujula-Kadphises was only a petty local chief (*yavuga=jabyou*), never 'a king of kings,' like his successor. But this assertion is erroneous. On some of his coins Kujula-Kadphises styles himself *maharaja rajadiraja*, and, according to Cunningham, *devaputra* also. That he ruled, moreover, at Taxila, and consequently over the north-west of the Punjab and Frontier generally, is abundantly clear from his coins, which are found there in larger numbers than those of any other king except Azes I and Azes II. Other considerations, too, favour the identification with Kujula-, rather than Vima- Kadphises. For, in the first place, it would be natural for the first emperor of the dynasty to be styled 'the Kushan emperor' without any further appellation, while it would be equally natural for his successors to be distinguished from him by the addition of their individual names. Secondly, the stratification of coins at Taxila shows that Kujula-Kadphises succeeded the Pahlava kings there, and consequently he can hardly have conquered the country before *circa* A.D. 50; and, inasmuch as his coins betoken a fairly long reign there, and he is known from other sources to have lived to a great age, he may well have been ruling in the 122nd and 136th years of the era of Azes, i.e., approximately, in A.D. 65 and 79."

Dr. Thomas seems inclined to ascribe the Taxila record to the reign of Vima-Kadphises. The era is, he maintains,² the same as in the Takht-i-Bahi and Panjtār records and probably an old Śāka era, which was continued by the first Kushana rulers, at least as late as the years 122 and 136. He goes on to remark: "If Gondophernes died about A.D. 50 after forty years of rule, the year 136 would correspond to $A.D. 50 + 33 + 14 = \text{circa } A.D. 70$, which approximates to A.D. 78, the beginning of the so-called Śāka era. And A.D. 78—twenty-eight years after Gondophernes—will be a very suitable date for the death of Vima-Kadphises, who succeeded an octogenarian probably soon after the death of Gondophernes. This would fit the commencement of Kanishka's reign . . . in A.D. 78. We may urge further (1) that the era of the Śakas, having been actually employed by the early Kushans, can have been overthrown only by the definite institution of a new era, which will naturally be the known era of Kanishka; (2) that the so-called Śāka era must have owed its institution to the intentional abolition of a real Śāka era, that is, to the new epoch of Kanishka. On the other hand, if $136 + = A.D. 78$, the commencement of the era is not B.C. 58, but a few years earlier. If, however, the $+ = 0$, we arrive actually at B.C. 58. Although the era which we know as the Mālava and Vikrama era is dated, as I have endeavoured to show above (pp. 413-14), from the institution of non-kingly (oligarchical) rule in Ujjain, it is quite conceivable that it was a consequence of the foundation of the real Śāka era and followed after only a short interval; for the Śakas in question may have overturned a ruling dynasty in Ujjain."

So far as I can see, there cannot be much doubt that the Kushana emperor of the Panjtār and Taxila records was Kujula-Kadphises, and not Vima-Kadphises, who does not on his coins style himself a Kushana.

We learn from Chinese sources that the Yüeh-chi, after their defeat by the Hiung-nu in the second century B.C., proceeded westwards, and that, on the southern slopes of T'ien-shan, they came into contact with the Sai-wang, who in their turn migrated southwards and made themselves masters of Ki-pin. Later on, about 160 B.C., the Yüeh-chi were attacked by the

¹ See, however, Dr. Fleet's remarks, *JRAS.*, 1914, p. 993 and note 1.

² *JRAS.*, 1914, pp. 989 ff.

Wu-sun and continued their march towards the west. In Bactria they settled down under the rule of several *hi-hou*.¹ More than hundred years later the *hi-hou* of Kuei-shuang K'iu-tsiu-k'io conquered the other *hi-hou*, established himself as king and adopted the dynastic title "King of Kuei-shuang." He invaded An-si (Parthia), conquered Kao-fu and annihilated P'u-ta and Ki-pin. He died at the age of eighty years and was succeeded by his son Yen-kao-chên, who "again" conquered India and appointed a governor of that country.

It is now generally recognised that K'iu-tsiu-k'io is identical with Kujula-Kadphises and Yen-kao-chên with Vima-Kadphises, and that the Sai-wangs were the people who in India were known as Śakas or Śaka-murundas.¹ The information which can be gathered from Chinese tradition is accordingly to the following effect :—

The Śakas conquered the country which the Chinese called Ki-pin. Here they were later on replaced by the Kushana chief Kujula-Kadphises, who also invaded Parthia, and whose son Vima-Kadphises "again" conquered India. We are not told whether the Śakas extended their conquest beyond Ki-pin. The remark, however, that Vima-Kadphises' conquest of India was a re-conquest would naturally lead to the conclusion that India had formerly been subjected to the rule of the Śakas.

Sinologists seem to agree that Ki-pin in the times of the Han and the Wei denoted Kashmir, while in the T'ang period it was identified with Kapiśa, i.e. the country drained by the northern tributaries of the Kabul river.² There cannot be any doubt about the correctness of the latter statement that the terms Ki-pin and Kapiśa were often in the times of the T'ang dynasty used to denote the same locality. The principal reasons on which it is based have been ably summarised by M. Chavannes,³ as follows,—

(1) In the Chinese-Sanskrit dictionary Fan-yü-tsa-ming by Li-yen Kie-pi-sho-ye, i.e. Kapiśa, is given as a synonym of Ki-pin ;

(2) Hsüan-tsang states that the kings of those parts were in the habit of spending the summer in *Kia-pi-shi*, i.e. Kapiśa, and the winter in Gandhāra. A century later Wu-k'ung gives the same information, but substitutes *Ki-pin* for *Kia-pi-shi* ;

(3) From the T'ang-shu we learn that in the days of Hsüan-tsang the dominions of the Tu-kü extended as far as Ki-pin, and the Turkish Kagan gave the Chinese pilgrim an escort to *Kia-pi-shi*, i.e. to the southern limit of his empire.

That Ki-pin was, in the T'ang period, different from Kashmir can also be inferred from the fact that Wu-k'ung came to Kashmir after having visited Ki-pin. According to him Gandhāra was the eastern capital of Ki-pin, and, as Gandhāra was the lower Kabul valley, Ki-pin must have comprised the central part of that valley.⁴

Finally *Ki-pin* can be considered as a Chinese rendering of the word Kapiśa,⁵ though it is by no means certain that such be the case.

Kapiśa seems to have been an old country. Lassen⁶ has identified it with *Kapissa* which, according to Pliny VI. 25, was conquered by Kyros, and, if this identification can be upheld, we should be able to trace the name back to the 6th century B.C.

³ *Documents sur les Tou-kiue (Turcs) occidentaux*. St. Pétersbourg, 1903, p. 52¹.

⁴ Lévi, *Jo. As.*, IX, vi, pp. 371 ff.

⁵ Lévi, *Jo. As.*, IX, vii, pp. 161 ff. According to a note added to the Ming edition of the *Na-tien-king* (Milindapañña), Ki-pin is a *fan*, i.e. Indian word, meaning "mean fellow." Cf. Lévi, *Jo. As.*, IX, x, p. 529²; Schlegel, *T'oung-pao*, II, i, pp. 329 f. Perhaps this means that *Kapiśa* was explained as *ka* (or *ku*)-*pāśas*.

⁶ *Indische Alterthumskunde*, Vol. I, pp. 859 f.

In the T'ang period Kapiśa was a considerable power. In Hsuan-tsang's time Gandhāra had fallen under its domination, and Wu-ta-kiā-han-ch'a, i.e. Udabhāṇḍa on the Indus, was one of the residence towns of its king. Nagarahāra, Lampāka, and other countries belonged to their dominions, which later on also comprised Udyāna. Takshaśilā, which had formerly belonged to Kapiśa, on the other hand, had recently passed into the possession of the Kashmir kings.¹

The arguments in favour of the identity of Ki-pin and Kashmir in the Han and Wei periods are far less convincing. According to M. Lévi² they are,—

In Chinese works such as the Pien-yi-tien section of the T'u-shu-tsi-ch'eng and the Hui-kuo-t'u-chi, Ki-pin and Kashmir are identified ;

The old annals distinguish Ki-pin from Kao-fu, which latter name must signify Kabul ;

The Wei annals state that the country was surrounded by four mountain ranges, and that it extended 800 li from east to west and 300 li from north to south ;

Finally *Ki-pin* can very well be a rendering of an Indian word *Kapira* ; cf. the transliteration of *Rāhula* as *Lo-yun*. This *Kapira* can be compared with Ptolemy's *Kaspēria*, *Kaspeiraioi*, and may represent a Sanskrit *Kaspīra*=*Kāśmīra*. Paramārtha, a native of Ujjayinī, who lived in the second half of the 6th century, in his translation of the *Abhidharma-kōśa* always renders *Kāśmīra* by *Ki-pin*,³ while Hsuan-tsang, a century later, in his translation of the same work, renders the Indian name as *Kia-shi-mi-lo*.

These reasons are far from being conclusive. The identification of Ki-pin and Kashmir in some Chinese sources does not prove much, if we remember that Kashmir became part of the empire of the Kushanas, of whom we know that they made themselves masters of Ki-pin after the Śakas. Mountain ranges are found everywhere in Afghanistan as well as in Kashmir, and the fact that Ki-pin may be a rendering of *Kāśmīra* does not prove that such is actually the case. Ptolemy's *Kaspeiraioi* are located between the country of the Pāṇḍavas and the Vindhya hills,⁴ and Paramārtha's rendering would, at the utmost, prove the identity of Ki-pin and Kashmir in his time, and we have already seen that such cannot be the case.

It will accordingly be necessary again to examine the information which can be gathered from the oldest Chinese sources.⁵

The Chinese first heard about Ki-pin during the rule of the emperor Wu-ti (140-87 B.C.). The country was then in the possession of the Sai, i.e. the Śakas. Later on it was conquered by the Kushanas, and the first Kushana ruler does not seem to have extended his power beyond Ki-pin into India proper. In the time of Yuan-ti (48-33 B.C.) ambassadors from Ki-pin arrived in China and were escorted back as far as Hien-tu, which was accordingly on the way to Ki-pin. Also the Sai, i.e. the Śakas, passed Hien-tu on their way to Ki-pin.

According to M. Specht, Hien-tu was situated to the east of Badakshan. Professor Franke,⁶ on the other hand locates it at a short distance to the west of Skardu. He bases his conclusions on Fa-hian's description of his route from Turkistan to Udyāna. After crossing the passes he arrived at Kio-cha, and thence proceeded along the hills towards the south-west and arrived at a gorge where one had to descend and cross (*tu*) by means of hanging (*hien*) ropes. This description seems to suit the famous gorge near Skardu. From Hien-tu Fa-hian then arrived in Udyāna, i.e. the Swat valley. He did not accordingly

⁴ Lassen, *loc. cit.*, Vol. III, p. 146.

⁵ Cf. Franke, pp. 59 ff. ; Specht, *Jo. As.* VIII, ii, pp. 323 ff. ; IX, x, pp. 162 ff. ; Lévi, *Jo. As.*, IX, vi, pp. 371 ff.

⁶ *Loc. cit.*, pp. 56 ff.

proceed from Hien-tu to Kashmir, but towards the west, whereby he would have to cross the Indus a second time.' His description would accordingly lead us to infer that Ki-pin was situated to the west of Kashmir.

This well agrees with the information which can be gleaned from older Chinese sources. According to the Han annals Ki-pin was bounded towards the south-west by Wu-i-shan-li, towards the north-west by the Bactrian empire of the Yüe-chi, while towards the north-east it was eight days' journey distant from Nan-tun, and towards the east 2250 li distant from Wu-cha. In another place Ki-pin is mentioned between An-si, i.e. Parthia and Wu-i-shan. Wu-i-shan-li is, as shown by Professor Marquardt,¹ a rendering of the Greek Alexandria, i.e. Kandahar, or, according to M. Chavannes,² Herat, and according to Cunningham³ it comprised the whole of South-western Afghanistan. This description certainly seems to indicate parts of Afghanistan, to the south of the Hindukush. Of Kao-fu, to the south-west of the Ta Yüe-chi, we hear⁴ that it sometimes belonged to Ki-pin and sometimes to T'ien-chu. Kao-fu has been identified with Ptolemy's Kaboura, the present Kabul, and, if we consider Kao-fu as the border land between Parthia and Ki-pin,⁵ to which latter country it sometimes belonged, we are led to think of parts of the Kabul valley and neighbouring districts, i.e. territories which we have found formed part of Kapiśa. Professor Franke therefore arrives at the conclusion that Ki-pin comprised the north-western portion of the present Kashmir state, the Indus country down to the Kabul river, the country between the lower Kabul river and the Swat river, and further parts of the Panjāb. These must be added, because we learn about Ki-pin that it was a flat and hot country, a designation which does not at all suit Kashmir. I think that we cannot get nearer at the truth. The only territories mentioned by Professor Franke which I do not think can be proved to have belonged to Ki-pin are the north-western districts of Kashmir. On the other hand it is possible that it extended a little further towards the west and the south-west.

Ancient Ki-pin thus included districts which were later on known as Kapiśa, and I do not see why it should be necessary to assume that the Chinese at different periods used the designation Ki-pin in two different senses. It seems to me that we shall have to return to the old explanation of Ki-pin as a rendering of the same word which the Greeks made into Kōphēn, whereby we must bear in mind that the Greek *ph* was an aspirated labial and not a spirant. The reasons brought forward against this identification are little convincing. M. Lévi⁶ thinks that the name Kōphēn had probably already become obsolete when Megasthenes picked it up. Ptolemy ignores it and calls the principal river of Afghanistan Koas, and finally Strabo has another form of the name, viz. Kōphēs. I cannot find anything in these arguments which disproves the old identification of the names Kōphēn and Ki-pin; which is in itself much more likely than the supposed renderings of Kapiśa and Kāśmīra by Ki-pin. The fact remains that the Greek knew a name which they thought sounded like Kōphēn, that this name sounds much more like Ki-pin than any other name which has been suggested, and that we have every reason for looking for Ki-pin in the same neighbourhood where the ancient Greeks located Kōphēn, the country on the Kōphēn. The fact that the Chinese later on used the name Kapiśa of districts which others included in Ki-pin seems to be much more naturally explained by assuming that Kapiśa formed part of ancient Ki-pin and was sometimes designated by means of the wider name Ki-pin.

In support of my location of ancient Ki-pin I may mention a small detail. I hope to have proved in another place⁷ that the so-called Murundās who ruled in the Ganges valley in

⁷ *SBAW.*, 1916, pp. 790 ff.

the second and third centuries A.D. were in reality the Kushanas, and that the word *murunda* itself is not the name of a tribe, but a Śaka word meaning "lord," which was used as a title by the Śakas and after them by the Kushanas, while the Kshatrapas translated it by the corresponding Indian word *svāmin*. Wherever we meet with the designation *murunda*, we are justified in thinking of Śakas or tribes that can be considered as the heirs and successors of the Śakas. Now Lassen has long ago¹ drawn attention to the statement in Hēmachandra's *Abhidhānachintāmaṇi*, v. 960, *Lampākās tu Muruṇḍāḥ syuḥ*, "the Lampākās would be (called) Muruṇḍas." Lassen inferred that the *Muruṇḍas*, who must be identical with the *Muruṇḍas*, should be located in the present Laghman. This, however, is impossible, when we consider the information about the *Muruṇḍas* which can be gleaned from Indian, Greek and Chinese sources, which unanimously locate the so-called people in the Ganges valley. If we examine the preceding stanza in Hēmachandra's work, we there find the remark, *Turushkās tu Sākhaṇḍāḥ syuḥ*, "the Turushkas would be called Sākhis." It has long ago been recognised that this *sākhi* is nothing else than the title *shāhi*, and we are quite justified in looking for a title in *murunda* as well. Now that we know that *murunda* was actually a Śaka title, the natural inference is that the Lampākās had preserved this title from the time when they were ruled by Śakas, in other words that their country belonged to the dominion of the Śakas, of whom we know that they ruled in Ki-pin.

Finally, the location of ancient Ki-pin here attempted is the only one which suits what we know about the ancient history of the Śakas and the Kushanas. We have no traces of the Śakas or of Kadphises in Kashmir, and there is not the slightest indication that they ever ruled there. Numerous finds, on the other hand, prove that they held sway in Taxila and further to the west, at least as far as towards Jalalabad. Of Huvishka we have traces as far west as in Khawat.

I have consulted Professor Franke about the results of my study of the question, and he kindly authorises me to state that he agrees with me. The support of his great authority makes me confident that I am right.

Taxila, the find-place of the present inscription, accordingly belonged to Ki-pin, and "India" which was reconquered by Vima-Kadphises was beyond Ki-pin, i.e. beyond the north-western Panjāb. We thus have an old tradition about a king who succeeded the Śakas in Ki-pin, and about his son, who reconquered India. Now I have shown in my *Indo-Scythian Contributions* that the Kushanas in India must be considered as the heirs and successors of the Śakas, that they were known under the Śaka title *murunda*, and that it would be nothing extraordinary if a Kushana ruler were designated as a Śaka. I have therefore compared the Chinese tales about the Sai-wang and the Kuei-shuang in India with an Indian tradition, which has been handed down in the Jain work *Kūlakāchāryakathānaka*.²

We there learn how the king of Ujjayini, Gardabhillā, abducted the sister of Kālaka, who went to the country of the Śakas (*sagakūla*) and prevailed upon some of the *sāhis*, i.e. chiefs, to accompany him to India (*Hindugadēsa*). They first proceeded to Surat (*Suratṭha*) and thence, in the autumn, to Ujjayini, where Gardabhillā was made prisoner. A *Sāhi* was made overking, and thus the dynasty of the Śaka-kings originated. After some time, however, Vikramāditya, the king of Mālava, ousted the Śakas and became king, whereafter he established his own era. After the lapse of 135 years his dynasty was overthrown by another Śaka, who in his turn introduced the Śaka era.

I have no doubt that this second Śaka king who reconquered India is identical with Vima-Kadphises, who "again" conquered India; and, if that is admitted, the Jain tale at once acquires

¹ *Loc. cit.*, I, p. 548¹.

² *ZDMG.*, 37, pp. 247 ff.

great importance. It must be a very old tradition, and we have no reason to reject any portion of it, unless it can be disproved. I know that most European scholars, though many of them speak with respect about Indian tradition, do not usually take any notice of it, but I am unable to see why. And with regard to the narrative of the *Kālakāchāryakathānaka* I see no reason whatever why we should disbelieve it. I have shown elsewhere¹ that there are good reasons for assuming the existence of a Mālava king Vikramāditya at an early date, and² that the oldest dates in the Mālava-Vikrama era are recorded according to a system which is quite different from that followed in old Kharōshthī inscriptions, and which is probably the old national Indian one. I think the only sensible course is to abandon the idea that the Vikrama era was established by foreigners and return to the traditional theory that it dates back to an Indian ruler of Mālava, who upset the rule of Śaka conquerors. As remarked by Dr. Fleet, everything we know about Indian eras is to the effect that they were started by individual kings, and, though the Vikrama era was later on known as the era of the Mālava corporation, I do not think that Dr. Thomas has succeeded in making it probable that "it dates from the foundation of the tribal independence of the Mālavas."³

The oldest dates in the Śaka era are recorded in the same way as the ancient Kharōshthī inscriptions, and this state of things makes it almost certain that Dr. Thomas was right in assuming⁴ that these latter ones were likewise dated in a Śaka era. The second Śaka era, of A.D. 78, was according to the *Kālakāchāryakathānaka* founded by the Śaka ruler who ousted the dynasty of Vikramāditya and "again" subjected India to the sway of the Śakas. I have already remarked that I identify this Śaka ruler with Vima-Kadphises, who "again" conquered India and appointed a governor to rule the country. If we remember that Surat and Mālava were the countries which the Śakas invaded at the invitation of Kālaka, when he asked them to accompany him to India, it becomes probable that the governor whom Vima-Kadphises appointed was the first of the Western Kshatrapas, i.e. in my opinion, Bhūmaka=Ysamōtika.⁵ It is thus easily explained why the inscriptions of the Western Kshatrapas are dated in the Śaka era.

If now Vima-Kadphises was the ruler who established the Śaka era, he can scarcely be the king alluded to in the Taxila inscription. His conquest of India did not probably take place in the first year of his reign, and we may roughly place his accession in A.D. 75. His father, who died as an octogenarian, would then have been born *circa* 5 B.C. According to Professor Franke⁶ the consolidation of the Kushāna empire under Kujula-Kadphises had not taken place in A.D. 24, but did not happen long after that date. In l. 5 of the so-called Takht-i-Bahi inscription I read *erjhuṇa Kapśasa puyae*, "in honour of prince Kapśa." This prince Kapśa can hardly be anybody else than Kujula-Kadphises, of whom we know that he invaded Parthia. The Takht-i-Bahi inscription is dated in the year 103 of the era which I follow Dr. Thomas in considering as an old Śaka institution. It can, of course, be anterior to A.D. 24, but scarcely much later. The initial date of the era would accordingly not fall later than about 75 B.C., but might fall some years earlier. At least there cannot be any question of the Vikrama era, which, I think, we must finally ascribe to Central India. With an initial date in or about 75 B.C., the year 136 would fall about A.D. 60, at a date when there can be no question of placing Vima-Kadphises; and, even if we were to assume that Kujula-Kadphises ascended the throne as much as 10-15 years after A.D. 24, the Taxila inscription would still have to be ascribed to Kujula-Kadphises. It should finally be borne in mind that we have the definite statement about him in Chinese sources that he assumed the title "King of Kuei-shuang," i.e. Kushāna king.

TRANSLATION.

In the year 136, on the 15 day of the first month of Āshāḍha, on this day relics of the Venerable One were enshrined by Urasaka, the son of Indafri, a man from Balkh, a Resident of the town Noacha. By him the relics of the Venerable One were enshrined in the Dharmarājika (*stūpa*) in Takshaśilā, in the Bōdhisattva-chapel of Tanuva, for the bestowal of health on the great king, the king of kings, the son of the gods (of heaven), the Khushaṇa; in honour of all the Buddhas; in honour of the individual Buddhas; in honour of the Arhats; in honour of all beings; in honour of (*his*) parents; in honour of (*his*) friends, ministers, kinsmen and blood-relations; for the bestowal of health upon himself; to Nirvāṇa may this proper gift lead hereafter (?).

No. 21.—ARTHUNA INSCRIPTION OF THE PARAMARA CHAMUNDARAJA:
VIKRAMA-SAMVAT 1136.

BY LIONEL D. BARNETT.

The village of Arthūṇa lies about 28 miles in a westerly direction from Bānswārā in Rājputānā; it is shown on the Indian Atlas quarter-sheet 36 (1905) as lying in lat. 23° 29½', long. 74° 9½'. About a mile to the east of Arthūṇa is a temple of Maṇḍalēśvara Mahādēva (Śiva); the present inscription, which records its foundation and endowment, is on a slab on the right side of its *śikhara*. According to local tradition, the place formerly bore the name of Amarāvati. An abstract of this record was published by Professor Kielhorn in *Ind. Ant.*, Vol. 22 (1893), p. 80. Recently Mr. Shyama Shankar Har Chaudhuri, M.A., with great kindness obtained for me from the Antiquarian Department of His Highness the Maharaja of Jhalawar's Government the loan of an ink-impression of the stone, together with a transcript by the learned Curator of the Department, Pandit Gopal Lal Vyas, on the basis of which I now edit the text. Unfortunately the ink-impression in several places has been touched up with white paint, which somewhat lessens the value of its testimony; but in spite of this fact and of the frequent incorrectness of the original writing the greater part of the inscription can be determined with certainty.—The character is Northern, of a type common in Rājputānā during the period; the letters are on the average about ½" in height. They are for the most part fairly well preserved. The area covered by the writing is 2 ft. 6½" wide and 2 ft. 2" high.—The language is throughout Sanskrit, all verse, with the exception of the colophon on l. 53. The spelling throughout shews a tendency to confuse *ś* and *s* (I fear I may not have always succeeded in distinguishing what the engraver really cut in this respect, owing to the touching up of the ink-impression), and sporadic doubling of consonants after *r*. In the somewhat ambitious *praśasti* occupying ll. 1-45, which shews that the poet was a careful student of Kālidāsa, there is little of special linguistic interest; we may note the words *tōṇīra* (for *tūṇīra*, l. 5), *kaṇḍāla* (l. 12), and *uchch[u*]lumpchukāra* (l. 40). But in the business part of the record, comprising the articles of the endowment (l. 45 to end), there is a fair number of

rare words, mostly of a homely kind, viz. *prati* (ll. 45, 46), *haṭṭa* (l. 46), *mūṭaka* (ll. 46, 50), *pūḷaka* (l. 47), *jāla* (ib.), *utthapanaka* (ib.), *vuṃvaka* (l. 48), *laḡaḡā* (ll. 48, 50), *saṃta* (l. 48), (?)*pāṇaka* (ib.), *vr̥sha-viṃśōpaka* (l. 49), *tavāṇi* (ib.), *araghaṭṭa* (ib.), *hāraka* (ib.), *ohhaṅga* (l. 50), *vāpa* (ib.), and *āṭavika* (ib.).

The subject of the inscription is the foundation and endowment of the temple of **Maṇḍalēśa** (Śiva) at Arthūṇā by the **Paramāra** king **Chāmunda**rāja. After two Śaiva benedictory stanzas, it gives the familiar legend of the origin of the **Paramāras**. First Mount **Arbuda** (Ābū) is described (v. 3); here the saint **Vasishṭha** performed his holy rites (v. 4), in company with his wife **Arundhatī** (v. 5) and the Cow of Desire (v. 6). **Viśvāmitra**, son of **Gādhi**, stole the cow (v. 7). To recover her **Vasishṭha** miraculously created a warrior, who defeated the enemy and brought her back (vv. 8-10). **Vasishṭha** blessed him and gave him the name **Paramāra**, "Destroyer of Foes" (v. 11). In his lineage was the warrior king **Vairisimha** (v. 12), who, despising common glory, became master of the earth (vv. 13, 14). Next his younger brother **Ḍambarasimha**, a valiant and charming prince, is introduced (vv. 15-16). In his lineage was **Kaṃkadēva** (probably an error for **Kakkadēva**), a brave warrior (vv. 17-18), who in a battle on the banks of the **Narmadā** overthrew the army of the king of **Karṇāṭa**, and in fighting on the side of **Śriharsha** of **Mālava** died a hero's death (v. 19). We are then told of the glories of his son **Chandapa** (vv. 20-21), **Chandapa**'s son **Satyarāja** (vv. 22-24), **Satyarāja**'s son **Maṇḍanadēva** (vv. 25-45), and **Maṇḍanadēva**'s son **Chāmunda**rāja (vv. 46-54). He (apparently **Chāmunda**rāja) gloriously overcame **Sindhurāja** (v. 55); his splendours are further described (vv. 56-61). He established religion in an unprecedented degree (v. 62), and dispensed rich bounties to **Brāhmanas** and others (vv. 63-65). He caused the temple of **Maṇḍalēśa** to be built (v. 66); may his fame endure for ever (v. 67). Then follow the details of the endowment (vv. 68-81), and comminatory stanzas (vv. 82-83). In the **Sādhāra** family was the learned poet **Sumati-Sādhāra** (v. 84); his son was **Vijaya-Sādhāra** (v. 85), whose younger brother was **Chandra**, the author of this poem (v. 86). The fair copy was written by **Āsarāja**, son of the **Kāyastha Śridhara** (v. 87).

The family of kings introduced to us by this *praśasti* is a junior branch of the **Paramāra** dynasty. The point at which they branched off from the main stock (as represented by the family ruling **Mālwa** from **Kṛishṇa-Upēndra** down to **Arjunavarman**: above, Vol. I, p. 224, *Ind. Ant.*, Vol. XIX, pp. 345 ff.) is not clear: it may be from **Vairisimha** and his brother **Ḍambarasimha**, for conceivably the former may be identical with the **Vairisimha I** of the **Mālwa** dynasty.¹ Some generations after these we find **Kakkadēva** fighting for the cause of "Śriharsha" of **Mālwa** against the "Lord of **Karṇāṭa**." This "Śriharsha" is most probably **Harshadēva-Siyaka II** of **Mālwa**; and the "Lord of **Karṇāṭa**" may be the **Rāshtrakūṭa Khottiga**, against whom **Siyaka II** waged a successful war about 970 A.D. Accordingly we may assign **Chandapa** to about 1000 A.D., **Satyarāja** to about 1025, **Maṇḍanadēva** to about 1050, and **Chāmunda**rāja to 1080, which was the actual year in which the present inscription was set up. Some difficulty, however, arises from the obscurity of the verses 47 ff. To all appearance they refer to **Chāmunda**rāja, and we should naturally gather from them that it was he who conquered **Sindhurāja** (v. 55), patronised religion (v. 62), and built the temple of **Maṇḍalēśa** (v. 66). But immediately afterwards we find a prayer for the continuance of the glory of **Maṇḍanadēva** (v. 67) and a statement that certain imposts for the benefit of the temple were established by the latter (v. 70). The most natural conclusion is that vv. 47-66 do refer to **Chāmunda**rāja; that the temple of **Maṇḍalēśa** built by him was a new structure taking the place of an older sanctuary to which his father **Maṇḍanadēva** had

¹ Considerations of chronology forbid us to identify him with **Vairisimha II** of **Mālwa**.

previously granted an endowment¹; and that the present inscription was intended to record these facts and to amalgamate the endowments of the father and the son.

Who *Sindhurāja* (v. 55) can be is not clear. He cannot be the well-known *Sindhurāja* of *Mālwa*, whose period is about 990-1010 A.D.; for, even if we refer v. 55 to *Maṇḍanadēva*, the latter can hardly have been old enough to wage a victorious war before 1010; and as we saw, the probability is that the verse refers to his son, which will bring it still further down in time. Possibly *Sindhurāja* is to be understood as meaning "a king of *Sindh*."

The date as given on the ink-impression and read by Pandit Gopal Lal Vyas is: *Samvat* 1136;² *Phālguna* *suddha*, the 3rd day; Friday. On this Mr. R. Sewell has kindly supplied to me the following remarks: "Since the month is *Phālguna*, the beginning of the year, whether *Chaitra*, *Kārttika*, or *Āshāḍha*, makes no difference in the year's number; and since the *tithi* was in the bright half, it makes no difference whether the months began with the new or full moon. Hence the only question is whether the year was current or expired. Take the *expired* case first. In that case *Samvat* 1136=A.D. 1079-80. The lunar year began 7 March 1079, and 3 *śukla* *Phālguna* corresponded with Tuesday, 28 January, A.D. 1080. This, therefore, does not fit. Now take the *current* *Samvat* 1136. This=A.D. 1078-79, which began in lunar reckoning on 17 March 1078. 3 *śukla* *Phālguna* of that year must have been coupled with a civil day 327 days later, viz. with Thursday, 7 February, A.D. 1079. On that day, 3 *śukla* *Phālguna* ended about 11 h. 24 m. before mean sunrise on the Friday next day, and it could not be coupled with that Friday. However, this is nearer than the Tuesday of the former case."

On the other hand, Professor Kielhorn, in his notice of the inscription, read the number of the *tithi* as *seven*, and accordingly calculated the date as Friday, 31 January, A.D. 1080, when, according to his reckoning, the seventh *tithi* of the bright half ended 20 h. 3 m. after mean sunrise. Mr. Sewell has pointed out to me that this is a satisfactory solution. "Only," he adds, "Kielhorn made a slip about the end of the *tithi*, so it seems to me. My work shews that the 7th *śukla* *tithi* of *Phālguna* in *Samvat* 1136 *expired* was current at mean sunrise on Friday, 31 January, A.D. 1080. It had begun 2 h. 25 m. before that mean sunrise, and was coupled with the civil day Friday . . . Supposing that the calculation for the given date had been made for the moment of true sunrise, not mean, would the results be different? I think not. In Northern India true sunrise on Jan. 31 would take place *after*, not *before*, mean sunrise. Hence, since the 7th *śukla* *tithi* had begun 2 h. 25 m. before mean sunrise, it would have run a still longer time at the moment of true sunrise." Accordingly it would seem most probable that the numeral representing the *tithi* on our inscription was really 7, and has been wrongly altered by the preparer of the ink-impression to 3.

The only places mentioned are: Mount Arbuda, now *Ābū* (v. 3), *Karṇāṭa*, the *Narmadā*, and *Mālava* (v. 19).

TEXT.³

[Metres: vv. 1, 3, 4, 13, 19, 24, 28-9, 31, 37, 39, 40-1, 43, 45-6, 49, 58, 63-4, 67, *Śārdū-lacikṛīḍita*; vv. 2, 5-7, 14, 16, 18, 21, 23, 26-7, 30, 32-5, 42, 44, 47, 52-3, 57, 61-2, 65, 68-70, 72-84, 87, *Anuṣṭubh*; vv. 8, 48, *Drutavilambita*; vv. 9, 10, 38, 51, 56, *Sragdharā*; vv. 11, 36, 71, *Svāgatā*; vv. 12, 15, 17, 22, 25, *Vasantatilaka*; vv. 20, 86, *Triṣṭubh*; vv. 50, 59, 60, *Mandākṛāntā*; vv. 54, 66, *Mālinī*; v. 85, *Āryā*. V. 55 is compounded of a *Rathōddhātā* (*pāda* 1) and *Svāgatā* (*pādas* 2-4).]

¹ Read *virachitāh*; the next words are more or less corrupt.

² Read *hasitā Va(ba)li-prabhritayah*.

³ These six syllables are illegible on the ink-impression; the transcription of Pandit Gopal Lal Vyas suggests the reading *chintā chintāmanār=api*.

⁴ See further the translation below, p. 309 and note.

⁵ Perhaps to be corrected to *Śrīyō*.

⁶ After this *daṇḍa* there is a four-armed ornament and another *daṇḍa*.

⁷ Corrupt; perhaps *-madhyāt*.

⁸ Uncertain; perhaps we should read *pālī* or *pālā* (i.e. *pāyalī*, *pāyalā*), or we may take *pā* as an abbreviation of one of these words: cf. above, Vol. XI, pp. 41, 56.

⁹ Possibly a mistake for *mānakām*.

¹⁰ The ending *ā* is wrong.

¹¹ Corrupt; possibly *cha*.

(Line 1.) Ōm ! Ōm ! homage to Śiva !

(Verse 1.) May the glances of Dēvi at the time of her marriage protect you—(*glances*) confused with excitement, budding forth with pleasure, quivering with delight, made slow by modesty, as in terror at the hissing of the snakes clinging to his arm she clenched her hand, which was drawn back by the old ladies for Śambhu, who seized it eagerly in firm grasp !

(Verse 2.) May the moon-crested one [Śiva] protect you, who bears on his head the moon that is wasted away as if from annoyance at the superiority of Gauri's face that is ever present !

(Verse 3.) There is in this land a famous mountain, Arbuda, the summit of which supports the heaven on high, (*and*) which stands in the highest rank among the lofty mountains beginning with Mēru; upon which for a moment night has been imagined by Siddhas to be day and day to be night, as they beheld the sun and moon licked by rays (*respectively*) of crystals and topazes.

(Verse 4.) Upon it the excellent saint Vasishṭha, freed from embodied life, magnificent in his conduct, a treasure of divine knowledge, boundless in merits, performed labours of true mortification; through being long in contact with the smoke flaring up from his *agni-hōtra* rites, (*and*) passing through the sky, as it were, the horses of the Sun were coloured bay.⁹

¹ For this missing syllable the transcription of Pandit Gopal Lal Vyas gives *śhū*. Much of the rest of the verse is corrupt.

² Apparently corrupt; should we read *bharakē* ?

³ Read =*bhukt-aikaikēna*.

⁴ Read =*śaśi*.

⁵ One *akshara* is here illegible.

⁶ About 12 *aksharas* here are almost illegible, of which nos. 6-10 look like *Gumḍāka-sūtradhārāḥ*.

⁷ The transcription of Pandit Gopal Lal Vyas adds here *maḥā-śrī* ||.

⁸ [In a number of unspecified points I should dissent from the subjoined rendering of this elaborate composition. But it is not necessary to discuss them, as the historical facts are not affected.—Ed.]

⁹ The meaning of this *utprākṣhā* is that the Sun's horses got their bay colour because of their regularly passing through the sky, which was full of the smoke of his constant sacrifices.

(Verse 5.) In company with this saint shone the stainless lady Arundhati, having the whole of her organs strictly under control, like the embodied spirit of mortification.

(Verse 6.) With him dwelt the Cow of Plenty, obtainable by no others, bestowing objects of desire, like success in mortification.

(Verse 7.) Then the son of king Gadhi [Viśvāmitra], inflated with the arrogance of the warrior caste, by fraud carried off his precious cow, as an impediment (*to a religious act removes its*) success when ready.

(Verse 8.) Thereupon that saint, wroth at the occurrence of the insult, like a blazing sun, offered in the fire an oblation attended with clear spells, because he wished to create a warrior to slay (*his*) foes.

(Verse 9.) There issued thence a certain warrior, bearing on his back a pair of quivers and in (*his*) hand a terrible bow, fastening exceedingly tightly the mass of (*his*) braided locks with (*his*) right hand, wrathful, wearing the sacred cord, with awry glances terrifying the world of living beings, magnificent in splendour, crushing opponents.

(Verse 10.) He, who had most puissant strength of arm, being instructed by that (*saint*), entered the fray, while an auspicious song was sung by troops of celestials, routed his foes with showers of arrows forsooth filling the regions of space (*and*) covering up the sun's rays, seized the Cow of Plenty, and presented himself devoutly before (*the saint*), with head quivering upon the pair of lotuses that were his feet.

(Verse 11.) The delighted saint, having pronounced over the bowing conqueror the desired blessing, at once gave him the appropriate name of Paramāra [Destroyer of Foes].

(Verse 12.) In his lineage in due course arose a warrior named the blest Vairisimha because he was able to utter a lion's roar, a monarch terrible with claws consisting of the sword uplifted to cleave the frontal globes of the noble elephants' potent foes.

(Verse 13.) Observing now that Glory was fickle of nature, worn by enjoyment and unpleasing, he, puissant with a pair of long arms (*and*) having ever a festal residence on the periphery (?) of the frontal globes of the brilliant elephants of the four regions of space, held his espousals with [*or, levied tribute upon*] the earth of (*other*) kings, who was deeply enamoured of his virtues, within the area of the four regions of space.¹

(Verse 14.) The Ocean is not equal to him; for it has lost Fortune, and he was a treasure of fortune; it is in confinement, and he held foes in restraint; it is unintelligent,² and he was shrewd of wit.

(Verse 15.) His younger brother Dambarasimha subdued multitudes of foes by the awfulness of his terrible long arms, (*and*) the lotus of his face was obstructed by the mass of bees that were the eyes of damsels who were the very essence of amorous sentiment.

(Verse 16.) How could even moonlight be compared to his glory? The one arises from *doshākara* [the moon, or a mine of faults], the other is produced from a multitude of virtues.

(Verse 17.) In his lineage was the blest Kakkadēva, whose long arms were solid as an elephant's trunk, (*and*) whose blazing splendour was a consuming fire to the multitudes of *patra-vallī*³ on the breasts of the wives of his pride-blinded foes.

(Verse 18.) In (*his*) two long arms itching for the fray so as to join battle he felt pleasure at the nail-scratchings that were the assaults of foemen's arrows.

(Verse 19.) Mounted upon his elephant's back in battle, on every side with showers of arrows shattering the host of the Lord of Karpāṣa upon the banks of the Narmadā,

¹ Despising ordinary glory, he aspired to and quickly won the earth. [*kumbha* also = 'bowl' of water, an auspicious object in the wedding marquee.—Ed.]

² There is a play on the double meaning of *jaḍadhi*, "ocean" (= *jaladhi*) and "dull-witted" (*jaḍa-dhi*: cf. Whitney's Grammar, § 354a).

³ Lines drawn with fragrant pigments.

slaying thus the foes of the blest king Śrīharsha the lord of Mālwa, he went to heaven, a valiant warrior, worshipped with the lotuses of the eyes of the ladies of the gods.

(Verse 20.) His son, *Chandapa* by name, had fame wandering free through the universe, (and) was a peculiar cloudy season (*causing*) the departure of the swans that are the smiles of princes' mistresses.

(Verse 21.) Exceedingly brilliant was his fame, standing like a flower-bunch over (*the universe comprising everything from*) Brahman to grass and constantly attended with song from crowds of Kinnaras like bees.

(Verse 22.) His son was *Satyaarāja*, a seat of truth, having lovely splendour irresistible as fire, (*who made*) the mass of radiance from his toenails a bright forehead-ornament clinging to princes' brows delighting in deep obeisances.

(Verse 23.) From dread of him his enemies, though . . . constantly wore wild flowers: how surely are the lords of fortune known !¹

(Verse 24.) Being in a hundred ways active in the works of the sword, yet withal "genuinely tender" with mercy; always controlled inwardly, though obtaining extension² by hundreds of valiant deeds; in many ways winning fortune earned by his arms [*or, without guilt*]³ though nourished in virtue down to his very roots,—he was thus certainly *viruddha* [*discrepant*] in his conduct, but not *viruddha* [*inimical*] to the world.

(Verse 25.) From him arose, like a conjunction of prosperity from policy in this world, a holy ornament of the triple universe, broad and lofty of shoulders, an ear-jewel attached to the beautiful deeds of the gods, a palace of Fortune, (*a son*) named *Maṇḍanadēva*.

(Verse 26.) Finding him arisen in his career, broad of breast, charming, Fortune, as I imagine, held no (*more*) amorous commerce with her ancient husband.

(Verse 27.) Giving out constant streams of *dāna* [*largesse, or ruttig ichor*], stout in his long arm [*or, trunk*], uniquely *dhavala* [*white with fame, or a bull*] in his race, *bhadra* [*brilliant, or a high-bred elephant*], he was resplendent as the Elephant of the Gods [*Āirāvata*].

(Verse 28.) The pairs of lotuses that were his hands and feet bore the tokens of cheiromancy, having moonbeams from the glittering nails, (*being surrounded by*) a mass of water of brilliant beauty, bearing a radiance of most graceful clear long lines, being marked with the goodly conch and fish, suitable for the lordship of an army, peerless, famous, a cause of fortune.⁴

(Verse 29.) This excellent king, having the form of the Love-god, binding the marriage-thread here in the brilliant pavilion (*formed*) of the pole of his stout arm, on the arrival of an auspicious day, espoused his foes' fortune, (*as a bride*) who was charming in high descent, exceedingly perfect in all members, desired by rivals, and gloriously given as his wife by his own great prowess.

(Verse 30.) His sword, like a minister, supporting the burden of the earth, shattering the hostile action of foes, constantly fostered his fortunes.

(Verse 31.) As the forest, full of masses of green grass-sprouts, is burned up by the earnest hot grief-born winds of the sighs of his foes' mistresses, which vie everywhere with the

¹ There is a play on words, designed to suggest that the king was the equal of Viṣṇu (*Lakṣmīpati*) or Kṛiṣṇa (*Vanamālīn*); it would be improved if we adopted Pandit Gopal Lal Vyās's reading *achyutā*. [*'How are his enemies neither recognized, nor lords of Fortune ?'*—Ed.]

² Literally, "moistened." [*nistṛīṃsa* also = "cruel."—Ed.]

³ Scil. of territory or of fame.

⁴ If we take *dōṣha* in the sense of "arm," we must divide *vahudhā dōṣh°*; if in the sense of "guilt," we must divide *vahudh=ādōṣh°*.

⁵ For the full understanding of this verse the reader must refer to the text-books of palmistry. The figure of a fish in the palm usually portends wealth, progeny, and general success; that of a conch, lordship over millions of men. [*sāṃudrikā lakṣaṇam*, as also *vāhinyāḥ*, contains a punning reference to the sea, the source of the moon, etc. etc.—Ed.]

blasts of the end of the æon, (*and*) the water is utterly dried up (*by them*), the worn deer exist with difficulty, deprived of their sustenance of food and drink.

(Verse 32.) His splendour, ever brilliant, blazed like a second submarine fire, potent in the destruction of all lords of hosts [*or, of the Ocean*].

(Verse 33.) His sword in battle seems like a fetter for foemen's fortunes after the departure of (*their*) glory, like a braided look of the goddess of victory.

(Verse 34.) Purandara [*Indra*] himself does not bear a resemblance to this skilful man—(*the former being*) a destroyer of (*the demon*) Vala, (*the latter*) a possessor of *vala* [*strength*]; (*the former being*) a smiter of the Gôtras [*stalls of mythical kine*] [*mountains (?)*—H. K. S.], (*the latter*) a gladdener of his Gôtra [*family*].

(Verse 35.) In his heart is Fortune, and he is dear to the heart of Fortune: how can he whose device is Garuḍa [*Vishṇu*] rival him?

(Verse 36.) As he was lovely with fresh sprouts of majesty, stainless of glory and bearing an unscathed body, a festal pitcher of victory filled with the water of mercy, Fortune never abandoned him.

(Verse 37.) This his fame, like a miraculous deity, truly established in a temple because of its ancient exceedingly pure virtues, bearing the radiance of pearl-strings, greatly admired, pervading the three worlds, present in every region, in every forest, in every town, in every house, is everlastingly extolled by men.

(Verse 38.) The boundless stream of the virtues of this man, who was a seat¹ of righteous conduct, was a Milk Ocean entirely filling the bright spaces of earth and sky on every side, in which Fortune found birth, and in which arose floods of the pale yellow nectar of fame; whence arising, the garlanded waves of (*his*) glory, radiant as the moon, spread over the heavens.

(Verse 39.) His glory, nowhere insignificant, nowhere in the world becoming a thing of secondary importance, certainly not ceasing, not arising from the occurrence of a failure of righteousness, nowhere finding a lodging in the triple world, which is too small to contain its full single stage, is marking, white as jasmine, the swart body of Fortune's Lord [*Vishṇu*].

(Verse 40.) Wholly covered up by the masses of dust (*caused*) by the mighty host of this (*king*), who had an awful pair of long arms, as he advanced against the foemen's host, even the lord Sun forsooth plainly surrendered his own radiance in every region of space in an access of terror . . . what need then to speak of other beings?

(Verse 41.) When this crest-jewel of all monarchs, ready to conquer the (*various*) regions, eager to ravish foemen's fortune, advances on the shores of the ocean, the water, scented with the rutting ichor of the plunging elephants of the quarters of space, is scarcely drunk by the elephants of (*his*) army, lofty in pride, although they are threatened again and again by the angry drivers.²

(Verse 42.) Bearing aloft the *vrisha* [*rule of righteousness, or bull*], always having even vision, being free from foes, conquering countless cities, he is another worshipful Paramêśvara [*emperor, or Śiva*].³

¹ Literally, "bound."

² The king's elephants feel themselves superior to the elephants of the Quarters, because the king is the conqueror of the Quarters; hence they scorn to drink the water of the ocean.

³ The king is greater than Śiva. For he bears the *vrisha* ("righteousness," or "bull"), while Śiva is borne on it; he is *sama-dṛishṭi* ("impartial"), but Śiva is *a-sama-dṛishṭi* ("three-eyed"); he has no foes, but Śiva has the foe Kāma; he conquers innumerable cities, but Śiva conquered only the Three Cities. The figure is an *adbhūta-rūpaka*.

(Verse 43.) Though espoused by him personally from stainless high spirit, that dear mistress Fame wanders thus in company with his native glory through the world, renowned under the title of, "The Unfickle" (*and therefore*) regarded with jealousy by Fortune, penetrating to the realm of the sun, praised even by the gods, everlastingly pure.¹

(Verse 44.) Learned in the science of the bow, a unique seat of high spirit and truth, when he applied his energy to battle, how were his foes smitten by him !

(Verse 45.) His weighty sword, a tethering-post for the elephant of victory, a bright tress of the lady Fame, a glittering reflection of Fortune, who had her dear and constant peculiar abode on (*his*) long arm, an awful mace of Kāla uplifted to destroy foes in battle after battle, was assuredly radiant, wielded with valour, as he cut down the pride of haughty enemies.

(Verse 46.) To him, who had the radiance of the sun, was born a son, a hero magnificent in might, a peculiar ornament of his race, a destroyer of irresistible warriors, potent with a bright and awful long sword lusting to ravish foemen's fortunes, a site of a mass of lovely women's wanton glances, a Cupid of amorous sentiment, a treasure of virtues, Chāmundaṛāja.

(Verse 47.) His foes' mistresses constantly by hot sighs of deep sorrow caused the forest to be burnt up, and by floods of tears made it sprout into bud.

(Verse 48.) To him all the virtues, as if dislodged by the multitudes of enemies' vices which had unhappily risen up² and attained victory in this world, (*and as if*) rejected by all classes of beings in the universe, came for refuge.

(Verse 49.) He, best of warriors, cut to pieces troublesome foes, scattered like seeds of fame multitudes of strings of pearls falling out of the frontal globes of elephants smitten by his sword on the field of battle, the spaces whereof were intensely pounded by his horses' hoofs, and which were on all sides flooded with streams of blood vomited forth from wounds made by sharp missiles.

(Verse 50.) Upon him, who wielded again and again a washed sword and was beloved of the goddess of constant victory in battle after battle, fall over gently, over timidly, these naturally charming glances of the sky-traversing (*goddesses*), (*inspired*) by immediate love and fear, in mutual rivalry.

(Verse 51.) Sorely fearing his wrath, the mistresses of countless smitten princes in every region, having entered the forests, overcome by the influence of weariness, (*and*) falling into the sleep of sorrow, in dreams meet and are embraced by their respective lovers, and thus on their waking, imbued with amorous emotion, they do not quickly open (*their*) eyes.

(Verse 52.) Enemies, expelled from their seats by him, who is terrible in his wrath, have found no resting-place anywhere except in their mistresses' hearts.

(Verse 53.) Verily endowed with a hundred delights [*or*, attended by Brahman], succeeding again and again in imprisoning the mighty [*or*, arising to his dismay³ from Balin's prison], like Trivikrama, he always has been in possession of exalted fortune [*or*, Lakshmi].

(Verse 54.) Having found him, Fortune, who is charming in the embrace of the righteous, a cause of delight, has never quitted him even for a moment, as a female swan (*quits not*) the

¹ The idea of this is that though the king's ascetic fame was acquired lawfully by him and became as it were his lawful wife, yet it spreads freely all over the earth like a common woman. He and his fame are paralleled with Vishnu and Śrī (Fortune), but they have a point of superiority: Fortune is fickle, the king's fame is not. [I would take *amalēna* not with *mānēnēva* 'as if through temper,' but with *yēna* and *yasāṁ sahaiva sahaṣṭāna* as 'with her brother, prestige.' In the next verse *sandhānam ānitya riparō hatāḥ*—his enemies were annihilated by his making friends with them.—Ed.]

² I understand the reduplication in *edit-ōditair* in accordance with Pāṇini VIII. i. 10 (*Siddhānta-kaumudī* 2145).

³ For this meaning of the reduplication, see the previous note.

male swan, for he is most firm in (*his*) attachment, possessed of a stainless double lineage¹ [*or, bearing a stainless pair of wings*], an object of the love of the encircling earth [*or, a performer of amorous sport amidst the lotuses*].

(Verse 55.) He, who in battle bears a sword like Mandara, with which he has utterly shattered Sindhurāja [*or, has completely churned the ocean*] in sport, has found like Purnashōtama Fortune (*and*) a world-purifying conch-shell (*consisting*) of fame.

(Verse 56.) That lion his mighty sword, instantly devouring in sport all majesty of foemen as if it were a partridge, having a splendid mane of rays reddened by commixture of the intense radiance of the sun, awful with fangs (*consisting*) of its edge, displays itself in battle, making a loud noise with (*its*) blows, skilful in shattering the frontal globes of enemies' elephants.

(Verse 57.) Seeing not the likeness of his beauty of every member, the Love-god himself has long praised his own *anaṅgatā* [bodilessness, *or* character of Cupid].²

(Verse 58.) When he returns to the house, the women in the intensity of their joy, conceiving in imagination gleams of jewel-strings upon their happy bosoms, have made a festal scene of their own bodies, which are marked with *svastikas*, adorned both by shells (*consisting*) of (*their*) throats brilliantly beautiful by union with high pitcher-like breasts and by the lotuses of (*their*) bright faces. *

(Verse 59.) When they see the faces of love-lorn damsels surpassing in fragrance their messenger,³ the troops of bees fly down very hastily in a swarm, enjoying alternative good fortune from (*either the damsels'*) fever of hot sighs (*or*) from the dripping of their falling tears because of sorrow (*in the one case*) or joy (*in the other*) on his account when it is reported of him either that he is not coming or that he is coming.

(Verse 60.) With affection in every house, constantly on every road, and repeatedly, perpetually, in every court, attendant damsels, worn with intensity of desire, on all sides in emulation have stirred up into high waves [*stole* (?)—H. K. S.] by the scoops of their eyes the water of beauty lying in the person of this (*king*) who is lovely as the Love-god.

(Verse 61.) The Love-god is naturally *Anaṅga* ["Bodiless"] when he has dwelt here in the heart of lovers which is ablaze with (*the agony of*) separation.⁴

(Verse 62.) By him a certain unprecedent religion has been displayed on the face of the earth; his merit in maintaining it has reached the highest degree.

(Verse 63.) By bestowing unparalleled largesse of gold and jewels in unique affection for religion, he thus forsooth has raised holy Brāhmanas to most abounding dignity; overcoming without lamps the gathered gloom that had arisen in the upper chambers of their dwellings, rays from lamps (*consisting*) of jewels create radiance by day and night.

(Verse 64.)⁵ as he gave largesse of such degree to the multitude of Brāhmanas, by the splendour of his brilliantly demonstrated fame all those (*ancient*) kings such as Balin have been conspicuously outshone.

¹ Cf. above, Vol. XIII, p. 32 and note 1.

² The king is in the perfect beauty of his every limb an image of Cupid (*Kāma*, *Smara*, or *Anaṅga*). The latter has hitherto boasted of being *Anaṅga* ("bodiless one"), but that was because he had not yet seen the king; he was "bodiless" only so long as the king, his image in beauty, was not yet visible. It is thus suggested that the king himself is the true Love-god. [Or does *prastāṁsita* imply 'congratulated himself upon'?—Ed.]

³ *Dūṭhā*: if this is correct (and the reading seems to be certain), it must mean the mango-tree; but possibly it should be emended to *chāṭam*. [But should we not render 'owing to the fragrance which overspreads their faces (they blush, in fact) on seeing a go-between' and later *sva-vacana uditā* 'as their own lips pronounce the words'?—Ed.]

⁴ The latter half of this verse is unintelligible to me, and is perhaps corrupt. [I would translate the verse 'That the bodiless *Kāma* remained in a heart [*sc.* that of Rati] on fire with the pain of separation' was meet: but when he dwells in the hearts of us who have a [living] lover ["are loved," *kāntānām*] that is surprising to me.' The next verse refers (*guṇa*, *kōṭi*, etc.) to the bending of a bow; *dharma* = 'fashion.'—Ed.]

⁵ [The omitted passage seems to contain a list of *mahādānas*; cf. e.g. Vol. XIII, p. 128, v. 17.—Ed.]

(Verse 65.) Since men have heard of his marvellous bounty, the Cow of Plenty has been a thing not wanted, as also the idea of the wishing-stone¹ and the conception of the tree of desire.

(Verse 66.) He, the lotuses of whose feet are covered with masses of bees (*consisting*) of the kindled lustre of sapphires² fixed in the hair-knots worn by bowing foes, a seat of godliness, has caused to be made here this splendid exalted temple of the blest Maṇḍalēśa.

(Verse 67.) As long as Hara bears on his coronet³ the moon with the hue of a white umbrella joined to the fire⁴ of his (*frontal*) eye and as long as he bears the snake-ring like a new *yōga-paṭṭa*,⁴ as long as that Kaustubha shines on Vishṇu's breast like (*his*) love⁵ for Fortitude, so long may the praise of the blest Maṇḍana abide on the face of the earth !

(Verse 68.) Now on the fourteenth of Chaitra this list of dues of the god was made by Yaśodēva and other servants, (*likewise*) by others headed by Kirttirāja.

(Verse 69.) On each *bharaka* of candied sugar and jaggery belonging to the traders (*there was assigned*) one *varṇikā*; and on each *bharaka* of Bengal madder,⁶ thread, and cotton, one *rūpakā*.

(Verse 70.) Likewise the blest Maṇḍana, great of soul, by edict made out this list of dues on what is sold in the bazaar.

(Verse 71.) On every *bharaka* of coconuts, one fruit; on each *mūṭaka*⁷ of salt, a *mānaka*; from every thousand areca-nuts, one nut; on every *ghaṭaka* of butter and sesam oil, one *palikā*.

(Verse 72.) On each *kōṭikā* of clothing fabric were assigned one and a half *rūpakas*; on a *jālu*,⁸ two *pūlakas*⁹

(Verse 73.) For each house of the traders in the local bazaar (?) was assigned by him a *dramma*¹⁰ on the Chaitra festival and the festival of the sacred thread.¹¹

(Verse 74.) On the shops of the braziers was likewise imposed a *dramma* for the month, on (*each*) *vumvaka* of the distillers four *rūpakas*.

(Verse 75.) Under this constitution there was assigned on every house of the whole population a *dramma*, on the gambling (*-house*) two *rūpakas*.

(Verse 76.) On each *lagaḍā*¹² were assigned two *santas*, on each *karsha* of oil a *pāṇaka*; and similarly on each load of cattle-fodder a *vrisha-vimśōpaka*.¹³

¹ See above, p. 302, note 3.

² If *maulaṣ* is right, it is out of place, and should come in the first *pāda*, as I have implied in translation. Possibly, however, it should be corrected to *maunī*.

³ *Dhūma-danḍa*, literally "smoke-staff." There is apparently a play on words: *danḍa* is suggested by *chhatra*.

⁴ The band used by Yōgins to keep their limbs in a position of rigidity.

⁵ A play on the primary meaning of *rāga*, "colour," is intended.

⁶ *Rubia munjiata*, Roxb.

⁷ Apparently "bullock's load"; cf. Marathi *māṭh*, "bullock's pack-saddle," and Telugu *mūṭa*, "bundle," "pack."

⁸ This is perhaps connected with Sanskrit *jālaka*, "bunch of buds."

⁹ This in Sanskrit usually means "bundle"; it is the Hindi *pulā*, "a small bundle of sticks or plants."

¹⁰ See on this particularly the *Progress Reports of Asst. Arch. Supt. for Epigr., Southern Circle*, 1909, p. 80, 1910, p. 97, 1915, p. 102.

¹¹ See *Ind. Ant.*, 1909, p. 52.

¹² This seems to be connected with Marathi *lagaḍ*, "a bar of gold, silver, or other metal; a frame of wood or iron in which pitchers are carried upon beasts," and the Gujarati *lagaḍum*, "a coarse bag put on an ass in which the burden is placed."

¹³ See above, Vol. I, p. 166; Vol. XI, pp. 41, 59.

(Verse 77.) He likewise gave a *dramma* on each traders' association; the fourteenth day of the bright fortnight in each month was attached to every recurrence.¹

(Verse 78.) and on a pile of sugar² a *dramma*, on a water-wheel³ a *hāraka*⁴ of barley.

(Verse 79.) In (*his*) bounty also he granted on a clear twenty (*packs*) of loaded⁵ grain one *bharaka* in his piety, and on a *bharaka* (*of the same*) one *chhariga* (?).

(Verse 80.) He likewise constructed a town with white houses and furnished with gardens, and bestowed on the god lands duly measured out with their sides of access.

(Verse 81.) He moreover assigned one citron from each *lagaḍa*, and the *vāpa*⁶ from a *mūṭaka* of barley and likewise on *āṭavika*.

(Verse 82.) O kings on earth, hearken to the edict granted by me : observe it : for no other purpose are these my hands clasped upon this coronet.

(Verse 83.) Prithu and other kings have severally enjoyed the earth ; whence the latter together with them has again passed through various conditions.

(Verse 84.) There was born in due succession in the family sprung from Sādhāra the learned poet Sumati-Sādhāra, an ear-ring of the Muse.

(Verse 85.) Success be to his son the blest Vijaya-Sādhāra, by the sandal-paste of whose virtues there was made a beauteous forehead-ornament for the goddesses of the quarters of space,⁶ a moon to the lotuses of poets' faces !

(Verse 86.) His younger brother Chandra, having fame bright as the moon, pronounced this panegyric when a period of one thousand, one hundred, and thirty-six years was elapsing since the Śaka (*king*).

(Verse 87.) Āsarāja, son of the junior Śrīdhara of the Kāyastha race, happy of mind, wrote out here the panegyric.

(Line 53.) Engraved by Samvat 1136, on Friday, the 3rd day of the bright fortnight of Phālguna. Good luck !

NO. 22.—KADALADI PLATES OF ACHYUTA-RAYA : SAKA 1451.

By Prof. S. V. Venkateswara, M.A., and S. V. Viswanathan, M.A., Kumbakonam.

These plates belong to Mr. Yegnaswāmi Ayyar, son of Rāmachandra Dikshitar, a direct descendant of the donee of our grant, whose name is also Rāmachandra Dikshitar. He is the village munsiff of Kaḍalāḍi in North Arcot district and has still in his possession the land granted to his ancestor by Achyuta-Rāya. The plates were obtained from him through the kindness of His Holiness the Śaṅkarāchārya at Kumbakonam. They are in good preservation and are at present in the possession of the latter.

The grant is on five copper plates bored at the top and held together by a ring. The plates bear inscriptions on both sides, excepting the first and the last, which are engraved on one side only. They are numbered with Telugu-Kanarese numerals on the first side of each

¹ *Sarva-ācārtta-yutā*, i.e. assigned as the date of payment as it falls due annually.

² *Tavaṇi* (the ending is perhaps wrong) is connected with Marathi *tavaṇā*, "the heap of sugarcane as cut for the mill" (Molesworth).

³ See above, Vol. XI, p. 29.

⁴ Ibid.

⁵ A hand-cast or handful : cf. above, Vol. I, p. 161 n. Compare *nirvāpa*, above, Vol. XI, p. 56.

⁶ I understand *-sumdara-samjāta* . . . *tilakaḥ* as an irregular compound similar in structure to the Prakrit *dhavala-ka-ōvavā* (i.e. *dhavala-kṛit-ōpavā*, for *kṛita-dhaval-ōpavā*) : Pischel, *Gramm. d. Prakrit-Spr.*, 608.

plate. They measure 9·2 in. by 7·4 in. Including the arch at the top, the height is 11·7 in. The writing runs across the breadth of the plates and is quite legible. There are 216 lines in all. All the plates have raised rims. The ring with which the plates are fastened is 7 in. in diameter.

The characters are Nandināgari, excepting the words *Śrī-Virūpāksha*, the signature at the bottom, which is in large Kanarese characters. The average height of the letters is 2 in., except in the signature. The language is Sanskrit, full of errors, and the whole inscription is in verse, except in *Śrī-Gaṇādhipataye namaḥ* at the beginning and *Śrī-Virūpāksha* at the end.

The inscription contains some noteworthy orthographical peculiarities. The first is that punctuation marks are not supplied in their right places, all the lines of the verses being stopped with a vertical line. These have been pointed out in the footnotes to the text. Here and there we find instances of confusion between long and short *i* and *u*. In these plates, as in others, there is a redundant *anusvāra* before the double consonants *nya* and *nya*. Instances of these are: °*hiraṇya-payō-dhārā* for °*hiraṇya-payō-dhārā* (l. 126), °*amnyās=traya*° in the place of °*anyās=traya*° in ll. 127-8, °*Śāṃḍily-āmnvaya* instead of °*Śāṃḍily-ānvaya* (l. 159). °*Sāmāṇyō=yam* (l. 214) is a mistake for °*Sāmānyō=yam*. *Anusvāra* is wanting in some places, as it is superfluous in others, e.g. °*chadra* for °*chandra* (l. 1); °*Kāṃchyā* instead of °*Kāṃchyām* (l. 36). These, we think, are mostly to be attributed to want of care on the part of the engraver. Visargas are likewise redundant. Examples of this may be seen in l. 66, where we have °*gaṃḍaḥs=tōsha*° instead of °*gaṃḍas=tōsha*°; ll. 119-20 °*samyuktahm=ēkabhōgyam* for °*samyuktam=ēkabhōgyam*. The confusion between the sibilants, palatal, dental and lingual (श, स and ष), is as common here as in the other grants of the Vijayanagara kings. Instances of this are:—°*shu=apy=a-sēshēshu* in l. 39 instead of °*shu=apy=a-sēshēshu*; °*sāmsōshya* in l. 54 for °*sāmsōshya*; °*sudhībhi* in l. 72 in the place of °*sudhībhi*; °*a-sēsha* in l. 104; °*kāstti* in l. 128; °*sēshṭa* in l. 129 and °*śāsanēna* in l. 207 are written instead of °*a-sēsha*, °*kāstti*, °*sēsh(t)a*, and °*śāsanēna* respectively. A conjunct consonant is made up of the full form of the first consonant and the curtailed form of the second consonant. The *r* sign is inserted over the line, where necessary, except in a few instances of double consonants, e.g. °*avujya* in l. 34 and °*chatubhuja* in l. 51. In certain cases instead of a double consonant only one of the consonants is written. As in the other inscriptions of the same dynasty, this one also contains the *birudas* attached to the kings—for example °*Bhāshegetappuvarāyagandh*, °*Hindurāyasuratrānaḥ*, etc. *Rāya* and *Mahārāya* appear frequently in the place of *Rājā* and *Mahārāja*. There are instances also of Tamil usage. °*Tāmbra-sāsanam* in ll. 208 and 209 is evidently the Tamil form of °*tāmra-sāsanam* and *varsha* is usually written in Tamil as *varusha*.

The inscription records the grant of the village of Kadalāḍi *alias* Patendal, by Achyuta-Rāya to Rāma-chandra-Dikshita, son of Nāgā-Bhaṭṭa, who in his turn splits up the village granted into 110 *vrittis* and distributes them among other Brāhmans, who are 46 in number. The inscription naturally falls into 4 parts—(1) Vv. 1-3, benedictory verses; (2) Vv. 4-36, the genealogy of the dynasty as far down as Achyuta-Rāya; (3) Vv. 37-104, the terms of the grant, names of donees, etc. etc.; (4) Vv. 105-111, the names of the composer, the engraver and the imprecatory verses at the end. Vv. 1-3 invoke Śambhu, the Varāha incarnation of Viṣṇu and Gajānana. Vv. 4-8 trace the genealogy of the family as far as Narasa Nāyaka. Vv. 9-11 give an account of the gifts made by the king and his exploits; his victory over the kings of the South, Chēra, Chōla and Pāṇḍya. Vv. 12 and 13 mention the sons of Narasa, Vira Nṛ-siṃha and Kṛishṇa-Rāya by Tippāji and Nāgala. Vv. 14-18 contain the praise of Vira Nṛ-siṃha as king and his gifts at holy shrines; and the beneficent rule of Vira Nṛ-siṃha. Vv. 19-23 likewise describe the deeds of valour of, and the gifts made by, Kṛishṇa-dēva-Rāya. Vv. 24-27 describe how Achyuta succeeds Kṛishṇa-Rāya after the latter's death. We have in these a long

list of the *birudas* attached to the name of the king. Vv. 28-36 are in praise of Achyuta-Rāya, who succeeds his brother.

The verse stating that Achyuta was the son of Ōbāmbikā, a step-mother of Kṛishṇa-Rāya, and thus making Achyuta a step-brother of the latter, is not found in our inscription. Our record states, however, that Kṛishṇa-Rāya, after his death, was succeeded by Achyuta-Rāya, a younger brother of his (*anujanma*—v. 29). The genealogy thus stops with Vira Nṛ-simha; and Kṛishṇa-Rāya and Achyuta succeed the latter in due course.

Among the shrines to which Achyuta paid pilgrimage and at which he is said to have made gifts is *Viriñchipuram*, which is a locality in the Vellore *Taluk*, North Arcot district. It contains a Śiva temple, known as that of Mārgasahāyōśvara. The late Rai Bahadur V. Venkayya has identified Marataka-puri (mistake for Marakata-puri), appearing in the Satyamangalam plates of Dēva-Rāya II¹ and in the Madras Museum plates of Śrīgiri-bhūpāla² with Viriñchipuram. He says that Marakata-puri is derived from Marakatavalli, the goddess of Viriñchipuram.³ The city of Viriñchipuram is mentioned as the capital of the country ruled over by Śrīgiriśvara, a brother of Dēva-Rāya II. Of the grants of the second Vijayanagara dynasty so far published it is only in this that Viriñchipuram is mentioned among the shrines visited by Vijayanagara kings. Perhaps at the time of this grant Viriñchipuram, which a century before was ruled over by a branch of the Vijayanagara family, had been lost to them and had come to be classified with Kāñchi as a place of pilgrimage.

(Vv. 37-42) In the Śaka year 1451 according to the Śālivāhana reckoning, in the year Virōdhin, in the month Makara, on the trayōdaśī day of the dark half of the month and on Tuesday (was made the gift) on the banks of the river Tuṅgabhadra, in the vicinity of Virūpāksha, to the best of Brāhmins, Rāmachandra Dikshita, the son of Nāga-Bhaṭṭa. Thus the necessary details as regards the date are given.

The date of the grant is of considerable interest to students of history. In the course of his introduction to the Ūnamāñjēri plates of Achyuta-Rāya⁴ Professor Kielhorn has remarked as follows :— "The latest date for Kṛishṇa-Rāya known to me from published inscriptions corresponds to Friday, 23rd April, A.D. 1529, and the earliest date for Achyuta-Rāya to Monday, 15th August 1530." But the astronomical data given in our inscription unmistakably refer to the year 1451 Śaka, etc., i.e. Jan. 1530 A.D. Dr. Kielhorn's earliest date for Achyuta-Rāya has therefore to be revised in the light of this inscription. It is clear also that Achyuta-Rāya succeeded his brother after the natural death of the latter (V. 29 *गतवति*⁵ *सुरजीकं जयराजं निजता*⁶ *तदनु तदनुजन्मं पुण्यकर्माश्चरैः* etc.). So the death of Kṛishṇa-Rāya must be placed before January 1530 A.D.

The only inscription among those as yet discovered that may seem to raise some difficulty as regards our chronological result is No. 369 of 1912, copied by the Madras Epigraphical Survey. It belongs to the reign of Vira-pratāpa Kṛishṇa-dēva Mahārāya and is dated Śaka 1453, *Virōdhi Sittirai su di 10, Attam*. But another inscription in the same temple⁸ records a sale of land made in the reign of Achyutayya-dēva Mahārāya, son of Vira-pratāpa Narasa Nāyaka, dated Śaka 1452, *Vikṛiti, Makara su di 13, Monday, Pūṣam*. If 1452 Śaka year is Vikṛiti, then 1453 cannot be Virōdhin. It is therefore clear that the figure 1453 must be a mistake for 1451, as the figure nearest to 'three' in Tamil characters is 'one'.⁹

¹ See *Ep. Ind.*, Vol. III, p. 35.

² *Ep. Ind.*, Vol. III, p. vii.

³ Read *गतवति*.

⁴ Read *जन्मा पुण्यकर्माश्चरैः*.

⁵ *onnu* (one); cf. *mūnnu* (three). [The inscription reads clearly 1453 and not 1451.—H. K. S.]

⁶ *Ep. Ind.*, Vol. VII, p. 308.

⁷ *Ep. Ind.*, Vol. III, p. 148.

⁸ Read *निजता*.

⁹ No. 373 of 1912, *Ep. Surv. Report*.

Vv. 42-48 record the name of the village granted with its boundaries and neighbouring villages. The village of **Kaḍalāḍi**, the object of the grant, is situated in **Paḍaviḍu-mahārājya** in **Jayamkonda-chōḷa-maṇḍala**, in **Phalgunna-kōṭaka**, in **Paṅgala-nāḍu**, on the outskirts of **Kaṭṭagara**. It is surrounded on the north by the village of **Sennāripāḍi**; on the east by the village of **Pālapūr**; on the south by the village of **Chiyanēndil**; and on the west by **Skandanadi** and the village named **Haritālāmaṅgala**. Besides the localities noted above there are others mentioned in the grant. Among these are **Siṅgaṇappāḍi**; **Kunnaturu**; **Māmbakam**, and **Paṭēndal**. Of these **Paḍaviḍu mahārājya** was probably called after a town bearing the name **Paḍaviḍu** in the North Arcot district. This town was very likely the centre round which the **Mahārājya** was situated. **Pālapūr** may be either **Polur** or **Pollilur**. The former is a **Taluk** in the North Arcot district, in which the town **Paḍaviḍu** is; while the latter is the scene of a battle between the English and **Haider Ali**.

Vv. 48-53 describe the terms of the grant, such as are usually found in all Vijayanagara grants. The villages are given in perpetuity as *sarva-mānya*, to be enjoyed by the donee and his descendants. With the grant of the village go also the rights over the property therein. The king reserves to himself no right over the village granted. The village, as the inscription states, is given as *ēka-bhōgya*, which implies the exclusive ownership of the property and the rights over it by a single individual. In effect, however, it is found that the land is not *ēka-bhōgya*, as part of it is divided among others and a portion reserved for the gods. Land which is thus enjoyed by 2 or more parties goes by the name of *gaṇa-bhōgya* or *tri-bhōgya*. The word *ēka-bhōgya* in the particular context can be explained only by the fact that the grant was made in the first instance only to one individual, **Rāmachandra-Dikshita**, who divided the land among the **Brāhmins** of the sect to which he belonged. It is, moreover, not clear whether, as in the original grant, **Rāmachandra-Dikshita** gave to the **Brāhmins** along with the land allotted among them, rights over it also. Perhaps the rights over the property were reserved by the donor, the donees being allowed only the enjoyment of the fruits accruing from the land.

In vv. 54-104 the village granted to **Rāmachandra-Dikshita** is divided into 110 *vr̥ttis*, and the portions allotted among various **Brāhmins**. The donee takes 27 shares for himself (V. 54). He leaves one *vr̥tti* for **Vishṇu** and one likewise for **Śiva** (V. 55). The remaining 81 *vr̥ttis* are divided among 47 **Brāhmins**, the division ranging from $\frac{1}{2}$ *vr̥tti* to 8 *vr̥ttis*. The donees belong to an important sect of **Brāhmins**, the **Poysala Kannaḍa sect**—judging from the names and from the fact that there are two of the *Sāma śākhā* (Nos. 14 and 29 below). The **Poysala Kannaḍa** are, I am told, the only sub-sect of the **Kannaḍa Brāhmins** where we find *Sāma-vēdins*. The exact amount given to each, the name of his father and the particulars of his *gōtra*, *sūtra*, and *śākhā*, the nature of the learning of each etc. are appended below in a table.

49. Ekāba .	Divākara-Bhaṭṭa .	Yajus .	Parāśara	1	

It is clear from the list given above that of the 47 donees among whom the land was distributed 24 were R̥ig-vēdins (Bahv-ṛicha); 15 Yajur-vēdins and 2 Sāmāgas. It is not stated to which Vēda the remaining 6 donees belonged; 10 were of the Kāśyapa gōtra; 8 of the Bhāradvāja; 6 of the Gautama; 4 each of the Viśvāmitra and the Ātrēya; 3 each of the Śāṇḍilya and the Jāmadagnya-vatsa; 2 each of the Kauśika and the Harita; and one each of the gōtras Maudgalya, Śrīvatsa, Gārgya, Kapila and Parāśara. 6 belonged to the Bōdhāyana sūtra, the rest belonged presumably to the Āpastamba sūtra, though this is distinctly stated only of Rāmachandra-Dīkshita, the main donee. As regards relationship of the other donees to Rāmachandra-Dīkshita, it appears probable that Nos. 4-6 were his brothers, and No. 7 a cousin of his. No. 21 was apparently a brother of No. 22, and No. 27 of No. 28. All the donees probably stood in agnate or cognate relationship to Rāmachandra.

As regards the distribution of land among the donees, the allotment among the 47 Brahmins, when totalled up, comes only to 65 *vr̥ttis* and not to 81, as it should according to the grant (see above). It is not known what became of the remaining 16 *vr̥ttis*.

After the names of the donees, etc., thus given the record mentions that Paṭēṇḍal was another name by which Kaḍalāḍi was known (V. 103). [If it was a *grāmagrāma* it must be a separate village.—H. K. S.] Then comes the name of the person who composed the edict of the king. His name was Sabhāpati, the famous rhymester of the Court (V. 105). V. 106 gives the name of the engraver, Virap-āchārya, the son of Mallāṇa, whose family were the hereditary engravers of the grants of the Vijayanagara kings. Under all these is the signature at the bottom of the last plate, Śri-Virūpāksha, written in bold Kanarese characters, after the concluding imprecatory verses common to all the Vijayanagara grants.

TEXT.¹

[Metres : vv. 1-4, 6-8, 12-14, 18, 19, 25-27, 35, 37-103, 105-110, *Anuṣṭubh*; vv. 5, 20, 29, 34, *Sārdūlavikr̥ita*; vv. 10, 11, 15, 16, 17, 21-23, 28, *Sragdharā*; v. 9, *Harinī*; v. 24, *Dodhaka*; vv. 30 & 104, *Āryā*; vv. 31, 111, *Śalinī*.]

¹ From the original plates.

[The first 28 verses of the grant are not printed here, as they are the same as those found in the other grants of the Vijayanagara dynasty that have been published by us. They appear in the Kāñchipuram plates of Kṛishṇa-dēva-Rāya (Vol. XIII, pp. 126-9). The first 26 verses are found in the Kuḍiyāntaṇḍal grant of Vīra Nṛsiṃha (Vol. XIV, No. 17). The Bēvinahalli grant of Sadāśiva contains the first 29 verses of our grant (Vol. XIV, No. 16). Such slight variations as occur are apparently due to mistakes of the engraver, and are not of interest to students of history or epigraphy.]

^१ Read वंजिन.^२ Read परेनृपे.^३ Read राजैत्यनिध.^४ Read °स्थी.

^५ This pāda appears in other Achyuta plates as विजयनगरराजद्वसिंहासनस्थः. This is not suited to the reading in this inscription, as रत्नसिंहासनस्थः appears in the previous pāda. But to style a king as विजयनगरवासी ("residing in the city of Vijayanagara") is unusual, and the poet seems to have been carried away by consideration of rhyme in विजयनगरवासी and कीर्तिपूर्त्वा विलासी.

Vv. 28. Trace the genealogy of the second Vijayanagara dynasty as far down as Achyuta which runs as follows :—

V. 29. After the departure to the other world of Kṛishṇa-Rāya his brother Achyuta-Rāya succeeded him on the throne.

Vv. 30-32. Describe the deeds of valour and greatness of Achyuta.

V. 33. The gifts of Achyuta at the holy shrines of Gokaṇa, Saṅgama, Chidambaram, Śopādri, Viriñchi, Kāñchi, Kālahasti, and Kumbhaghōṇa.

Vv. 34-36. Praises of the king.

Vv. 37-39. In the Śaka year 1451 according to the Śālivāhana reckoning, in Virōdhin, in the Pushya month, on the Makara-Saṅkrama, on the 13th day of the dark half of the month, on Tuesday, on the banks of the Tuṅgabhadra, in the vicinity of Śri-Virūpāksha, (the gift was made)

Vv. 40 and 41. To the great soul Rāmachandra-Dikshita, the best of Brāhmins, who very well deserved the gift of land, the son of Nāga-Bhaṭṭa, of the Yajus-sākhā,

Vv. 42-48. Of Kaḍalādi, the ornament of the province of Jayamkoṇḍachōḷa, situated in Paḍaviḍu-rājya, in Phalgunna-kōṭaka, in Virvaḷḷu-pattuka, in Paṅgala-nādu, on the west of Skandanadi, bordering on Kaṭṭagara, to the east of Pālapūr, to the south of Chīyanēndil, to the west of Haritālāmāṅgala and to the north of Sēnnāripādi.

Vv. 49-52. Describe the details of the contents in the village granted and also the terms of the grant, as generally occurring in other Vijayanagara grants.

Vv. 53 and 54. The village is divided into 110 *virittis* and allotted in small portions to Brahmins of various *gōtras*, *sūtras*, etc.

Vv. 55-104. Give the names of the donees, their *gōtra*, *sūtra*, *sākhā* and the number of shares allotted to each.

Vv. 105 and 106. Give the names of the composer of the decree of Achyuta-Rāya and the engraver of the inscription as *Sabhāpati* and *Virapāchārya*.

Vv. 107-111. The admonitory verses above the signature Śri Virapāksha.

No. 23.—THE BANGARH GRANT OF MAHI-PALA I: THE 9TH YEAR.

BY R. D. BANERJI, M.A., INDIAN MUSEUM, CALCUTTA.

This grant was discovered among some ruins called Ban Rāja's garh or Bangarh, in the Dinajpur District of the Presidency of Bengal, during the latter decades of the 19th century. It was kept for some time in the office of Bābū Nṛsiṃha Charaṇa Nandi, Zamindār of Nawābbāzār in the same district. In 1886 Mr. Giridhari Basu sent several rubbings of this inscription to the Asiatic Society of Bengal. These rubbings were examined by the late Rāja Rājendra Lāla Mitra, who pronounced the find to be an important one, but was prevented by his failing eyesight from attempting a decipherment. The rubbings were then sent by Dr. A. F. R. Hoernle to the late Dr. F. Kielhorn, who published his reading of this important record in the Journal of the Asiatic Society of Bengal in 1892.¹ The subsequent history of the plate cannot be definitely traced. It appears to have been sent to the Baṅgiya Sāhitya Parishad by the late Mr. Nanda Kṛishṇa Basu, C.S., then Collector of Dinajpur. In the Bengali year 1305 (1898 A.D.) Bābū Nāgendra Nātha Vasu Prāchya-vidyā-mahārṇava Siddhānta-vāridhi re-edited the record in the Journal of the Baṅgiya-sāhitya-parishad.²

The new edition of the text was in no way an improved one, but on the contrary was disfigured by mistakes, though the author had the original plate before him. A fresh edition of the record, accompanied by a translation, was published in 1912 by Mr. Akshayakumāra Maitrēya in a book entitled *Gauḍa-lēkhā-mālā*, in which the author collected all published records of the Pāla kings of Bengal.³ Though Mr. Maitrēya's translation is an excellent one, yet his version of the text was no improvement. It was a very careless copy of the text published by the late Dr. Kielhorn. The corrections made by Mr. Maitrēya are conjectural in the majority of cases, and he has taken Dr. Kielhorn's cautious version of ill-preserved portions of the record to be the only version possible. In the winter of 1911-12, when the authorities of the Baṅgiya Sāhitya Parishad exhibited their collection of antiquities and literary relics, this grant was sent on loan to that exhibition by Bābū Nāgendra Nātha Vasu, who is the present owner of the plate. I obtained a loan of it from the same gentleman, and the now accompanying ink-impressions were prepared by Munshi Wāhid-ud-dīn Ahmad of the Archaeological Section, Indian Museum. On examining the original plate I found that it had never been properly cleaned and in many cases letters were still filled up with earth. The plate was very carefully cleaned before estampages were taken. In the subjoined edition Dr. Kielhorn's version of the text has been improved in some places, the most important of which is the reading of the date. Dr. Kielhorn could not read any part of it, as he had tried to decipher the record from pencil-rubbings which were taken when this part was full of impurities. Bābū Nāgendra Nātha Vasu, instead of cleaning the plate, stated that the numeral of the year and the name of the month had been scratched out. Mr. Maitrēya has simply copied this statement without attempting to verify it. After cleaning the plate I found that the portion bearing the date has suffered from corrosion only, but no one had ever scratched any part of it. The year, month and day are still legible, the numeral for the year having suffered most. The impressions published here are the first of this important record, no one having supplied a fac-simile, when editing it either in English or in Bengali.

Like all other Pāla grants, this record also is incised on a single plate of copper, measuring 14½" by 12½". It is surmounted by a highly wrought ornament, which was the seal of the Imperial Pālas. It is pointed at the top and bears in the centre a beaded circle with raised

¹ *Beng. Asiat. Soc.'s Jl.*, 1892, pt. 1, p. 77.² *Baṅgiya-sāhitya-parishat-patrikā*, Vol. V, p. 164.³ *Gauḍalēkhamālā*, Vol. I, p. 99.

rim, supported and surrounded by arabesque work. On the top of this circle is a conch (*śaṅkha*). Inside the area of the circle is divided into two equal parts, the upper half bearing a representation of the Buddhist wheel of law (*dharma-chakra*) on a pedestal, surmounted by an umbrella and with a deer couchant on each side, while the lower half bears the name of the king *Śrī-Mahipāla-Devasya* in raised letters, supported by arabesque work.

The plate bears sixty-two lines of writing, thirty-four on the first side and twenty-eight on the second. After the *Oṃ Svasti* in l. 1 the first twenty-four lines contain twelve verses, which describe the genealogy of the *Pālas* from *Gō-pāla* I. to *Mahī-pāla* I. The rest of the record, with the exception of the seven imprecatory verses and the two verses giving the name of the *dūtaka* and the account of the mason, is in prose. The text is generally correct, and the majority of the mistakes is to be found in the prose portion of the record. In addition to the usual employment of *va* for *ba*, we find that the mason or the author had a predilection for the palatal in the place of the dental *sa*. In one or two cases, on the other hand, *sa* is used in the place of *śa*; e.g. in *saṭa* and *sikhara* in l. 25. The doubling of consonants with a subscript or superscript *r* is rare, e.g. *Maitrīm* (l. 1), *-ātaputrā* (l. 10), *°tair-ijagatīm* (l. 11), *°yair-jjaladhi* (l. 15).

The characters of the inscription show well-developed Bengali forms in the initials of *a* and *u* among vowels and among consonants *ka*, *kha*, *ga*, *cha*, *dha*, *va*, and *ha*. The rest of the alphabet shows forms gradually advancing to the Bengali alphabet of the 12th century A.D. In one case at least the complete Bengali form of *ja* is used, i.e. in *jivā* (l. 3). This is really the proto-Bengali alphabet, while the 12th century alphabet of the *Deopārā* inscription of *Vijaya-sēna*, which Bühler termed proto-Bengali, is in reality the fully developed Bengali alphabet. Final forms of *ma* and *na* are used, e.g. in *bhūbhritām* (l. 7) and *-gunān* (l. 13). The sign of *avagraha* is inserted in the majority of cases. The language of the record is Sanskrit.

The inscription refers itself to the reign of the Emperor *Mahī-pāla* I. of Bengal, whose titles are *Paramēśvara*, *Parama-bhaṭṭāraka* and *Mahārājādhirāja*, and who mediated on the feet of the *Parama-saugata*, *Mahārājādhirāja Vighraha-pāla-dēva* (III.). It records the donation of the village of *Kuraṭa-pallikā*, with the exception of the *Chuṭa-pallikā*, in the *Gōkalikā maṇḍala* of the *Kōṭivarsha viśhaya* of the *Puṇḍravardhana bhukti*, by the Emperor, after a bath in the Ganges on the occasion of the *Vishuva-saṁkrānti*, to a *Brāhmaṇa* named *Kṛishṇāditya-sarmman*, son of *Bhaṭṭa-putra Madhusūdana* and grandson of *Bhaṭṭa-putra Hṛishikēśa*, who is an immigrant from the village of *Hastipada*, an inhabitant of the village of *Chāvaṭi*, of the *Parāśara gotra*, *Śakti*, *Vasishṭha* and *Parāśara pravara*, a student of *Vājasaneyin* branch of the *Yajur-vēda*, and well-versed in grammar (*vyākaraṇa*), logic (*tarka-vidyā*) and the sacred philosophy (*mīmāṃsā*). The grant was issued from the royal camp or residence of *Vilāsa-pura*, on the 12th day of *Phālguna* of the 9th year of the king's reign. The *dūtaka* of the grant was the minister (*mantrin*) *Bhaṭṭa Vāmana*. It was incised by the artisan (*śilpin*) *Mahidhara*, son of *Vikramāditya*, an inhabitant of *Pōshali*. The *Āmagachhi* grant was incised by *Śasidēva*, the son of this *Mahidhara*. The record is here re-edited from the original.

TRANSLATION.

V. 1. Om Hail ! Victory to the illustrious Gopāla-dēva, who with his heart gladdened by the jewel of compassion, held love (for his subjects) higher (than any other thing), who had washed away the mud of ignorance (of the people) by the pure water of the stream of his perfect understanding and knowledge, who had obtained enduring peace (for his kingdom) by defeating the attacks (of princes) who were led by (their own) passions, (and who therefore was) like another Daśabala (Buddha), who with his heart expanded by the jewel of compassion held Maitrī to be dearer than others, who washed away the mud of ignorance by the pure water of the stream of knowledge of the perfect enlightenment, (and) who had obtained eternal peace by having defeated the attacks made by the Kāmaka foe (i.e. Māra).

¹ Read *Rishikēśa*.² Read *Madhusūdana*.³ Read *sarmmaṇe*.⁴ Read *Viśuva*.⁵ The *va* is superfluous.⁶ Read *vidhivat*.⁷ Read *tasya*.⁸ Read *ayāti*.⁹ There is a superfluous *anusvāra* over the *m*.¹⁰ Read *para*.¹¹ Read *krimir*.¹² Read *śununā*.

V. 2. From him was born the king Dharmmapāla, whose grandeur mocked the charm of the Ocean of Milk, whose place of birth was the same as that of Lakshmi¹ (or who was the place of the birth of Lakshmi), who exacted the payment of revenue (*kara*) evenly, (or who was full of crocodiles, "*makaras*"), who was capable of bearing the weight of the world, (or who was capable of bearing the maintainer of the Earth, i.e. *Vishnu*), who was the only refuge of kings that had sought protection out of fear of having the wings (of their armies) cut off (or who was the only refuge of mountains who had sought shelter out of fear of their wings being cut off by *Indra*), who was intently engaged in maintaining the dignity (of the social orders) (or which was intently engaged in maintaining boundaries) (and) who was the receptacle of valour (or who was the home of the rays of the sun).

V. 3. To him, who had taken the vow of truth like *Rāma*, was born a younger brother, like him in virtues, named *Vākṣpāla*, who was the equal of *Saumitri* (i.e. *Lakshmaṇa*) in greatness, who, endowed with grandeur, was the only abode of policy and valour and who, remaining under the rule of his (elder) brother, made the (ten) cardinal points free of the banners of the enemies and brought them (i.e. the cardinal points) under a single umbrella.

V. 4. From him was born a victorious son, named *Jayapāla*, who, purifying the world by his deeds, which were like that of *Upendra* (*Vishnu*) and vanquishing the enemies of religion in battle, made his elder brother *Dēvapāla* enjoy the happiness of having the world for his kingdom.

V. 5. His son, the illustrious *Vigrahapāla*, was born like *Ajātaśatru* (*Yudhisṭhira*), the keen edge of whose spotless sword, like a stream of pure water, wiped away the toilette marks of the wives of his enemies.

V. 6. He begot a son, the illustrious Lord *Nārāyaṇa*, who in (his own) body was possessed of the qualities divided by the guardians of the cardinal points for supporting the world, who adorned by his own deeds the throne of law obtained by righteousness (or by inheritance), the stone foot-stool of which was surrounded by kings with the lustre of their crest-jewels.

V. 7. His son was the illustrious *Rājyapāla*, a ruler of the middle world, who, by (excavating) tanks, the beds of which were as deep as the bed of the ocean, (and) by (erecting) temples whose sides were as high as the ridges of the principal mountains (*Kula-bhūdhara*), had become famous.

V. 8. As from the eastern mountains the Sun, so from him, in the womb of *Bhāgya-dēvi*, the daughter of the high-crested *Tuṅga*, the moon of the *Rāshṭrakūṭa* family, was born a son, the ocean of lustre, the illustrious *Gōpāla-dēva* (and) who became for a long time the only husband of the earth, who had only one husband (i.e. was the sole Lord of the earth), which (earth) was clad in the four oceans decorated by the rays of many jewels as its coloured garment.

V. 9. *Lakshmi*, being possessed of the powers of valour (*utsāha*), counsel (*mantra*) and rule (*prabhu-śakti*, i.e. *kōsha*, *danḍa* and *bala*²), keeping the earth pleased (just as a good-natured lady keeps well-pleased) her co-wife served her husband (*Gōpāla*), who was not lacking in kingly virtues, with ever-increasing charm and devotion.

V. 10. As the moon, the scatterer of myriads of rays, from the Sun, so from him was born in course of time *Vigrahapāla-dēva*, the scatterer of innumerable riches. By his rise (or birth), who was pleasing to the eyes on account of personal beauty (or by his soft rays), who

¹ This refers to the descent of the Pāla kings from the Sea (cf. *Pālas of Bengal, Mem. B. A. S., Vol. I, p. 46*). This fact is based on the *Rāmācharita* of *Saundhyākaranandin*, published by *Mahāmahōpādhyāya Hara Prasād Sāstri (Mem. B. A. S., Vol. III, I, 3-4)*.

² This explanation is based on *Amarakōśa* 2, VIII. 19, quoted by *Mr. Akshaya Kumāra Maitreya* in his *Gauḍalīkhamālā*, p. 99, note.

was pure, (or spotless), who was learned in the (sixty-four) arts (*kalās*) (or who was formed of sixteen parts, i.e. *kalās*), were annihilated the sufferings of the world (or the heat of the earth caused by sunshine).

V. 11. Whose war-elephants, like clouds, having drunk clear water in the eastern country, which abounds with water, after that having roamed according to their own wills in the sandal forests of the valleys of the Malaya (country), (and) having caused a coolness in the Maru lands by throwing dense sprays (of water emitted from their trunks), enjoyed the slopes of the Himālayas (*Prāśyādri*).

V. 12. From him was born, the protector of the earth, the illustrious Mahipāla-dēva, who, slaying all enemies, (and) having obtained his paternal kingdom, which had been snatched away through pride of prowess by people who had no claim to it, placed his lotus-like feet on the heads of kings.

Ll. 24-62. From the illustrious (and) victorious camp (pitched) at Vilāsapura, where the illusion of the Sētubandha (bridge built for Rāma between India and Ceylon) with a chain of mountain tops placed (in the sea) was produced by water-craft of various kinds proceeding along the path of the Bhāgīrathī; where exceedingly dense arrays of rutting elephants darkened (i.e. obscured) the beauty of the day (and) caused the illusion of the beginning of a perpetual rainy season; where the cardinal points were made grey with the dust dug by the sharp hoofs of the countless army of horses (that were) presented by many kings of the North; where the (surface of) the Earth bent under the weight of the endless infantry of the kings, one and all, of Jambūdvīpa, (who had) come for serving (their) overlord; he, the Paramēśvara, Paramahatṭāraka, great king of kings, the illustrious Mahipāla-dēva, who meditated on the feet of the illustrious Vigrahapāla-dēva, the devout worshipper of the Sugata, the great king of kings, being in good health, honours, informs and orders (the following persons), in the village of Kurata-pallika with the exception of Chūṭa-pallikā with the low ground (*tala*) which belongs to the personal (royal) domain, in the maṇḍala of Gōkalikā, in the vishaya of Kōṭivarsha, in the Puṇḍravardhana bhukti, all royal officers assembled (here follows names of officers, 11. 22-41) and others, (who are) royal dependants, but not mentioned in the lists of superintendents (*adhyakshas*), the neighbouring Brāhmaṇas and others, Mahattamas and other families down to Mōdas, Andhras and Chaṇḍālas, "Be it known unto you, that this village which has been mentioned above, as far as its boundaries, grass and pasture-lands, with low lands, with assignments, with mango and Madhūka trees, with land and water, with hollows and salt lands, with the ten offences, with the right of extirpation of robbers, with the exemption from all oppression, not to be entered by irregular or regular troops, not to be meddled with by anybody, with all revenues, shares, rights of easement, taxes, (rights of mining) gold, etc., by the law of *bhūmi-chchhidra*, as long as the Sun and the Moon will last, for the increase of the merit and fame of my father and mother as well as mine, in the name of Lord Buddha, has been granted by us by means of a copper-plate grant, after bathing in the Ganges, according to law, on the occasion of the Vishuva Samkrānti, to the Bhaṭṭaputra Kṛishṇāditya-śarman, son of the Bhaṭṭaputra Madhusūdana, grandson of the Bhaṭṭaputra Hṛishikēśa, an inhabitant of the village of Chāvaṭi, an emigrant from the village of Hastipada, (who is) well versed in religious law (*Mīmāṃsā*), grammar and logic, a Brahmachārin of the Yajur-veda, of the Parāśara gōtra, whose *pravaras* are Śakti, Vasishṭha and Parāśara, (here follows a valedictory sentence in prose). In the year 9 on the 12th day of Phalguna (here follows 5 of the usual valedictory verses)" For this grant given to the best of the twice-born, by the illustrious Mahipāla-dēva, the counsellor Bhaṭṭa Śrī-Vāmana was selected as the *dutaka* (20). This grant was incised by the artisan, the illustrious Mahidhara, son of Vikramāditya of the village of Pōshali (21).

No. 24.—PENUKONDA PLATES OF MADHAVA II (III).

By LEWIS RICE, C.I.E.

These plates are of special interest as being an admittedly genuine record of the early Gaṅga kings of Gaṅgavāḍi, or Mysore. They were brought to notice by Rao Sahib H. Kṛishṇa Śāstri in his *Epigraphical Report* for 1913-4, and belong to a resident of Penukonda, or, more correctly, "Penugonda, in the Anantapur District of Madras, which borders Mysore on the north-east. It was the seat of government of the Vijayanagar kings after the loss of their capital. The plates have been among the family records of a *purōhit* of Penugonda, named Ādem-Bhaṭṭa, for a very long time, his ancestors being hereditary *purōhitas* of the place. They were produced for examination by the *Karṇam* Venkatarayappa of Kanchasamudram in the Hindupur *taluq*.

There are three plates, of which the two outer ones are engraved on the inner sides only. Four faces are thus inscribed, each containing five lines. The whole inscription is in a good state of preservation.¹ The characters are of an ornamental type and well formed, similar to those used in the best engraved Gaṅga grants, of which we have examples in Nos. 1, 18, 27, 28, 31 and others in the list below. The letters in the present case, measured by the single ones within the lines, are exactly $\frac{1}{4}$ " in height. Except for the partial omission of one step in the pedigree, the engraver's work is remarkably free from errors. But in the word *maṭi* (l. 4) the *ma* is formed like *che*; and in the word *dushkham* (l. 18) an *m* has been put for *sh* [or for the *jihvā-mūliya*.—Ed.], but these two letters closely resemble one another. According to Mr. Kṛishṇa Śāstri—"The plates measure roughly $8\frac{1}{4}$ " by $2\frac{1}{8}$ ", and are strung on an oval ring, whose major and minor axes are $2\frac{1}{8}$ " and $2\frac{1}{4}$ " respectively. The edges of the ring are secured at the bottom of a circular seal, $1\frac{1}{4}$ " in diameter, which bears at its top, on a countersunk surface, a standing elephant, facing the proper left, with its trunk hanging down between its tusks. The ring was not cut when the plates were placed in my hands. The plates, ring and seal weigh 83 *tolas*."

The record is in Sanskrit prose throughout, except for three of the usual imprecatory verses at the end. It contains the pedigree (to be noticed below) of four Gaṅga kings, from Koṅgaṇivarman (the first of the line), here spelt Koṅkaṇivarman, which is a Tamil form,² to Mādhava II,³ and announces a grant by the latter, to a Brahman named Kumāraśarman, of 65 paddy fields, having a sowing capacity of 27 *khaṇḍukas*, below the big tank of Paruvi in the Paruvi *riṣhaya*. The only date given is the full-moon day of the month Chaitra. The engraver was Apāpa, son of the goldsmith Ārya.

Paruvi is the modern Parigi, 7 miles north of Hindupur in the Anantapur District, still noted for its capacious tank. Paruvi is mentioned in early inscriptions as the capital of the Bāṇas; and in the time of the Chōla king Rājaraṇja I it was the chief place of the Parivai *nāḍu* in the Nulambapāḍi (i.e. Nalambavāḍi) district.

Dr. Fleet's opinion of the plates was as follows:—"In the characters, language and orthography the record stands all the usual tests, and its execution is good throughout . . . My conclusions about it are that we have here at last a genuine early Gaṅga record, and that on the palaeographic evidence . . . A.D. 475 seems a very good date for it."

¹ The impressions were sent to me by Mr. Kṛishṇa Śāstri, with a request that I should publish the inscription in the *Epigraphia Indica*. But, finding that the late Dr. Fleet had already made preparations for doing so, I left it to him. He issued a preliminary notice in the *Journal of the Royal Asiatic Society* for July 1915, but appears to have got no farther. Hence, by the courtesy of the Editor, I have undertaken the task.

² The Beṇḍigānbaḷli plates have both forms.

³ More properly Mādhava III, as the original Koṅgaṇivarman was also named Mādhava. But I retain II in order to be in conformity with the heading given to the facsimile.

In its description of the kings it follows, with slight variations, that given in the majority of the Gaṅga copper-plate inscriptions, of which as many as thirty-nine are known and have been published, ranging in date from c. 240 to 939 A.D. (see list herewith). From about the year 650 stone inscriptions preponderate. But the present record contains certain fresh statements of special importance not elsewhere met with.

The pedigree as here given is as follows:—

Koṅkaṇivarman *dharma-mahādhirāja*,
(of the Jāhnavēya (Gaṅga) *kula*, and Kāṇvāyana *gōtra*).
|
Mādhava *mahādhirāja*.
|
Gaṅga-rāja Āryavarman,
(installed by Siṃhavarman *mahārāja*, the Indra of the Pallava *kula*).
|
Mādhava *mahādhirāja* (of the Gaṅgas),
Siṃhavarman,
(Banner of the Gāṅgēya-vaṃśa),
(installed by Skandavarman *mahārāja* of the Pallava^a).

As regards the two first steps all the Gaṅga plates are in agreement. But a Nagar stone inscription¹ informs us that Koṅkaṇivarman's name was Mādhava (I), the younger of two brothers, Daḍiga and Mādhava,² and that Mādhava (II), Kiriya Mādhava, was the son of Daḍiga, with whom the succession continues. In some plates Mādhava appears as Mādhavarman. The third king is in all the plates named Harivarman, which in the Tanjore plates has the Tamil form Arivarmā. But in the Bendigānhalī plates we have Kṛṣṇavarman (with the prefix Śrī-vijaya, apparently only complimentary); and here we have Āryavarman (equivalent to Āryavarman). These are all variants of the same name Harivarman; for Kṛṣṇa is synonymous with Hari, and Ārya or Āryya may be intended for an improvement on Ari. It is with the fourth king that a discrepancy arises, when compared with the whole run of plates. For they with one accord give his name as Viṣṇugōpa (in the Kaḍagattūr plates Viṣṇukōpa, and in the Ganjam plates Biṣṇugōpa) and then bring in his son as Mādhava (III). The testimony of all the records being uniform as to Viṣṇugōpa at this point, his omission in the present plates has to be accounted for. With regard to his successor being Mādhava, there is no dispute; but he is distinguished in some cases as Taḍaṅgāla Mādhava (perhaps owing to a limp in his gait), and one record³ makes him Viṣṇugōpa's grandson, which may be correct and indicate that his actual father did not reign.

The most conspicuous occurrence of the name Viṣṇugōpa is in the Samudra-gupta inscription on the pillar at Allahabad, where he is introduced among the conquered kings as Viṣṇugōpa of Kāñchi. He was thus a Pallava, and contemporary with Samudra-gupta, who belongs to the latter part of the 4th century. In Pallava inscriptions⁴ Viṣṇugōpa is mentioned along with Skandavarman and Siṃhavarman, who appear in the present record as being connected in a special manner with the Gaṅgas. But we here get no help from this source to explain the exclusion of Viṣṇugōpa.

¹ *EC*, VIII, No. 35.

² Dr. Fleet was disposed to combine them into one, named Daḍiga-Mādhava; but the dual form—*tat-sutan Daḍiga-Mādhava-nāmadhēyan*—shows that they were two, said to be a Rāma and Lakṣmaṇa.

³ *EC*, VII, Sh. 4.

⁴ *IA*, V, 50, 154.

Now all the Gaṅga plates describe Viṣṇugōpa in the same way,—as ‘devoted to the worship of the twice-born, gurus and gods,’ or ‘gurus, cows and Brāhmins.’ Taking this statement into consideration, it seems to me that a simple explanation can be given to account for the omission of Viṣṇugōpa in the present plates. At the end of line 8 and the beginning of line 9 we have the phrase ‘devoted to the worship of gods, twice-born and gurus,’ with which the inscription goes on as if it were an attribute of Mādhava. But this is nowhere stated of Mādhava; on the other hand, it is the distinctive characteristic of Viṣṇugōpa, and of no other. It is evident then, I think, that Viṣṇugōpa was intended by the composer of the inscription to come here, in connexion with this phrase. But the engraver, whether for the purpose of saving space for the rest, or out of pure carelessness or misunderstanding, went on with it as if part of the description of Mādhava. Viṣṇugōpa thus dropped out.

Having disposed of this difficulty, we have now to consider the character in which the Pallavas appear in relation to the Gaṅgas, which is the novel feature of this record. Of the first two kings nothing of the kind is stated; but the third and fourth are said to have been installed (*abhishikta*) by Pallava kings, and this function¹ is described as performed *yathārham*, which may merely mean ‘in due form,’ or it may perhaps be intended to imply that the sanction of the Pallavas was customary, and indispensable to confirm the Gaṅgas on their throne. Though, occurring as it does in a Gaṅga grant, the act may be considered as a friendly one, yet the adoption by Mādhava of a second name which was that of the Pallava king would usually be a sign of subordination. On the other hand, it must be noted that the name he took was not that of the king who crowned him, but that of his son. The only instances in which we find anything of the kind in connexion with the Gaṅgas are in the Sirigunda stone,² which says that Nirvīta’s (*i.e.* Avīta’s) younger son obtained the Koṅgaṇi crown from the Pallava and Rāṣṭrakūṭa kings (superseding the rightful heir)—this was in the latter half of the 5th century; and in the early part of the 9th century, Śivamāra-Saigoṭṭa, on his release from captivity, was crowned by the Rāṣṭrakūṭa and Pallava kings³ with their own hands. We gather, therefore, that the Pallavas laid claim to be overlords of the Gaṅgas; but, if so, they only asserted the claim on rare occasions. Certain it is that no such relation is mentioned in any other Gaṅga grants as it is in this. It may be noted that in the case of the Kadambas, although the Pallavas installed the founder of the line in his kingdom,⁴ they are not afterwards referred to as overlords. Perhaps, therefore, they pursued the liberal policy of letting the quasi-dependent kings ordinarily follow their own course unimpeded.

We are here told that Āryavarman was installed by the Pallava king Simhavarman, and that Mādhava (III) was installed by the Pallava king Skandavarman and had another name Simhavarman. Now in the Pallava inscriptions already mentioned above we have the same names. First Skandavarman, then his son Viravarman, his son Skandavarman, and his son Viṣṇugōpavarman or Viṣṇugōpa. The latter, as *Yuvamahārāja* or *Yuvarāja*, makes a grant in the reign of Simhavarman, who may have been his elder brother or his uncle and the ruling sovereign. The second grant goes on to Simhavarman, the son of Viṣṇugōpa. He may be the Simhavarman of this inscription. If so, the Skandavarman may be his son, as we have no Skandavarman following a Simhavarman, as here required. There are no precise dates that can be given for these kings; but undoubtedly they belong to the 4th century.⁵

¹ Sprinkling with consecrated water. Goldstücker, in the Dictionary he began, has 25 columns on the subject.

² *EC*, VI, Cm 50.

³ *Id.* IV, Yd 60; IX, Nl 60.

⁴ *Id.* VII, Sk 176; *BI*, VIII, 24.

⁵ A somewhat similar sequence, but with variations, occurs in two later Pallava grants, of perhaps the 8th or 9th century. But this seems to be merely an echo of the earlier genealogy in the grants above referred to. See Kielhorn’s remarks on the subject in *BI*, III, 144. Also the list in *IA*, VIII, 280.

We have seen already that the Pallava Vishṇugōpa is mentioned on the Samudra-gupta pillar. It is likewise interesting to note that his father Skandavarman is also said,¹ like the Gaṅga Vishṇugōpa, to have 'honoured the gods, twice-born, gurus and old men.' Moreover, the phrase that 'his fame was tasted by the water of the four oceans,' stated of Harivarman, the Gaṅga Vishṇugōpa's father, is found applied to Samudra-gupta.² The prefix *Śrī-vijaya* to the name of Kṛishṇavarman, the equivalent of Harivarman, is chiefly used in connexion with the Gaṅga-Pallavas, who, though Pallavas, claimed descent from Kōṅgaṇi, the first Gaṅga. Mādhava (III), again, married the sister of the Kadamba king whose name was Kṛishṇavarman, and she was probably a daughter of the Kadamba king Kākusthavarman, who is said to have given his daughters in marriage to Gupta and other kings, which, it is plain, refers to Samudra-gupta, the only Gupta king who made an expedition to the south. These various items point still farther to the end of the 4th century, or beginning of the 5th, as the period of our inscription.

But by a remarkable coincidence more exact evidence can be adduced in support of this. For the manuscript of a Digambara Jain work in Sanskrit, named *Lōkavibhāga*, has been discovered by the Mysore Archæological Department (see the Reports for 1909 and 1910), treating of Jaina cosmography. The contents, it says, were first delivered by the Arhat Vardhamāna, and handed down through Sudharma and a succession of other teachers. The *Rishi* Simha-sūri (or Simha-sūra) produced the work in a translation (? from Prākṛit into Sanskrit). And the *Muni* Sarvanandin formerly (*purā*) made a copy of it in the village named Pāṭalika in the Pāṇa-rāshṭra. The interesting point is that the precise date is given when this task was completed, namely, the 22nd year of Simhavarman, the lord of Kāñchi, and in 80 beyond 300 of the Śaka years. Two other manuscripts of the work have since been discovered, which give the same information. It is unnecessary to point out the supreme importance of this record; but Śaka dates of such early period are looked upon with suspicion. Dr. Fleet has published his views in full about this date. Having detected a flaw in the calculations of Prof. Śaṣipāla Jhā of Benares, who made it the 1st of March 458, he has decided that the real date is the 25th of August 458. In either case the year is the same, and this Simhavarman began to reign in Kāñchi in 436. As regards the Simhavarman of our inscription, the latest date so far obtained for Mādhava (III) is ? 390; but he must have lived to c. 430, when his son was crowned, being then an infant on his mother's lap. The near approximation of the two dates is evident; and that of the literary work furnishes a limit beyond which we need not go, while it seems to show that the name Simhavarman was a recurring one among the Pallavas of the period. Pāṭalika, the village in which Sarvanandin made his copy, may be Pāṭalipura, in the South Arcot District. The *Periya-purāṇam* makes it the seat of a large Jaina monastery in the 7th century. Pāṇa-rāshṭra is no doubt the territory of the Bāṇa kings.

TRANSLATION.

(Line 1) Ōm.³ Be it well.⁴ Success through the adorable Padmanābha, resembling (in colour) the cloudless sky.

¹ Read *mati*.

² Appears as *dumkham* [*duṣkham*? —Ed.] in the original.

³ The spiral symbol here is supposed to represent this sacred syllable.

⁴ This word *Seasti* is in the margin, midway between lines 2 and 3.

A sun illumining the clear firmament of the Jāhnavi (or Gaṅga) *kula*, possessed of a territory of good people, which sprang from the swift victory of his own arm, adorned with wounds received in cutting down the hosts of his cruel enemies, of the Kāṇvāyana *gōtra*, was His Majesty **Koṅkanivarman** *dharma-mahādhirāja*.

(Line 4) His son, inheriting the qualities of his father, having developed a special intelligence, by acquiring the meaning and essence of many sciences, skilled in the exposition and practice of the science of politics, having obtained the honours of the kingdom only for the sake of the good government of his subjects, was His Majesty **Mādhava** *mahādhirāja*.

(Line 6) His son, his body adorned with wounds obtained in many wars, knowing the essence of many *Śāstras*, *Itihāsas* and *Purāṇas*, duly installed by the Indra of the Pallava *kula*, **Simhavarman** *mahārāja*,—was the Gaṅga-rāja **Āyyavarman**.

(Line 8) By his son, uniting the qualities of his father and grandfather, devoted to the worship of gods, Brāhmanas and gurus, knowing how to act by the practice of justice, having the glory of a kingdom won by the valour of his own arm, the banner of the Gāṅgāya-vaṁśa, having acquired the kingdom descended in his own family, being duly installed by **śrī-Skandavarman** *mahārāja* of the Pallavas—**Mādhava** *mahādhirāja* of the Gaṅgas, **śrī-Simhavarman**—to the Brāhmaṇ, of the Vatsa *gōtra* and Taittiriya *charaṇa*, **Kumārasarman**, proficient in penance, fasting, mortification, silent prayer, sacrificing, conducting sacrifice, studying and teaching the sacred books, cursing and blessing, an acceptor and receiver of gifts, —on the full-moon day in the month Chaitra, were given, in the form of a Brāhmaṇ gift in the **Karmaṭuva** *kshētra*, situated below the great Paruvi lake in the Paruvi *vishaya*, sixty-five fields, sowing twenty-seven *khaṇḍuka* (of seed).

(Line 16) Whoso takes away this becomes guilty of the five great sins. As to this also there are the *ślōkas* uttered by Manu :—By many kings has the earth been enjoyed, Sagara and others. Whosoever at any time is the land, his is then the fruit. To make a gift oneself is very easy ; difficult the protection of another's. Of giving or protecting, than giving more excellent is protecting. Whoso seizes on land given by himself or by another, abides in dreadful darkness for sixty thousand years.

(Line 20) Thus is this copper plate, written by the goldsmith Āryya's son **Apāpa**.
Om.

This array of documents provides us with the inscripational chronicles of the Gaṅga kings of Gaṅgavāḍi, or Mysore. They have been found in all parts of the country, and of various dates throughout the period to which they relate, a period for which but for them the local history is a blank. They present a consistent and consecutive account, not discredited by contradictory statements or anachronisms. They are supported and confirmed by scores of stone inscriptions of all periods, and by references in contemporary records of neighbouring and other dynasties. They are thus entitled to acceptance as credible and authentic, though it would be unreasonable to expect that chronicles for so extended a period of antiquity should be free from all difficulties.

Objections have been raised to them, by Dr. Fleet, who prefixed the epithet 'spurious' to the whole series, and this has been simply repeated by others, following his authority. But the grounds of his opposition mainly relate to faults that may be in some cases detected in style or orthography. These, however, are not such as to affect the veracity of their contents. The basis of his sweeping dictum that all the Gaṅga inscriptions on copper plates are 'spurious,' and only those on stone genuine, is on the face of it unsound and paradoxical. Why should a line of kings issue chronicles of their past which are true and to be accepted as such when on stone, but false and to be rejected when on metal? Especially when, as here, such stone inscriptions as have survived, even for the early periods, confirm, so far as they go, the accounts on the metal plates, which, being portable and indestructible, have more easily been concealed and preserved. In fact, it is not uncommon for a stone inscription to state that the grant recorded in it was also engraved on a copper plate.

Then a condemnation, perhaps for a discrepancy in the week day of the date, as sometimes happens, is not a sufficient reason for rejecting them as altogether false. Dr. Fleet has himself said that 'the fact that a date has been recorded accurately does not prove the authenticity of a record, any more than an incorrect date proves that the record in which it is put forward is spurious.' This completely cuts away the ground from under the feet of those who insist unduly upon the value of such testimony, though it is not to be disregarded.

As regards the palaeography, again, although changes have undeniably taken place in the forms of certain letters from time to time, it is impossible to draw a hard and fast line, as Dr. Fleet does at the year 804, for instance, and to lay it down that a particular form cannot occur before that, in which particular he has been shown to be incorrect. The standards, therefore, by which he proceeded to judge the Gaṅga copper plate grants and reject them as 'spurious' were themselves in need of revision and correction. Approaching these grants with preconceived ideas, if he found that the facts did not support his views,—well, so much the worse for the facts.¹

It might seem desirable here to recapitulate the history of the Gaṅgas, as derived from the numerous inscriptions on metal or stone which have been brought to notice. But for this information I may refer, for the present, to my work *'Mysore and Coorg from the Inscriptions'* and to my revised edition of *Coorg Inscriptions* in the New Imperial Series of the Archaeological Survey of India.

¹ There seemed to be a sense of some personal annoyance in the matter, for he says his difficulty was 'to put himself in the frame of mind from which they can be imagined to be genuine.' He even saw nothing strange in writing to me—'If you will only give up the Gaṅgas, I will do anything you like for you'!

A somewhat similar state of things is met with elsewhere. For Canon Isaac Taylor, in his book *'The Alphabet'*, refers to Prof. Mahaffy's complaint that even eminent English Hellenists are found to be helpless in face of a Greek inscription. Mr. Paley, on first becoming acquainted with the inscription at Abu Simbel, the cardinal monument of Greek epigraphy, finding he could not reconcile it with his Homeric studies, pronounced the whole thing a hoax!

No. 25.—THE KANUMA GRANT OF SADASIVA-RAYA : SAKA 1470.

By S. V. VISWANATHA, M.A., MANNARGUDI.

The inscription is on five copper-plates, which are bored at the top so as to admit a ring holding the plates together. The latter are in good preservation. They are now in the possession of the Collector of Anantapur. They were obtained and sent to me for publication by Rao Sahib H. Krishna Sastri, who has noticed these in his Report on Epigraphy for 1915, pp. 9 (No. 9) and 112.

The plates measure $10\frac{1}{2}$ in. by $7\frac{1}{2}$ in., except in the middle, where the height is greater on account of the arch at the top. The holes through which a ring is intended to pass have a diameter of 6 in. The rims of all the plates are slightly raised. The writing runs across the breadth of the plates, and is quite legible. The first and the last plate are engraved only on one side. The inscription contains 241 lines in all. The plates are numbered in Telugu numerals. I am supplied with the following further information about the plates from the office of the Assistant Archaeological Superintendent for Epigraphy, Madras : —

“The plates are strung together on a circular ring of the same metal, which is 3" in diameter and about $1\frac{1}{2}$ " in thickness. It bears on it a sliding signet ring to which is fixed a circular seal, whose diameter is about $1\frac{1}{4}$ ". The seal bears on a countersunk surface the following, which are the prevailing features of all Vijayanagara seals : (1) *Top-row* : the crescent to the proper right and the sun to the left ; (2) *Middle-row* : a boar standing on a platform and facing the proper right with a dagger in its front, pointing downwards ; and (3) *bottom* : a floral device, probably a blown lotus, on which the platform of (2) rests. The plates with the ring and the seal weigh about 431 tolas."

The language of the inscription is Sanskrit, and the whole is in verse, except the Telugu portions in plates Nos. 3, 4 and 5, which give the distinguishing marks of the boundaries and the signature. The characters are Nandinagari, except in the case of the signature, which is in Telugu. There are a few orthographical peculiarities worth noticing. Instances of unnecessary *anusvāra* and *visarga* have been noted in the footnotes to the text. As in other Vijayanagara grants, there is confusion here also between the use of *sa*, *śa* and *sha*. Instances of this are : — *Sambhavē* for *Śambhavē* (l. 2) ; *Kauśalyā-śrī-Sumitra°* in place of *Kauśalyā-śrī-Sumitra°* (l. 19) ; °*śitu°* instead of °*śitu°* (l. 27) ; °*rāsi°* for °*rāsi°* (l. 40) ; *śaṁśāśya* instead of *śaṁśāśya* (l. 41) ; *svāṁśam-ētya°* in place of *svāṁśam-ētya°* (l. 47), etc. The vernacular sound *r* is represented by an *r* sign added over the consonant *r*, e.g. *mūru* in l. 75. Long *i* is represented in one place by a vertical stroke and a loop over short *i*, as if *i* were a consonant.

The inscription records the grant of the village of Kanuma by Sadāsiva-Mahārāja of the Second Vijayanagara dynasty to several learned Brahmans of various *gotras* and *śakhās*. The grant was made at the request of Appalarāja, the son of Krishnarāja and grandson of Timmarāja, of the Kāśyapānvaya, i.e. the Solar race. It was made in the presence of the god Viṭṭhalēśvara, on the banks of the Tungabhadra river. Kanuma, we are told, is situated in Muṇḍimaḍugu *śimā*, a division of the Gutti *valita*. The boundaries of the object of the grant and the marks of identification thereof are clearly described in Telugu, the *Dēśa-bhāṣā*, as it is called in the inscription. The terms of the grant are the same as those found in other grants of the Vijayanagara house. One peculiarity to be noted about this is that the village granted is divided equally between the god Chennakēśava and the Brahmans, one-half going to each. A half is thus left as the property of the temple, while the other portion is split up into 30 *vr̥ttis*, to be divided among Brahmans, 2 *vr̥ttis* being set apart for the daily worship of the god. The grant is made for the performance of 16 kinds of worship (*śhōḍaś-ōpachāra*) to the god Chennakēśava. Of all the kings of the Vijayanagara dynasty Sadāsiva seems to have favoured the Vaiṣṇavite religion most.

The date of the grant is given (ll. 82-83) in the numerical words *avatār-āṅga-vēd-ēndu*, i.e. 1470. Thus the record is dated in the Śaka year 1470, corresponding to 1548 A.D., Kilaka, the month Āṣāḍha; the bright fortnight; Prathama-dvādaśī and Sunday. The Śaka year 1470 is the earliest date for Sadāśiva that can be fixed from the copper-plate inscriptions known so far, though the earliest stone inscription of his time that has been examined is dated in the Śaka year 1467. Thus the grant is of importance, as it is the earliest of the copper-plate grants of Sadāśiva yet discovered.

Among the names of personages appearing in the grant the most important is that of Rāmārāja, the Karpāṭa minister and brother-in-law of the king. Sadāśiva bears the usual titles, of which *Gaj-aṅgha-gaṇḍa-bhērūṇḍa* deserves notice. In 'South Indian Images of Gods and Goddesses' by Rao Sahib H. Krishna Sastri (p. 268) there is an interesting picture of a mythological bird, with two heads. It is seen in the picture to carry elephants in its talons and beaks.

Appalarāja, the son of Kṛṣṇarāja and grandson of Timmarāja, at whose request the grant was made, is stated to be of the Kāśyapa *gōtra*, Āpastamba *sūtra* and the Solar race.

The names of the composer and the engraver appear as usual after the imprecatory verses at the end. It is interesting to note that the engraver and his father are known by the same name. It has been the custom among Hindus that the grandson is given the name of the grandfather. The names of the father and son are identical in rare instances. Mallapa appears as the father of Vīrapa in the Unamañjēri Plates of Achyuta-Rāya (above, Vol. III, p. 151) and in the Conjeeveram Plates of Kṛṣṇa-Rāya (*ibid*, Vol. XIII, p. 126).

ABSTRACT OF CONTENTS.

Vv. 27 & 28. After the death of Achyuta, Venkaṭa-dēva-Rāya succeeded to the throne..
On his death,

Vv. 29 & 30. Sadāśiva-Mahārāya, the son of Raṅga by Timmāmbā, was anointed as king of Vidyānagara by Rāmarāja, the protector of the Karpāta kingdom, and other ministers.

Vv. 31-35. The praises of Sadāśiva-Mahārāya, who was a devotee of the god residing on Śēshādri (i.e. the god Venkaṭēśa).

Vv. 36-42. The other titles of king Sadāśiva.

Vv. 43-57. In the vicinity of the god Viṭṭhalēśvara, on the banks of the Taṅgabhadra river, in the Śaka year counted by the numerical words *avatār-āṅga-rēd-ēndu* (=1470)³; in the year Kilaka; the month Āshāḍha; in the bright fortnight; and on Sunday, the day of Pramatha-Dvādaśī; for the worship of the god Chenna-Kēśava enshrined in the village Muṇḍimaḍugu, by the 16 methods prescribed and for Brāhmaṇas of various Śākhās, names, *gōtras* and *sūtras*, famous for their Vedic knowledge and learned in the *śāstras*; the king gave the village of Kanuma, otherwise known as Narasammasamudra, situated in the Gutti *valita* in Muṇḍimaḍugu *simā*, on the banks of the Pinākini (Pennar) river to the east of the village Śrīvara, to the south of Kallamaḍi, to the north of Ākilēru and to the west of Nāgalaguḍa.

V. 58. The god Chenna-Kēśava and the Brāhmaṇas hold equal divisions in the village.

Vv. 59-97 contain the names of the donees and the number of shares that went to each.

V. 98 & ll. 151 to 228. The details of the boundaries and the marks of identification are set forth.

Vv. 99 & 100. The grant was composed on the order of the king by Sabhāpati-Svayambhū.

V. 101. The engraver of the grant was Virāṇa-āchārya, son of Virāṇa.

Vv. 102-106. The usual admonitory verses.

L. 241. Śrī-Virūpākṣa (the sign manual of the king).

No. 26.—THE MELUPAKA GRANT OF MAHADEVENDRA-SARASVATI : SAKA 1608.

By S. V. VISWANATHA, M.A., TRICHINOPOLY.

The grant is recorded on a single copper-plate inscribed on both sides. It is now in possession of the Śaṅkarāchārya of the Kumbhaghōṣam *maṭha*, who kindly lent the plate for examination. I edit the inscription from inked impressions prepared by me.

¹ Read ऐकैव.

² In Telugu characters.

³ [The number 70 is obtained by adding *avatāra* (10) to *āṅga* (6) the latter of which, as it stands in the place of tens, is equal to sixty.—H. K. S.]

The plate is 8·8 in. high and 8·4 in. broad, except in the middle, where it is 12·3 in. high. There is a hole at the top of the plate to let in a ring. The inscription, which is in large *Nāgarī* characters and which runs across the breadth of the plate, is legible enough. The plate is in good preservation. There are in all 31 lines of writing.

Two languages are used in the inscription. The first three lines are in Telugu and give the details of the date of the grant. The rest of the first side from l. 3 to l. 15, is in Sanskrit and describes the religious qualities and attributes of Mahādēvēndra-Sarasvatī, the disciple of Chandraśēkhara-Sarasvatī of the Conjeeveram Śārādā maṭha. The whole of the second side again is in Telugu, mostly of a corrupt kind, except the usual admonitory verses.

The characters of the inscription are a carelessly written form of Dēvanāgarī. The whole inscription is in these characters, excepting the last line, which is in Telugu.

The inscription records the grant of certain rights in the village of Mēlupāka by the then presiding teacher (*āchārya*) of the Śārādā maṭha at Conjeeveram, Mahādēva-Sarasvatī, disciple of Chandraśēkhara-Sarasvatī, to Rāmā Śāstrin, follower of the Āśvalāyana sūtra, of the Kāmākāyana Viśvāmitra gōtra, a member of the Hōyāsāna Kanneḍi community. The village of Mēlupāka was once granted to the maṭha by the Golkonḍa ministers Akkanna and Mādanna. These rights included certain taxes of 3 *maras* (*marakkāl*) for every *kalam* of paddy, which gives us the ratio of $\frac{1}{4}$ for *kānukoyi-dēṣamukhi*. It is interesting to compare the term *kānukoyi* with the similar form *Kanungo*, which is the name given to the village accountant in Muhammadan India. *Dēṣamukhi* is the tax customarily paid by the subjects to the 'lord,' and this is given as a definite proportion of the produce raised, generally $\frac{1}{10}$. It also included the gift of two *varāhas* (=Rs. 7-0-0) per annum from the maṭha and two house sites.¹

The grant is dated Śaka 1608, Prabhava, Vaiśākha, Śu. di. 15, Saturday, lunar eclipse. On these details Diwan Bahadur L. D. Swamikkannu Pillay writes as follows:—"Śaka 1608, Prabhava, Vaiśākha, Śu. di. 15 Saturday, lunar eclipse. Śaka 1608=A.D. 1686-87. But Prabhava was A.D. 1687-88. The day intended was Saturday 16th April, A.D. 1687. The *tithi* commenced at .58 of the day and ended at .55 of the following day. There was no lunar eclipse on the day in question." One thing has to be remembered against the above verification of the date. The occurrence of the lunar eclipse on the day on which the grant was made must have been an unmistakable fact. We have to take this as a certain and known fact and with this as our basis work out the other details to suit it. Eclipses are of immense significance to the Hindu, and could not be easily forgotten by him, whether the other details of a date are correctly stated or not. Hence the right method of verification of the date would seem to be to find out on what days in the year 1686 or 1687 there were lunar eclipses and to see if the other data fit in with the date on which the eclipse occurred.²

Regarding the names of persons occurring in the grant, special mention has to be made of Akkanna and Mādanna of Golkonḍa, as they appear in our inscription. Akkanna and Mādanna were the ministers of one of the Nawabs of Golkonda. They appear in Indian tradition as the uncles of the Vaishnava saint Rāmadas of Bhadrāchalam.

Concerning the two brothers Rao Sahib H. Krishna Sastri writes thus in the *Madras Ep. Rep.*, 1915, pp. 117 f., quoting from the Dutch journal of *Havart* :—

"These donors must be identical with the two famous persons of those names frequently mentioned in the popular story of Rāmadas. They were the ministers of Tānisha, one of the

¹ See below, p. 356, note 7.

² [The non-coincidence of the most important item of the date, viz. the lunar eclipse, reflects upon the genuineness of the grant itself.—H. K. S.]

kings of Golkonda. Rāmadās, the nephew of these ministers, was put to extreme torture on account of certain misappropriation of revenue."

"They were two brothers, born of a very poor family, who entered service as shroffs in A.D. 1666 on a pay of 10 *gilders* per mensem under Saiyyad Mustapha, a nobleman of Golkonda known to fame as Mir Zumla. Mādanna *alias* Sūryaprakāśa Rao is stated by the Dutch journalist to have been an intelligent man, whereas his brother Akkanna was a man of cunning and roguery with very little of understanding. The brothers rose in rank by an apparent act of treachery, which cost Mir Zumla his high office under the Nawabs of Golkonda. Mādanna became a very prominent figure in the administration of the kingdom, so much so that the Sultan left everything to his care and was satisfied with receiving 75,000 dollars for his personal use. Mādanna was well versed in Persian, Hindustani, and the vernaculars of the country, and lived in a kingly style."

"Having served under Abdulla Qutb Shah (A.D. 1611-1672), the two brothers seem to have maintained the same high position also under the reign of Abdul Hassan, the successor of Abdulla Qutb Shah. But they were not to maintain this long. In A.D. 1685 the Mughal king Aurangzeb marched with his army into Golkonda and plundered first the house of Mādanna. The people were in a state of panic and accused Mādanna of high treason. Under orders from the Sultan they murdered the two brothers, who were once the bosom friends of the king, in a most ignominious way. Akkanna and Mādanna were dragged along the streets in the presence of the people. The head of Mādanna was severed from his body and sent to Aurangzeb, while that of Akkanna was trampled under the foot of an elephant. The death of the two brothers must have happened after the 29th of Oct. 1685, when the Mughal army entered Golkonda, and perhaps before the end of that month."

The Dutch journal contains four interesting pictures, which have been reproduced in the *Madr. Ep. Rep.*, 1915, plate II, regarding the story of Akkanna and Mādanna. One of them is a figure of the king of Golkonda "*Sultaan Aboe-il-Hassan Kothshah Koning van Golkonda.*" Two others are those of Akkanna and Mādanna. The former is styled "*Oppeer Boekhouder en Generalissimus van het Golcondaze leger,*" while concerning Mādanna we have "*Madoena Sureparkaas Roww Albestiorder van het Golcondaze ryk.*" The fourth picture illustrates how the two brothers are drawn through the streets by the disaffected populace. Under each of these we find an inscription by Havart as follows:—

I. *Aboe-il-Hassan.*

Nemo felix ante obitum.

L. 1. Hy was een Koning in de naam,
niet in der daad,

L. 2. Quam tot die waadigheyd van de
alderlaagste staat,

L. 3. En liet door andere zig zelf, ent Ryk
bestieren,

L. 4. Een dom onnozel Mensch, niet
Vorstlyk in manieren.

L. 5. Toen nu't geluk met hem een tyd
lang had gefopt,

L. 6. Wierd hy door eygen Schuld van
Kroon en Throon geschopt,

L. 7. Kroop in het zant, vrat stof, moest
zig als slaaf vermindren.

L. 8. Wee zulken land, alwaar de
Koningen zyn kindren.

Translation.

None is happy before death.

He was a king in name, not in deed. From a very low state he rose to high dignity. He let others rule himself and his kingdom. He was a stupid man, not kinglike in manners. When fortune had played with him for a long time, he was kicked from crown and throne through his own fault; crept in sand, ate dust and was humbled like a slave. Woe to the land where kings are children.

II.

Tollantur in 'altum, ut lapsu graviore
ruant.

L. 1. Hier ziet men Mādoena naar't leven
afgetekend,

L. 2. Die van den eersten tyd zyns
Ionkheys afgerekend,

L. 3. Tot aan zyn dood toe was een speel-
kind vant geluk :

L. 4. Hy is van niet tot zoo een hoogen
trap verheven,

L. 5. Dat zelf de Konink naar zyn wenk
heest moeten leven.

L. 6. Hy heeft zyn eygen Heer (O heyl-
loos schelemstek)

L. 7. Van ampt en staat gezet, ja alles
derven wagen.

L. 8. Maar trag tende zyn Vorst te lēvren
in de hand

L. 9. Des vyands, raakte hy tocn't uyt
quam aan een kant,

L. 10. Door Sidemaktas swaard, teynd
moet de last tog dragen.

III.

Alter Idem.

L. 1. Hier ziet men in het kleyn de schets
van Akkana,

L. 2. Een beest in menschen schyn :
wiers loze loze stroken,

L. 3. Wiens schelmery en trots niet syn
om uyt te spreken.

L. 4. Geen groter booswicht, droeg de
stad van Golconda.

L. 5. Deelaghtig aan tverraad zyno broers
nooit wel te vreden,

L. 6. Heest hy de zelve straf op eenen
tyt geleden.

Let them be raised on high that they
may be led to graver fall.

Here we see Mādanna drawn from life ; a
plaything of fortune from the beginning of his
youth till his death ; he had risen from
nothing to such good luck that even the king
must live according to his direction. He re-
moved his own master from office and state.
Oh hellish scoundrelism, nay, he dared to do
anything. Trying to deliver the king into the
enemy's hands, he was discovered in the act
and had to give up his life through Sayyad
Makhta's sword. After all the burden has to
be borne.

A second just the same.

There we see the picture of Akkana in
miniature. A beast in human skin : his cun-
ning and wily tricks, his roguery and pride
are not fit to be spoken. No greater villain
Golkonda ever produced. Partaking in his
brother's treason, he was not content. He had
the same penalty at the same time.

Madoena en Akkana. Twee Gebroeders vermoort en schandeluk ten toon Gestellt.
(Mādanna and Akkana. • Two brothers murdered and exhibited scandalously.)

The donor of our grant is Mahādēvēndra-Sarasvatī, disciple of Chandrasekhara-Sarasvatī
of the Śārādā pīṭha of Kāñchipuram. This grant, taken with the other Vijayanagara record

examined and published by myself and Mr. Venkateswara in Vols. XIII and XIV of this Journal, discloses to us the names of four Āchāryas of the Conjeeveram *maṭha*—

Name.	Grant.	Date.
1. Mahādēva-Sarasvatī, disciple of Sadāśiva-Sarasvatī.	Kuḍiyāntaṇḍal grant of Vira-Nṛsiṃha	S. 1429.
2. Chandrachūḍa-Sarasvatī, disciple of Mahādēva-Sarasvatī.	Conjeeveram plates of Kṛishṇa-dēva-Rāya.	S. 1444.
3. Sadāśiva-Sarasvatī, disciple of Chandraśekhara-Sarasvatī.	Udayambākam grant of ditto	S. 1450.
4. Mahādēvēndra-Sarasvatī, disciple of Chandraśekhara-Sarasvatī.	The present grant	S. 1608.

* For the relation in time of these and their descent from the first Śaṅkarāchārya see Mr. Venkateswara's article in the *Journal of the Royal Asiatic Society*, October, 1916, pp. 161 f.

Chandraśekhara-Sarasvatī we find residing in the Śāradā *maṭha* of Kāñchi, surrounded by his disciples, to whom he imparts nectar-like instruction in Advaita, crushing the heretic faiths and setting up the religion of the Vēda and Vēdānta. The heretic faiths referred to are probably Jainism and Buddhism, vestiges of which are still to be found in South India, especially in Conjeeveram.

As regards Rāmā Śāstrin, the donee, we are told that he belonged to the Hōyāsāna Kanneḍi community, was of the Āśvalāyana *sūtra* and Kāmākāyana Viśvāmitra *gōtra*. We find no more particulars about him. But the fact that he was of the Kanneḍi community is of some importance. It shows probably the encouragement given to this sect by the then presiding *āchārya*. This in a way continues to be the practice in the Kumbhaghōṇam *maṭha*, where the Āchārya for some generations past at least has been chosen from among the Hōyāsāna-Kanneḍi community.

It is clear to us that Chingleput was included in the territory of Golkonda and that in the 17th century it was held as a *jāgīr* under Golkonda. This record makes it clear to us that the Kāmakoṭi *pīṭha*, as at present it is known to be the seat of the Śaṅkarāchārya of Kumbhaghōṇam, must have been in the Śāradā *pīṭha* at Kāñchi, at least till the date of this grant (1686-1687). We know from another grant to an earlier Śaṅkara-Yōgin of probably this same *maṭha*, by Vijayagaṇḍagopāla-dēva, the Tolugu chieftain, that this line of teachers must have been in existence in Kāñchi at least from the 13th century.¹ Thus the Śāradā *pīṭha* or the Kāmakoṭi *pīṭha* must have been in Kāñchi between the 13th and 17th centuries of the Christian era. The tradition of the *maṭha* tells us that it was at the invitation of King Śarabhoji of Tanjore that the Āchārya removed to Kumbhaghōṇam.

The inscription ends with the usual admonitory verses. We do not find at the end, where there is the line '*Śrī-Chandramaulīśvara-Svāmī sahāyam*,' the signature of Mahādēvēndra-Sarasvatī, who made the gift, and it is interesting to note that to this day the Āchāryas on no occasion affix their signature to any letters or correspondence proceeding from the *maṭha*.

¹ [The date of this grant has been disputed. See above, Vol. XII, p. 195.—H. K. S.]

TRANSLATION

(abridged).

- L. 1. In the year 1608 of the Śālivāhana Śaka.

L. 2. In the year Prabhava, Vaiśākha, full-moon, Saturday.

Ll. 3-16. On the day of a lunar eclipse, Mahādēvēndra Sarasvatī, the choicest of the disciples of Chandrasēkhara Sarasvatī, who has established himself at the Śāradā pīṭha at Kāñchi otherwise called Satyavrata, the ornament of the whole world, in which are the temples of Ekāmrānātha-Mahādēva Kāmākṣī-Dēvī, adored by the 33 crores of gods, and which is the chief seat of Hastigiri-nātha's visible presence; he who delights crowds of learned people with his benedictory compositions, a stream of honey, that flows from the wreaths of jasmine which adorn the braided hair of Sarasvatī, the beloved of Brahmā, and having an unrivalled nectarean sweetness; who always takes delight in the Advaita philosophy; who is rich in a constant adornment of śānti and dānti; who is ornamented with a character celebrated as supporting the whole circle of worlds; who advocates the religion of the Vēda and Vēdānta, after rooting out the heretic faiths, which were so many thorns; who is enthroned on the seat of the Paramahansa Parivrājākāchārya Śrī Saṃkarāchārya—

Ll. 17-27. made to Rāmā Śāstrin, of the Āśvalāyana sūtra and Kāmākāyana Viśvāmitra gōtra, belonging to the Hōyāsāna Kanneḍi seat of Brāhmaṇas, a copper-plate grant of an agrahāra in Mēlupāka near Ajāru, in the jāgīr of Changalapattā (Chingleput), granted to the teacher by Akkanna and Mādanna of Gōlkoṇḍa. It is bounded on the north and the west by the lake and on the south by the village of Mēlupāka. The lands of the village are to be supplied with the water of the Kaṇṇaru. Besides this 2 house-sites, 2 pagodas a year, 3 marakkals per kalam for kānukoyi and dēśamukhi, and some minor sources of income are granted to Chandramaulīśvara-Svāmin (Maṭha).⁷

Ll. 28-30. The usual admonitory verses.

L. 31. Invokes the help of Śrī Chandramaulīśvara-Svāmin.

¹ Read कषादक्षतल.

² Read निवेशनं.

³ Between the letters नु and नु is inserted the figure २ in Nāgarī. This may partly explain the reading मेरा in the next foot-note.

⁴ [Mr. T. A. Gopinatha Rao reads 'मगननु' (his Copper-plate Inscriptions of the Kāmakoṭī-pīṭhas, p. 135 text-line 26) which like मराननु gives no meaning. The reading intended was evidently मेराडुनु.—H. K. S.]

⁵ Read 'दद्युतं पद'.

⁶ Read 'दिगुणं'.

⁷ [The author and Mr. Gopinatha Rao have both committed the same mistake in the matter of the object of the grant. The donee Rāmā Śāstrin was given: (1) the mānya (l. 22), i.e. exemption from payment of fee to the mortgagees (talayīḍukāṇḍlu) and the holders (āyakāṇḍlu) of the sub-channels, for using water; (2) two varāḥas as annuity from the maṭha; (3) the mēra (share) of 3 aḍḍas on a kalam of paddy due to the supervising Dēśamu-khi and of 1 aḍḍa due to the god Chandramaulīśvara in the village of Mēlupāka.—Ed.]

No. 27.—PURLE PLATES OF INDRAVARMAN: THE [GANGA] YEAR 149.

By G. RAMADAS, B.A.

The subjoined plates were secured by me from a cultivator in Purle, a village near Palakonda. It was stated that they were discovered in a pot exposed to view in a crumbling wall on the bank of the river opposite to where Purle lies.

They are three in number, each measuring $6\frac{1}{8}$ " by $2\frac{1}{8}$ ". The margins of the inscribed inner side of the first and the third plates and both sides of the second plate are raised for the protection of the writing, which is in a good state of preservation, except in two places in ll. 12 and 14. The plates are strung on a ring, which was uncut when they came into my hands. It is $\frac{3}{8}$ " thick and 3" in diameter; its two ends are secured under an oval seal ($\frac{1}{2}$ " by 1" in diameter), which bears on a countersunk surface an impression which indistinctly appears to be a bull standing to the proper right.

The language is correct Sanskrit, and the composition closely resembles that of the Chicacole plates of Indravarman.¹

The characters resemble those of the Chicacole plates of Dēvēndravarman, son of Guṇārṇava.² The slight difference may be due to the style or the skill of the engraver.

Orthography.—The *Upadhmanīya* is invariably expressed by a sign representing the Telugu intensive *r* ౠ, e.g. in ll. 5, 10, 19, 20, 21. The *Jihvāmūliya* is represented by a sign indicating *m*, e.g. in ll. 16 and 20. Consonants following *r* are doubled, e.g. in ll. 2, 3, 8, 9, 11, 13, 15, 22, 23, 27, 28, 30, 31. The following are exceptions:—in line 10 (*°chandrārka°*); ll. 16 and 18 (*°rjuna°*). Consonants preceding *r* are not doubled. Of palæographic interest is the vowel letter *ē* (l. 18), inasmuch as it is in this plate that it is first found.

The plates record the grant of the village Bhukkukura in the Kūraka rāshṭra to Bhavadattaśarman, who was a student of *Ṛig-Vēda*, well-versed in *Vēdas* and *Vēdāṅgas*, an inhabitant of Tiriliṅga, and who belonged to the Kausika gōtra.

The donor of the grant was the Gāṅga king Indravarman, son of Dānārṇava. As the *prastuti* of the grant is the same as that of the Chicacole grant of Indravarman above referred to, no comment is required.

The grant was made on the full-moon day of Kārttika and was engraved on the 20th day of Pushya in the year 149 of the prospering victorious reign. This refers to the Gāṅga era, generally mentioned in the Kalinga grants. This grant, therefore, appears to be three years posterior to that of the Chicacole plates of Indravarman,³ dated 146. This son of Dānārṇava was, probably, the grandson and successor of the Indravarman of the Chicacole plates.

The order for the grant was issued by the Mahāmahattara Śivaśarman, who may have been the son of the Mahāmahattara Gauriśarman of the grant of Indravarman,² dated 128; and father of Mahattara Śavarānandīśarman of the Chicacole grant of Guṇārṇava's son Dēvēndravarman.⁴

The writer of the grant was Khaṇḍichandra, son of Āditya-Bhōgika. The Chicacole grant of Guṇārṇava's son Dēvēndravarman is said to have been engraved by Sarvachandra, the

³ Archaeological Survey of Southern India, Vol. IV, *Tamil and Sanskrit Inscriptions*, by Jas. Burgess, Part III, No. 18, pp. 164 sqq.

⁴ *Ep. Ind.*, Vol. III, No. 21, p. 131.

son of Khandichandra-Bhōgika; and Āditya, the son of Vijāyachandra, is stated to have engraved the Chicacole grant of Indravarman, dated 128. The Chicacole grant of Indravarman, dated 146, is stated to have been engraved by the state *Bhōgika*, probably Āditya. The office of the engraver appears to have been hereditary, like that of the *ajñapti*.

The composer of the grant was the 'Minister-General' Śāmbapura-Upādhyāya, the son of Dharmachandra, the chief of the elephants (*Hastyaadhyaksha*).

Of the localities mentioned in the grant the following require mention:—

Dantapura.—The royal residence from which the grant was issued was evidently in the kingdom of Kalinga.

Dantapura is mentioned in the *Daladavaṃsa*. It is said that the left canine tooth of the lower jaw of Buddha was brought by one of his disciples to Kalinga and a large *stūpa* was built over it. In course of time a large city rose round the *stūpa*, and it was called Dantapura. The Buddhists all lived in a village close by. The people of Ceylon, attracted by the miracles worked by the tooth, established a colony not far from Dantapura. Ultimately, when the *stūpa* was destroyed by the malice of the Brahmans, the tooth was taken away to Ceylon.

On the way from Chicacole to Siddhāntam (Siddhārthaka-grāma, a Buddhistic village) and close to the latter place a large tract of land is shown as the site of the fort of Dantavaktra. Valuable jewels, images of all kinds, coins and such other articles used formerly to be found there by the cultivators. Even now the people believe that there was once immense wealth there. About twelve miles north of Siddhāntam and on the same side of the Nāgāvali is the village Hiramandalam, which name is only a corruption of Īramandala (the Tamil Īla-maṇḍalam), the ancient name of Ceylon. Siddhāntam must have been the village where the Buddhists lived. These facts prove that Dantapura stood on the place which is now shown as the site of the fort of Dantavaktra.

Kūraka *rāshṭra* has, perhaps, given its name to the village of Kurchavalsa, about four miles north-west of Siddhāntam. *Rāshṭra* properly means 'a kingdom.' As parts of the Kalinga kingdom were termed *vishayas* in the Rāgolu Plates of Śaktivarman¹ (Kalinga itself was a *vishaya* and Varāhavartini was a *vishaya* of Kalinga), why is this district here called a *rāshṭra*? Perhaps, this was at first an independent kingdom, but was subsequently conquered and subdued by the kings of Kalinga.

Bhukkukura is Bukkur in the Pālakoṇḍa *Tāluk* and is opposite to Parle on the river. It was on the Bukkur bank of the river that the plates are said to have been discovered.

From the position of Kurchavalsa and Bukkur it may be seen that the Kūraka *rāshṭra* corresponds to the modern Pālakoṇḍa *Tāluk*.

Tiriliṅga is clearly Triliṅga.

TRANSLATION.

(Line 1.) Om! Hail! From (his) victorious residence (*vāsakāt*) at (the city of) Dantapura the son of the glorious Dānarṇava, the glorious Mahārāja Indravarman—who has had the stains of the Kali age washed away by obeisance to the lotus feet of the divine (God) Gōkarṇa-Svāmin, the lord of the movable and immovable (creation), the sole architect for the creation of the whole universe, who is established on the summit of the mountain Mahēndra—who is the ornament of the family of the Gāṅgas—who has obtained the supreme sovereignty over the whole of Kālīṅga by the quivering of the edge of his own sword; whose fame is stainless over the earth, which is girt about by the waves of the water of the four wide-spreading oceans; whose feet are tinted by the mass of the clusters of blossoms which are the lustre of the crest-jewels of all the chieftains who have been made to bow down by his prestige of the cries of triumph occasioned by victory in the contests of many battles; and who meditates on the feet of (his) parents—issues the (following) order to all the householders cultivating the division of Bhukkukura in the Kūraka-rāshṭra:—

(L. 10.) Know ye! This land, having been exempted from all taxes (and) having been established (as a village) to continue as long as the moon and the sun may last, has been given, for the increase of the religious merit of (our) parents and of ourselves, with an accompaniment of libations of water, on the full-moon-day in the month of Kārttika, to Bhavadattaśarman, of the Kauśika gōtra, a student of the R̥g-Vēda, a resident of Tirilīṅga and well-versed in Vēdas and Vēdāṅgas. Having known this, dwell ye in happiness, tendering (to him) the proper share of the profit therefrom.

(L. 14.) The marks of the boundaries in the *pradakṣiṇā* (right to left) order may here be noted thus:—On the east, beginning with an ant-hill, (there are) at (a distance which equals) the shadow of a man,¹ an *Arjuna* tree, then an ant-hill, then a *Karañja* tree together with an ant-hill. On the south, from the *Karañja* tree, at (a distance which equals) the shadow of a man, three boulders. On the west, beginning with the boulder, at (a distance which equals) the shadow of a man (there is) a boulder only, then an *Arjuna* tree, then a boulder. On the north, beginning with the boulder, at (a distance which equals) the shadow of a man (there is) a *Timira* tree,² then a boulder, then in the form of a door-joining (there is) a boulder and then a single boulder (and) then an ant-hill.

(L. 21.) And he (the king) admonishes future kings:—This meritorious gift should be preserved by those (kings) who rule the earth, having obtained it by right, inheritance, or conquest, one or other means. With reference to this (subject) there are verses sung by Vyāsa:—

[The three customary verses.]

(L. 28.) (By) the order of the Mahā-Mahattara Śivaśarman—this edict was written by Śāmbapura-Upādhyāya, son of the Hasty-adhyakṣa—the chief of the elephants—the *sarv-adhikṛita* Dharmachandra, on the 20th day in the month of Pushya of the year 100 40 9 of the augmenting victorious reign; and was engraved by Khaṇḍichandra, son of Āditya-Bhōgika.

¹ On *puruṣa-śloka* cf. *Ep. Ind.*, Vol. III, p. 134, n. 1.

² [*Timira* is the Sanskrit translation of the Telugu *śikāṣi*, which is the name of the tree *exanthocymus pictorius*.—H. K. S.]

No. 28.—TUPPAD-KURHATTI INSCRIPTION OF THE REIGN OF AKALAVARSHA
KRISHNA III: SAKA 868.

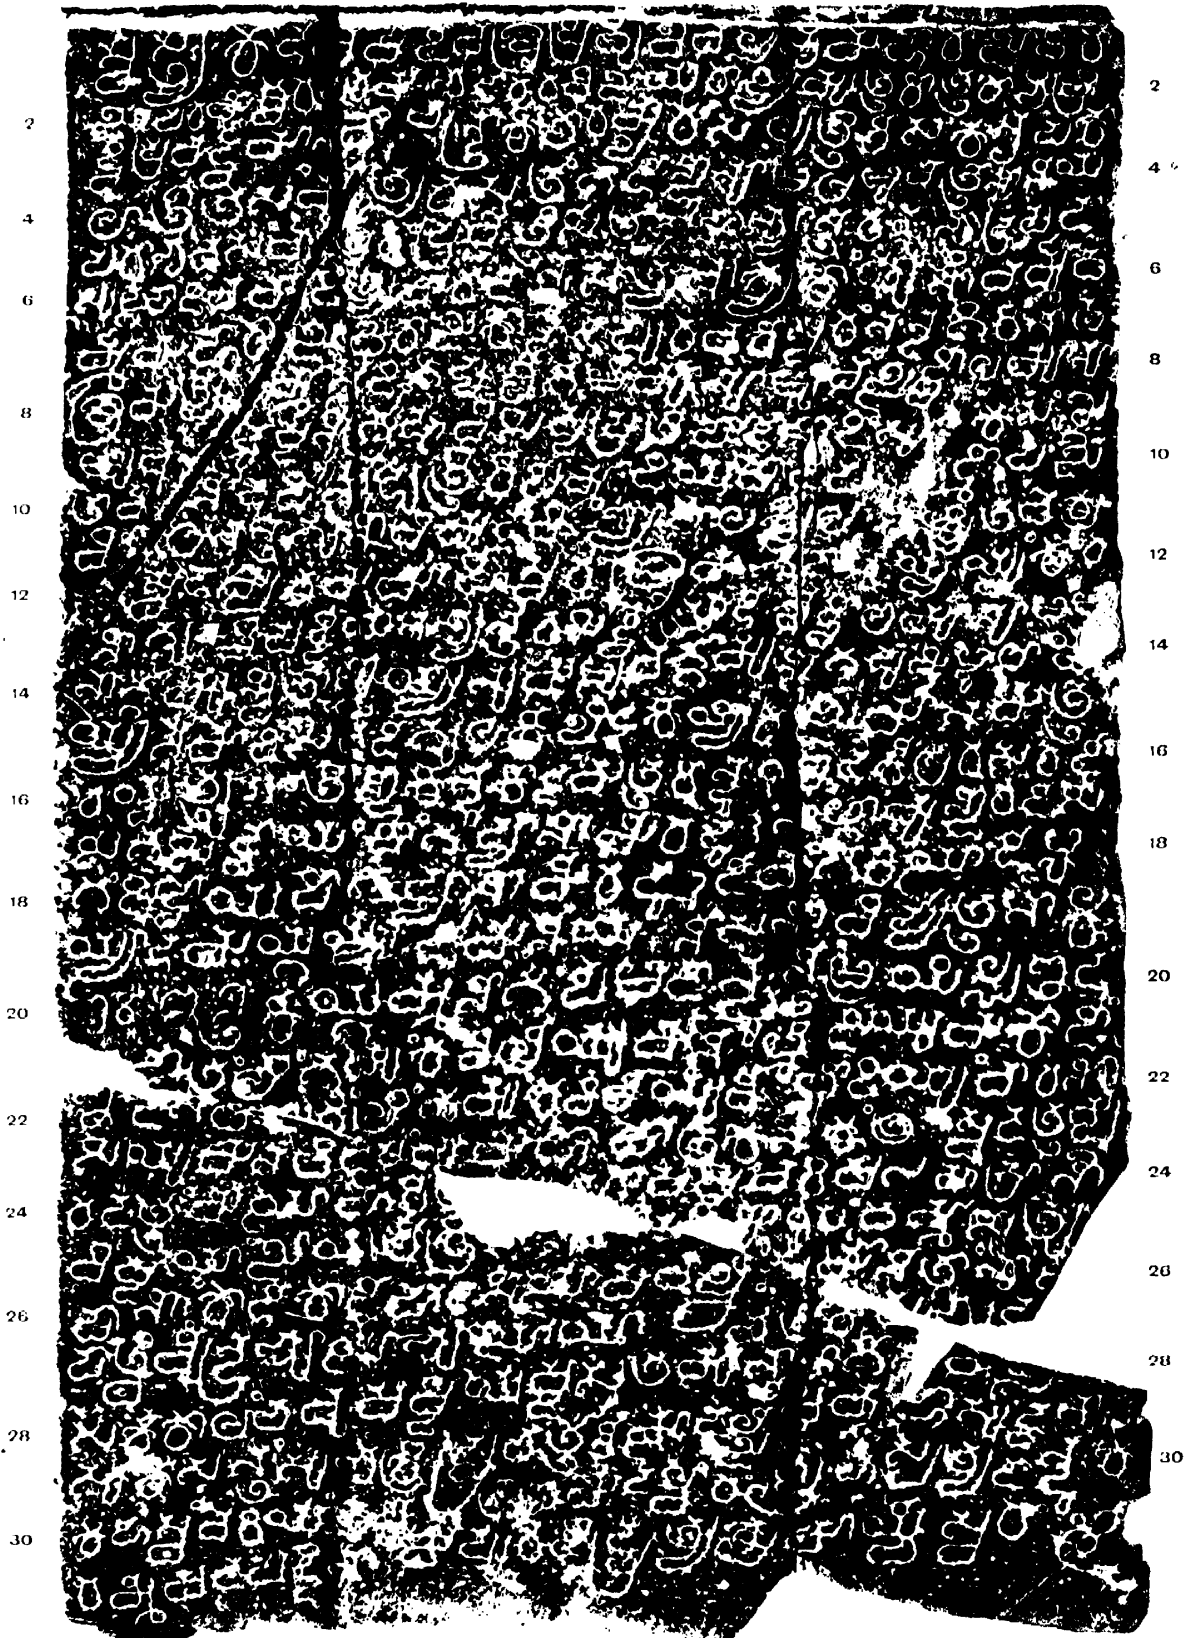

By LIONEL D. BARNETT.

Tuppad-Kurhatti is a village of Navalgund Taluk, Dhārwar District, and lies in lat. $15^{\circ}32\frac{1}{4}'$ and long. $75^{\circ}32\frac{1}{4}'$, about $9\frac{1}{2}$ miles nearly east of Navalgund town. Its name is spelt as "Tupadkurhatti" in the *Postal Directory of the Bombay Circle*, "Tupad Kurhatti" in the Bombay Survey sheet 332, and "Toopud Kooruttee" in the old Indian Atlas sheet 41. The name, correctly spelt, is *Tuppada Kurhatti*, "Kurhatti of the Butter," apparently on account of the excellence or abundance of the butter produced in the village. *Kurhatti*, in Old Kanarese *Kuripaṭṭi*, means "ram's fold," and we find a semi-sanskritised variant of this in *Mēshada-paṭṭi*¹ (l. 31). Apparently the full name in ancient times was **Karapa-Guripaṭṭi**, "Kuripaṭṭi of the Office" (ll. 12-13). The stone bearing the present record was found in front of the temple of Māruti in the village, broken into two or three pieces. Ink-impressions of it were made for the late Dr. Fleet, and are now in the British Museum; from them I have edited the text.—The stone is a rectangular block; the top is surmounted by three triangular finials, one in the middle and one at each corner. It contains on top two bands, each of which is divided by two columns into three compartments. The lower band has some sculptures, namely a *liṅga* on a stand in the central compartment, a squatting figure in the proper right compartment, who holds something like a broom or a chowrie in his left hand, and a cow with sucking calf in the left compartment. Below this is an inscribed area about 1 ft. $11\frac{1}{2}$ in. wide and 3 ft. $4\frac{1}{2}$ in. high.—The character is good Kanarese of the period. Most of the letters are between $\frac{1}{2}$ in. and 1 in. high, though some are a little taller. The vowel signs *ē* and *ō* are usually formed in the later manner; but occasionally they are written in the ancient fashion (e.g. *Belvola*^o, l. 8, *°yyoḷam*, l. 19). The archaic subscript *l* in *illa* (l. 20) is also noteworthy. The palatal *ñ* appears in *viñyāna* (l. 11), a mistake for *viñāna* which shews that *jñ* was pronounced by the writer in the same manner as by modern Tamils.—The language is Old Kanarese, except in the formal verses 1 and 2 (ll. 23-27). The *ḷ* is preserved (*ḷḷu*, l. 14; *nāḷ-gāmunḍara*, l. 17; *ēḷ*^o, ll. 21, 22; *aḷ*^o, ll. 22, 23), except in one case, where it is written as *r* (*nār-ggāmunḍam*, l. 14). Final *m* is sporadically changed to *v* before vowels in *°pādivav* (l. 6) and *nesaṇav* (l. 19). There is an archaic participle-form in *kādom* (l. 21, in a formula). Lexically noteworthy are *nesaṇa*, from the Sanskrit *nivēśana* (l. 19), the locative verb-noun *modal* (ll. 29, 30: Kittel gives only *mudu* and its parts), and *hastā*, apparently with the meaning of *paksha* (l. 30). We find a genitive used as a semi-nominative in *Āychayyana māḍisida dēgulakke* (l. 15: cf. my note in *Journ. Roy. As. Soc.*, 1918, p. 105).

The record opens by referring itself in ll. 1-3 to the reign of **Akalavarsha** (the **Rāshṭra-kūṭa Kṛishṇa III**), and then states that in the year Parābhava, Śaka 868, while his viceroy **Satyavākya Koṅṇuṇivarma Permāṇaḍi**, entitled "lord of **Kōḷālapura** best of cities" and "master of **Nanda-giri**," was governing Puligere and Belvola (ll. 3-10), and the latter's subordinate **Āychayya** was administering **Karapa-Guripaṭṭi** (ll. 10-13), certain local officials granted lands for the maintenance of a temple founded by **Āychayya** (ll. 13-20). Then come formulæ of the usual kind (ll. 20-27), followed by a verse recording that on a certain date some years previously the god **Āychēśvara** (i.e. the form of Śiva worshipped in the above-mentioned temple founded by **Āychayya**) revealed himself in the town (ll. 28-31); this may have been the event which led to the establishment of the temple, as was the case at **Kurgōḍ** (above, p. 278). The viceroy **Satyavākya-Koṅṇuṇivarma Permāṇaḍi** is evidently the same as the **Gaṅga Būṭuga**, the son-in-law of the **Rāshṭrakūṭa Amoghavarsha-Vaddiga**, and hence a brother-in-law of **Kṛishṇa III** (see *Dyn. Kanar. Distr.*, pp. 304, 419, 421, and the **Gāwarvāḍ** inser. above).

¹ See note on translation, below.

Tuppad Kurhatti Inscription of the reign of Akalavarsha Krishna III : Saka 868.

We have thus two **dates** in the inscription, the one for the grant to the temple and the other for the revelation of the god. The first is specified in ll. 3-6 as Śaka 868, Parābhava; Bhādrapada śu. 1; Sunday. This is irregular according to the Southern Cycle, in which Parābhava is equated with Śaka 868 *expired*; for by the *Sūrya-siddhānta* the *tithi* śu. 1 was current on Friday, July 31, A.D. 946, and Mr. Sewell, who has kindly examined the dates for this paper, points out that by the *Ārya-siddhānta* śu. 1 was expunged. It follows therefore that the date intended was Śaka 868 *current*, Parābhava, according to the Northern Cycle, by which the *tithi* śu. 1 was connected with **Monday, 11 August, A.D. 945**, and ended on that day 16 a. 5 m. after mean sunrise (for Ujjain); it was, therefore, current during the last 8 h. 26 m. of the preceding Sunday, which, hence, by a slight irregularity might be coupled with it (cf. Mr. Venkatasubbiah's *Some Śaka Dates in Inscriptions*, p. 69).

The second date is given on ll. 28-30 as Śaka 864 (current), Śubhakṛit; Jyāishṭha śu. 15 (apparently); Thursday. These data also imply the use of the Northern Cycle, according to which the *tithi* was connected with **Thursday, 13 May, A.D. 941**, and ended 15 h. 55 m. after mean sunrise for Ujjain. Mr. Sewell informs me that practically the same results are obtained by applying the *Ārya-siddhānta*: calculating for true motions of sun and moon, the difference is only 34 m., and calculating for mean motions, it is 1 h. 38 m.

The **geographical names** mentioned are Kōlālapura (l. 7), Nanda-giri (l. 7), the Three-hundreds of Puligere and Belvola (l. 8), Karaṇa-Guṛipattī (l. 13) with the sanskritised form Mēshada-pattī (l. 31), and Dēvaṃgēri (l. 18). Kōlālapura is Kolhāpur.¹ On Karaṇa-Guṛipattī see above. Dēvaṃgēri is perhaps the modern Deogēri, in the neighbourhood of Gadag town.

TRANSLATION.

(Lines 1-3) Hail ! while the victorious reign of king **Akālavarsha**, the darling of Fortune and Earth, great Emperor, supreme Lord, supreme Master, was advancing in a course of successively increasing prosperity, (*to endure*) as long as moon, sun, and stars :—

(Lines 3-10) while the cyclic year **Parābhava**, the eight-hundred and sixty-eighth of the centuries of years elapsed from the time of the Śaka king, was current, on Sunday, the first (*lunar day*) of the bright fortnight of Bhādrapada in that year, when **Satyavākya Koṅguṇi-varma** the great emperor of righteousness, lord of **Kōḷālapura** best of cities, master of **Nandagiri**, **Permāṇāḍi**, was governing the **Puligere** Three-hundred and the **Beḷvola** Three-hundred, so as to suppress the wicked and to protect the excellent, with enjoyment of pleasant conversations :—

(Lines 10-13) while he who finds sustenance at **Permāḍi's** lotus-feet, he whose breast is marked by (*the presence of*) the genius of endless virtue and stainless wisdom, a supreme worshipper of Mahēśvara, **Āychayya**, was administering **Karaṇa-Guripaṭṭi** with internal authority :—

(Lines 13-20) **Toṇḍayya**, the county-Gāmuṇḍa of the **Beḷvola** Three-hundred, and the Six Gāmuṇḍas in concert granted for the temple constructed by **Āychayya** a field, fifty *mattar* by the king's measure, (*and*) gave for a garden one *mattar*. On this, for the share of the kings the fixed revenue (*shall be*) two gold *gadyāṇas*, for the share of the county-Gāmuṇḍas the fixed revenue two gold *gadyāṇas*. (*They also gave*) twenty-four dwelling-houses of seven cubits and five cubits (*in width*) at **Dēvaṁgēri**. Thus on this field and houses there is not a single other impost.

(Lines 20-23 : a prose formula of the usual type.)

(Verses 1-2 : common Sanskrit formulæ.)

(Verse 3) When the Śaka date was eight-hundred and sixty-four, while the cyclic year **Subhakṛit** pleasant and peaceful was in progress, while **Jyaishṭha** (*and*) the fortnight named the great bright one were going on, during the course of the last lunar day (*of the fortnight*), on Thursday, **Āychēśvara** verily revealed himself in the town named **Mēshada-paṭṭi**.

¹ Read *varsha*—

² Read *bhavadbhīḥ*.

³ Read *Subhakṛit*.

⁴ I give the above emendations in the first half of the line with considerable diffidence. The use of *hastā* in the sense of *pakṣa* is new to me, though both words may be used in chronograms to denote a pair. *Vari* may also be the same as *bari*, i.e. *pakṣa*, and, if so, the emendation *astagaṇa* will be wrong. But in spite of these difficulties the above emendations seem to meet the requirements of the case better than any others.

⁵ It is possible that *Karam-Mēshada-paṭṭi* should be read as a compound, corresponding to *Karaṇa-Guripaṭṭi* of ll. 12-13 (*kara*, "tax," corresponding to *karaṇa*, "office," "treasury").

No. 29.—A NOTE ON KING CHANDRA OF THE MEHARAULI INSCRIPTION.

By R. D. BANERJI, M.A.

A tall slender pillar of iron, almost entirely pure, stands in the courtyard of Masjid Quwwat-ul-Islām within a few feet from the Qutb Minār. Among the various inscriptions incised on it, the largest is a record of six lines, in characters of the fourth century A.D. The final edition of this inscription is to be found in Dr. Fleet's Gupta Inscriptions.¹ According to this record a king named Chandra had defeated a combination of his enemies in Eastern Bengal (*Vaṅga*), had crossed the seven mouths of the Indus during his wars, defeated the *Vāhlikas*, and set up a standard of Vishṇu on a hill called Vishṇupada. Scholars have offered numerous suggestions concerning the identity of this prince. Dr. Fleet was of opinion that this king Chandra was probably Chandragupta I of the early Gupta dynasty.² Dr. V. A. Smith thought that this king Chandra was the same as king Chandragupta II of the early Gupta dynasty and in the first two editions of his Early History of India assigned the inscription on the iron pillar at Mēharauli to the son of Samudragupta. Mahāmahopādhyāya Hara-Prasād Śāstri is of opinion that this king Chandra is Chandravarman, son of Simhavarman of Pushkaraṇā, whose inscription has been found at Susunī in the Bankura District of Bengal.³ Recently Mr. R. G. Basak has thought fit to revert to the theory of the late Dr. J. F. Fleet concerning the identity of the prince mentioned in the Mēharauli pillar inscription and identifies him with Chandragupta I, the father of Samudragupta.⁴

Mr. Basak's paper opens with a statement the accuracy of which is doubtful and which, so far as is known, cannot be supported by Epigraphical evidence. Mr. Basak says: "In the early part of the fourth century A.D. there was a great defeat of the people of Bengal (*Vaṅga*) by a king named Chandra"; but the record on the iron pillar at Mēharauli merely states that the king defeated "a combination of his enemies in the Vangu countries."⁵ The plural is used instead of the singular, which is significant. The combination may have been of people who had no relation with the people of Bengal, but who had either established small principalities in Eastern Bengal or had been driven to take shelter in that region. There is no mention of the "people of Bengal" in this record, and we are not in a position to determine whether the "people of Bengal" were able to take part in these struggles at that period or not.

The principal argument on which Mr. Basak bases his identification of king Chandra of the Mēharauli pillar with king Chandragupta I of the Gupta dynasty is the statement on the iron pillar inscription that king Chandra "attained sole supreme sovereignty in the world, acquired by his own arm and (enjoyed) for a long time." According to Mr. Basak this statement "applies more to an early Gupta ruler of the fourth century than to any local king of any of the small states then ruling independently in Northern India."⁶ Mr. Basak assigns no reasons for his statement, and consequently it is difficult to trace the trend of his thought. Evidently the glamour of the early Gupta empire and its glory in later days enticed him to put forward this bold statement. Mr. Basak goes on to state: "So it is very likely that Samudragupta's father Chandragupta I, whom we know to have been the first *Mahārājādhirāja* of the Gupta line, began to establish the empire by going out for making conquests in Bengal, in part of the Punjab and also in the South and perhaps succeeded in incorporating portions at least of these provinces into his own kingdom, which after his death passed into Samudragupta's hands."⁷ It is true that Chandragupta I, the son of Ghaṭōtkachagupta, was the first *Mahārājādhirāja* of the Gupta dynasty; but there is absolutely no evidence which can lead us to believe that he was

¹ *Corpus Inscriptionum Indicarum*, Vol. III, p. 141.² *Epi. Ind.*, Vol. XIII, p. 133.³ Fleet's *Corpus Inscriptionum Indicarum*, Vol. III, p. 141.⁴ *Ibid.*⁵ *Ibid.*, p. 140, note 1.⁶ *Ind. Ant.*, Vol. XLVIII, 1919, p. 98.⁷ *Ind. Ant.*, Vol. XLVIII, p. 101.

capable of leading an army into the Punjab or the south or that he ruled for a long time. He may or may not have been in possession of Bengal. The coins bearing his name and effigy and that of his consort Kumaradēvi the Lichchhavi, which an earlier generation of Numismatists assigned to this prince, are now taken as medals issued by the Emperor Samudragupta in memory of his parents.¹

The Mēharauli inscription of Chandra states that he enjoyed suzerainty for a long time. But it is impossible to admit that Chandragupta I reigned for a long time. There is a consensus of opinion among orientalists on this point, and, as far as is known, Mr. Basak is the only advocate of this opinion. If we dismiss the doubtful evidence of the Bodhi Gayā inscription of Trikamala or Turāmala of the year 64² and the Gayā plate of the time of Samudragupta of the year 9 (?), the oldest known inscription of the Gupta dynasty which is dated is the Udayagiri inscription of Chandragupta II of the year 82=400 A.D.³ Now the initial year of the Gupta era is generally admitted to be the time of the accession, or rather the coronation, of Chandragupta I sometime in 318-19 A.D. Udayagiri, where this inscription is to be found, is in Eastern Mālava, a province which was conquered or subjugated by Chandragupta II. This is proved by the existence of a new class of silver coins of Chandragupta II based on the Mālava and Saurāshṭra fabric of silver coins which were introduced by Chandragupta II in imitation of the silver *drachmæ* of the Western Satraps.⁴ The conqueror of a new province or country generally conciliates the subjects of his newly conquered province by issuing coins of the same type which was in vogue immediately before the conquest rather than offend them by issuing a type unknown previously. This was done by Maḥmūd bin Sabuktigin,⁵ Muḥammad bin Sām⁶ and his immediate successors in the Punjab and Delhi,⁷ and by Akbar in Gujarat.⁸ The conquest of a province and its settlement generally takes some time; and, if we assign fifteen or twenty years for it, we have sixty or sixty-five years left for the reigns of Samudragupta and Chandragupta. It is hardly possible even to think of a short reign for Samudragupta when we consider the amount of work he did to conquer and consolidate the Empire. By common consent forty-five or fifty years have been assigned to Samudragupta, and the majority of Indologists agree with the late Dr. V. A. Smith in assigning a very short reign of ten or fifteen years to Chandragupta I and a long reign of at least fifty years⁹ to his son and successor Samudragupta. So it is impossible to maintain that Chandragupta I enjoyed a long reign, and consequently it is not possible to identify him with king Chandra of the Mēharauli pillar inscription, who enjoyed the suzerainty, acquired with his own arms, for a long time.

In the second place is it possible to maintain that Chandragupta I led an expedition into the Punjab and Afghanistan and the Dekkhan? The negative evidence of the Allahabad pillar inscription is decisive on this point. If Samudragupta's father had done any campaigning in the North-West or the South, then it is perfectly certain that an able panegyrist of the type of *Sāndhivigrahika-Kumārāmātya-Mahādandanāyaka* Harishēṇa would have mentioned it and availed himself of such occurrences to extol the might of his master Samudragupta still further. The silence of the Allahabad *prasaśti* on this point enables us to state with a tolerable degree of confidence that Chandragupta did not campaign in the land of the five rivers or Afghanistan or lead an army into the Dekkhan. It is a pity that the first three lines of the Allahabad *prasaśti* can neither be completely read nor partially restored. It would have cleared up all doubts

about the beginning of the Gupta dynasty. The opening line of this record mentions Samudragupta's kinsmen, who seem to have had done something about the beginning of his reign.¹ Then, the list of kings and countries conquered by Samudragupta gives us a good idea of the states surrounding the parent state of the Gupta Empire, i.e. Magadha, and the rigid silence of Harishēṇa about the achievements of Chandragupta I in these regions proves that that monarch secured his own independence and did little else. The first mention of Chandragupta I is to be found in the Mathurā fragmentary inscription of the time (?) of his grandson Chandragupta II.² Neither the Allahabad³ nor the Ēraṇ⁴ inscription mentions him, a fact which leads us to believe that the kingdom of Magadha was acknowledged as the paramount power in India only during the time of Samudragupta and the title of **Mahārājādhirāja** was probably bestowed on Chandragupta I by his descendants. Chandragupta I may have been the real founder of the kingdom of Magadha and freed it from the yoke of the Scythian foreigner. Beyond this nothing can be said about Chandragupta I.

Mr. Basak questions: "Where is the evidence that Bengal had ever been in the possession of Chandravarman?"⁵ But he does not pause to think what evidence there is of the possession of Bengal by Chandragupta I. Copper-plate grants of the time of Kumāragupta and Budhagupta have been discovered in Northern Bengal. These are the Dhanaidaha⁶ and Damodarpur⁷ grants of Kumāragupta I and the Damodarpur grant of Budhagupta. But it does not seem to have struck Prof. Basak that these copper-plates cannot prove that Chandragupta I had any hold over any part of Bengal.

Another argument adduced by Mr. Basak in favour of his theory about the inclusion of Bengal in the kingdom of Chandragupta is the discovery of the coins of the Emperors of the early Gupta dynasty in Eastern and Western Bengal. Only one or two coins of Chandragupta I have been found in Bengal, and these coins too are not regarded by Allan, the latest authority on the subject, as being genuine issues of Chandragupta I, but as medals struck in memory of his parents by his son Samudragupta. Coins of Chandragupta II, Kumāragupta I and Skandagupta have been found in large numbers and indicate that probably Eastern and Western Bengal were included in the Empire of the Guptas in the fifth century A.D.

To sum up; it is not possible to admit that Chandragupta I of the early Gupta dynasty had a long reign; therefore he cannot possibly be the same person as king Chandra of the Meharauli inscription. Then, the existing evidence in both the Epigraphic and the Numismatic fields is insufficient to prove that Bengal was included in the kingdom of Chandragupta I, the first monarch of the Gupta dynasty, or that he campaigned in the Indus Delta. Finally Paurāṇic evidence, as quoted by Mr. Pargiter, proves very distinctly that Bengal was not included within the dominions of Chandragupta I. Mr. Pargiter says: "The Guptas are mentioned as reigning over the country comprised within Prayāga, Sākēta and Magadha." Mr. Pargiter concludes very correctly that this was "exactly the territory which was possessed at his death by Chandragupta I, who founded the Gupta dynasty in A.D. 319-20 and reigned till 326 or 330 (or even till 335 perhaps), before it was extended by the conquests of his son and successor Samudragupta."⁸ It is, therefore, almost certain that Bengal was never included within the dominions of Chandragupta I. In order to reconcile this directly hostile piece of evidence to his own theory Mr. Basak states: "Or it may be supposed that the Magadha of the Purāṇas probably included portion of Bengal conquered,"⁹ a statement which need not be taken seriously.

It is, therefore, certain that it is hardly possible to identify Chandragupta I of the early Gupta dynasty with king Chandra of the Mēharauli pillar inscription. We may now revert to Mr. Basak's question as to whether we possess any evidence which indicates that Bengal was at any time in the possession of Chandravarman. The answer is in the affirmative. We have evidence of the possession of a part, at least, of Bengal by Chandravarman in the Susuniā rock inscription of Chandravarman, son of Simhavarman, king of Pushkarapā.¹ Mr. Basak has taken this inscription to be a pilgrim's record without assigning sufficient reasons. So far as is known, there is no evidence to prove that Susuniā hill was at any time a place for pilgrimage of sufficient importance to draw devotees from the Western end of India. No remains have been found on the hill which might indicate that there was any famous shrine on this hill or near the inscription. It is very difficult to understand why Mr. Basak takes this inscription to be the record of a pilgrimage of king Chandravarman of Pushkarapā simply because he carved the discus of Vishṇu on a hill of Western Bengal. The inscription proves that a king named Chandravarman from Pushkarapā (modern Pokhara in the Jodhpur State) had come as far as Western Bengal proper and left his mark there in the form of a short record with one of the emblems of his principal deity incised on the hill, the only prominent landmark in the country, which is perhaps the only hill in Bengal proper. Let us connect the fact gleaned from this very short record with those obtained from the Mēharauli inscription of Chandra. The latter speaks of a king named Chandra, who had defeated a combination of his enemies in the *Vaṅga countries*. The full name of king Chandra may be either Chandranātha, Chandravarman or Chandragupta. In the Susuniā inscription we have a confirmation of one of the statements of the Mēharauli inscription that a king named Chandravarman had left the mark of his visit in Bengal. Then, both inscriptions are Vaishṇava; king Chandra had raised a staff of Vishṇu on the Vishṇupada hill, while Chandravarman had incised the wheel of Vishṇu on the Susuniā hill. Whereas it is impossible to identify this Chandra with Chandragupta I of the early Gupta dynasty, the only alternative left open is to identify this Chandra of the Mēharauli pillar inscription with Chandravarman, son of Simhavarman, of the Susuniā rock inscription. The statement of the Mēharauli pillar inscription fits in very well with the case of Chandravarman, as he must have had a long reign.

The mention of Chandravarman among the chieftains of Āryāvarta, who were uprooted by Samudragupta, shows that that dynasty had come to an end in the North. Subsequent inscriptions prove that two more generations continued to rule independently in Western Mālava and the dynasty was finally subjugated during the reign of Kumāragupta I. In this connection certain inaccuracies which Mr. Basak has used to refute the statements of Mahāmahōpādhyāya Hara-Prasād Śāstri should be considered :—

The first of these is Mr. Basak's idea of the extent of the dominion of the early Guptas in Mālava. He says: "We know from Epigraphic records that in A.D. 404 Chandragupta II was on the Imperial Gupta throne. Hence we may safely suppose that Mahārāja Naravarman was Chandragupta II's feudatory in the Western regions."² The Mandasor inscription of Naravarman contains no reference to the suzerainty of the Gupta dynasty, and it is hardly correct to suppose that he had submitted to the Guptas. The only possible conclusion is that Naravarman had somehow or other evaded the yoke of the Guptas down to the year 461 V.E.=404 A.D. The Gangdhar inscription of his son Viśvavarman³ clearly proves that Naravarman maintained his independence throughout and did not submit to the Guptas.

In the second of these extraordinary statements Mr. Basak asks us to believe that both Viśvavarman and his son Bandhuvarman were feudatories of Kumāragupta I. He says: "We

¹ *Epi. Ind.*, Vol. XIII, p. 133.

² *Ind. Ant.*, Vol. XLVIII, p. 98.

³ *Fleet's Corpus Inscriptionum Indicarum*, Vol. III, pp. 74-76.

gather from other records that his (Naravarman's) son Viśvavarman and his son Bandhuvarman were feudatories of Kumāragupta I"; and in a footnote he refers us to inscriptions Nos. 17 and 18 of Fleet's Gupta inscriptions. These are the Gangdhar inscription of Viśvavarman, son of Naravarman, of the year 480 V.E., and the Mandasor inscription of the year 493 V.E. of Bandhuvarman, the son of Viśvavarman. A careful scrutiny of the long record found at Gangdhar reveals nothing about a suzerainty of the Gupta Emperors over Viśvavarman, and the inevitable conclusion is that at the time of this record (480 V.E.=423-4 A.D.) Viśvavarman did not acknowledge the Gupta Emperors of the North as his suzerains. Turning to the Mandasor inscription of the time of Bandhuvarman and his suzerain Kumāragupta I, we find that Bandhuvarman was the ruler or governor of Daśapura when Kumāragupta was ruling and that Viśvavarman is mentioned as a king who was the father of Bandhuvarman. The past tense of the verb *to be* (*babhūva*) clearly indicates that Viśvavarman had ceased to exist. The verses about Viśvavarman were introduced as a parenthesis to show the descent of Bandhuvarman. The real connection is between *Kumāraguptā prithivīm praśāsati* (l. 13) and *Bandhuvarmani Daśapuram-idam pālayati* (l. 16). Consequently it must be admitted that the Mandasor inscription of Bandhuvarman does not contain any reference or proof as to a suzerainty of the Early Gupta Emperors over Viśvavarman, king of Western Mālava, though the record clearly indicates that Viśvavarman's son Bandhuvarman was a feudatory of the Early Gupta Emperor Kumāragupta I. Therefore we cannot accept Mr. Basak's statement that Naravarman's son Viśvavarman was a feudatory of Kumāragupta I. Mr. Basak's idea apparently is that the dynasty of Jayavarman ruled the whole of Mālava from Daśapura; but the findspots of inscriptions of Naravarman and his son prove that they were rulers of a portion only of Western Mālava. Naravarman's inscription was found at Mandasor, while that of his son Viśvavarman was found at Gangdhar or Gangrar, Lat. 23° 56' N., Long. 75° 41' E., in the Gwalior State (sheet No. 35, Atlas of India, Survey of India Map printed in 1899). The tract of country in which these two inscriptions were found lies along the southern border of Mewar and runs along a range of hills. This country appears to have sheltered the descendants of Siṃhavarman after the defeat of Chandravarman. The Udayagiri inscription of the year 82¹ and the Sāñchi inscription of the year 93,² both of the reign of Chandragupta II, prove that Naravarman and Viśvavarman had no hold on this part of Mālava.

We have, therefore, no reason to put any faith in the following statement:—"Samudragupta probably destroyed the independence only of the nine kings of Northern India among whom Chandravarman was one, and allowed them after their utter defeat to rule in their respective States as Gupta feudatories."³ It is clear from the statement of Harishēya's *Prasasti* that the nine kings of Āryāvarta were uprooted, i.e. their kingdom assimilated into the Empire (l. 21), while the kings of the south were captured and liberated, i.e. they were reinstated. The inscriptions of Chandravarman's brother Naravarman and his son Viśvavarman indicate very clearly that after his defeat by Samudragupta either Chandravarman himself or his brother Naravarman migrated into Mālava. There, in the hilly country in the North-West corner, adjacent to modern Mewar, they managed to maintain their independence till 423-4 A.D., and were subjugated by the Early Gupta Emperors at some date between 424 and 437 A.D. There is no doubt about the fact that Bandhuvarman, son of Viśvavarman and grandson of Naravarman, had in 437-38 A.D. lost his independence.
